CURRENT FRAMEWORK | OCTOBER 21, 2026

Unisplendour: accepted AI infrastructure spending must become funded profit

H3C can capture more recognized spending as Chinese enterprises and internet customers build AI servers, high-speed networks and complete racks. Its installed channels, heterogeneous accelerator integration and continuing support can turn a large hardware opportunity into repeat system work. The potential alpha is a stronger conversion of local infrastructure demand into accepted revenue and durable operating profit than a simple equipment-shipment reading would suggest.

The economic capture is constrained by competitive server hardware, a larger low-margin server mix, inventory and receivables, customer acceptance, and substantial financing and minority obligations. The current model gives those costs explicit weight. The resulting operating ceilings remain conditional on both acceptance and financing.

Current review	Research conclusion
Research date	October 21, 2026; Framework 8.0
Classification	Watchlist / Path B AI-infrastructure beneficiary
Analytical score	39/60 = 65
Protected Excel Base	67; distinct from analytical score and contract probability
Active ceiling quarter	Q4 2027; earnings window Q4 2027 to Q3 2028
Operating ceiling	CNY 41 per share
Valuation method	20x Chinese consolidated statement OP x 88% / 3,290 million proxy shares
Market snapshot	Current dated quote, market capitalization and holding status unavailable

Reader figures are rounded to whole CNY millions unless a table says CNY per share or shares. Nonzero monetary amounts below one million appear as <1. Rates may be expressed in basis points. Calculations retain unrounded model inputs, so rounded terms can differ from their displayed sum. The source exhibits retain their original units and precision.

CURRENT FRAMEWORK | OCTOBER 21, 2026

The profit-capture mechanism

A customer budget becomes H3C revenue through product selection, material supply, system integration, delivery and acceptance. Network performance, rack integration and operational support make the platform valuable across those steps. Repeat projects and foreign channels can improve scale, while a larger server contribution can reduce blended margin. Greater revenue therefore earns a higher operating ceiling only after manufacturing, support, research, losses and financing are paid.

Step	Evidence and model consequence
Customer demand	Chinese enterprise, internet and carrier infrastructure spending supports the recognized H3C envelopes. No named customer capex allocation is added.

Step	Evidence and model consequence
Product and delivery	Servers, networking, storage, security, cloud and rack integration create eligible receipts. Card counts describe product capability, not accepted units.
Acceptance	Delivery/control or customer acceptance is the revenue event. Advances remain obligations until performance.
Profit capture	Separate product gross profits fund selling, administration, R&D, surcharges, finance and recurring losses.
Cash and claims	Working capital, capex, leases, minority distributions and forward claims determine the conditional funding need.

Position in the architecture and competitive alternatives

H3C supplies a broad infrastructure system. Networks and computing capacity are required for AI workloads, and H3C is one commercial route to build them. Huawei, Inspur and ZTE can compete for customer budgets, while customers can combine their own architectures and software. The platform benefits from integration and local execution, with meaningful customer and supplier alternatives. That supports a beneficiary classification and a moderate core score.

Management describes UniPoD products covering 32 to 1,024 cards, expansion capability up to 16,384 cards, heterogeneous processors and accelerators, liquid cooling, and newer high-bandwidth networking. These are issuer technical descriptions. They do not identify realized server ASP, customer-specific awards, accepted rack volumes or a measured product gross margin. Source capability supports the delivery cases already modeled.

	软件、系统集成、端到端交付及算网协同，打造国内稀缺的、面向训练与推理全周期的全栈智算服务能力，其中推理领域的全方位能力尤为突出，构成公司全栈能力扎实的基础。 Token 运营方面，公司依托图灵小镇与芯模社区的产业模式创新，持续推动 AI 算力与产业应用融合落地。围绕这一模式，公司进一步推出“图灵 Token 工厂”端到端解决方案，打通 Token 生产、调度、计量、治理的全生命周期运营闭环，助力客户实现 Token 从“资源”到“资产”的价值跃迁。 七、2026 年上半年液冷产品整体交付情况如何？是否存在技术瓶颈？公司如何做好交付准备？ 面对与日俱增的大规模高密算力增长需求，液冷技术正逐渐成为释放算力潜力的关键路径，公司上半年液冷相关服务器业务收入实现高速增长。公司作为国内少数具备液冷整机柜设计制造全流程和大规模交付能力的厂商，持续完善液冷产业布局，公司掌握冷板、密封结构、漏液监测、整机柜协同等核心技术，冷板式与浸没式双路线布局，并配套自研了液冷智能运维平台。公司持续进行技术提升，包括在新一代散热材料、散热协同技术等方面研发，并与部分高校开展物理层面的微观技术研究。面对下一代高端设备对散热性能的更高要求，预计液冷在整体设备出货中的占比将持续提升。 八、公司上半年毛利率同比有所下降，请问是什么原因？ 公司上半年毛利率同比下降 1.8%，降幅较前期收窄，第二季度毛利率环比有所提升。上半年毛利额同比增长 18%，保持较快增长。收入结构变化是毛利率下降的核心原因，其中服务器等 IT 业务增速快且收入占比继续提升，网络产品等 CT 类产品增速虽然也很快但低于 IT 业务增速，加剧了结构倾斜。尽管整体毛利率下降，但高毛利网络产品收入增速超 20%、服务器收入增速超 50%，供应链紧张但增强了产品议价能力，支撑毛利额高速增长。

Management on liquid cooling and mix pressure. Management links lower group margin to faster server growth and states that networking grew more than 20% and servers more than 50%. These are issuer statements, with no separate verified product-quarter ASP or GP. Source: IR_20260828_mirror, 2026-08-31, original PDF page 8. CNY yuan where printed. Original pixels retained.

CURRENT FRAMEWORK | OCTOBER 21, 2026

Supercycle map and phased market expansion

The near-term exposure is the buildout of Chinese AI infrastructure. Faster networks, memory and storage throughput, rack power and cooling, and software compatibility support server utilization. The recognized revenue cases include broad enterprise and internet expansion; the model does not add a second global AI budget, optical module TAM or direct SpaceX wallet.

Phase	Mechanism / eligible buyers	Analytical confidence	Incremental treatment
1: current AI buildout	Enterprises, carriers and internet customers buy accepted servers, networks and integrated systems.	Current infrastructure opportunity	Within the recognized revenue cases
2: physical AI and edge	Industrial and enterprise workloads can create more processing, data movement and managed-edge infrastructure demand.	50% phase judgment	Included within enterprise envelopes; no second revenue vector
3: wider ubiquitous compute	Space, defense and distributed-network workloads can expand the need for secure infrastructure over longer periods.	20% phase judgment	Long-dated optionality; no separately added TAM or order

Phase judgments describe market expansion, and the 60%/40% execution weights describe company outcomes. Neither is the analytical Base score. The model uses accepted-revenue envelopes because detailed customer capex allocation, bill of materials, server/network units and ASP data are unavailable. This is an explicit LOW-confidence Plan B, anchored to reported H3C and formal group product data.

CURRENT FRAMEWORK | OCTOBER 21, 2026

China evidence ladder

Variable	Primary evidence	Model use / limitation
TAM	Management describes AI infrastructure, domestic substitution and overseas channels.	Eligible demand context, without an additive measured company TAM.
Demand	H1 H3C revenue rose about 37%; networking and servers grew rapidly.	Supports conditional delivery envelopes; no conversion of capabilities into unit orders.
Margin	Formal note 49 has distinct digital, distribution, other and elimination costs.	Exact calibration; forward digital margin is a LOW mix/capture proxy.
Timing	Quarterly acceptance; supply scheduling extends into H1 2028 according to management.	Finite pricing and delivery windows; product launch and supplier capacity are not revenue recognition.
Risk	Negative reported operating cash, financing obligations and new minority arrangements.	Explicit working-capital, finance-cost, claim and funding scenarios.

The formal note 49 product perimeter is the single calibration used in the forward product build. The MD&A ICT/distribution table uses a different classification and is presented as a separate source exhibit. Mixing revenue from one classification with costs from the other would distort gross profit.

五、境内外会计准则下会计数据差异

1、同时按照国际会计准则与按照中国会计准则披露的财务报告中净利润和净资产差异情况

□适用 √不适用

公司报告期不存在按照国际会计准则与按照中国会计准则披露的财务报告中净利润和净资产差异情况。

2、同时按照境外会计准则与按照中国会计准则披露的财务报告中净利润和净资产差异情况

□适用 √不适用

公司报告期不存在按照境外会计准则与按照中国会计准则披露的财务报告中净利润和净资产差异情况。

六、非经常性损益项目及金额

√适用 □不适用

单位：元

H1 actual financial highlights. Actual highlights show parent and adjusted parent profits and negative consolidated CFO. These measures are not interchangeable with operating profit. Source: H1_2026_full, 2026-08-29, original PDF page 7. CNY yuan where printed. Original pixels retained.

Accounting bridge and recurring profit assumptions

H1 gross profit less selling, administration, R&D and surcharges is about CNY3,218 million. Reported Chinese statement OP is about CNY2,873 million. Parent net income is about CNY2,167 million and adjusted parent net income about CNY1,874 million. H1 contains a substantial foreign-exchange gain and a nonrecurring effect from the completed former HPE transaction; these are not carried forward automatically.

The forecast keeps ordinary manufacturing, warranty, support, R&D, existing depreciation and subsidiary SBC within the cost build. It charges bank and lease finance costs, a bounded minority-forward accretion proxy, recurring asset and credit losses, and surcharges, while retaining a revenue-linked VAT rebate. Future other grants, investment, fair-value, disposal and FX effects are zero assumptions. Currency and policy risks continue to exist.

Formal product calibration

H1 2026 / CNY million	Revenue	COGS	Gross profit
Digital infrastructure	52,082	44,059	8,023
Distribution	14,426	13,853	574
Other	40	8	32
Eliminations	(3,033)	(2,919)	(114)

The digital-to-H3C revenue mapping is calibrated to H1 formal digital revenue divided by H3C standalone revenue. The remainder of group recognized revenue is allocated to distribution, other and eliminations at their exact relative H1 scales. Those components retain their own H1 cost-to-revenue ratios. Negative elimination revenue and COGS remove internal activity; they do not represent a commercial product loss.

本集团与履约义务相关的信息如下：

本集团在销售ICT等相关产品时，相关履约义务于交付或经客户验收后履行完毕，客户需按约定支付预收款、到货款与验收款，本集团承担的未来预计退还客户款项主要包括销售返利，所提供产品质量保证涵盖保证型质保及服务型质保。

本集团在提供维保、数据中心建造等服务时，相关履约义务在服务期内或客户验收完成后履行，客户需按约定支付服务进度款及验收款，本集团承担的预计将退还客户的款项主要为销售返利，所提供的质量保证属于服务型质保。

（5） 分摊至剩余履约义务

于2026年6月30日，已签订合同、但尚未履行或尚未履行完毕的履约义务所对应的收入金额为人民币331.77亿元（2025年12月31日：人民币314.10亿元），本集团预计大部分金额将随着履约义务的履行完毕，在未来三年内确认为收入。

Revenue recognition and remaining performance obligations. Formal recognition and remaining-performance-obligation notes distinguish delivery, acceptance and services from cash advances. Newest management records and source completeness

Event / publication	Published record read	What is established	Remaining gap
August 28 / August 31, 2026	H1 telephone minutes, all 9 pages	Management overview and sections II-IX, final date and attachment statement	Audio, verbatim remarks, every live question and spoken closing unverified
April 28 / April 29, 2026	Q1 telephone minutes, all 6 pages	Management overview plus seven published Q&A topics II-VIII	Same live/verbatim/audio gaps
April 15 / April 16, 2026	Annual telephone record, all 8 pages	Supplementary annual discussion	Published record is not proof of full spoken call
April 29, 2026	Annual online record, all 2 pages	Two published questions	Not the full two-hour event

The H1 discussion covers supernodes, overseas execution, financing and FX, supply tightness, integrated services, liquid cooling, margin mix and future priorities. The Q1 questions cover domestic products, supply/prepayments, integrated systems, supernodes, customer demand, overseas expansion and finance expense. These records support the active hypotheses, while the unavailable spoken material remains an explicit completeness gap.

CURRENT FRAMEWORK | OCTOBER 21, 2026

October preliminary profit update

The October 15 release is a nine-month profit preview, reported in ten-thousand yuan. It gives parent net income of CNY2,420-3,060 million and adjusted parent net income of CNY2,100-2,740 million. Subtracting exact H1 adjusted parent income implies Q3 adjusted parent profit of about CNY226-866 million. The preview contains no actual Q3 revenue, GP, operating profit, CFO or balance sheet.

The central Q3 adjusted-parent-income point is CNY546 million. Dividing by one minus the 20% tax proxy and by the 88% parent-attribution proxy produces normalized OP of about CNY776 million. It is a LOW analytical inversion. The difference from each cost-built Q3 operating result is shown as an unallocated preliminary reconciliation. It is not assigned to a reported writeoff or made into a perpetual charge.

Q3 2026 / CNY million	Fast case	Slow case	Active weighted
Cost-built statement OP	1,897	1,301	1,659
Preliminary normalized OP proxy	776	776	776
Unallocated reconciliation	(1,121)	(525)	(882)
After-tax cash classification adjustment	448	210	353

The active cash proxy assigns 50% immediate after-tax cashability to this unexplained difference. Zero and full cashability are diagnostics. The other half is a reconciliation adjustment, not a source-proven noncash expense or reported CFO addback. Q3 parent-attribution tests affect this inversion; valuation and future parent attribution retain 88%.

紫光股份有限公司

2026 年前三季度业绩预告

本公司及董事会全体成员保证信息披露的内容真实、准确和完整，没有虚假记载、误导性陈述或重大遗漏。

一、本期业绩预计情况

1、业绩预告期间：2026 年 1 月 1 日至 2026 年 9 月 30 日

2、业绩预告情况：预计净利润为正值且属于同向上升情形

单位：人民币万元

项目	本报告期	上年同期
归属于上市公司股东的净利润	盈利：242,000-306,000	盈利：140,385.31
	比上年同期增长：72.38%-117.97%	
归属于上市公司股东的扣除非经常性损益后的净利润	盈利：210,000-274,000	盈利：145,995.63
	比上年同期增长：43.84%-87.68%	
基本每股收益（元/股）	盈利：0.85-1.07	盈利：0.4908

二、与会计师事务所沟通情况

本次业绩预告未经注册会计师预审计。

三、业绩变动原因说明

公司预计 2026 年 1-9 月归属于上市公司股东的净利润较上年同期大幅增长，主要原因如下：

1、随着人工智能需求持续释放和应用场景加快渗透，2026 年前三季度，公司积极把握智算与国产化带来的市场机遇，聚焦 AI 基础设施及解决方案等核心业务，优化业务布局，增强全栈综合优势；依托多元、稳健、可持续的供应链体系，保障交付的稳定与连续；深化全球化战略，海外业务规模扩大，服务能力进一步提高，推动公司营业收入实现快速增长和毛利水平的持续提升。

Nine-month preliminary profit range. This is an unaudited preliminary range. The printed table is cumulative nine-month data, not standalone Q3 actual results. Source: Q3_2026_profit_preview, 2026-10-15, original PDF page 1. Profit amounts in CNY 10,000; EPS in CNY per share. Original pixels retained.

Recognized revenue cases

The active case weights fast execution at 60% and slower acceptance at 40%. H1 execution and large server/network demand support the fast outcome. Working-capital absorption, lower-margin server mix and the weaker implied Q3 profit justify a substantial slower outcome. These are subjective joint company-execution judgments, not measured frequencies and not the analytical Base.

Year	Fast H3C	Slow H3C	Other net envelope
2026	110,000	103,000	23,516
2027	146,000	118,512	30,000
2028	161,000	137,809	33,000
2029	185,000	159,678	35,000
2030	207,000	185,478	41,000

The slower path starts at CNY103,000 million H3C revenue in 2026 and applies the appraisal growth ratios after reanchoring. The appraisal absolute levels remain speculative acquisition-valuation assumptions, with no performance commitment. The other-net planning envelope is group revenue outside H3C before the formal digital mapping; it is not added again on top of the product table.

② 营业收入预测

新华三作为数字化及 AI 解决方案领导者，致力于成为客户业务创新、数字化转型值得信赖的合作伙伴，始终以客户需求为导向，提供场景化解决方案，支持运营商、政府、金融、医疗、教育、交通、制造、电力、能源、互联网、建筑等百行百业数字化转型实践。新华三未来相关产品有较好的发展前景，未来收入预测数据如下：

单位：万元

收入/增长率	2026 年度	2027 年度	2028 年度	2029 年度	2030 年度
营业收入	8,805,433.77	10,131,583.65	11,781,206.69	13,650,839.23	15,856,486.17
增长率	15.89%	15.06%	16.28%	15.87%	16.16%

注：公司上述前瞻性信息是建立在推测性假设的数据基础上的预计，具有重大不确定性，不构成盈利预测或业绩承诺，敬请广大投资者理性判断，注意相关投资风险。

最近三年，新华三收入持续增长，分别实现 5,193,865.16 万元、5,507,403.98 和 7,598,074.50 万元，同比增长 4.27%、6.04%和 37.96%，平均增长率为 16.09%，根据上表收入预测，2026-2030 年新华三收入的平均增长率为 15.85%，与**最近三年**平均增长率 16.09%相当。2025 年以来，在深化推进“算力×联接”战略下，新华三加快在智算和国产化领域全栈能力布局，紧抓国内外人工智能应用趋势，有序推进海外业务拓展，新华三交换机业务、计算存储业务及国际业务收入得以增长较快，未来相关业务的增长预期将进一步延续，本次新华三收入预测具有合理性。

另一方面，未来我国数字经济与实体经济将深度融合，国家将新型基础设施建设提升至国家战略高度，为 ICT 行业提供了政策保障和资源支持，以 AI 产业为代表性的新兴产业将驱动新型基础设施、算力网络、下一代网络技术等科技创新加速，并为 ICT 产业注入新的增长动能，促使行业加速拓展以 AI 与数字化为代表的发展新机遇。另外，在科技自立自强国家战略指引下，政策端持续加大关键核心技术扶持力度，政务、金融、能源、通信运营商、互联网等关键行业领域，对 ICT 基础设施、软硬件系统的安全可控要求持续提升，国产化替代将进一步向深度适配、性能优化、生态闭环方向推进，具备核心技术自研能力、全产业链整合能力的企业，将持续占据行业发展主动权，国产化也将长期成为驱动 ICT 产业高质量发展的核心主线。在此背景下，国内 ICT 行业仍将有较好的成长前景。根据 IDC 预测数据，中国交换机市场 2024-2029 年复合增长率约为 15.78%，2029 年市场规模有望达到 145.3 亿美元，中国 X86 服务器 2024 年至 2029 年

H3C appraisal revenue assumptions. The acquisition appraisal path supplies a growth cross-check. Its absolute revenue forecasts are not company guidance. Source: SZSE_reply_20260908_mirror, 2026-09-08, original PDF page 23. Revenue amounts in CNY 10,000. Original pixels retained.

CURRENT FRAMEWORK | OCTOBER 21, 2026

Quarterly phasing and confidence

Reported Q1 and derived Q2 group revenue stay exact. Forecast H2 2026 uses the selected remaining annual envelope and the saved 4:3 quarterly weighting. Later years use the saved seasonal quarter proportions. Revenue-sensitivity tests scale future receipts while retaining the already reported H1; working-capital interpolation follows the same recognized annual scope.

Digital gross margin is 15% in the fast case at the start, with 25bp annual recovery from 2028. The slower state is 50bp lower. These are LOW mix-and-capture proxies anchored to reported product data. Distribution, other and elimination margins retain their formal H1 ratios. No separate server/network quarter margin, accepted quantity or realized ASP is claimed.

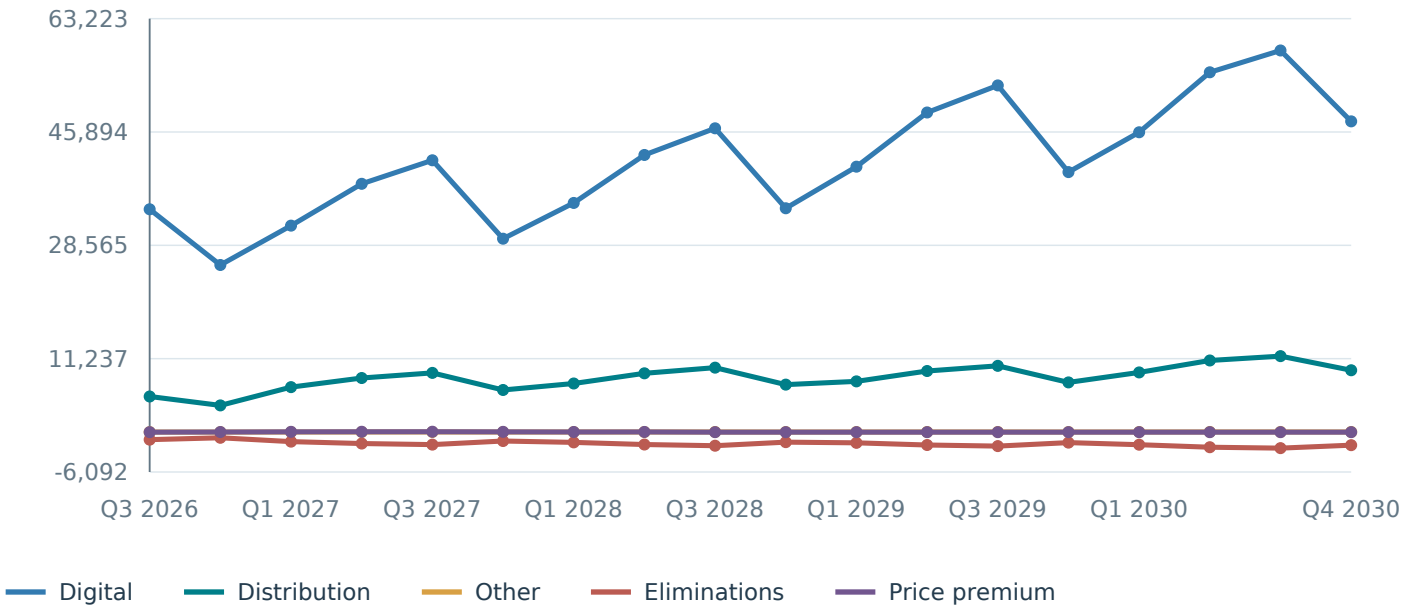

Paid selling follows revenue, administration grows 2% per quarter from the Q2 anchor and R&D grows 250bp per quarter. Those fixed operating commitments provide leverage when receipts arrive and remain a burden when acceptance is slower. New equipment depreciation is incremental. Inventory/credit losses and financing are fully visible in the OP bridge.

CURRENT FRAMEWORK | OCTOBER 21, 2026

Recognized product revenue path

Product revenue and explicit price increment

CNY million

All 18 future quarters are model estimates. Product reference revenue plus separate premium equals group revenue. Negative eliminations remove internal activity. Exact numerical observations follow.

Q4 2030	160	239	189	585	67	2,634

Other net is income before the separately shown impairment losses. For reported quarters it includes the disclosed other/investment/fair-value/disposal combination. Prospective other income is the VAT proxy, with other grants and investment/FX valuation effects zero. The Q3 unallocated reconciliation is additional to this cost-built bridge and is quantified in the preliminary section.

Profit capture after paid costs

Gross profit, paid operating costs and statement OP

CNY million

Model estimates. Finance, surcharges, recurring losses, VAT and the Q3 reconciliation connect gross profit and paid costs to OP in the full tables. This chart is not an EBITDA measure.

Q4 2030	7,718	4,222	2,634

Increasing accepted revenue creates leverage against fixed administration and research. Manufacturing and distribution absorb most revenue, and an adverse server/network mix can outweigh large sales growth. The model therefore tests digital margin and revenue independently, with associated cost and cash changes.

CURRENT FRAMEWORK | OCTOBER 21, 2026

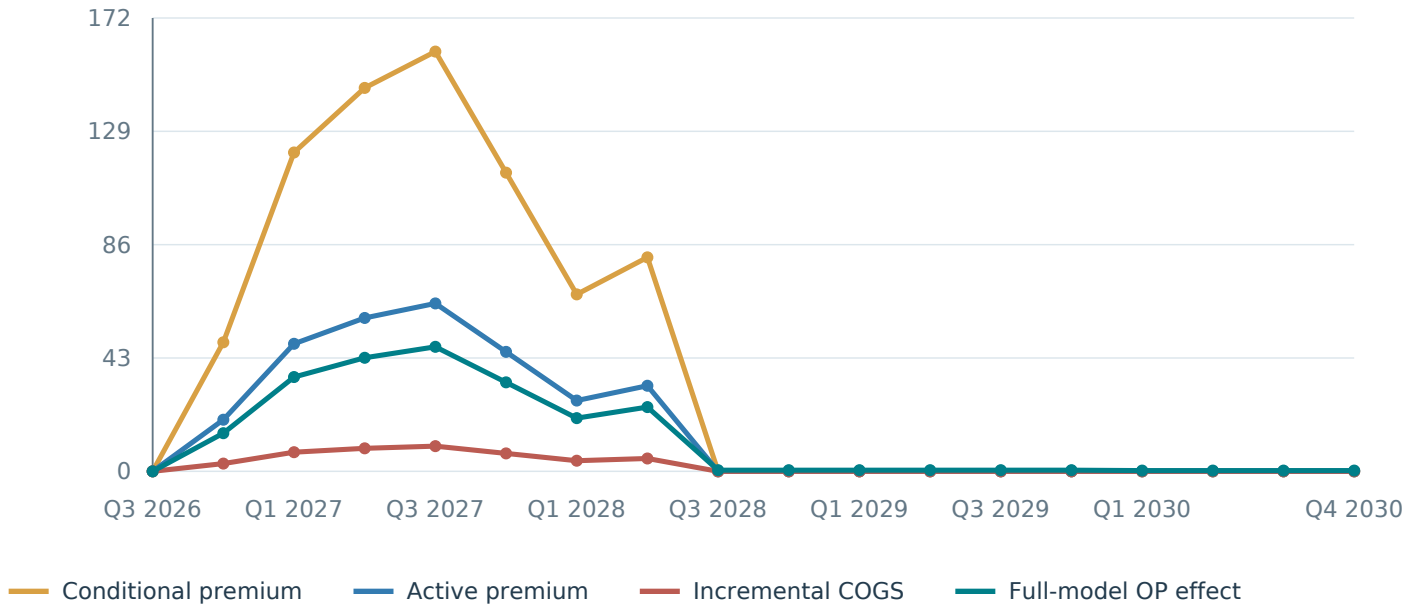

Active finite pricing bridge

The August management discussion describes tight upstream supply and improved bargaining ability. The model admits a finite price opportunity at 40% probability: 20% of eligible H3C reference receipts can earn a conditional 2% premium. Only new or repriceable receipts qualify. Manufacturing/expedite absorbs 15% of the premium and paid support another 10%, alongside normal revenue-linked surcharges, VAT and losses.

The ramp is half in Q4 2026, full in 2027, half in H1 2028 and zero directly afterward. The reference receipts exclude this separately quantified premium. Cash retained from earlier profit can affect later interest income, so a later full-model effect can remain after direct price revenue expires. The pricing judgment is conditional on the revenue actually realized in each execution state.

Conditional and active pricing receipts and OP

CNY million

Conditional premiums are before the 40% pricing probability. Active premium and costs are weighted once. OP effect compares the current model with its saved price-zero diagnostic, including linked costs and cash yield.

Quarter	Conditional premium	Active premium	Incremental COGS	Full-model OP effect
Q3 2026	0	0	0	0
Q4 2026	49	20	3	14
Q1 2027	121	48	7	36
Q2 2027	146	58	9	43
Q3 2027	160	64	10	47
Q4 2027	114	45	7	34
Q1 2028	67	27	4	20

Q3 2030	0	0	0	<1
Q4 2030	0	0	0	<1

CURRENT FRAMEWORK | OCTOBER 21, 2026

Probability ledger - realization and pricing

Hypothesis / date	Probability / dependence	Endpoint already modeled	Costs and active treatment	Revision test
H1 delivery execution / August 28	Fast 60%; slow 40%; mutually exclusive	Fast H3C 110/146/161/185/207B; slow103B reanchored to appraisal growth	Four-product GP and full paid-cost and cash path. Endpoints weighted once, never multiplied by Base.	Fast80% only with profitable accepted growth and better funding;40% if margin or cash conversion decline.
Supply/repricing / August 28	40%, conditional on realized eligible receipts; overlap0%	20% H3C receipts x 2% premium; finite Q4 2026 through H1 2028 ramp	15% premium COGS plus 10% support plus linked items; active quarterly receipts/OP quantified in chart.	60% on observed new-order terms;20% if competition or input-cost pass-through weakens net capture.
Physical AI / phased thesis	50% market-phase judgment	Enterprise and edge workloads inside recognized envelopes	100% overlap; no separate current increment	Revisit eligible buyers, actual deployment and company capture.
Longer ubiquitous compute / thesis	20% market-phase judgment	Space, defense and distributed-network optionality	No direct SpaceX order; no extra TAM receipt	Require company-specific endpoint/cost/timing before a separate increment.

Probabilities are analytical judgments rather than observed frequencies. Technical performance claims, related announcements and repeated statements can be correlated. They support the existing delivery cases and are not treated as independent confirmation with a second revenue addition.

Included signals and zero-increment dispositions

Signal	Numerical probability / overlap	Current disposition	Next test
UniPoD, CPO/NPO, liquid cooling and overseas channels	60% execution / 100% overlap	Included in recognized H3C envelopes; no extra accepted-unit wallet	Accepted delivery, margin, compatibility and funding
Remaining performance obligations: 33,177M	100% contracted existence / 100% forecast overlap	Contracted products/services, mostly within 3 years; no second all-AI increment	Conversion and acceptance timing
H3C ownership: about 88%	100% source / 100% method overlap	Already embodied in 88% valuation attribution; no extra OP or SOTP addition	Minority forward terms and obligations
Factoring ceiling proposal: 18,000M	60% approval judgment; draw unquantified	Zero drawn cash and zero revenue. Limit alone gives no selected draw, rate or credit transfer	October 26 vote and actual contract/draw/fees

The factoring authorization ceiling does not identify the amount drawn, the contract rate or whether receivable risks transfer. Those missing variables prevent a distinct cash-flow amount, while the prospective approval still carries an explicit probability.

股票简称：紫光股份　　股票代码：000938　　公告编号：2026－106

紫光股份有限公司

关于增加 2026 年度应收账款保理额度的公告

本公司及董事会全体成员保证信息披露的内容真实、准确和完整，没有虚假记载、误导性陈述或重大遗漏。

紫光股份有限公司（以下简称“公司”）于 2026 年 10 月 8 日召开的第九届董事会第三十五次会议审议通过了《关于增加 2026 年度应收账款保理额度的议案》，本议案需提交公司 2026 年第八次临时股东会审议，现将具体情况公告如下：

一、 保理业务概述

公司第九届董事会第十七次会议及 2025 年第六次临时股东会审议通过了《关于 2026 年度应收账款保理额度的议案》，同意公司及纳入合并报表范围的下属子公司 2026 年度与国内外商业银行、商业保理公司等具备相关业务资格的机构开展总额不超过人民币 60 亿元的应收账款保理业务，保理方式为应收账款债权无追索权保理方式和应收账款债权有追索权保理方式，保理融资利息将根据市场费率水平由双方协商确定。具体内容详见公司 2025 年 12 月 4 日在巨潮资讯网等披露的《关于 2026 年度应收账款保理额度的公告》（公告编号：2025-069）。

为把握智算产业快速发展带来的机遇和满足未来业务发展需要，进一步加速流动资金周转、提高资金使用效率、降低应收账款管理成本、优化资产负债结构及经营性现金流状况，公司第九届董事会第三十五次会议审议通过了《关于增加 2026 年度应收账款保理额度的议案》，同意将公司及纳入合并报表范围的下属子公司 2026 年度应收账款保理额度增加至人民币 180 亿元，合作机构包括国内外商业银行、商业保理公司等具备相关业务资格的机构，保理方式为应收账款债权无追索权保理方式和应收账款债权有追索权保理方式，保理融资利息将根据市场费率水平由双方协商确定，并提请股东会授权公司管理层负责应收账款保理业务具体实施事宜。

本次保理业务事项不构成关联交易，也不构成《上市公司重大资产重组管理办法》规定的重大资产重组。根据《深圳证券交易所股票上市规则》和《公司章程》的规定，上述议案需提交公司 2026 年第八次临时股东会审议。

Proposed factoring ceiling expansion. The notice proposes a higher business ceiling. It is not a cash draw, incremental recognized sales or a committed bank loan. Source: factoring_20261009_mirror, 2026-10-09, original PDF page 1. Ceiling amounts in CNY 100 million. Original pixels retained.

Annual trajectory cross-check

Year	Recognized revenue	Gross profit	Statement OP
2026	130,735	17,692	4,409
2027	165,221	22,087	6,702
2028	184,783	25,021	8,054
2029	209,871	29,103	10,286
2030	239,391	33,581	12,689

Annual totals are trajectory cross-checks. Each operating ceiling uses its own current-quarter-plus-next-three window. Source appraisal figures, global AI spending and a company fiscal-year total are not substituted for that rolling window.

CURRENT FRAMEWORK | OCTOBER 21, 2026

Claims and the protected valuation convention

The issuer reports 2,860,079,874 common shares. The proposed maximum 430,000,000-share placement would produce 3,290,079,874 shares. The preserved model uses a rounded maximum-dilution proxy of 3,290,000,000 shares. It is distinct from currently issued shares and from the 70% financing-cash probability. The maximum proxy remains in all active valuation windows.

Claim / control	Current convention
Actual parent common count	2,860,079,874
Maximum proposed new shares	430,000,000; issue not verified complete
Exact arithmetic maximum	3,290,079,874
Protected valuation proxy	3,290,000,000
Attribution	88%; a whole-group valuation proxy reflecting H3C ownership of about 88%
Multiple and window	20x Chinese statement OP; current ceiling quarter plus next three
Share sensitivity	Actual parent claims matched with no-placement cash in a diagnostic

The 88% attribution is a retained valuation convention, not the measured parent share of every business or quarter. No automatic ownership uplift follows the modeled future-forward payments. No fresh price is supplied, so this report makes no price-dependent return, ranking or entry calculation.

Opening liquidity and parent access

The cash model starts at consolidated June cash equivalents of CNY6,729 million, excluding restricted funds and bank interest that is not freely payable. Parent-only cash equivalents are about CNY93 million. Consolidated cash is not assurance that every subsidiary balance can immediately service a listed-parent obligation.

Parent investment-income cash received was CNY700 million in H1. It is an intercompany/parent cash fact and not another consolidated revenue or cash addition. The parent ordinary distribution of CNY186 million is the prior annual dividend recognized during H1; the issuer planned no half-year 2026 distribution. The forecast uses one such annual payment as a planning proxy, with no exact future payment date or unconditional payout floor.

后附财务报表附注为本财务报表的组成部分

The parent-only cash statement shows a combined dividend/profit/interest payment, not a separately identified pure cash-interest amount. Source: H1_2026_full, original PDF page 71. Original pixels retained.

Borrowing, lease and purchase claims

June 30 / CNY million	Amount
Bank principal	27,568
Lease carrying liability	1,522
New minority repurchase forward	4,446
Future minority dividend forward	792
Other noncurrent total including deposits	5,307
Aggregate undiscounted other noncurrent cash	5,847

The old HPE19% acquisition obligation has been settled. New about 10% minority repurchase arrangements and future-dividend obligations remain. A reduction in the old obligation and its former interest expense does not extinguish these newer claims.

一年内到期的非流动负债	3,960,331,541.84	3.63%	12,687,012,050.58	13.17%	-9.54%	一年内到期的非流动负债较本年初减少，主要是由于公司与 H3C Holdings Limited 约定的新华三剩余 19%股权的期权远期安排确认的金融负债，本期因股权购买完成，相应金融负债终止确认所致
其他流动负债	4,121,490,594.43	3.78%	2,859,397,678.13	2.97%	0.81%	其他流动负债较本年初增加，主要是由于本期随着收入扩大，公司子公司新华三预提销售返利及预提费用增加所致
长期借款	9,992,528,318.53	9.16%	10,218,169,872.92	10.61%	-1.45%	
租赁负债	709,541,544.43	0.65%	725,671,416.43	0.75%	-0.10%	
长期应付职工薪酬	43,803,349.73	0.04%	20,309,114.85	0.02%	0.02%	长期应付职工薪酬较本年初增加，主要是由于本期公司子公司新华三计提中长期激励计划所致
其他非流动负债	5,306,689,683.67	4.86%	79,313,800.66	0.08%	4.78%	其他非流动负债较本年初增加，主要是由于本期公司将与新华三少数股东约定的新华三 10.06%股权的期权远期安排，以及与新华三所有少数股东约定的未来股利分配安排确认金融负债所致
资本公积	28,075,709.16	0.03%	15,683,120.56	0.02%	0.01%	资本公积较本年初增加，主要是由于本期公司子公司确认股份支付费用增加资本公积所致
盈余公积		0.00%	22,232,017.09	0.02%	-0.02%	盈余公积较本年初减少，主要是由于本期公司因购买新华三 6.98%股权新取得的长期股权投资与按照新增持股比例计算的应享有新华三自合并日开始持续计算的净资产份额之间的差额冲减资本公积，资本公积不足冲减的，依次冲减盈余公积和未分配利润所致

2、主要境外资产情况

3、以公允价值计量的资产和负债

√适用 □不适用

单位：元

New minority-related financial liabilities. The source explains the reduction of the former current obligation and recognition of newer minority arrangements. Source: H1_2026_full, 2026-08-29, original PDF page 19. CNY yuan where printed. Original pixels retained.

五、 合并财务报表主要项目注释（续）

41. 预计负债

	2026年6月30日	2025年12月31日	形成原因
产品质量保证	286, 338, 500. 96	301, 254, 262. 45	一年以上的产品质量保证
待执行亏损合同	20, 561, 201. 16	8, 792, 388. 42	
未决诉讼	1, 979, 213. 58	1, 980, 413. 58	
合计	308, 878, 915. 70	312, 027, 064. 45	

产品质量保证是基于历史实际发生的质量维修支出，并结合维修支出的数据模型而估计出的，变动情况如下：

	2026年6月30日
期初余额	632, 505, 316. 97
本期增加	235, 987, 544. 50
本期减少	(261, 353, 454. 24)
期末余额	607, 139, 407. 23
减：被列为流动负债的部分	320, 800, 906. 27
合计	286, 338, 500. 96

42. 递延收益

	期初余额	本期增加	本期减少	期末余额	形成原因
政府补助	485, 976, 224. 25	113, 901, 167. 60	(84, 299, 363. 01)	515, 578, 028. 84	收到的政府补助

43. 其他非流动负债

	2026年6月30日	2025年12月31日
长期押金	68, 810, 056. 05	79, 313, 800. 66
与少数股东就未来分红事项的远期安排	791, 780, 085. 62	-
与少数股东就回购事项的远期安排	4, 446, 099, 542. 00	-
合计	5, 306, 689, 683. 67	79, 313, 800. 66

Minority dividend/repurchase forward and warranty notes. New minority repurchase and future-dividend forwards are separate financial liabilities. Exact contractual rate and exercise terms remain unavailable. Source: H1_2026_full, 2026-08-29, original PDF page 143. CNY yuan where printed. Original pixels retained.

Working-capital calibration

The selected operating working-capital perimeter has net inventory, receivables, receivable financing, prepayments, current/noncurrent contract assets and other receivables, less trade payables, notes payable and contract liabilities. It excludes bank, lease and minority-forward debt. June net operating working capital is about CNY30,214 million.

CNY million	June 30,2026	Dec31,2025
Notes Payable	7,849	6,377
Trade Accounts Payable	26,143	16,423
Contract Liabilities	11,574	16,882
Contract Assets Current Net	812	620
Contract Assets Noncurrent Net Within Other Noncurrent Assets	44	38
Inventory Net	51,056	43,568
Trade Accounts Receivable Net	19,775	12,663
Prepayments	3,025	2,418
Notes Receivable	412	780
Receivables Financing	365	650
Other Receivables	290	289

Each June component scales with annualized H1 recognized revenue, and the future path interpolates to matched year-end case targets. The 2026 target preserves actual H1 and scales only forecast H2 in revenue diagnostics. Stock changes differ from the issuer broad CFO adjustment rows. The model therefore labels its cash bridge an economic proxy instead of reproducing a GAAP CFO classification.

后附财务报表附注为本财务报表的组成部分

Payables and contract liabilities fund part of the operating asset base; bank debt is a separate obligation. Source: H1 report released August 29, 2026; original PDF page 57. Original printed units CNY yuan; pixels retained.

Actual H1 operating cash reconciliation

CNY million	H1 2026	H1 2025
consolidated net income	2,507	1,285
asset impairment addback	676	258
credit impairment addback	78	135
PPE depreciation	179	195
ROU depreciation	166	179
intangible amortization	47	56
investment property DA	3	5
long prepaid amortization	14	20
long asset disposal loss	(6)	(2)
PPE scrapping loss	<1	<1
fair value loss	(23)	110
finance expense CFO adjustment	452	603
investment loss CFO adjustment	135	(60)
deferred tax asset decrease	(45)	(68)
deferred tax liability increase	16	35
inventory decrease CFO adjustment	(8,227)	(7,249)
operating receivables decrease CFO adjustment	(5,599)	(651)
operating payables increase CFO adjustment	5,449	2,676
other CFO adjustment	(32)	(342)

All nineteen printed lines sum to reported H1 CFO of negative CNY4,209 million. Five asset D&A/amortization lines total CNY410 million, including ROU depreciation. Subsidiary SBC of CNY23 million is separately disclosed in its own note and has no standalone line in this reported CFO bridge. It is not added a second time to historical CFO. Contract-fulfillment cost amortization is not another automatic D&A cash addback.

Operating cash-flow reconciliation. The source CFO reconciliation distinguishes impairments, depreciation, finance adjustments and operating working-capital movements. Source: H1_2026_full, 2026-08-29, original PDF page 157. CNY yuan where printed. Original pixels retained.

Future economic cash equation

Economic CFO proxy equals modeled consolidated net income plus existing and incremental asset D&A, subsidiary SBC and noncash minority-forward accretion, plus the selected Q3 cash-classification adjustment, less the change in net operating working capital. Recurring inventory and credit losses remain an economic replacement burden. The model makes no additional impairment addback against net working-capital stocks.

Closing cash then subtracts maintenance and project capex, lease principal, ordinary minority and parent distributions, net forward payments and any additional principal repayment in the refinancing tests. Net placement proceeds are added once. Bank/lease cash interest is already in the finance-cost OP bridge. The combined historical lease/installment payment is not debited in addition to the selected lease-liability cash reduction.

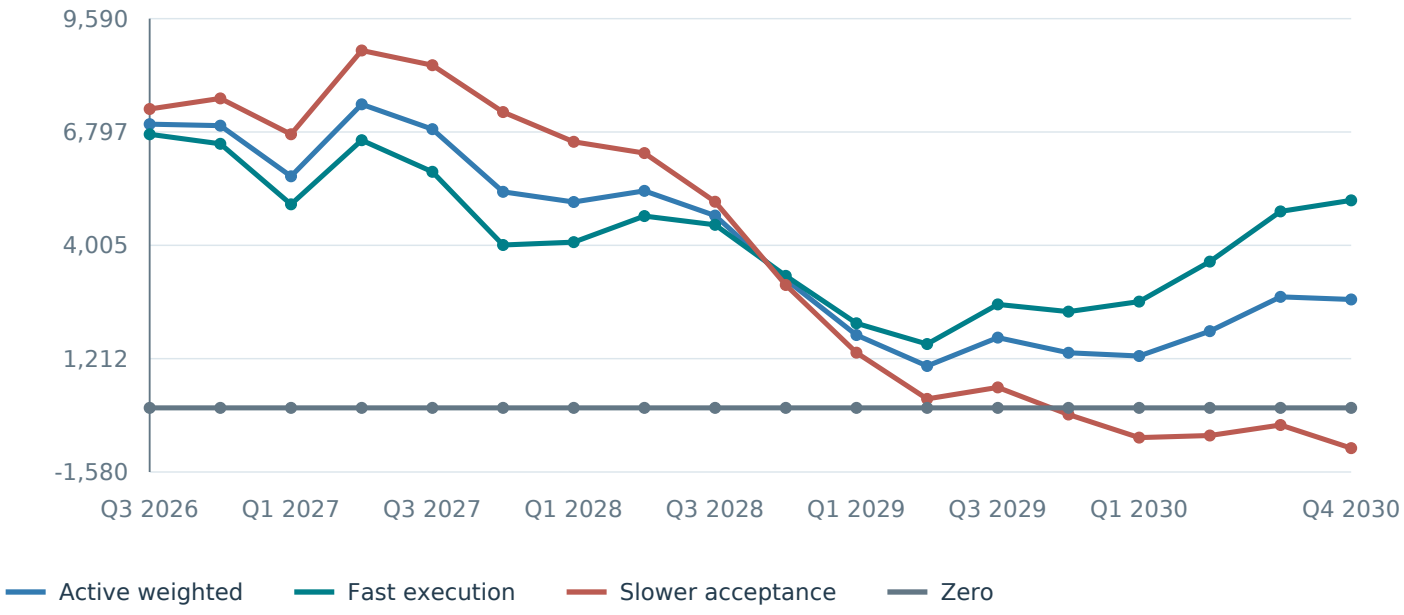

An unresolved operating-profit reconciliation has no source-proven cash split. The 50% after-tax cashability assumption and zero/full diagnostics keep that uncertainty visible. The cash screen uses a zero buffer only to identify a financing requirement; it is not a legal insolvency certificate or a zero-intrinsic-value gate.

CURRENT FRAMEWORK | OCTOBER 21, 2026

Conditional cash by execution state

Cash outcomes retain the slower-state funding gap

CNY million

Conditional cash proxies with 70% expected placement and assumed bank rollover. Weighted positive cash cannot finance a different state. Negative cash is an unmodeled funding requirement, not a price cutoff.

Quarter	Active weighted	Fast execution	Slower acceptance	Zero

The no-placement states retain the full lack of proceeds. The full-placement states retain the full proceeds and selected repayment. The active expected-cash path is an analytical blend, not a commitment by investors or banks. The slow state still requires funding under the active 70% cash probability; full placement and timely conversion materially change its headroom.

Placement, repayment and factoring

The proposed placement has gross proceeds capped at CNY5,410 million and a maximum 430 million new shares. The selected cash completion probability is 70%, with a Q2 2027 timing proxy and 2% issuance-cost haircut. Expected net proceeds are CNY3,711 million and expected bank repayment CNY1,134 million. Registration, pricing, closing and actual receipt are not verified.

The CNY3,390 million acquisition-replacement use relates to consideration already paid and does not become a second future acquisition cash outflow. The proposed research-equipment funding cap is CNY400 million against a CNY401 million project. The bank-repayment use is applied once. A factoring authorization remains separate from actual drawn financing.

上述项目拟以募集资金投入金额，公司董事会及其授权人士将根据实际募集资金净额，在符合相关法律法规的前提下，在上述募集资金投资项目范围内，可根据募集资金投资项目进度以及资金需求等实际情况，调整并最终决定募集资金的投入优先顺序及各项目的具体投资额，募集资金不足部分由公司以自有或自筹资金解决。

若本次向特定对象发行募集资金总额因监管政策变化或发行注册文件的要求予以调整的，则届时将相应调整。

6、本次发行完成后，发行对象所认购的本次向特定对象发行的股票自发行结束之日起 6 个月内不得转让。本次发行完成后至限售期满之日止，发行对象所取得公司本次向特定对象发行的股票因公司分配股票股利、资本公积转增股本等情形所取得的股份，亦应遵守上述限售安排。上述限售期届满后，该等股份的转让和交易将根据届时有效的法律法规及中国证监会、深圳证券交易所的有关规定执行。法律、法规对限售期另有规定的，依其规定。

7、本次发行决议的有效期为 12 个月，自股东会审议通过之日起计算。

8、公司一贯重视对投资者的持续回报。根据中国证券监督管理委员会《关于进一步落实上市公司现金分红有关事项的通知》《上市公司监管指引第 3 号—上市公司现金分红（2025 年修订）》的要求，公司已有完善的股利分配政策，现行有效的《公司章程》对公司的利润分配政策进行了明确的规定。

9、本次发行完成后，公司本次发行前滚存的未分配利润由公司新老股东按照发行后的股份比例共同享有。

10、本次向特定对象发行股票完成后，公司的每股收益在短期内存在被摊薄的风险。为保障中小投资者的利益，公司就本次向特定对象发行事项对即期回报摊薄的影响进行了认真分析，并制定填补被摊薄即期回报的具体措施。相关情况详见《关于 2026 年度向特定对象发行 A 股股票摊薄即期回报、填补措施及相关主体承诺的公告》。特此提醒投资者关注本次发行摊薄股东即期回报的风险，虽然本公司为应对即期回报被摊薄风险而制定了填补回报措施，但所制定的填补回报措施不等于对公司未来利润做出保证。投资者不应据此进行投资决策，投资者据此进行投资决策造成损失的，公司不承担赔偿责任。提请广大投

于2026年6月30日，本集团无应付票据到期未付。

Notes payable include commercial and bank acceptances and letters of credit. Bill-discount borrowing is also separately classified within short borrowings. Source: H1 report released August 29, 2026; original PDF page 136. Original printed units CNY yuan; pixels retained.

Bank maturity and refinancing discipline

Opening bank principal is CNY27,568 million. Current short and long bank principal totals CNY17,575 million. In no/half-refinancing tests, that current principal is scheduled over Q3 2026 to Q2 2027 as a LOW timing proxy. Mandatory placement repayment is applied first inside the quarterly obligation; the refinancing percentage then covers the remainder. The bank balance and later interest decline after repayment.

The source within-one-year undiscounted bank cash envelope is CNY18,157 million and includes contractual financing cash. It is disclosed separately and is not debited on top of the principal model. Leases, trade/notes payables and minority forward claims have separate scopes. Baseline rollover is conditional and is not a committed facility.

五、 合并财务报表主要项目注释（续）

36. 其他流动负债

	2026年6月30日	2025年12月31日
预提销售返利	1,228,396,961.34	434,930,056.99
预提费用	962,473,727.94	609,803,239.94
预提退货准备	649,897,135.31	613,768,355.47
待转销项税额	378,641,176.83	387,730,795.46
产品质量保证	320,800,906.27	331,251,054.52
其他	581,280,686.74	481,914,175.75
合计	4,121,490,594.43	2,859,397,678.13

37. 长期借款

	2026年6月30日	2025年12月31日
信用借款	3,921,506,557.34	3,142,036,290.79
保证借款	666,880,334.45	615,621,549.73
质押借款	8,536,971,053.45	8,761,610,919.66
减：一年内到期的长期借款	3,132,829,626.71	2,301,098,887.26
合计	9,992,528,318.53	10,218,169,872.92

于2026年6月30日，上述借款的年利率为2.14%至4.43%（2025年12月31日：2.14%至4.43%）。

长期借款中包括一笔金额为人民币8,074,608,700.00元的质押借款，其到期日介乎2027年12月21日至2031年8月28日，该笔借款须遵守以下承诺条款：

（i） 资产负债率（总负债/总资产）自首次提款日起至2026年12月31日止不得超过80%；资产负债率自2027年1月1日起至2031年8月28日止不得超过75%。

（ii） EBITDA利息保障倍数（EBITDA/利息费用）自首次提款日起至2026年12月31日止不得低于3倍；EBITDA利息保障倍数自2027年1月1日起至2031年8月28日止不得低于4倍。

（iii） 杠杆率（刚性负债/EBITDA）自首次提款日起至2026年12月31日止不得超过6.5倍；自2027年1月1日起至2031年8月28日止，杠杆率（刚性负债-不受限货币资金）/EBITDA不得超过4.5倍。

用于计算上述比率的负债不包括因购买新华三股权的期权而产生的相关负债。该承诺条款每年12月31日进行评估，目前无迹象表明公司履行该承诺存在困难。

Loan interest rates and annual financial covenants. Covenants exclude relevant purchase-option liabilities and are assessed at year-end. The headline group liability ratio alone does not establish breach. Source: H1_2026_full, 2026-08-29, original PDF page 141. CNY yuan where printed. Original pixels retained.

Minority forward claims and finance cost

The new repurchase-forward carrying amount is CNY4,446 million and the dividend-forward amount CNY792 million. The aggregate other-noncurrent undiscounted schedule totals CNY5,847 million. Its buckets are mapped to quarterly cash timing as an analytical proxy, with no verified exact exercise date or legally isolated principal schedule.

Ordinary minority dividends and the CNY792 million future-dividend arrangement are treated as one payment in the active cash path: that overlap is proportionally removed from aggregate forward cash. This is a model convention rather than verified legal discharge. The unnetted full-payment diagnostic preserves an upper cash-use interpretation.

The full CNY540 million aggregate undiscounted-minus-carrying gap is charged as a conservative noncash finance-cost proxy over twelve quarters from Q3 2026. It is added back once in cash because future payment buckets already include it. The difference is not an issuer-identified exact interest allocation. Zero and twice-accretion tests show the uncertainty, including modeled tax effects.

The issuer liability rollforward separates cash movements from noncash recognition of new minority arrangements. Source: H1 report released August 29, 2026; original PDF page 156. Original printed units CNY yuan; pixels retained.

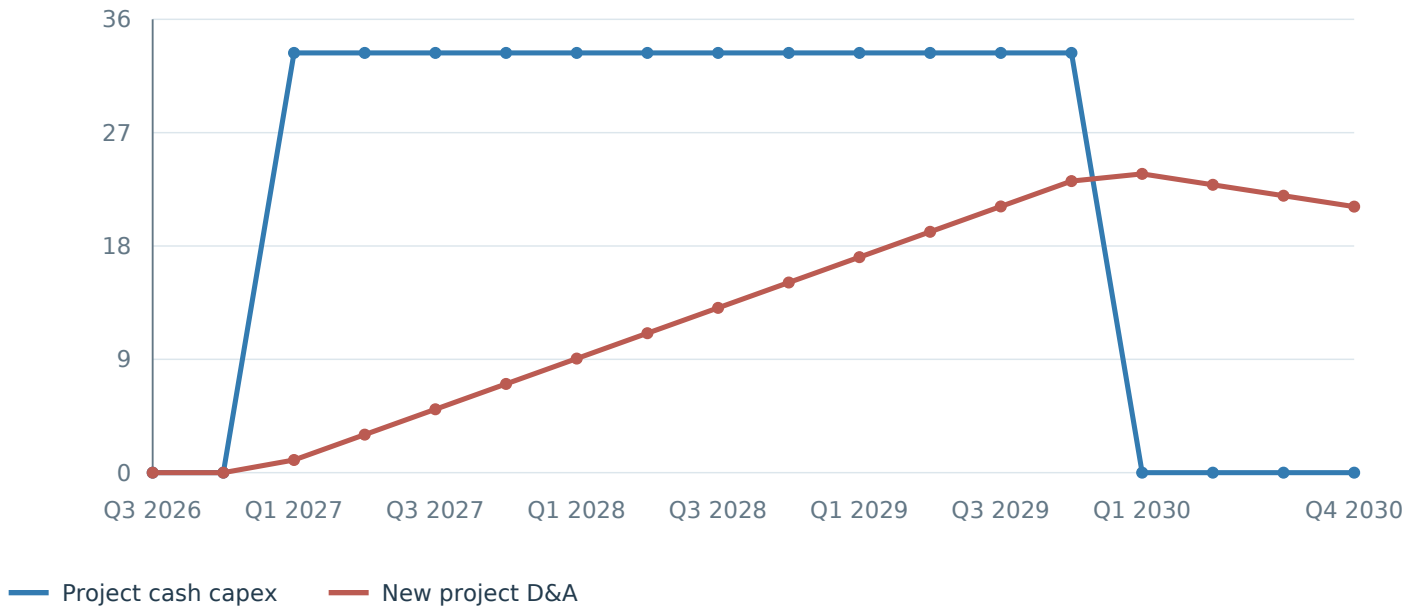

Equipment, capex and depreciation

Maintenance cash capex is six per thousand of recognized revenue. The CNY401 million research-equipment project is added over twelve quarters from Q1 2027. Hardware is CNY217 million, software CNY125 million and other project costs CNY59 million. The active planning proxy capitalizes the full project; CNY1 million is own cash above the proposed funding cap.

The selected lives are five, three and five years, with midpoint commissioning and a final half-quarter at retirement. These are explicit LOW life proxies, especially for the other-cost category. The full-other-cost immediate-expense diagnostic removes that category from depreciation and pays its expense through OP. New depreciation is paid in OP and added back once in the cash bridge.

New project cash and operating depreciation

CNY million

Model project tranches and useful-life proxies. Capital cash and noncash depreciation are distinct; the latter is added back once in economic cash.

CURRENT FRAMEWORK | OCTOBER 21, 2026

Replacement leases and ROU assets

The selected recurring replacement assumption adds noncash lease liability and ROU assets equal to each quarter principal cash reduction. Lease carrying value stays at CNY1,522 million. ROU assets begin at CNY1,361 million and roll forward by replacement additions less the source-calibrated ROU depreciation. That depreciation is already inside operating costs and the existing D&A cash addback.

Quarter	Open ROU	Noncash additions	ROU depr.	Close ROU	Lease carrying	Principal cash
Q3 2026	1,361	108	100	1,369	1,522	108

CURRENT FRAMEWORK | OCTOBER 21, 2026

Conditional funding and decision relevance

The active weighted cash minimum is about CNY1,032 million. The fast execution state reaches a minimum about CNY1,573 million, while the slower state reaches negative CNY992 million under 70% expected placement. No-placement minima are about negative CNY1,109 million and negative CNY3,721 million. Full-placement minima are about CNY2,723 million and CNY188 million. These distinct outcomes must remain visible.

A negative conditional path identifies a funding action requirement before extra unmodeled loans or equity. Growth and operating ceilings remain conditional on acceptance and financing. Weighted positive cash does not provide actual cash to another state. Facility access, collateral, refinancing terms, parent access, taxes and exact minority-contract dates remain material unknowns.

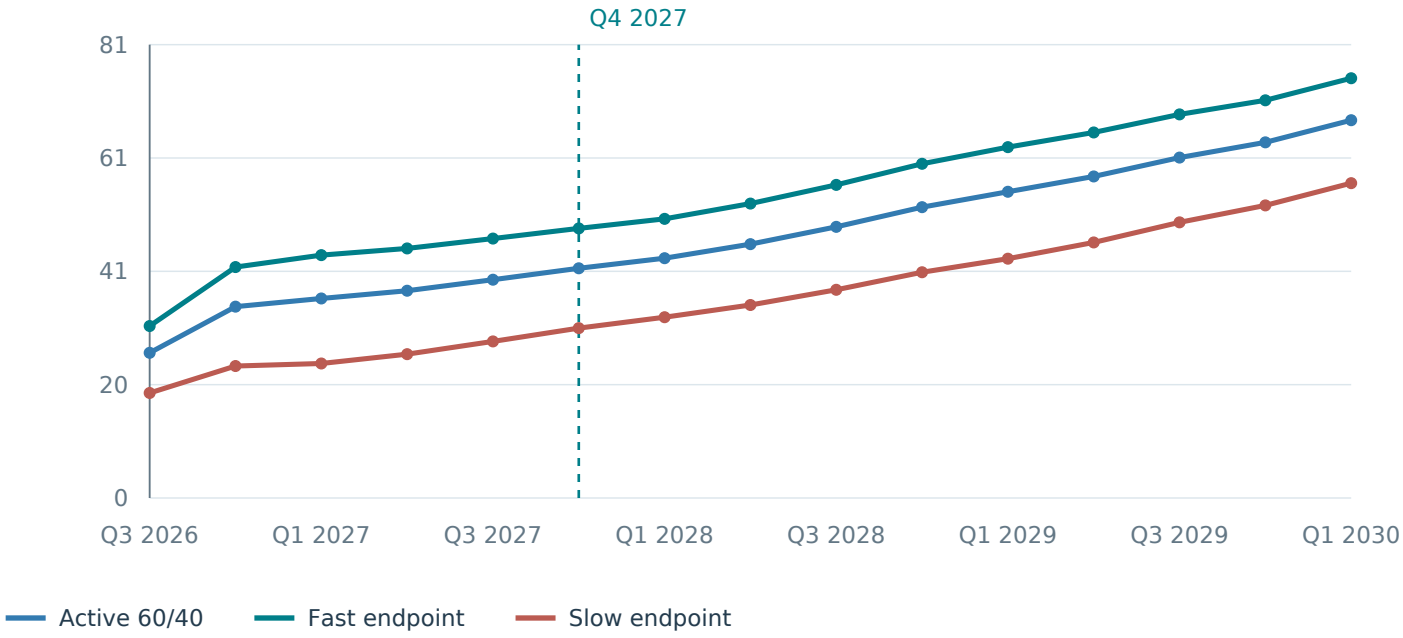

The current method produces a conditional operating ceiling, not a certification of a fully funded future balance sheet. Source maturity stress, slower delivery, no/full placement, working capital and rate tests show how financing outcomes can change. Negative cash does not automatically set intrinsic value to zero.

CURRENT FRAMEWORK | OCTOBER 21, 2026

All fifteen operating ceilings

Current-quarter-plus-next-three operating ceilings

CNY per share

Each value uses its own four-quarter window: summed Chinese statement OP x20 x 88% / 3,290 million shares. Model estimates; no current price ratio. The active marker is Q4 2027.

Each row contains the current ceiling quarter and next three operating-profit terms. The formula uses full precision. Whole reader values are approximations and can show a rounded sum difference; they do not replace the exact model inputs. No annual total, calendar roll or analyst target replaces these chains.

Endpoint and probability contributions

Quarter	Fast	Slow	60% fast	40% slow	Active
Q3 2026	31	19	19	8	26
Q4 2026	41	24	25	9	34
Q1 2027	44	24	26	10	36
Q2 2027	45	26	27	10	37

Q4 2029	71	53	43	21	64
Q1 2030	75	57	45	23	68

The outcome weights are applied once. Base 65 is a thesis score and is not another realization probability. The protected Excel Base 67 is a separate retained control.

CURRENT FRAMEWORK | OCTOBER 21, 2026

Thirty-five same-build diagnostics

These are controls on the current model, with the same accounting and conditional cost framework. They are not separate active forecasts. The table shows the first, active and last ceiling windows and the minimum probability-weighted cash for each diagnostic. Full matrices follow so finite near and later effects remain visible.

Diagnostic	Q3 2026	Q4 2027	Q1 2030	Min. cash	First negative cash

Tax 15% and Q3 bridge	26	41	68	2,111	None in mean path
Tax 25% and Q3 bridge	26	41	68	(199)	Q2 2029
Q3 NI attribution 85%	26	41	68	1,043	None in mean path
Q3 NI attribution 90%	26	41	68	1,025	None in mean path

Diagnostic	Q3 2026	Q4 2027	Q1 2030	Min. cash	First negative cash
Placement fee 0%	26	41	68	1,109	None in mean path
Placement fee 5%	26	41	68	917	None in mean path
Actual shares + no placement	30	47	78	(1,649)	Q1 2029

The Q3 NI-attribution tests only change the Q3 adjusted-parent-profit inversion. Future parent attribution and all valuation windows retain 88%. The tax15%/25% tests affect forward taxes as well as that bridge. The no-placement/actual-share diagnostic pairs actual issued shares with no placement proceeds; it does not assert a completed issue.

CURRENT FRAMEWORK | OCTOBER 21, 2026

Diagnostic assumptions and interpretation

Control	Scope / selected bounds
Pricing	0%, 40%, 100% and full overlap; finite direct premium; base execution states unchanged
Digital margin / receipts	Plus or minus 100bp digital GM; future receipts scale 90% / 110%, with actual H1 fixed and consistent WC
Placement	0% / 70% / 100% cash completion; 2Q delay;0% / 2% / 5% fees; joint case cash paths retained
Working capital / bank rate	Projected WC change 80% / 100% / 120%; bank rate 214 / 350 / 443bp
Taxes / preliminary profit	Tax 15% / 20% / 25%; Q3 adjusted NI low/mid/high; Q3 parent inversion 85% / 88% / 90%
Financing / dividends	0% / 50% / 100% refinancing of remainder after mandatory repayment; zero/base/twice parent annual distribution
Forward claims	Timing 2Q earlier / later; dividend overlap 100% / 0%; accretion zero / base / twice
Q3 cash / equipment	Residual cashability 0% / 50% / 100%; other project cost capitalized or immediately expensed
Shares	Maximum 3,290M active proxy; actual 2,860,079,874 claims with no-placement cash diagnostic

Single-factor diagnostics are not a joint worst-case bound. Several uncertainties can move together, including input costs, acceptance, collateral, funding and FX. The source evidence does not supply a measured joint distribution. Analytical scenario weights are therefore kept separate from source-authenticity judgments.

CURRENT FRAMEWORK | OCTOBER 21, 2026

Triggers that change the operating assessment

Evidence test	Precommitted response
Profitable accepted growth and funded conversion improve	Consider fast execution 80%; recalculate receipt, cost and cash outcomes.
Margin or cashconversion deteriorates	Consider fast execution40%; retain paid costs and funded growth constraints.
Observed new-order net price terms improve	Consider pricing 60% with matched cost and acceptance evidence.
Competitive or input-cost pass-through weakens net capture	Consider pricing 20% or revise the conditional net endpoint.
Binding registration/closing terms improve financing certainty	Consider placement 90%; do not equate approval with cash received.
Material placement delay/withdrawal	Consider placement 30% and revise timing/funding paths.
Oct26factoringvote; actual Q3 release; forward terms	Reconcile dated new information, overlaps and claimcash. No event is assumed completed.

These are prospective tests, not automatic changes to the protected Excel Base. Independent evidence can change the selected probability, conditional amount, paid cost or timing. Repeated announcements from the same event are one signal.

CURRENT FRAMEWORK | OCTOBER 21, 2026

Five risk classes

Risk class	Economic consequence	Deduction
Competitive capture and mix	Server competition and lower-margin mix can consume a large revenue opportunity.	-1
Acceptance and working capital	Accepted receipts can lag material purchases and customer advances.	-1
Borrowing and parent access	Rollover, collateral and subsidiary-to-parent cash access are conditional.	-1
Minority contracts and governance	Exercise terms, future-dividend netting and claim costs remain uncertain.	-1
Export, policy and supply	Component access, substitution, regulation and customer budgets can change.	-1

The five one-point deductions reach the framework maximum risk deduction of 5. A higher risk score does not replace the explicit cash and operating scenarios. Source gaps remain prominent, with no covenant-breach or financing-complete assertion.

CURRENT FRAMEWORK | OCTOBER 21, 2026

Additive analytical scorecard

Category	Points	Max.	Reason
Core thesis	11	20	Useful local integration/channel capability; competitive alternatives limit bottleneck capture.
Cycle stage	9	10	AI infrastructure demand is expanding, with acceptance and funding constraints.
TAM expansion	8	10	Networking/system capability supports adjacent enterprise/edge workloads, within bounded envelopes.
Catalysts	4	5	Dated profit, financing and contract tests can improve or weaken visibility.
Macro	9	10	Chinese AI infrastructure and digital substitution support demand; policy/supply remain risks.
Alpha	3	5	Local-language accounting, system mix and financing interpretation provide a useful evidence edge.
Risk deduction	-5	0	Five risk classes above.
Total	39	60	Analytical normalized score 65; protected Excel Base 67 is separate.

The analytical score is 39/60, or 65, consistent with a Watchlist assessment. The protected Excel Base remains 67. Neither score is used as a second probability multiplier on operating inputs or ceiling values.

Cross-book implications and investment conclusion

Unisplendour adds exposure to Chinese AI networking, systems and acceptance. Memory pricing, optical component wallets and power construction remain separate mechanisms. ANET offers a networking margin/acceptance cross-check; MRVL and AVGO illustrate silicon integration; AAOI, LITE and COHR illuminate optical architectures. None of those associations verifies H3C procurement, creates a new model for another company or adds a second supplier wallet to this forecast.

The investment case rests on more accepted infrastructure work and disciplined profit capture. Durable networking mix, funded conversion, continued product compatibility and tighter operating execution could make earnings exceed a hardware-volume reading. Slower customer acceptance, supplier cost pressure or financing difficulty can leave high demand with weak shareholder cash.

The current assessment is Watchlist / Path B beneficiary. The complete fifteen-quarter ceiling path is a conditional operating valuation. A current stock return or allocation conclusion requires a dated quote in the separate live portfolio layer.

Dividend and cash-source context

第四节 公司治理、环境和社会

一、公司董事、高级管理人员变动情况

√适用 □不适用

姓名	担任的职务	类型	日期	原因
李涛	董事	被选举	2026 年 4 月 24 日	经公司 2026 年第二次临时股东会审议通过，补选李涛先生为公司董事
	董事长	被选举	2026 年 6 月 29 日	经公司第九届董事会第二十九次会议审议通过，选举李涛先生为公司董事长
王洪学	董事	被选举	2026 年 8 月 25 日	经公司 2026 年第六次临时股东会审议通过，补选王洪学先生为公司董事
王慧轩	董事	离任	2026 年 4 月 7 日	工作分工调整
于英涛	董事长	离任	2026 年 6 月 26 日	个人原因

二、本报告期利润分配及资本公积金转增股本情况

□适用 √不适用

公司计划半年度不派发现金红利，不送红股，不以公积金转增股本。

三、公司股权激励计划、员工持股计划或其他员工激励措施的实施情况

√适用 □不适用

1、股权激励

□适用 √不适用

2、员工持股计划的实施情况

√适用 □不适用

报告期内全部有效的员工持股计划情况

员工的范围	员工人数	持有的股票总数（股）	变更情况	占上市公司股本总额的比例	实施计划的资金来源
紫光股份有限公司首期 1 号员工持股计划参加的员工范围是公司董事、监事（不包括外部董事和监事）和高级管理人员及部分员工	29	454,284	无	0.02%	员工的合法薪酬和通过法律、行政法规允许的其他方式取得的自筹资金
紫光股份有限公司首期 2 号员工持股计划参加的员工范围是新华三集团有限公司及其子公司、下属公司及分支机构的员工	1,513	4,919,489	无	0.17%	员工的合法薪酬和通过法律、行政法规允许的其他方式取得的自筹资金

	加：期初现金及现金等价物余额	66	8,574,301,330.99	7,316,512,142.72
六、	期末现金及现金等价物余额	66	6,729,092,263.54	7,435,808,965.66

后附财务报表附注为本财务报表的组成部分

Consolidated financing cash includes subsidiary minority capital, borrowing, distributions/interest and other financing payments. Source: H1 report released August 29, 2026; original PDF page 64. Original printed units CNY yuan; pixels retained.

五、 合并财务报表主要项目注释（续）

29. 应付账款

（1） 应付账款列示

	2026年6月30日	2025年12月31日
1年以下	25, 271, 452, 110. 43	15, 417, 705, 680. 68
1年至2年	285, 843, 108. 71	411, 548, 160. 81
2年至3年	249, 312, 386. 79	310, 929, 525. 26
3年以上	335, 935, 147. 53	282, 521, 999. 47
合计	26, 142, 542, 753. 46	16, 422, 705, 366. 22

截至2026年6月30日，应付账款余额主要是应付供应商的采购货款、项目款等，无账龄超过1年的重要应付账款。

30. 预收款项

（1） 预收款项列示

	2026年6月30日	2025年12月31日
1年以内	1, 596, 578. 95	1, 452, 235. 92

截至2026年6月30日，预收款项余额主要是预收的房租。

31. 合同负债

（1） 合同负债列示

	2026年6月30日	2025年12月31日
预收产品合同款	8, 176, 306, 330. 82	13, 370, 235, 620. 65
预收服务合同款	3, 397, 471, 412. 70	3, 512, 066, 753. 69
合计	11, 573, 777, 743. 52	16, 882, 302, 374. 34

预收产品合同款为已向客户收取销售产品款项但产品尚未交付或尚待客户验收，本集团履约义务在客户取得商品控制权时履行完毕并满足收入确认条件；预收服务合同款为已向客户收取的维保服务、运维服务、培训服务、建造服务、安装服务和其他增值服务款项，并根据服务履约进度或客户验收完成时点确认收入。

无账龄超过 1 年的重要合同负债。

Contract advances await the recognition events described in the source; trade AP and advances are separate. Source: H1 report released August 29, 2026; original PDF page 137. Original printed units CNY yuan; pixels retained.

Source registry and completeness boundary

Primary issuer documents are preserved as retrieved. Official CNInfo/SZSE files and mirrors of issuer originals are identified separately. The financial report was read on relevant complete pages, not claimed as a verbatim call. No raw third-party licensed exhibit is used to assert a newly verified customer order.
