

# M7U.DE - Nynomic AG | Full Deep Dive

**September 21, 2026 | Framework 6.0.2 | NOT HELD | STRUCTURAL - optical process measurement; TEMPORAL - industrial recovery | Watchlist**

**Analytical Base: 40/60 (67%). Valuation: 20x forward four-quarter IFRS-style operating profit (EBIT).**

Snapshot: EUR 23.00 per share on September 18, 2026 Xetra close; 6.569 million shares, implying EUR 151.08 million equity value. Source [M7U-6]. Price is a dated header snapshot, not a valuation input in the body.

**Active horizon Q3 2027 ceiling: EUR 39.27/share. Q1 2028: EUR 45.36/share.**

All financial model amounts are EUR millions, shares in millions, unless stated. Calendar-year reporting; native financial statements use thousands of euros, converted here to EUR millions. M7U / DE000A0MSN11 identifies Nynomic, not Manz.

## 1. Thesis, bottleneck and expanded TAM

Nynomic supplies optical measurement components, systems and solutions for industrial processes, life science and agriculture. The relevant Framework 6.0 themes are higher manufacturing precision, resource efficiency and semiconductor complexity. It measures processes and materials; it is not a communications transceiver vendor.

The three reporting segments are Clean Tech, Life Science and Green Tech. Semiconductor process sensing and transformer gas analysis offer two routes into AI-related spending: more complex chip manufacturing and more reliable electrical infrastructure. Those exposures sit inside Clean Tech. [M7U-1, M7U-2]

The immediate thesis is operating recovery after restructuring. A leaner cost base can convert incremental orders into profit, but a small diversified instrument group should not be valued as if every product is a sole-source semiconductor bottleneck. The model follows the disclosed 10% medium-term growth ambition and phases in margin recovery.

The German half-year report describes a fragmented photonics market with global suppliers and regional or application-specific specialists. Nynomic competes through integration, application knowledge and customer customization. This can improve switching costs but also requires ongoing engineering and exposes it to OEM project timing. There is no verified consolidated market-share statistic or named exclusive hyperscaler contract. [M7U-1]

### TAM expansion and S-curve

| Phase                                        | Economic exposure                                         | Model treatment                                                               |
|----------------------------------------------|-----------------------------------------------------------|-------------------------------------------------------------------------------|
| Phase 1 - current, 100% relevance            | Deployed industrial, medical and agricultural measurement | Reported segment base and conversion of existing orders                       |
| Phase 2 - 2027-2028, 50% conceptual weight   | Semiconductor metrology and transformer gas monitoring    | Clean Tech gains share of consolidated growth                                 |
| Phase 3 - 2029 onward, 20% conceptual weight | More integrated sensing, automation and new applications  | Organic 10% group trajectory; no acquisition premium or double-counted AI TAM |

The August management presentation targets average organic revenue growth around 10%; acquisitions are excluded from that ambition. Semiconductor, gas and process measurement are distinct applications. The group cannot capture the whole wafer-fab-equipment market because it supplies measurement content within equipment and processes. A customer-capex allocation is not defensible without disclosed customer revenue and content shares; the model instead uses the guided revenue base and management growth trajectory, with LOW confidence beyond the first forecast year. [M7U-2]

## 2. Latest evidence and financial anchor

H1 sales were EUR47.749M and EBIT EUR1.804M. Segment sales were Clean Tech 31.165, Life Science 6.230 and Green Tech 10.354. Orders on hand reached EUR63.5M. FY2026 guidance remains sales EUR100-105M and EBIT margin 6-8%. [M7U-1]

The May Q1 management update reported approximately EUR22.3M sales, EUR0.1M EBIT and EUR55.6M backlog. The August update and investor presentation show further recovery, with reduced fixed costs and more semiconductor/energy-related demand. Two recent management reporting cycles were reviewed; complete public transcripts for two earnings calls were not located, so no unseen Q&A is represented as reviewed. [M7U-2, M7U-3, M7U-4]

On September 1, subsidiary m-u-t announced a high-single-digit-million-euro gas-measurement order from a longstanding energy-sector customer. The disclosed range is not an exact EUR8M order, and the release does not establish a quarterly delivery schedule. The model includes an EUR8M illustrative allocation within Clean Tech, not on top of the group outlook. [M7U-5]

| Period  | Status                       | Revenue | Gross profit | Operating profit | Source |
|---------|------------------------------|---------|--------------|------------------|--------|
| Q1 2026 | Company preliminary, rounded | 22.30   | Not reported | 0.10             | M7U-3  |
| H1 2026 | IFRS interim; cumulative     | 47.75   | Not reported | 1.80             | M7U-1  |

The income statement reports costs by nature, not functional gross profit. H1 bridge: sales 47.749 + inventory change 1.450 - materials 16.931 - personnel 20.175 - other operating costs 7.684 + other operating income 0.425 - depreciation/amortization 3.031 = EBIT 1.803 (1.804 reported; rounding). Material contribution is not labeled gross profit. Forecast GP, R&D and SG&A are synthetic functional allocations calibrated to EBIT, with depreciation retained. H1 R&D was approximately EUR5.3M. [M7U-1]

FY2026 is calibrated to EUR102.5M revenue and 7% EBIT, the guide midpoints. Actual H1 leaves EUR54.751M H2 sales and EUR5.371M H2 EBIT. Q3 is modeled at EUR25M revenue/EUR1.875M EBIT; Q4 is the EUR29.751M/EUR3.496M residual. Higher Q4 shipments and fixed-cost absorption are required, not already earned. Quarterly segment allocations are estimates; only the half-year segment totals are reported.

## Balance sheet and capital allocation

June cash of EUR12.284M and bank debt EUR2.855M imply EUR9.429M net bank cash; IFRS16 lease liabilities add EUR14.738M. H1 operating cash flow was EUR2.248M versus EUR2.137M fixed-asset investment. [M7U-1] The equity base is substantial, but leases, inventory and acquisition-related goodwill still matter. Consolidated EBIT includes minority interests; the framework convention does not separately capitalize a cash balance or acquisition option.

## 3. Base score and evidence ledger

| Category      | Score       | Evidence                                                                  |
|---------------|-------------|---------------------------------------------------------------------------|
| Core Thesis   | 14          | Qualified niche metrology with application expertise; broad competition   |
| Cycle Stage   | 8           | Orders recovering after industrial downturn and restructuring             |
| TAM Expansion | 8           | Semiconductor sensing and energy monitoring increase applications         |
| Catalysts     | 4           | Backlog conversion and gas-measurement order execution                    |
| Macro         | 7           | AI-related capex and resource efficiency versus industrial cyclicity      |
| Alpha         | 3           | Small measurement-content supplier with limited broad-market attention    |
| Risks         | -4          | Delivery/cycle, margin execution, customer visibility, capital allocation |
| Total         | 40/60 = 67% | Watchlist                                                                 |

## 4. Quarterly operating model

Reported segments are the revenue vectors. Their model GP allocations include production labor and depreciation, unlike the reported material-cost subtotal. R&D starts close to its disclosed 11% H1 revenue intensity; SG&A and remaining overhead are calibrated to consolidated EBIT. No restructuring savings are added a second time after lowering the modeled expense base.

| Revenue vector | Driver and source                                                 | Confidence                                                        |
|----------------|-------------------------------------------------------------------|-------------------------------------------------------------------|
| Clean Tech     | M7U-1 segment base; M7U-2 growth direction; M7U-5 order           | MEDIUM guided group calibration; LOW segment/out-year allocations |
| Life Science   | M7U-1 base; 8% analyst growth within group 10% trajectory         | MEDIUM guided group calibration; LOW segment/out-year allocations |
| Green Tech     | M7U-1 base; residual modest growth under company group trajectory | MEDIUM guided group calibration; LOW segment/out-year allocations |

Company growth ambition is the controlling revenue envelope. Clean Tech grows 12% in 2027 and 11.5% thereafter; Life Science 8%; Green Tech is the remaining sales needed to reach 10% consolidated annual growth. This gives more weight to the disclosed semiconductor/gas drivers without inventing end-customer purchase commitments. For the September order, assume EUR8M total delivery, EUR1M in H2 2026 and EUR7M in 2027, all embedded in Clean Tech. Varying the order midpoint between EUR7M and EUR9M changes this allocation, not the entire group target automatically. The quarter weights assume Q4 shipment concentration. No unit/ASP disclosure supports a precise sensor count, so shipment value is the Plan B proxy.

### Physical and commercial drivers

| Year | Clean Tech | Life Science | Green Tech | Group / 10% growth |
|------|------------|--------------|------------|--------------------|
| 2027 | 78.400     | 14.580       | 19.770     | 112.750            |
| 2028 | 87.416     | 15.746       | 20.863     | 124.025            |
| 2029 | 97.469     | 17.006       | 21.953     | 136.428            |
| 2030 | 108.678    | 18.367       | 23.026     | 150.070            |

### Vector revenue, gross margin and gross profit

For each row: vector gross profit = vector revenue x its own gross margin. The following tables expose the inputs; they are analyst model assumptions unless explicitly identified as reported or guided.

## Clean Tech

| Quarter | Revenue | Gross margin | Gross profit |
|---------|---------|--------------|--------------|
| Q3 2026 | 17.73   | 46.00%       | 8.16         |
| Q4 2026 | 21.10   | 48.00%       | 10.13        |
| Q1 2027 | 17.25   | 49.00%       | 8.45         |
| Q2 2027 | 18.82   | 49.00%       | 9.22         |
| Q3 2027 | 19.21   | 49.00%       | 9.41         |
| Q4 2027 | 23.13   | 49.00%       | 11.33        |
| Q1 2028 | 19.23   | 51.00%       | 9.81         |
| Q2 2028 | 20.98   | 51.00%       | 10.70        |
| Q3 2028 | 21.42   | 51.00%       | 10.92        |
| Q4 2028 | 25.79   | 51.00%       | 13.15        |
| Q1 2029 | 21.44   | 53.00%       | 11.36        |
| Q2 2029 | 23.39   | 53.00%       | 12.40        |
| Q3 2029 | 23.88   | 53.00%       | 12.66        |
| Q4 2029 | 28.75   | 53.00%       | 15.24        |
| Q1 2030 | 23.91   | 54.00%       | 12.91        |
| Q2 2030 | 26.08   | 54.00%       | 14.08        |
| Q3 2030 | 26.63   | 54.00%       | 14.38        |
| Q4 2030 | 32.06   | 54.00%       | 17.31        |

## Life Science

| Quarter | Revenue | Gross margin | Gross profit |      |
|---------|---------|--------------|--------------|------|
| Q3 2026 |         | 3.32         | 48.00%       | 1.59 |
| Q4 2026 |         | 3.95         | 49.00%       | 1.94 |
| Q1 2027 |         | 3.21         | 50.00%       | 1.60 |
| Q2 2027 |         | 3.50         | 50.00%       | 1.75 |
| Q3 2027 |         | 3.57         | 50.00%       | 1.79 |
| Q4 2027 |         | 4.30         | 50.00%       | 2.15 |
| Q1 2028 |         | 3.46         | 50.50%       | 1.75 |
| Q2 2028 |         | 3.78         | 50.50%       | 1.91 |
| Q3 2028 |         | 3.86         | 50.50%       | 1.95 |
| Q4 2028 |         | 4.65         | 50.50%       | 2.35 |
| Q1 2029 |         | 3.74         | 51.00%       | 1.91 |
| Q2 2029 |         | 4.08         | 51.00%       | 2.08 |
| Q3 2029 |         | 4.17         | 51.00%       | 2.12 |
| Q4 2029 |         | 5.02         | 51.00%       | 2.56 |
| Q1 2030 |         | 4.04         | 51.50%       | 2.08 |
| Q2 2030 |         | 4.41         | 51.50%       | 2.27 |
| Q3 2030 |         | 4.50         | 51.50%       | 2.32 |
| Q4 2030 |         | 5.42         | 51.50%       | 2.79 |

## Green Tech

| Quarter | Revenue | Gross margin | Gross profit |      |
|---------|---------|--------------|--------------|------|
| Q3 2026 |         | 3.95         | 43.00%       | 1.70 |
| Q4 2026 |         | 4.70         | 44.00%       | 2.07 |
| Q1 2027 |         | 4.35         | 45.00%       | 1.96 |
| Q2 2027 |         | 4.74         | 45.00%       | 2.14 |
| Q3 2027 |         | 4.84         | 45.00%       | 2.18 |
| Q4 2027 |         | 5.83         | 45.00%       | 2.62 |
| Q1 2028 |         | 4.59         | 45.50%       | 2.09 |
| Q2 2028 |         | 5.01         | 45.50%       | 2.28 |
| Q3 2028 |         | 5.11         | 45.50%       | 2.33 |
| Q4 2028 |         | 6.15         | 45.50%       | 2.80 |
| Q1 2029 |         | 4.83         | 46.00%       | 2.22 |
| Q2 2029 |         | 5.27         | 46.00%       | 2.42 |
| Q3 2029 |         | 5.38         | 46.00%       | 2.47 |
| Q4 2029 |         | 6.48         | 46.00%       | 2.98 |
| Q1 2030 |         | 5.07         | 46.50%       | 2.36 |
| Q2 2030 |         | 5.53         | 46.50%       | 2.57 |
| Q3 2030 |         | 5.64         | 46.50%       | 2.62 |
| Q4 2030 |         | 6.79         | 46.50%       | 3.16 |

## Combined quarterly earnings

| Quarter | Status | Revenue | Gross profit | R&D  | SG&A  | Other opex | OP   | OP margin |
|---------|--------|---------|--------------|------|-------|------------|------|-----------|
| Q3 2026 | Model  | 25.00   | 11.45        | 2.75 | 6.82  | 0.00       | 1.88 | 7.50%     |
| Q4 2026 | Model  | 29.75   | 14.13        | 3.27 | 7.36  | 0.00       | 3.50 | 11.75%    |
| Q1 2027 | Model  | 24.81   | 12.01        | 2.73 | 6.82  | 0.00       | 2.46 | 9.93%     |
| Q2 2027 | Model  | 27.06   | 13.10        | 2.98 | 7.44  | 0.00       | 2.69 | 9.93%     |
| Q3 2027 | Model  | 27.62   | 13.38        | 3.04 | 7.60  | 0.00       | 2.74 | 9.93%     |
| Q4 2027 | Model  | 33.26   | 16.11        | 3.66 | 9.15  | 0.00       | 3.30 | 9.93%     |
| Q1 2028 | Model  | 27.29   | 13.65        | 3.00 | 7.37  | 0.00       | 3.28 | 12.01%    |
| Q2 2028 | Model  | 29.77   | 14.89        | 3.27 | 8.04  | 0.00       | 3.58 | 12.01%    |
| Q3 2028 | Model  | 30.39   | 15.20        | 3.34 | 8.20  | 0.00       | 3.65 | 12.01%    |
| Q4 2028 | Model  | 36.59   | 18.30        | 4.02 | 9.88  | 0.00       | 4.39 | 12.01%    |
| Q1 2029 | Model  | 30.01   | 15.49        | 3.30 | 7.95  | 0.00       | 4.24 | 14.12%    |
| Q2 2029 | Model  | 32.74   | 16.90        | 3.60 | 8.68  | 0.00       | 4.62 | 14.12%    |
| Q3 2029 | Model  | 33.42   | 17.26        | 3.68 | 8.86  | 0.00       | 4.72 | 14.12%    |
| Q4 2029 | Model  | 40.25   | 20.78        | 4.43 | 10.67 | 0.00       | 5.68 | 14.12%    |
| Q1 2030 | Model  | 33.02   | 17.35        | 3.63 | 8.58  | 0.00       | 5.13 | 15.54%    |
| Q2 2030 | Model  | 36.02   | 18.92        | 3.96 | 9.36  | 0.00       | 5.60 | 15.54%    |
| Q3 2030 | Model  | 36.77   | 19.32        | 4.04 | 9.56  | 0.00       | 5.71 | 15.54%    |
| Q4 2030 | Model  | 44.27   | 23.26        | 4.87 | 11.51 | 0.00       | 6.88 | 15.54%    |

## Annual trajectory cross-check

The calendar-bucket sums below are a capacity and demand cross-check; quarterly windows remain the live valuation method. Years beyond the latest guidance are model extensions, not company guidance.

| Year | Revenue | Operating profit | OP margin |
|------|---------|------------------|-----------|
| 2027 | 112.75  | 11.19            | 9.93%     |
| 2028 | 124.03  | 14.90            | 12.01%    |
| 2029 | 136.43  | 19.27            | 14.12%    |
| 2030 | 150.07  | 23.33            | 15.54%    |

The 2030 sales level of approximately EUR150.070M is exactly four years of 10% growth from the 2026 guide midpoint. Management also targets a medium-term EBIT margin above 15%, but provides no binding year for attainment. This model approaches that ambition gradually through mix and operating leverage. A EUR5M Clean Tech shortfall at 49% GP removes EUR2.45M profit before cost flex; execution sensitivity remains high at the present small profit base.

## 5. Forward four-quarter ceiling and derivations

20x forward-four-quarter IFRS-style operating profit (EBIT) is the portfolio owner-selected multiple as of September 21, 2026, held constant across the model. This is the framework operating-profit convention, not an observed market P/E. A one-turn change changes each ceiling by 5%. IFRS depreciation, amortization and lease costs remain in modeled EBIT; it is not EBITDA or net-income P/E.

The framework convention applies the operating-profit multiple directly to diluted equity shares. It is neither a net-income P/E nor an enterprise-value bridge. No separate net-cash addition, tax conversion, probability haircut or price-dependent ranking enters this ceiling. Any probability-weighted revenue is already included once in its operating vector.

| Ceiling quarter | Exact earnings window | Forward-4Q OP | Multiple | Diluted shares | Ceiling/share |
|-----------------|-----------------------|---------------|----------|----------------|---------------|
| Q3 2026         | Q3 2026 to Q2 2027    | 10.52         | 20x      | 6.569          | 32.03         |
| Q4 2026         | Q4 2026 to Q3 2027    | 11.39         | 20x      | 6.569          | 34.67         |
| Q1 2027         | Q1 2027 to Q4 2027    | 11.19         | 20x      | 6.569          | 34.08         |
| Q2 2027         | Q2 2027 to Q1 2028    | 12.01         | 20x      | 6.569          | 36.56         |
| Q3 2027         | Q3 2027 to Q2 2028    | 12.90         | 20x      | 6.569          | 39.27         |
| Q4 2027         | Q4 2027 to Q3 2028    | 13.80         | 20x      | 6.569          | 42.03         |
| Q1 2028         | Q1 2028 to Q4 2028    | 14.90         | 20x      | 6.569          | 45.36         |
| Q2 2028         | Q2 2028 to Q1 2029    | 15.86         | 20x      | 6.569          | 48.29         |
| Q3 2028         | Q3 2028 to Q2 2029    | 16.91         | 20x      | 6.569          | 51.48         |
| Q4 2028         | Q4 2028 to Q3 2029    | 17.98         | 20x      | 6.569          | 54.74         |
| Q1 2029         | Q1 2029 to Q4 2029    | 19.27         | 20x      | 6.569          | 58.67         |
| Q2 2029         | Q2 2029 to Q1 2030    | 20.16         | 20x      | 6.569          | 61.39         |
| Q3 2029         | Q3 2029 to Q2 2030    | 21.14         | 20x      | 6.569          | 64.35         |
| Q4 2029         | Q4 2029 to Q3 2030    | 22.13         | 20x      | 6.569          | 67.38         |
| Q1 2030         | Q1 2030 to Q4 2030    | 23.33         | 20x      | 6.569          | 71.02         |

### Complete derivation for every ceiling quarter

**Q3 2026:** OP window Q3 2026 to Q2 2027:  $(1.88 + 3.50 + 2.46 + 2.69) \times 20 / 6.569 = \text{EUR } 32.03$  per share. Each OP above is the corresponding vector GP total plus any disclosed GP adjustment, less R&D, SG&A and other opex.

**Q4 2026:** OP window Q4 2026 to Q3 2027:  $(3.50 + 2.46 + 2.69 + 2.74) \times 20 / 6.569 = \text{EUR } 34.67$  per share. Each OP above is the corresponding vector GP total plus any disclosed GP adjustment, less R&D, SG&A and other opex.

**Q1 2027:** OP window Q1 2027 to Q4 2027:  $(2.46 + 2.69 + 2.74 + 3.30) \times 20 / 6.569 = \text{EUR } 34.08$  per share. Each OP above is the corresponding vector GP total plus any disclosed GP adjustment, less R&D, SG&A and other opex.

**Q2 2027:** OP window Q2 2027 to Q1 2028:  $(2.69 + 2.74 + 3.30 + 3.28) \times 20 / 6.569 = \text{EUR } 36.56$  per share. Each OP above is the corresponding vector GP total plus any disclosed GP adjustment, less R&D, SG&A and other opex.

**Q3 2027:** OP window Q3 2027 to Q2 2028:  $(2.74 + 3.30 + 3.28 + 3.58) \times 20 / 6.569 = \text{EUR } 39.27$  per share. Each OP above is the corresponding vector GP total plus any disclosed GP adjustment, less R&D, SG&A and other opex.

**Q4 2027:** OP window Q4 2027 to Q3 2028:  $(3.30 + 3.28 + 3.58 + 3.65) \times 20 / 6.569 = \text{EUR } 42.03$  per share. Each OP above is the corresponding vector GP total plus any disclosed GP adjustment, less R&D, SG&A and other opex.

**Q1 2028:** OP window Q1 2028 to Q4 2028:  $(3.28 + 3.58 + 3.65 + 4.39) \times 20 / 6.569 = \text{EUR } 45.36$  per share. Each OP above is the corresponding vector GP total plus any disclosed GP adjustment, less R&D, SG&A and other opex.

**Q2 2028:** OP window Q2 2028 to Q1 2029:  $(3.58 + 3.65 + 4.39 + 4.24) \times 20 / 6.569 = \text{EUR } 48.29$  per share. Each OP above is the corresponding vector GP total plus any disclosed GP adjustment, less R&D, SG&A and other opex.

**Q3 2028:** OP window Q3 2028 to Q2 2029:  $(3.65 + 4.39 + 4.24 + 4.62) \times 20 / 6.569 = \text{EUR } 51.48$  per share. Each OP above is the corresponding vector GP total plus any disclosed GP adjustment, less R&D, SG&A and other opex.

**Q4 2028:** OP window Q4 2028 to Q3 2029:  $(4.39 + 4.24 + 4.62 + 4.72) \times 20 / 6.569 = \text{EUR } 54.74$  per share. Each OP above is the corresponding vector GP total plus any disclosed GP adjustment, less R&D, SG&A and other opex.

**Q1 2029:** OP window Q1 2029 to Q4 2029:  $(4.24 + 4.62 + 4.72 + 5.68) \times 20 / 6.569 = \text{EUR } 58.67$  per share. Each OP above is the corresponding vector GP total plus any disclosed GP adjustment, less R&D, SG&A and other opex.

**Q2 2029:** OP window Q2 2029 to Q1 2030:  $(4.62 + 4.72 + 5.68 + 5.13) \times 20 / 6.569 = \text{EUR } 61.39$  per share. Each OP above is the corresponding vector GP total plus any disclosed GP adjustment, less R&D, SG&A and other opex.

**Q3 2029:** OP window Q3 2029 to Q2 2030:  $(4.72 + 5.68 + 5.13 + 5.60) \times 20 / 6.569 = \text{EUR } 64.35$  per share. Each OP above is the corresponding vector GP total plus any disclosed GP adjustment, less R&D, SG&A and other opex.

**Q4 2029:** OP window Q4 2029 to Q3 2030:  $(5.68 + 5.13 + 5.60 + 5.71) \times 20 / 6.569 = \text{EUR } 67.38$  per share. Each OP above is the corresponding vector GP total plus any disclosed GP adjustment, less R&D, SG&A and other opex.

**Q1 2030:** OP window Q1 2030 to Q4 2030:  $(5.13 + 5.60 + 5.71 + 6.88) \times 20 / 6.569 = \text{EUR } 71.02$  per share. Each OP above is the corresponding vector GP total plus any disclosed GP adjustment, less R&D, SG&A and other opex.

The final three operating quarters support earlier four-quarter windows and have no standalone ceiling. Arithmetic uses unrounded inputs; displayed components are rounded for readability.

6.568820M shares match the reported count and remain flat. No speculative acquisition shares or buybacks are inserted. A share-funded acquisition would require both operating and dilution updates; the 5%/10% denominator sensitivities show the effect of dilution alone. [M7U-1, M7U-2]

## Mechanical share sensitivity

| Q1 2028 denominator | Ceiling/share |
|---------------------|---------------|
| Current model       | 45.36         |
| 5% more shares      | 43.20         |
| 10% more shares     | 41.23         |

## 6. Cross-book relationships and monitoring

Semiconductor process measurement complements wafer-fab equipment exposure but is a smaller content layer. Equipment-market TAM and a vendor equipment sale cannot both be counted as Nynomic revenue.

Transformer gas monitoring creates an energy-reliability connection with ENS and SHLS. That common theme does not imply those companies are disclosed customers.

Optical transceiver demand can support the semiconductor ecosystem broadly. The Goldman optical module forecasts are not Nynomic product TAM; no direct CPO module ASP or laser-content revenue is modeled.

## 7. Scored risks and re-rate tests

| Risk class                       | Score | Failure channel                                                                    |
|----------------------------------|-------|------------------------------------------------------------------------------------|
| Cycle and delivery               | -1    | OEM projects or industrial investment slip; backlog converts later                 |
| Margin execution                 | -1    | Savings, product mix or factory absorption fail to produce guided recovery         |
| Customer and product visibility  | -1    | Undisclosed application/customer concentration weakens precise demand modeling     |
| Capital allocation and liquidity | -1    | Acquisitions, leases, working capital or thin trading liquidity reduce flexibility |

## Dated triggers and counters

| Checkpoint                  | Positive evidence                                          | Counter / model action                                              |
|-----------------------------|------------------------------------------------------------|---------------------------------------------------------------------|
| November 2026 Q3 update     | Shipment conversion supports the H2 sales/EBIT bridge      | Reduce Q4 if orders do not become accepted deliveries               |
| FY2026 report in 2027       | Sales 100-105 and EBIT margin 6-8% delivered               | Distinguish permanent cost improvement from inventory effects       |
| 2027 gas/semiconductor ramp | Order delivery and repeat demand support Clean Tech growth | Treat customer capex enthusiasm without content data as unproven    |
| 2028-2030 profitability     | Progress toward the stated above-15% EBIT ambition         | Keep the margin target conditional; no automatic valuation rerating |

German half-year statements and two recent management reporting updates anchor this analysis. Two complete earnings-call transcripts were not publicly available in the reviewed sources. Segment GP and expense functions are analyst allocations, not reported disclosures. The legacy filename identifying M7U as Manz is not used as evidence; this artifact covers Nynomic AG only.

## 8. Sources and snapshot

- **M7U-1** - August 31, 2026; signed August 21. German half-year report. Pages 16-18 financials, 22 segments, 27-28 guidance and R&D; downloaded and read.
- **M7U-2** - August 26, 2026. Management investor presentation. Slide 9 organic growth; slides 14-17 application drivers; downloaded and read.
- **M7U-3** - May 8, 2026. Q1 management update. Prior reporting cycle, rounded actuals and guidance.
- **M7U-4** - August 19, 2026. German H1 issuer announcement. Primary issuer text republished; superseded exact numbers in full report.
- **M7U-5** - September 1, 2026. German gas-measurement order announcement. Issuer-authored EQS release, high-single-digit-million order; no exact delivery schedule.
- **M7U-6** - September 18, 2026. Xetra closing history. Dated header snapshot.

Model snapshot: September 21, 2026. M7U.DE. Framework 6.0.2. Base 40/60 (67%). Eighteen modeled operating quarters and fifteen complete forward-four-quarter ceilings. Current full PDF and synchronized Markdown: G:/My Drive/1amInvesting/Artifacts/M7UDE\_Nynomic\_DeepDive.pdf and .md. The companion company worksheet uses this same model and links the ceiling path to the master portfolio.
