Yoke: qualified materials turn higher wafer complexity into repeat sales

Yoke supplies process materials that chipmakers must qualify before using in production. More deposition steps, higher memory layer counts and a larger installed manufacturing base can raise recurring chemical consumption. Qualified products, local delivery systems and technical support create a route to repeat business as customers expand output. The opportunity depends on accepted wafer production, material content and Yoke's qualified share.

The most useful alpha is the distinction between installed capacity and profitable, funded customer acceptance. New chemistry can increase content per wafer, while mature materials face price competition. Cash committed to factories, research and investor exits can grow before the corresponding receipts. The active model prices these benefits and obligations together.

Classification: Path B beneficiary with product-specific qualification barriers. Existing processes and customer relationships matter, but customers retain competing suppliers and alternative chemistries. The group does not have a demonstrated exclusive claim on the broader AI spending wallet. Holding status is unavailable in the saved portfolio row.

Current case	Value / scope
Active operating ceiling	CNY 118 per ordinary share; Q4 2027
Earnings window	Q4 2027 through Q3 2028
Valuation	20x consolidated core operating profit / starting-quarter ordinary share proxy
Analytical score	43/60; rounded 72
Protected Excel Base	73; separate from analytical score and contract probabilities
Known starting shares	476 million, rounded; future conditional share settlements are modeled separately
Saved quote	CNY 149, rounded; source quote date unavailable; no fresh upside or market capitalization claimed
Latest financial actual	H1 2026 filed August 26; Q3 remains Model
Management evidence	Two complete written earnings Q&A records, plus September business update; audio unavailable
Confidence	LOW for future qualified volumes, price, cash schedules and conditional exit terms

Display figures are whole CNY millions unless labeled otherwise. Nonzero amounts below one million appear as <1. All source images retain original units and precision. The linked model retains exact calculations; rounding can make displayed sums differ.

Where Yoke captures the value

Deposition precursors supply selected atoms into thin films; high purity, process compatibility, safe delivery and consistent lots matter to chip yield. Photoresists participate in patterning. Specialty gases support etch, cleaning and other industrial processes. Rental and engineering services include delivery systems and acceptance-driven work. These activities sit at different points in a fab's operating and capital cycle.

A memory producer's selling-price increase can improve its investment budget without immediately changing the number of wafers or the amount of Yoke material consumed. The direct receipt bridge is accepted wafer output multiplied by qualified material content and supplier capture, with the agreed material price applied afterward. Management's customer demand comments support that bridge without establishing a specific Yoke purchase order.

The five formal revenue-note buckets are exhaustive. LDS, powder, precursor subproducts and internal intermediate materials cannot be added as fresh group revenue on top of those buckets. Group remaining performance obligations also overlap the existing recognized revenue path.

YOKE TECHNOLOGY | FRAMEWORK 8 | OCTOBER 21, 2026

Cycle, market expansion and company capture

AI memory, advanced logic and packaging support the near-term cycle. More layers and more demanding structures can increase deposition, patterning and delivery work per wafer. Installed equipment creates an opportunity for consumables only after loading and customer qualification. The semiconductor and resist opportunities are in a ramp, while established chemical and service activities have more mature economics.

A later expansion into industrial and physical-AI applications could broaden wafer demand. The active model gives that long-range channel a 50% relevance judgment and 100% overlap with the existing customer-output envelope, yielding zero additional sales. Wider distributed compute has a 20% relevance judgment and the same full overlap. These phase judgments are separate from company execution probabilities and the analytical score.

Public data do not identify current qualified SKU volumes, realized ASPs, material intensity by customer or complete fab-start schedules. The company-specific Plan B retains the old accepted-revenue envelope as a bounded reference, decomposes semiconductor throughput from content and separates advanced-resist qualification. This is a LOW-confidence capture proxy; no broad market forecast is converted directly into company revenue.

Latest results, guidance and management completeness

The newest located written earnings events are the May 19, 2026 annual-results meeting with 33 questions and answers and the May 16, 2025 meeting with 48. Both complete issuer records were read. The September 8, 2026 business update has six questions and answers and adds more recent operational evidence. Audio, a conventional quarterly conference call and an unrecorded prepared presentation were not located and are not claimed complete.

Management describes UP Korea as near full and Jiangsu as having more available loading capacity, with further expansion and utilization milestones toward the end of 2027. Readiness, installed nameplate capacity, loading and customer acceptance remain different events. The slower operating state delays receipt growth by two quarters and retains paid factory staff on the original schedule.

May management answers describe annual product volume and price negotiations, relatively stable high-end pricing and competition in ordinary silicon chemistry. Customers' longer memory commitments do not establish Yoke exclusivity. No general high-end selling-price premium is added. The slower state includes ordinary semiconductor and resist price pressure.

The latest actual financial anchor is the first half of 2026 filed on August 26. The official recent filing check located the existing October 15 Yarui transaction and board notices, with no new third-quarter numerical result through the checked listing window. Q3 and every later modeled quarter retain Model status. No unsupported numerical management guidance is invented.

SOURCE METHOD APPENDIX

Management record completeness

The newest two located earnings-specific events are published written exchanges dated May 19, 2026 and May 16, 2025. The September 8, 2026 record is a supplementary investor meeting. The complete located records contain 33, 48 and 6 questions respectively. No conventional quarterly spoken earnings call or independent audio comparison is claimed.

Event / published	Written record	Completeness / remaining gap
2026-05-19 / 2026-05-20	33 published Q&A; all located written pages read	No audio/telephone conference represented by the located written record; event is text format. No claim to a complete spoken recording. No distinct prepared-speech or spoken closing published in the written record; not invented.
2025-05-16 / 2025-05-19	48 published Q&A; all located written pages read	No audio/telephone conference represented by the located written record; event is text format. No claim to a complete spoken recording. No distinct prepared-speech or spoken closing published in the written record; not invented.
2026-09-08 / 2026-09-09	6 published Q&A; all located written pages read	No audio/telephone conference represented by the located written record; event is text format. No claim to a complete spoken recording. No distinct prepared-speech or spoken closing published in the written record; not invented.

Original exhibit YOK-F12

	11. 前段时间卖掉子公司部分股权，回笼的资金是有什么大概用途规划吗 答：您好。放弃优先认股权后募集的子公司资金，专门用于偿还银行借款。谢谢！ **12. 公司的半导体光刻胶以及封装光刻胶都有什么进展了吗？这两个才是高毛利的产品。** 答：您好。半导体光刻胶以及封装光刻胶在客户的验证测试积极推进，已通过的产品产线正在建设。谢谢！ **13. 沈总好，绿氢作为未来能源发展方向公司对液氢的保温材料布局了嘛？-200 多℃比 LNG 更严苛** 答：您好。公司目前没有绿氢的布局。谢谢！ **14. 能否请您简单介绍下咱们湿电子化学品有哪些主要的客户，目前产能爬坡的情况如何，该业务的技术竞争力在行业内处于什么水平？** 答：您好。湿电子化学品客户包括国内外主流半导体晶圆厂和显示面板厂，为满足客户持续增长需求新的产能将在下半年投产。谢谢！ **15. 请问咱们公司硅微粉的技术在国内处于行业领先，还是追赶者？目前高端硅微粉的产能利用率是多少，有哪些主要的客户？伴随 PCB 市场需求迅速扩张，咱们是否有进一步新增产能的计划？** 答：您好。子公司浙江华飞电子在 2016 年就是硅微粉行业的技术标准制定参与者，并是国内较早完成部分产品替代日本进口，技术处于行业领先。随着芯片封装产能及高频高速覆铜板的需求增长，对高端硅微粉的需求也相应增加，公司成都工厂的产能有增加计划。谢谢！ **16. 前驱体二期及多个在建项目正式转固后，新增固定资产折旧将对毛利率产生一次性影响。公司有没有测算过折旧对毛利率的大致影响幅度？下半年通过提升稼动率和高端产品占比来对冲折旧成本，是否有信心保持毛利率稳定？** 答：您好。随着产能增加，折旧会相应增长，同时对客户的供应品种、供应量和供应能力都会提高，并能保持毛利率。谢谢！ **17. 公司有哪些材料可用于 CoWoS 先进封装？芯片堆叠技术对公司的产品有哪些影响？** 答：您好。公司的半导体前驱体材料、半导体光刻胶及配套试剂等，都能用在 COWOS 封装结构。谢谢！ **18. 请问截止目前的股东人数是多少？** 答：您好。截止 2026 年 5 月 8 日，公司股东户数为 62220 户。 **19. 公司 2025 年度拟每 10 股派 3.1 元，在 2026 年业绩持续增长的预期下，是否有中期分红的规划？**

May 19 written management Q&A, includingQ16 on depreciation rising with capacity andQ17 on packaging-material applications. Published May 20. Management supplies qualitative cost/qualification statements; no numerical future margin or incremental depreciation budget is disclosed. Source: YOK-IR0519, 2026-05-20, original PDF page 3. Original exhibit YOK-F13

	答：您好。公司注重对投资者的现金分红回报，如现金流允许并履行完相关法定程序后，会有中期分红。谢谢！ **20.随着国内存储大厂产能持续扩张，公司目前境内客户收入占比大概是多少？未来境内客户的增长是否会快于境外客户** 答：您好。国内 FAB 厂的产能增长速度较海外产能增长快。半导体材料的国内外收入占比基本持平。谢谢！ **21.公司目标是做成平台型的材料厂商，后期有什么考虑并购或准备新上的项目呢** 答：您好。公司目前新兴材料产品线较丰富，其中部分属于关键战略性材料，如果有合适的项目并购机会，会予以考虑。谢谢！ **22.我们公司的董秘平时回复得太少了，有消息希望能及时沟通，有时几个月也没有一点信息的。** 答：您好。公司会提高对互动易平台问题回复的及时性，感谢建议。 **23.覃总好。人民币汇率波动对公司海外业务收入和利润的影响有多大？公司有没有做套期保值等汇率风险管理？** 答：您好。汇率波动对外汇资产敞口会产生汇兑损益，公司在开展套期保值的汇率风险管理业务。谢谢！ **24.1. 请问公司 HBM 前驱体在手订单、产能释放节奏，对接各大算力芯片供应链进展如何？ 2. 海外半导体管控持续收紧，公司开拓国内存储厂商客户有无明确落地规划？ 3. 现阶段行业普通前驱体价格下跌，公司产品毛利是否承压？高端 HBM 前驱体长协价格是否稳固？ 4. 公司光刻胶业务何时正式放量盈利，账面商誉是否存在减值计提风险？** 答：您好。1、公司 HBM 前驱体一直有供应，随着国内和海外 FAB 厂 HBM 产能增长，前驱体材料需求也持续增长；2、国内存储厂商的新客户开拓或新产品导入在持续推进；3、目前硅基前驱体国内有竞争和价格波动。高端的前驱体材料因为技术壁垒很高、客户粘性强，价格稳定；4、公司光刻胶资产组对应商誉不存在减值风险。谢谢！ **25.请问公司在十五五期间制订了怎样的发展战略？公司和其他半导体材料友商相比，核心竞争优势是哪些？** 答：公司继续强化在半导体材料和 LNG 船舶材料的竞争力，进一步提升产品研发能力和突破技术壁垒，建设成全球领先的材料公司。公司同时具有海外和国内研发，生产基地，拥有更好的客户资源和最先进的技术节点产品开发的机会。 **26.今年二季度半导体前驱体产能利用率环比有增长吗？下半年前驱体业务会持续向好吗？** 答：您好。今年前驱体出货比去年同期有增加。随着国内存储客户产能

May 19 written management Q24: existing HBM supply, continued customer introduction, ordinary-precursor competition and stable high-end precursor prices. Published May 20. Investor questions and management answers must remain distinct. The page supplies no quantified order value, wallet share or guaranteed product margin. Source: YOK-IR0519, 2026-05-20, original PDF page 4. Original pixels retained. Original source.

Original exhibit YOK-F14

	爬坡，公司产品也会相应增加出货量。 **27.覃总好，两个问题请教： 1. Q1 因 LNG 交付节奏影响了营收，请问下半年 LNG 项目集中交付的时间节点大概在 Q3 还是 Q4？全年 LNG 业务营收能否实现同比增长？ 2. 在前驱体订单增长和 LNG 订单饱满的背景下，公司对 2026 年全年整体营收和利润的展望如何？** 答：您好。一季度春节因素，LNG 项目交付会相应减少，下半年船厂施工逐步饱满，将提高交付量。公司对 2026 年的持续增长有信心。谢谢！ **28.沈董好。公司提到前驱体订单呈增长趋势，请问能否给出更具体的指引——比如 2026 年全年前驱体出货量同比增速的大致区间？存储大厂产能爬坡后，公司前驱体供货份额是否有进一步提升的空间** 答：今年前驱体出货比去年同期有增加。随着国内存储客户产能爬坡，公司产品也会相应增加出货量。 **29.1. 25 年披露的前驱体 601 吨年产能，是否已含二期产线？目前还在试车，没正式转固对吧？ 2. 二期 6 月正式投产，是不是 7 月才开始计提折旧，现阶段试车阶段不计提？ 3. 行业 8 成稼动率就能全覆盖成本折旧，咱们前驱体现在不到 6 成，大概何时能摸到 8 成盈亏线？ 4. 硅微粉现在 81%稼动率，是不是已经稳稳盈利，摊完所有固定成本了？** 答：您好。1、披露的前驱体产能均为已通过试运行转固的产线，未转固的不包括。2、不清楚您说的二期是哪个项目。3、前驱体产能将逐步提高，已在盈利。4、硅微粉产能利用率逐步提高，已在盈利阶段。 **30.1. 咱们现成的 TFT 光刻胶，能不能微调配方，用到先进封装玻璃基板上做线路蚀刻显影？有没有布局规划？ 2. 后续是不是打算减少传统面板市场投放，主攻半导体玻璃载板这条高利润赛道？ 3. 国内二期前驱体客户认证进度咋样，下半年订单能不能起来拉满产能？ 4. 韩国成熟产能和国内新产能，客户跟产品规格是怎么搭配协同的？ 5. 下半年新折旧加上来，公司准备怎么提稼动率对冲成本压力** 答：TFT 光刻胶跟先进封装光刻胶的确比较接近，但是又有所不同。我们也在改造部分 TFT 产能，生产先进封装光刻胶，包括可以应用于玻璃基板的光刻胶。我们客户在持续认证我们前驱体产品，下半年产能会有进一步提升。韩国产能面向国外大客户，宜兴产能主要面向国内客户。 **31.前驱体产能目前较年报是否有提升？提升瓶颈在下游客户吗？光刻胶年报产能利用率很低，是新上产能的原因吗？目前的利用率在多少？** 答：前驱体产能目前没有提升，未来根据客户需求增长会增加新产能和新产品。光刻胶产品产能利用率低是在客户导入阶段，产能逐步释放。 **32.与主要客户的长协如海力士长鑫等在什么时候到期？是否有涨价预期？对客户 HBM 产线的前驱体验证进度如何？** 答：我们与客户每一年初会商议具体产品数量与价格。少数产品由于原

May 19 written managementQ29 to 32: reported capacity covers trial-completed and fixed-asset-converted lines, current profitability, validation, incremental capacity and annual quantity/price negotiation. 参与单位名称及人员姓名	泰康资产　魏博、奚佳 中泰证券　杨旭、冯光亮 长城财富保险　药晓东
时间	2026 年 9 月 8 日下午 15:00—16:00
地点	公司董事长会客室
上市公司接待人员姓名	董事长兼总经理：沈琦 其他上市公司业务负责人
投资者关系活动主要内容介绍	和投资机构参会人员就公司未来产品规划、半导体材料核心优势等事项进行了深入沟通，充分交流了相关情况，主要问题如下： **1、目前存储行业整体情况如何？** **答：**在 AI 需求驱动下，半导体存储行业自 2025 年第四季度进入景气上行周期。公司半导体材料业务的主要客户集中在存储领域，以 DRAM 晶圆制造厂商为主。主流晶圆厂至 2028 年的产能多已通过长期协议被下游客户锁定。预计 2026-2027 年存储市场供需偏紧，2028-2030 年行业新增产能逐步释放。后续供需格局将取决于 AI 算力需求的持续性以及个人消费端市场复苏情况。

September 8 issuer written IR meeting record, including management's memory-cycle and customer-demand discussion. This is an issuer written meeting record, not an independently checked audio transcript or a numerical Yoke long-range sales guide. Source: YOK-IR0908, 2026-09-09, original PDF page 1. Original pixels retained. Original source.

Original exhibit YOK-F17

	2、请介绍一下公司前驱体产能储备情况。 **答：**公司主要存储晶圆厂客户计划于未来 3- 5 年实现产能翻倍。为此，在中韩双生产基地的基础上，公司今年继续推动两个生产基地的扩产建设，相关新增产能预计于明年年底前建成，将进一步保障未来对主要晶圆厂客户的产品供应。 **3、公司前驱体现有产线稼动率情况是怎样的？** **答：**韩国 UP Chemical 公司基本满产，江苏先科目前暂未达到满产状态。预计两处生产基地将于明年年底接近满产。 **4、公司先进逻辑用和先进存储用前驱体的业务情况是怎么样的？** **答：** 2025 年公司先进逻辑用前驱体营收大幅增长，预计 2026 年该项业务有望维持相近增长水平，随着新增客户持续导入，2027 年业务规模将继续保持增长态势。先进存储用前驱体业务 2026 年增速低于先进逻辑用前驱体，新增产能预计于明年下半年开始有明显提升。 **5、公司怎么看以钼代钨给公司带来的业务机会？** **答：**钼由于电阻率低、价格便宜的优势，在 300 层以上 NAND 应用前景广阔。由于钼属于固态源，对专用前驱体材料、钢瓶、输送设备及配套湿化学品解决方案存在特定要求，未来会给公司带来多元的新业务机会。 **6、公司的 LDS 业务经营情况如何？** **答：**从 2026 年半年报财务数据来看，公司 LDS 业务暂未体现出营收增长，主要是由于上游阀门供应紧张及晶圆厂端由于生产任务饱满，装机验收人力配置不足，部分订单尚未完成收入确认。从经营情况来看，该业务今年的出货量有所提升，后续业务有望保持延续态势。

September 8 management statements on customer capacity plans, China/Korea expansion, utilization, advanced-memory timing, Mo opportunity and LDS acceptance constraints. Capacity plans, customer qualification, shipments and recognized revenue are distinct. The Mo opportunity is unquantified; no separate new TAM value is selected here. Source: YOK-IR0908, 2026-09-09, original PDF page 2. Original pixels retained. Original source.

Actual financial anchor and accounting perimeter

Period / status	Revenue	COGS	Gross profit	Core OP	CFO	Cash capex
Q1 2026 Actual	1,973	1,356	616	342	(42)	154
Q2 2026 Derived	2,540	1,809	732	395	297	81
H1 2026 Actual	4,513	3,165	1,348	736	255	235

H1 consolidated core operating profit is the five-business gross profit less selling, administration, research and turnover taxes. Statutory operating profit is about CNY 745 million; parent net income is about 561 and minority net income about 76. A conflicting MD&A operating-profit number is retained as a source error, with the exact statement controlling. Core OP, statutory OP and parent earnings have different perimeters.

H1 2026 formal bucket	Revenue	COGS	Gross profit	GP rate
Semiconductor business	1,448	839	608	42%
Photoresist business	1,194	1,002	192	16%
Chemical materials	1,292	1,016	276	21%
Specialty gases	245	186	59	24%
Rental and engineering services	335	121	214	64%

The H1 source discloses these five complete business buckets, without separate actual quarterly product data. The forecast uses half-H1 bucket anchors as an explicit starting proxy; it does not label them as reported Q1 or Q2 product actuals.

Original exhibit YOK-F01

四、主要会计数据和财务指标

公司是否需追溯调整或重述以前年度会计数据

□是 ☑否

	本报告期	上年同期	本报告期比上年同期增减

五、境内外会计准则下会计数据差异

1、同时按照国际会计准则与按照中国会计准则披露的财务报告中净利润和净资产差异情况

□适用 ☑不适用

公司报告期不存在按照国际会计准则与按照中国会计准则披露的财务报告中净利润和净资产差异情况。

2、同时按照境外会计准则与按照中国会计准则披露的财务报告中净利润和净资产差异情况

□适用 ☑不适用

公司报告期不存在按照境外会计准则与按照中国会计准则披露的财务报告中净利润和净资产差异情况。

六、非经常性损益项目及金额

☑适用 □不适用

单位：元

项目	金额	说明
非流动性资产处置损益（包括已计提资产减值准备的冲销部分）	-2,585,599.94	主要为本期处置固定资产
计入当期损益的政府补助（与公司正常经营业务密切相关、符合国家政策规定、按照确定的标准享有、对公司损益产生持续影响的政府补助除外）	25,331,283.59	主要为本期计入其他收益的政府补助，详见其他收益-政府补助
除同公司正常经营业务相关的有效套期保值业务外，非金融企业持有金融资产和金融负债产生的公允价值变动损益以及处置金融资产和金融负债产生的损益	16,709,585.06	主要为华泰瑞联公允价值变动
除上述各项之外的其他营业外收入和支出	-7,118,192.15	
减：所得税影响额	5,017,444.85	
少数股东权益影响额（税后）	-3,682,428.76	
合计	31,002,060.47

Note 46 disaggregates H1 revenue and cost into semiconductor business, photoresist, chemical materials, specialty gases, and rental/engineering services. Amounts are CNY yuan. These are five exhaustive contract-business categories. MD&A product taxonomy must not be added as extra revenue. Source: YOK-H126, 2026-08-26, original PDF page 110. Original pixels retained. Original source.

Execution probabilities and their evidence

Slower qualification receives 25%, supported by customer acceptance timing, ordinary-product competition and uncertain new capacity loading. Qualified expansion receives 55%, reflecting an incumbent supply position, actual reported sales and management's capacity updates. Faster accepted volume receives 20%, requiring stronger loading, new product capture and execution. These are correlated company outcomes, not independent votes from repeated comments.

Within those business states, advanced-resist adoption is 25%, 55% and 75%; Mo capture is 20%, 35% and 60%. Higher memory complexity supports the opportunity. Customer-specific qualification, substitution economics and allocation remain unknown. Mo receives only the net additional wallet after replacement overlap; its previously embedded allowance is removed before the new weighted increment is inserted.

Yarui funding closes with 50%, 75% and 90% probabilities across the three business states. Joint commercial success is 10%, 30% and 55%, including funding. The conditional success rate inside each funded branch is the joint probability divided by its funding probability. Research costs and funded plant commitments persist even when probability-weighted commercial receipts remain small.

The capital exit structure uses 45% equity settlement, 35% cash purchase and 20% extended unresolved outcomes. Appraisal, exercise and settlement dates are forecast proxies. The split reflects the disclosed best-effort share-exit route, real conditional rights and the possibility of cash or delay; it is not a legal conclusion or measured frequency. HuaFei claim presence is separately weighted at 60% because proposal, current funding and capital-table timing do not establish a complete executed cash allocation.

Business state	Weight	Receipt lag	New resist	Mo capture	Yarui funded	Joint commercial
slower qualification	25%	2 quarters	25%	20%	50%	10%
qualified expansion	55%	0 quarters	55%	35%	75%	30%
faster accepted volume	20%	-1 quarters	75%	60%	90%	55%

YOKE TECHNOLOGY | FRAMEWORK 8 | OCTOBER 21, 2026

Rule 16b: active receipts, costs and overlap

Probabilities describe subjective economic realization. Source authenticity, company capture, timing, funding and analytical score are distinct. Reposts and correlated capacity comments do not create independent increments.

Signal / source date	Numerical treatment	Active company bridge / boundary
H1 filing / August 26	100% reported anchor	Five exhaustive actual revenue and cost buckets; Q3 forecast retained honestly.
Capacity / September 8	25% / 55% / 20% joint execution	Accepted-volume growth, price erosion, staffing and commissioning vary coherently; old demand reference is replaced.

Signal / source date	Numerical treatment	Active company bridge / boundary
Advanced resist / May 19	25% / 55% / 75% conditional adoption	Current bucket fully retained; new capture is the residual above the mature path, paying manufacturing and support.
Mo for high-layer NAND / September 8	20% / 35% / 60%; 50% replaced-wallet overlap	Old net content allowance removed. Only weighted net new receipts are inserted.
Yarui proposal / October 15	50% / 75% / 90% funding; 10% / 30% / 55% joint commercial success	Commercial receipts net 50% existing-wallet overlap; research, plant, staff, depreciation and restricted financing are active.
Kemet / completed May 12	100% completion; 45% / 35% / 20% capital exit states	No future duplicate receipt. Conditional fees, cash settlement, shares and distributions apply.
HuaFei / March 31 proposal	60% claim presence; same capital exit states	No unsupported extra unrestricted cash. Claim and minority attribution vary together.
Xianke / source contract; end-2027 negotiations	45% equity / 35% cash / 20% unresolved	Already consolidated; zero extra group OP. Appraisal, cash and later shares are explicit proxies.
LDS and group RPO / September 8	80% relevance; 100% receipt overlap	Recognition timing in existing buckets; zero second revenue wallet.
Gas expansion / 2026 disclosures	25% / 55% / 20% execution	Qualified gas receipts, ramp cash costs and paid depreciation; no blanket AI premium on industrial tonnes.
High-end pricing / May 19	0% blanket premium	No extra negotiated ASP premium; slower state includes ordinary-product pressure.
SpaceX compute / October 20	35% company-demand relevance; 100% overlap	Zero incremental company receipts; existing memory and logic wafer-output states contain the demand channel.

Quarter	New qualified receipts	Net Mo receipts	Net Yarui receipts	Novel support paid
Q3 2026	43	0	0	1
Q4 2026	70	0	0	2
Q1 2027	91	0	0	3
Q2 2027	126	<1	<1	4
Q3 2027	163	2	2	5
Q4 2027	199	3	3	6
Q1 2028	235	5	5	7
Q2 2028	272	8	6	9
Q3 2028	308	10	9	10
Q4 2028	342	12	12	11
Q1 2029	371	15	14	12
Q2 2029	399	17	15	13

Quarter	New qualified receipts	Net Mo receipts	Net Yarui receipts	Novel support paid
Q3 2029	427	20	17	14
Q4 2029	454	23	20	15
Q1 2030	481	25	21	16
Q2 2030	508	28	23	17
Q3 2030	536	30	25	18
Q4 2030	555	32	27	18

These active receipt components are inside group sales, with manufacturing, fixed staff, support, startup, research and depreciation charged in the full build. They cannot be added again to group revenue or interpreted as incremental net profit. Qualification-zero and overlap sensitivities show the resulting ceiling and cash effect.

Manufacturing and paid operating costs

Reported H1 costs already contain depreciation and ordinary staff compensation. Manufacturing cash cost is calibrated by removing allocated H1 COGS depreciation once. An analytical 12% fixed and 88% variable split then distinguishes committed costs from receipt-linked costs. The fixed split is an assumption, not reported segment disclosure. Existing fixed cash costs grow 4% annually; incremental factory staff and maintenance cost 3% of new asset basis annually, with half of opening-CIP staff treated as overlapping the existing payroll.

New staffing starts two quarters before the original readiness date and remains paid through a delayed acceptance state. Semiconductor and mature resist variable costs scale pre-price accepted value. A price haircut therefore reduces profit without granting a matching free reduction in material or labor cost. New qualification receipts pay explicit variable manufacturing, support, startup and research costs before contributing to core operating profit.

Services normalize the unusually strong H1 cash gross margin toward 45% over the forecast. Semiconductor and other chemical efficiency improvements remain small explicit unit-cost assumptions. Neither a memory producer's margin nor a broad AI equipment margin is used as Yoke's manufacturing margin. Source product-quarter costs, fixed-cost splits, utilization and SKU economics remain incomplete.

Paid assets, readiness and depreciation

Opening construction in progress is already paid capital. It can create depreciation when ready but cannot create another cash outflow. Its modeled readiness tranches are 35% in Q4 2026, 45% in Q4 2027 and 20% in Q4 2028, shifted by each business execution state. New common capex becomes ready in two equal tranches four and eight quarters after payment. Depreciation starts in the following quarter, a coarse proxy for the source's month-after-readiness policy.

The selected machinery lives are 66 months in Korea and 144 months in China; building lives are 360 and 240 months. The assumed mix is 75% machinery, 25% buildings and 40% Korea for common assets. Chinese assets retain 5% residual value. These mix and life midpoints are proxies within reported policy ranges. Existing depreciation runs off 5% annually, while new paid cohorts are added separately.

Non-Yarui capex of CNY 700 million in 2026 means the remaining second half: 300 in Q3 and 400 in Q4. H1 actual spending is additional historical spending, making the calendar-year total about 935. Later annual common capex is 900, 1,000, 900 and 900. A funded Yarui adds 270 in 2028 and 270 in 2029. Future cash capex excludes all separately paid borrowing and lease interest; no extra capitalized-interest asset basis is forecast. The approximate remaining project-budget floor is a cross-check rather than a payment schedule.

Original exhibit YOK-F05

固定资产是指为生产商品、提供劳务、出租或经营管理而持有的，使用年限超过一个会计年度的有形资产。

固定资产以取得时的实际成本入账，并从其达到预定可使用状态的次月起采用年限平均法计提折旧。

（2） 折旧方法

类别	折旧方法	折旧年限	残值率	年折旧率
房屋建筑物	年限平均法	10-20	5	4.75-9.50
机器设备	年限平均法	10-15	5	6.33-9.50
专用设备	年限平均法	8	5	11.88
运输设备	年限平均法	5	5	19.00
其他设备	年限平均法	5	5	19.00

子公司 UP 化学依据当地相关规定，各类固定资产的折旧方法如下：

固定资产类别	预计使用寿命	预计净残值	年折旧率（%）
房屋建筑物	20-40 年	1000 韩元	2.50-5.00
机器设备	5-6 年	1000 韩元	16.67-20.00
专用设备	5-6 年	1000 韩元	16.67-20.00
运输设备	5 年	1000 韩元	20.00
其他设备	5 年	1000 韩元	20.00

（3）固定资产的减值测试方法、减值准备计提方法

资产负债表日，有迹象表明固定资产发生减值的，按照账面价值与可收回金额的差额计提相应的减值准备。公司需遵守《深圳证券交易所上市公司自律监管指引第 3 号——行业信息披露》中化工行业的披露要求

公司需遵守《深圳证券交易所上市公司自律监管指引第 3 号——行业信息披露》中的“化工行业相关业务”的披露要求

22、在建工程

公司需遵守《深圳证券交易所上市公司自律监管指引第 3 号——行业信息披露》中的“化工行业相关业务”的披露要求

（1）在建工程达到预定可使用状态时，按工程实际成本转入固定资产。已达到预定可使用状态但尚未办理竣工决算的，先按估计价值转入固定资产，待办理竣工决算后再按实际成本调整原暂估价值，但不再调整原已计提的折旧。

（2）资产负债表日，有迹象表明在建工程发生减值的，按照账面价值与可收回金额的差额计提相应的减值准备。

23、借款费用

（1）借款费用资本化的确认原则

Fixed-asset accounting policy: straight-line depreciation begins the month after readiness for use; domestic and Korean subsidiary life/residual schedules differ. Domestic building life 10 to 20 years, machinery 10 to 15, dedicated equipment 8; Korean buildings 20 to 40 and machinery/dedicated equipment 5 to 6. These source ranges do not identify future asset mix. Source: YOK-H126, 2026-08-26, original PDF page 67. Original pixels retained. Original source.

Conditional investor rights and restricted capital

Kemet's CNY 925 million capital increase was completed before the June cash anchor. The proceeds were restricted to existing financial debt, with more than half directed to bank debt. The forecast adds no second receipt. Share exit is best efforts with conditional continuation and purchase rights; a missed standalone profit target alone is not treated as an automatic default.

HuaFei's capital table totals about CNY 850 million, with a small difference from the proposal ceiling. Closing, current receipts and the accounting allocation remain unresolved. The proposed use is debt repayment, not a free growth wallet. The claim-presence branch affects conditional exit amounts and minority attribution without creating an unsupported extra cash inflow.

Xianke is already consolidated although the listed parent holds a minority of its equity. Acquiring an investor's interest changes cash requirements, distributions and possibly listed-parent share count; it creates no fresh consolidated revenue or operating profit. The active cash and equity paths use a dated minority-book appraisal proxy and explicit future settlement timing. The full signed pricing and exercise clauses remain unavailable.

The October 15 Yarui proposal contains CNY 1,350 million of outside cash and a CNY 439 million parent contribution. The parent contribution moves cash within the group. The selected funded path allocates 810 of outside cash to bank debt and ringfences 540 for plant spending. The source permits alternative uses; this modeled split is an assumption. Four of five directors and the general manager and finance appointments preserve control despite lower parent equity ownership.

Expected success-conditional settlement fees are paid once in operating costs. Each cash path replaces the expected fee with its own conditional fee before tax. Cash-purchase paths pay the appraisal proxy; equity paths add ordinary parent shares at an assumed issue price and raise no new cash. Extended outcomes include a separate net continuation reserve after ordinary distributions. No contractual IRR, guaranteed payment date or actual exercise is invented.

四、定价政策及定价依据

根据北京中天华资产评估有限责任公司出具的中天华咨报字[2026]第2612号《估值报告》，以2026年4月30日为估值基准日，以市场法为估值方法，江苏雅睿净资产账面价值为8,874.55万元，股东全部权益价值为12,176.00万元，增值额3,301.45万元，增值率37.20%。因为江苏雅睿目前处于研发及客户验证测试阶段，持续发生研发支出，自估值基准日起至2026年8月31日，江苏雅睿新增亏损2,784.24万元（上述数据未经审计），预计至本次交易交割日将持续产生新增亏损。基于前述情况，本次增资按实缴资本进行增资扩股。

本次增资，江苏雅睿每1元注册资本的增资价格为人民币1.00元，公司及投资者增资方拟增资的价款人民币178,891.00万元将全部计入江苏雅睿的注册资本。

本次增资遵循了客观、公平、公允的定价原则，不存在损害公司及其他股东利益，特别是中小股东利益的情形。

五、交易协议的主要内容

（一）增资协议的主要内容

甲方：江苏雅睿半导体材料有限公司（以下简称“甲方”或“标的公司”）

乙方：投资者增资方（以下简称“乙方”或“投资人”）

丙方：江苏雅克科技股份有限公司（以下简称“丙方”或“原股东”）

1、增资金额、增资价格及持股比例

（1）增资金额

乙方拟向甲方增资不超过人民币壹拾叁亿伍千万元整（小写1,350,000,000元），增资后乙方的实际持股比例按照本协议本条第（2）、（3）项确定。

（2）增资价格

各方确认，本次增资，甲方每1元注册资本的增资价格为1元。乙方向甲方增

October 15 Yarui proposal: before/after subscribed capital, parentabout 29% share at full proposal, April valuation and subsequent overlapping loss interval. Registered-capital tables are CNY yuan; valuation/loss prose is CNY10,000. The proposal is not a certified closing; Apr 30 to Aug 31 loss overlapsH1. Source: YOK-YARUI1015, 2026-10-15, original PDF page 5. Original pixels retained. Original source.

Original exhibit YOK-F19

资的135,000万元全部计入甲方注册资本。

（3）增资后公司持股比例

增资交割后，甲方股东的出资额和持股比例如下：

股东	认缴注册资本（人民币/元）	持股比例
雅克科技	550,000,000.00	28.95%
投资者增资方	1,350,000,000.00	71.05%
合计	**1,900,000,000.00**	**100.00%**

2、增资款项的用途

（1）甲方、丙方同意并承诺：甲方、丙方在甲方向乙方出具股东名册后方可按照本协议的约定使用乙方缴付的增资款。

（2）甲方、丙方同意并承诺：乙方对甲方的增资款项将全部用于项目建设或偿还甲方对丙方的关联借款，丙方收到还款后继续用于偿还其本部金融债务等。

3、利润分配

（1）各方同意，甲方各股东按实缴出资比例同股同权享有甲方所有可供分配利润（包括当年实现的可分配利润及累计未分配利润，以下简称“全部可供分配利润”）。自乙方增资后，甲方应至少于每个年度召开股东会按照本协议约定进行一次利润分配及现金股利支付，向股东分配利润。如标的公司上一年度形成可供分配利润（指某一会计年度实现的归母净利润，且弥补以往年度亏损（如有）并扣除盈余公积（如有）后的余额），利润分配方案须经股东会批准后按照股东会决议执行。如标的公司无可供分配利润时，则不实施利润分配。为免疑义，本条约定不构成标的公司的强制分红义务，若标的公司股东会决议不分红，不构成违约。

（2）各方确认，在乙方持有标的公司股权期间，在满足标的公司有可分配利润并且保证正常运营和投资资金需求时，经过股东会决议需向乙方分配利润。

（3）利润分配款项支付日。如甲方有可供分配利润，本次增资后的甲方股东会批准上一会计年度甲方利润分配方案之日起2个月内，且不晚于批准之日当年9月25日，甲方应当按照审议通过的利润分配方案向乙方、丙方完成支付全部利润分配款（完成支付以利润分配款到达乙方、丙方指定银行账户为标志）。丙

Yarui proposed contribution and uses: project construction or repayment of parent-related loans, followed by parent financial-debt repayment; conditional profit distributions. Amounts switch between CNY yuan and CNY10,000 as printed. All proceeds cannot simultaneously fund new capacity and repay debt; no free parent inflow or mandatory dividend floor is established. Source: YOK-YARUI1015, 2026-10-15, original PDF page 6. Original pixels retained. Original source.

Original exhibit YOK-F20

方、甲方承诺，甲方股东会召开并形成符合本协议约定的利润分配方案的决议之日不晚于每年的9月25日。

（4）各方声明，在不符合分配利润法定条件的情况下，甲方不进行利润分配。在乙方作为甲方股东期间，甲方不计提任意公积金，但经各股东表决同意的股东会决议通过的除外。甲方公司股东会决定具体利润分配方案时，应当严格遵守本协议约定。

4、投资延续权利

（1）在乙方持股期内，发生协议约定任一投资延续事件，乙方有权选择根据本协议约定选择投资延续并享有本协议约定的投资延续权利。

（2）在本协议约定的投资延续事件相关任一特定情形发生时，丙方应当在发生相关情形后5个工作日内书面通知乙方。无论丙方是否在上述期限内书面通知乙方，乙方自知悉任一特定情形发生后，有权选择要求享有本协议约定的“投资延续权利”，或选择要求丙方受让全部标的股权，并以书面形式通知丙方。如乙方选择要求享有本协议约定的“投资延续权利”，则丙方接到书面通知后有权进一步通过选择受让乙方所持全部标的股权以避免乙方享有该等“投资延续权利”。

①如乙方选择要求享有“投资延续权利”但丙方进一步选择受让全部标的股权以避免乙方享有该等权利的，丙方应在收到乙方发出的书面通知之日起10个工作日内以书面形式向乙方确认其同意受让标的股权或指定第三方受让标的股权，并在受让通知中写明其选择的受让价格（按协议约定的计算方式择一选择）；

②如乙方选择要求丙方受让全部标的股权，则丙方应在收到乙方发出的书面通知之日起10个工作日内以书面形式告知乙方其选择的受让价格（按协议约定的计算方式择一选择）。

（3）如乙方根据本协议约定选择要求享有“投资延续权利”且丙方未在收到乙方书面通知之后10个工作日内或乙方另行书面同意的期限内以书面形式向乙方确认丙方同意受让标的股权的，乙方可自行寻找第三方受让标的股权，且视为丙方已放弃对标的股权的优先受让权。与此同时，乙方对标的公司的投资进入投资延续期（投资延续期起始日为丙方收到书面通知后满10个工作日后的首日），丙方及标的公司应采取一切必要的措施（包括但不限于自投资延续期起始日起10

Yarui proposal investment-continuation and conditional investor transfer-demand mechanisms, including written-notice/election steps. 5、法律适用和争议解决

本协议的订立、效力、解释、履行和争议的解决应受中国法律的管辖，并依其解释。但是，若已公布的中国法律、法规未对与本协议有关的特定事项加以规定，则应在中国法律、法规许可的范围内参照一般国际商业惯例。

由本协议引起或与本协议有关的一切争议，包括有关其存在、有效性或终止的任何争议，应按照以下第①项方式解决：

①提交上海国际经济贸易仲裁委员会，根据申请仲裁时该会现行有效的仲裁规则仲裁解决。仲裁地为上海。仲裁裁决为终局的，对各方均具有约束力。

②提交合同签署地有管辖权的人民法院通过诉讼方式解决。

诉讼或仲裁期间，各方继续拥有各自在本协议项下的其他权利并应继续履行其在本协议下的相应义务。

协议的其他条款包括“定义和解释”、“特别约定事项”、“违约责任”、“协议的组成和生效”、“可分割性”、“保密”、“权利的保留”、“反贿赂条款”、“通知”和其他事项。

六、公司放弃优先认缴出资权说明

为了引入投资者增资方，增强江苏雅睿的资金实力，针对本次增资除雅克科技外投资者增资方增资的部分，公司作为江苏雅睿原股东将放弃优先认缴权。

七、交易的目的及对上市公司的影响

本次江苏雅睿通过增资方式引入战略投资人，可以保证江苏雅睿日常经营所需资金，提升江苏雅睿的资本实力，优化资产负债结构，降低财务风险，为研发的高强度投入、工厂建设和经营的快速发展提供资金支持，有助于公司的稳健持续发展。

本次交易完成后，公司持有江苏雅睿的股权不低于28.95%，仍然为江苏雅睿的第一大股东。经公司与投资者增资方协商，江苏雅睿董事会5个席位中，公司委派4名董事，总经理和财务负责人由公司委派，江苏雅睿的重大经营和财务决策均由董事会决定，因此公司仍保持对将江苏雅睿的控制权，本次交易不会影响公司合并报表范围，亦不会对公司财务及经营状况产生重大不利影响。

八、备查文件

1、第七届董事会第五次会议决议。

Yarui proposal concluding explanation: parent remains first holder at at leastabout 29%, appoints 4 of 5 directors plusGM/CFO and retains consolidation according to issuer. This is the issuer's proposed post-transaction control analysis. Lower equity ownership and consolidated group revenue are separate from attributable parent economics. Source: YOK-YARUI1015, 2026-10-15, original PDF page 13. Original pixels retained. Original source.

兴银金投	3,201,639.00	4.94%
合计	**64,807,581.00**	**100%**

2、交割前的资产

科美特在本次增资交割日前（含当日）的所有未分配利润、资本公积、盈余公积，由交割后全体股东（含投资人）按照实缴出资比例共同享有，本协议另有约定的除外。

3、增资款项的用途

科美特、雅克科技同意并承诺：科美特、雅克科技在科美特向投资人出具股东名册后方可按照本协议的约定使用投资人缴付的出资款项。

科美特、雅克科技同意并承诺：投资人对科美特的增资款项将全部用于偿还标的公司合并口径或雅克科技本部的存量金融机构负债（其中偿还银行贷款占比须超过50%），并主要用于交叉实施债转股。除投资人另行书面同意外，科美特/雅克科技不得将上述款项用于其他目的。

4、业绩目标

本协议生效后，雅克科技承诺，投资人持有科美特股权的投资期间内（含投资人增资入股科美特当年，且包括有投资延期情形的延期期间），科美特任一会计年度实现的本部净利润不低于人民币8,000万元，科美特子公司斯洋国际有限公司任一会计年度实现的本部净利润不低于人民币10,000万元，韩国易美太任一会计年度实现的本部净利润不低于人民币7,000万元（以下简称“业绩目标”）。

业绩目标以经会计师事务所出具的每一会计年度的年度审计报告作为确定依据，前述会计师事务所应由科美特自投资人认可的会计师事务所清单中决定并委任。为免疑义，科美特及其子公司任一年度未实现业绩目标，均不构成科美特或雅克科技违约。除非经投资人事先书面同意延期提供，科美特应在符合增资协议相关条款约定的情形下向投资人提供科美特的审计报告。

5、目标股权的退出

January 5 Kemet capital agreement disclosure: parentabout 77% table, restricted debt-repayment use and subsidiary profit-target scope. Table is registered capital in CNY yuan; NI-target prose is CNY10,000. Over 50% of proceeds must repay bank loans; target misses alone are not automatically a default. Original exhibit YOK-F23

2.3投资延续安排。在投资人持股期内，雅克科技作为控股股东，将积极支持科美特经营发展，在法律法规允许的范围内，维护少数股东权益。如发生任一“特定情形”，投资人有权选择延续投资，并享有以下“投资延续权利”。

2.3.1投资延续权利

标的公司在投资延续期首年的12月31日之前，应将投资人累计未实现投资收益以现金分红的形式分配给投资人。

投资人有权要求，变更需经股东会审议的事项范围及相关决策程序。

投资人有权要求雅克科技及其关联方在投资延续期开始后的30日内，全额清偿对标的公司所负债务或其他形式的资金占用。

投资人在选择行使上述全部或部分投资延续权利时，雅克科技及科美特应及时提供配合与协助等促使上述权利实现。

2.3.2 特定情形

未经投资人书面同意，标的公司进行增资、减资、合并、分立、改变主营业务、重大资产重组，或者雅克科技将其所持标的公司股权对外质押或转让等重大事项。

投资人持股期间标的公司任一会计年度经审计的单体财务报表口径下资产负债率超过36.5%，或投资人持股期间雅克科技任一会计年度经审计的合并资产负债表口径下的资产负债率高于40%，且未能在投资人届时提供的宽限期内采取投资人认可的方式予以妥善解决的，如因经营发展需要调整资产负债率约束值的，各方协商一致可进行调整。

在投资人持股期间，未经投资人书面同意，标的公司控股股东或实际控制人发生变化。

投资期内，标的公司任意一年经营业绩未达业绩目标的80%，或连续两年未达业绩目标的90%，且未能在投资人届时提供的宽限期内各方协商妥善解决的。

投资期内，斯洋国际有限公司（以下简称“斯洋国际”，为科美特持股100%的香港子公司）任意一年经营业绩未达业绩目标的80%，或连续两年未达业绩目标的90%，且未能在投资人届时提供的宽限期内各方协商妥善解决的。

投资期内，EMTIER CO.,LTD（以下简称“韩国易美太”，为斯洋国际持股74.34%的韩国子公司）任意一年经营业绩未达业绩目标的80%，或连续两年未达业绩目

Kemet continuation rights and specified audited leverage/control/performance triggers. Audited annual covenant tests differ from June interim ratios. Ongoing-return amount/rate is not fully disclosed; no unconditional redemption/IRR is established. Source: Kemet_capital_contract_20260105, 2026-01-05, original PDF page 8. Original pixels retained. Original source.

Original exhibit YOK-F24

标的90%，且未能在投资人届时提供的宽限期内各方协商妥善解决的。

内蒙古科美特电子材料科技有限公司（为投资人持股100%子公司）未能在2026年3月31日前取得环评许可、安全评价许可等合规手续。

投资期内，因环保、安全生产等原因，导致标的公司合并范围的六氟化硫有效产能在2026年低于8000吨、2027年及以后年度低于10000吨，且未能在投资人届时提供的宽限期内采取投资人认可的方式予以妥善解决的。

在投资人持有标的公司股权期间，任意一年度，标的公司各股东未就利润分配方案达成一致；但投资人对本款约定的情形书面豁免的除外。

投资期（自投资人出资日起算）届满36个月，投资人未能通过雅克科技发股收购交易实现退出标的公司股权（如果雅克科技已在投资期届满期前公布重组预案，因为资本市场波动及证券监管原因导致标的公司股权上翻延迟，可以在36个月投资期届满后再延长24个月）；也未能通过雅克科技或其指定第三方现金收购方式实现退出的，且各方未能就解决方案达成一致的。

在任何时点，雅克科技实控人及关联方和一致行动人累计质押雅克科技股份占其所持有雅克科技股份的比例超过30%。

为免疑问，“特定情形”下提及的任一宽限期，投资人有权自主决定是否提供宽限期及具体宽限期限。同时，“特定情形”下第四款、第五款、第六款不应被视为雅克科技、科美特对科美特业绩的承诺和保证，该情形下经各方协商一致宽限期最长可至投资期届满日止。

2.4在本协议任一特定情形发生时，雅克科技应当在发生相关情形后5个工作日内书面通知投资人，且投资人可以向雅克科技发出一份书面通知，要求享有本协议第四条约定的“投资延续权利”，雅克科技接到书面通知后有权通过选择受让投资人所持全部标的股权以避免投资人享有该等“投资延续权利”。如雅克科技选择受让标的股权的，应在收到投资人发出的书面通知之日起10个工作日内以书面形式向投资人确认其同意受让标的股权或指定第三方受让标的股权。

如雅克科技选择进行受让的，应在雅克科技收到投资人发出的书面通知之日后90个工作日内：（1）雅克科技应完成受让标的股权需履行的内部决策程序；（2）雅克科技与投资人应聘请有资质的资产评估机构对投资人所持标的股权进行评估；（3）甲乙双方应就标的股权的收购价格进行协商并达成一致。前述事

Kemet continuation triggers continue, with 36-month actual-investment clock/eligible extension and the parent's election to acquire investor interests after notice. The actual investment date is not inferred from announcement. The initial right is continuation; parent purchase election is distinct from HuaFei's direct investor acquisition-demand language. Source: Kemet_capital_contract_20260105, 2026-01-05, original PDF page 9. Original pixels retained. Original source.

Original exhibit YOK-F25

项均完成后15个工作日内，雅克科技应向投资人支付收购价款。

3、转让价款

投资人持有全部目标股权的评估值

各方同意，如根据本协议约定雅克科技（包括雅克科技指定第三方，下同）选择受让投资人持有全部目标股权的，自雅克科技发出选择受让的书面通知之日（本条内简称“通知”）起90个工作日内，投资人与雅克科技应选聘有资质的评估机构完成评估，以发出通知之日的上一个季度末为评估基准日。评估费用由科美特承担。

评估价格应当经雅克科技和投资人（为免疑义，各方可分别就其是否认可评估价格发表意见，并分别决定是否同意以评估价格向雅克科技转让其所持股权，下同）事先书面认可。

4、逾期付款情况下转让价款的计算和支付方式

如雅克科技按照本协议约定选择受让目标股权（包括雅克科技指定第三方受让目标股权），或按照其他相关约定应当支付股权转让价款的，雅克科技应当在约定的期限内完成转让价款支付。逾期支付的，雅克科技还应支付违约金，无论受让目标股权的主体为雅克科技或雅克科技指定第三方，违约金是以本协议项下应付未付的转让价款为基数，以每天万分之一为费率计算得出，直至雅克科技以及雅克科技指定第三方足额支付所有应付未付款项之日止。

5、违约责任

本协议任何一方违反本协议，或者在本协议项下的陈述与保证不真实、不准确或产生误导的，均构成违约，违约方应向守约方承担违约责任。

任何一方违反本协议的约定时，守约方有权要求及时履行、限期履行或纠正，并要求赔偿实际损失或按本协议约定支付违约金。如违约金不足以弥补实际损失的，违约方应就超过部分向守约方支付损害赔偿金。

如雅克科技违反本协议约定或未履行支付转让价款的义务，则投资人有权要求雅克科技支付本协议约定的违约金。

投资人基于本条约定要求违约方承担违约责任，不构成对投资人基于本协议约定行使各项救济措施等权利的放弃或者减损，且不构成雅克科技及科美特承担本协议项下的各项责任及义务的任何形式的豁免。

证券代码：002409　　证券简称：雅克科技　　公告编号：2026-019

江苏雅克科技股份有限公司
关于原全资子公司增资扩股引入投资人进展
暨完成工商变更登记的公告

特别提示：本公司及全体董事保证公告内容真实、准确和完整，不存在虚假记载、误导性陈述或者重大遗漏。

一、增资事项概述

江苏雅克科技股份有限公司（以下简称“公司”或“雅克科技”）于2025年12月31日召开第六届董事会第十七次会议，审议通过了《关于全资子公司增资扩股并引入投资人的议案》，同意为提升公司原全资子公司成都科美特特种气体有限公司（以下简称“科美特”）的综合实力，增强其资金实力，满足其全资子公司内蒙古科美特电子材料科技有限公司项目建设所需的长期资金需求，引入投资人工融金投二号（北京）新兴产业股权投资基金合伙企业（有限合伙）（以下简称“工融金投”）、兴银金融资产投资有限公司（以下简称“兴银金投”，与工融金投合称“投资人”）共同对科美特以货币形式进行增资，增资金额合计人民币92,500.00万元（以下简称“本次交易”）。

本次交易的增资价格为人民币62.4680元/1元注册资本，投资人认购科美特充分稀释基础上22.85%的股权，对应科美特新增注册资本人民币14,807,581.00元（大写：壹仟肆佰捌拾万柒仟伍佰捌拾壹元整），超出部分人民币910,192,419.00元（大写：玖亿壹仟万零壹拾玖万贰仟肆佰壹拾玖元整）计入科美特资本公积。

上述增资事项的具体内容详见公司于2026年1月5日刊登在指定信息披露媒体的公告（公告编号：2025-039）。

二、增资事项进展

根据各方签订的《增资协议》的约定，投资人已经完成出资义务。近日，公司接到科美特的通知，其已经完成了上述增资事项的工商变更登记手续并取得了

May 12 issuer completion notice: investors fulfilled contribution obligations for the CNY925 M Kemet raise and registration was completed. Completed financing must not be repeated as a future 925 M inflow. The original notice uses CNY10,000 for contribution and CNY yuan for registered capital. Original exhibit YOK-F28

投资人拟向华飞电子增资捌亿伍仟万元整（小写850,000,000.00元）。

（2）增资价格

本次增资价格以上海申威资产评估有限公司以2025年9月30日为估值基准日出具的《浙江华飞电子基材有限公司模拟股东全部权益价值评估咨询报告》（沪申威咨报字[2026]第0092号）所载评估结果为基础，并根据基准日至交割日之间的情况作损益调整进行确定。本次增资，华飞电子每1元注册资本的增资价格10.00元。投资人向华飞电子增资金额85,000.00万元中，计入华飞电子实收资本的金额=投资人增资金额÷华飞电子每1元注册资本的增资价格，其余金额计入华飞电子资本公积。

（3）增资后公司持股比例

增资交割后，华飞电子股东的出资额和持股比例如下（实际持股比例及对应出资额以工商登记为准）

股东	实缴注册资本（人民币/元）	出资比例
雅克科技	100,000,000.00	54.06%
工融金投二号	13,980,000.00	7.56%
昆仑工融基金	30,000,000.00	16.22%
兴银金投及其他投资人	41,000,000.00	22.16%
合计	**184,980,000.00**	**100%**

2、交割前的资产

华飞电子在本次增资交割日前（含当日）的所有未分配利润、资本公积、盈余公积，由交割后全体股东（含投资人）按照实缴出资比例共同享有，本协议另有约定的除外。

3、增资款项的用途

华飞电子、雅克科技同意并承诺：华飞电子、雅克科技在华飞电子向投资人出具股东名册后方可按照本协议的约定使用投资人缴付的增资款。

华飞电子、雅克科技同意并承诺：投资人对华飞电子的增资款项将全部用于偿还华飞电子合并口径或雅克科技本部的存量金融机构负债（其中偿还银行贷款占比须超过50%）。除投资人另行书面同意外，华飞电子/雅克科技不得将上述款

March 31 HuaFei proposed capitalization and use of proceeds: registered-capital table and debt-repayment restriction. The prose ceiling is CNY850 M; the registered-capital table times stated price impliesabout 850 M. Signing/closing is not certified, and proceeds are restricted to existing debt unless consented. Source: HuaFei_capital_20260331, 2026-03-31, original PDF page 6. Original pixels retained. Original source.

Original exhibit YOK-F29

负债率超过62.5%，或投资人持股期间雅克科技任一会计年度经审计的合并资产负债表口径下的资产负债率高于40%，且未能在投资人届时提供的宽限期内采取投资人认可的方式予以妥善解决的；如因经营发展需要调整资产负债率约束值的，各方协商一致可进行调整。

在投资人持股期间，未经投资人书面同意，华飞电子控股股东或实际控制人发生变化。

投资期内，华飞电子任意一年经营业绩未达业绩目标的80%，或连续两年未达业绩目标的90%，且未能在投资人届时提供的宽限期内各方协商妥善解决的。

在投资人持有华飞电子股权期间，任意一年度，华飞电子各股东未就利润分配方案达成一致；但投资人对本款约定的情形书面豁免的除外。在投资人持有华飞电子股权期间，任意一年度，华飞电子各股东未就利润分配方案达成一致；但投资人对本款约定的情形书面豁免的除外。

投资期（自投资人出资日起算）届满36个月，投资人未能通过雅克科技发股收购交易实现退出华飞电子股权（如果雅克科技已在投资期届满期前公布重组预案，因为资本市场波动及证券监管原因导致华飞电子股权上翻延迟，可以在36个月投资期届满后再延长24个月）；也未能通过雅克科技或其指定第三方现金收购方式实现退出的，且各方未能就解决方案达成一致的。

在任何时点，雅克科技实控人及关联方和一致行动人累计质押雅克科技股份占其所持有雅克科技股份的比例超过30%。

为免疑问，“特定情形”下提及的任一宽限期，投资人有权自主决定是否提供宽限期及具体宽限期限。同时，“特定情形”下第五款不应被视为雅克科技、华飞电子对华飞电子业绩的承诺和保证，该情形下经各方协商一致宽限期最长可至投资期届满日止。

2.4在本协议任一特定情形发生时，雅克科技应当在发生相关情形后5个工作日内书面通知投资人，投资人有权要求享有本协议约定的“投资延续权利”，或选择要求雅克科技受让全部标的股权，并以书面形式通知雅克科技。如投资人选择要求享有本协议约定的“投资延续权利”，则雅克科技接到书面通知后有权进一步通过选择受让投资人所持全部标的股权以避免甲方享有该等“投资延续权利”。

HuaFei proposal specified-event terms: investor may choose continuation rights or require Yoke to acquire all target interests. The continuation/failed-exit and audited-ratio conditions are conditional. No exercise notice, unconditional payment date, fixed IRR or certified 850 M receipt is established. Source: HuaFei_capital_20260331, 2026-03-31, original PDF page 10. Original pixels retained. Original source.

Original exhibit YOK-F30

如雅克科技选择受让标的股权以避免投资人享有该等“投资延续权利”的，应在收到投资人发出的书面通知之日起10个工作日内以书面形式向投资人确认其同意受让标的股权或指定第三方受让标的股权。

3、转让价款

投资人持有全部目标股权的评估值

各方同意，如根据本协议约定雅克科技（包括雅克科技指定第三方，下同）选择受让投资人持有全部目标股权的，投资人与雅克科技应选聘有资质的评估机构完成评估，以发出通知之日的上一个季度末为评估基准日。评估费用由华飞电子承担。

评估价格应当经雅克科技和投资人（为免疑义，各方可分别就其是否认可评估价格发表意见，并分别决定是否同意以评估价格向雅克科技转让其所持股权，下同）事先书面认可。

4、逾期付款情况下转让价款的计算和支付方式

如雅克科技按照本协议约定选择受让目标股权（包括雅克科技指定第三方受让目标股权），或按照其他相关约定应当支付股权转让价款的，雅克科技应当在约定的期限内完成转让价款支付。逾期支付的，雅克科技还应支付违约金，无论受让目标股权的主体为雅克科技或雅克科技指定第三方，违约金是以本协议项下应付未付的转让价款为基数，以每天万分之一为费率计算得出，直至雅克科技以及雅克科技指定第三方足额支付所有应付未付款项之日止。

5、违约责任

本协议任何一方违反本协议，或者在本协议项下的陈述与保证不真实、不准确或产生误导的，均构成违约，违约方应向守约方承担违约责任。

任何一方违反本协议的约定时，守约方有权要求及时履行、限期履行或纠正，并要求赔偿实际损失或按本协议约定支付违约金。如违约金不足以弥补实际损失的，违约方应就超过部分向守约方支付损害赔偿金。

如雅克科技违反本协议约定或未履行支付转让价款的义务，则投资人有权要求雅克科技支付本协议约定的违约金。

投资人基于本条约定要求违约方承担违约责任，不构成对投资人基于本协议约定行使各项救济措施等权利的放弃或者减损，且不构成雅克科技及华飞电子承

HuaFei written notice/election, appraisal at preceding quarter end, mutually accepted price and overdue-price penalty. Appraisal price is not fixed principal. The one basis point daily overdue penalty is distinct from investment yield; final executed/completed terms remain a source gap. Source: HuaFei_capital_20260331, 2026-03-31, original PDF page 11. Original pixels retained. Original source.

Original exhibit YOK-F31

权结构将由公司 100%持股调整为公司持股 33.07%（实际股权比例以后续工商登记为准），石溪资本、TCL、星熠领先、华泰国际和力牡投资（合成“表决权委托方”）同意将其所持江苏先科股权对应的全部股东会表决权委托于雅克科技行使，雅克科技可行使的表决权比例为 45.64%。雅克科技及表决权委托方同意，表决权委托方对雅克科技的表决权委托期限自《增资协议》生效之日起至表决权委托方不再直接持有江苏先科公司任何股权之日为止。

本次增资完成后，雅克科技可行使的表决权比例为 45.64%，其他股东股权结构较为分散。江苏先科董事会由五名董事组成，包括由雅克科技提名的四名董事，由大基金二期提名的一名董事，雅克科技仍保持对江苏先科的控制权。

本次增资将导致募投项目实施主体江苏先科的股权结构发生变化，但公司仍对其保持控制权，且募投项目及投资金额不会发生变化，不会影响公司募投项目的正常进行。

六、本次增资的目的和对公司的影响

江苏先科自成立以来一直致力于布局半导体前驱体产品、光刻胶及光刻胶配套试剂等半导体核心材料领域，客户多为世界知名半导体和显示面板生产厂商。为了把握当前高速发展的行业机遇，加强产品在国产化替代方向的战略布局，提升产品的核心竞争力，结合公司的整体发展规划，引入大基金二期等投资人。本次增资为公司研发的持续投入和业务的快速发展提供资金支持，有利于提升雅克科技在半导体前驱体和光刻胶业务领域的竞争实力，符合国家的产业政策的导向。为了引入外部投资者，增强江苏先科的资金实力，针对本次增资除雅克科技外其他增资方增资的部分，公司作为江苏先科原股东将放弃优先认缴权，不存在损害公司及股东特别是中小股东利益的情况。

本次增资完成后，公司对江苏先科的持股比例将由 100%降至 33.07%，石溪资本、TCL、星熠领先、华泰国际和力牡投资同意将其所持公司股权对应的全部股东会表决权委托于雅克科技行使，雅克科技可行使的表决权比例为 45.64%，不会导致公司合并范围、经营成果及财务状况的重大变化。江苏先科作为公司募投项目的实施主体之一，其股权结构因本次增资的变化，不存在改变或变相改变募集资金投向的情形，不存在损害公司及股东，特别是中小股东的利益情形。

Original exhibit YOK-F32

七、投资方股东主要特别权力

（一）回购权

如发生下列任一情形（以较早者为准），投资方股东（即本次增资中除雅克科技外其他增资方）可以书面要求雅克科技回购其所持有的全部或部分江苏先科股权：

1、自交割日起五年届满之日，雅克科技未能完成以向投资方股东发行股份的方式购买投资方股东所持江苏先科全部股权；

2、江苏先科发生处置其主要资产、破产清算、变更或停止主营业务经营等重大不利变化事项；

3、江苏先科或雅克科技拟以现金方式回购其他股东持有的江苏先科股权；

4、江苏先科或雅克科技违反《增资协议》第 5.3.2 条约定的交割后承诺。

（二）新增注册资本的优先认缴权

在《股东协议》签署后的任何时候，如江苏先科计划新增注册资本时，江苏先科股东均有权（但没有义务）在同等条件下，优先于新增第三方股东按照各江苏先科股东之间的相对认缴出资比例认缴新增资本。

（三）优先购买权

在《股东协议》签署后，若江苏先科股东（以下简称“转让方”）拟向任何人直接或间接出售或以其他方式处置其持有的全部或部分江苏先科股权，除转让方外的其他江苏先科股东有权（但没有义务）根据转让方计划出售的同等条款和条件优先购买拟转让股权。

（四）利润分配权

各方同意，江苏先科的资本公积金、盈余公积金、未分配利润（如有）由江苏先科所有股东按照各股东所持江苏先科股权比例共同享有。自交割日后，如股东会决定进行利润分配，江苏先科和雅克科技应采取一切必要的行动以确保投资方股东获得投资方股东按照其届时在江苏先科中的所持股权比例应享有的分红，

Sponsor review reproduces the actual conditional investor put: written demand for all/part of holdings, five years after closing without share exit and other specified triggers. Physical PDFpage 18 has printedlabel 17. No disclosed repurchase price, fixed IRR or exact cash deadline is supplied; the parent subscription is included in the broader 1745 Mcapital proposal. Source: Xianke_capital_terms_sponsor_20220830, 2022-08-30, original PDF page 18. Original pixels retained. Original source.

Cash conversion and funding scope

The cash build starts with June consolidated cash and separately shows the much smaller parent-only balance. Trade working-capital stocks use a defined inventory, receivable, payable and advance perimeter. Historical cash-flow working-capital adjustments have a broader scope and are reconciled separately; they are not forced to equal the stock change.

Each path pays bank interest, identified accrued interest once, a separately disclosed lease-interest cash proxy, income tax, capex, lease principal, parent dividends, minority distributions and conditional exit costs. Bank maturities and lease dates are LOW proxies because a full future contractual cash calendar is unavailable. Restricted debt repayment reduces the remaining maturity schedule once. Ringfenced Yarui cash cannot satisfy general or parent requirements.

A CNY 1,000 million operating and transferability cushion is a model reserve, not reported legally restricted cash. Required external capital is calculated as the positive gap to that reserve separately inside each path, and the running peak is calculated before probability weighting. Positive cash in an equity-settlement path cannot cancel a cash-purchase funding gap. The model assumes no automatic refinancing, new unrestricted equity proceeds or buyback.

The 36 declared paths combine business execution, Yarui funding, capital exit and HuaFei claim presence. Commercial qualification and Mo capture remain conditional means inside those states. Consequently the reported funding diagnostic does not claim to measure every possible real-world qualification or liquidity tail. The operating path is conditional on access to the capital required to complete its paid projects.

ASTRA accepted-output proxy, not reported tonnes, physical wafer starts or factory utilization. The chart removes modeled price and ordinary-content intensity from saved ordinary semiconductor sales. State weights 25%/55%/20%; all commercial receipt/cost equations remain active.

Q3 2030	172	199	225
Q4 2030	173	200	225

This driver isolates the modeled amount of customer-accepted output from material content and price. More layers can increase consumption per accepted unit, while customer qualification and fab loading determine whether installed capacity becomes receipts. Supplier-specific realized units and ASP remain unavailable.

The five recognized revenue paths

Five exhaustive business revenue series

CNY million

All observations are ASTRA model estimates; original source facts and assumptions are distinguished in the analysis.

Q4 2030	1,778	1,096	1,044	389	213	4,521

Semi means semiconductor business. The five component series sum to group sales; group total is shown as a reference line, not another revenue component.

Semiconductor business - full forecast derivation

Q3 2030	34	23
Q4 2030	34	23

The path reflects qualified product mix, limited unit-cash efficiencies and absorption of committed costs. Research, new factory staff and depreciation are paid explicitly. Services normalize toward a lower margin. Group margins are profit divided by total sales, rather than an average of business margins.

YOKE TECHNOLOGY | FRAMEWORK 8 | OCTOBER 21, 2026

Six coherent operating states

State	Weight bp	Q4 2027 sales	Q4 2027 OP	Q4 2030 sales	Q4 2030 OP
slower qualification Yarui unfunded	1,250bp	2,577	438	3,786	755
slower qualification Yarui funded	1,250bp	2,577	433	3,801	729
qualified expansion Yarui unfunded	1,375 bp	3,078	654	4,585	1,117
qualified expansion Yarui funded	4,125 bp	3,082	650	4,621	1,095
faster accepted volume Yarui unfunded	200 bp	3,439	796	5,132	1,352
faster accepted volume Yarui funded	1,800 bp	3,448	794	5,187	1,336

A funded Yarui branch can earn less near-term operating profit because new research and plant commitments precede sufficient commercial receipts. Funding completion is not proof of successful customer qualification.

Weights are shown in rounded basis points to describe small branches without decimal percentages. Rounded weights can differ from their exact total; the full-precision probabilities control all financial calculations. All rows retain underlying quarter-by-quarter cash and fee calculations in the linked model. The equations and input schedules below allow the waterfall to be reconstructed.

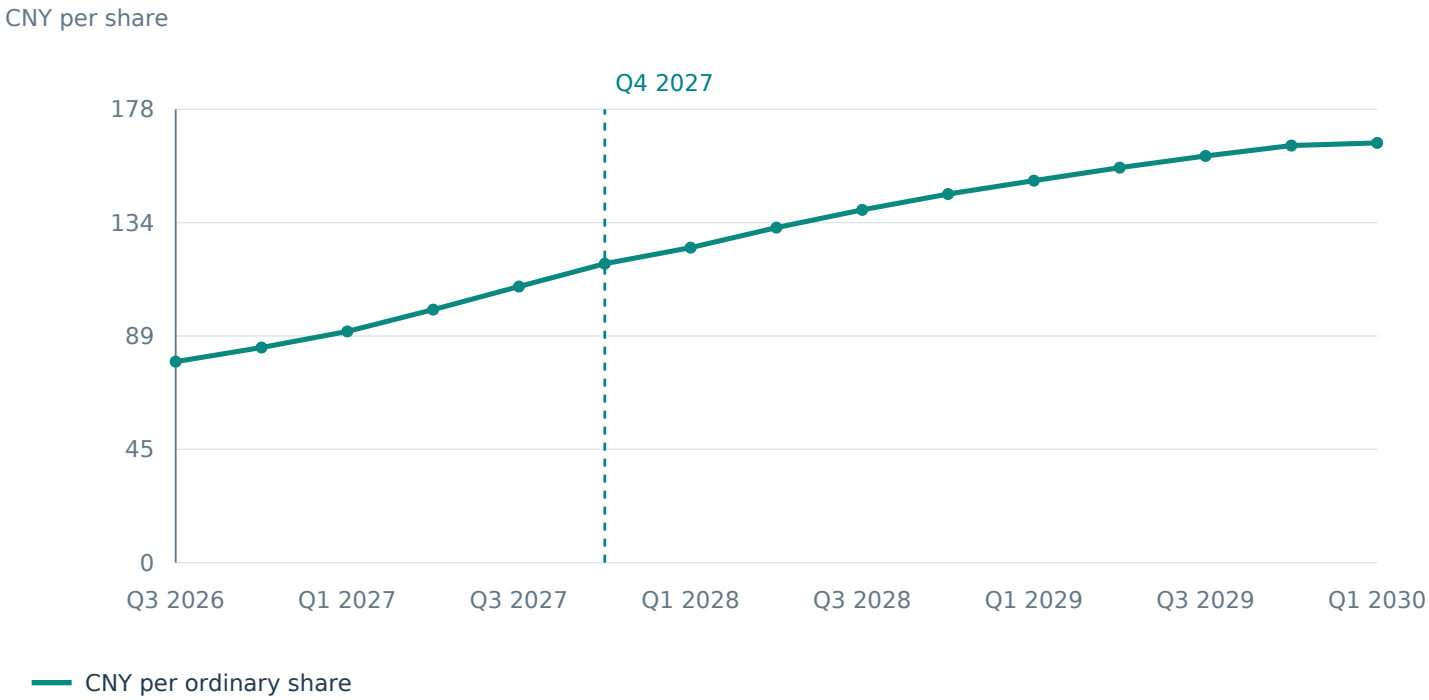

Operating ceiling and ordinary-share convention

The sanctioned valuation remains 20 times consolidated core operating profit in the ceiling quarter and next three quarters, divided by the expected ordinary share proxy at the start of that window. Financing expense, investment gains and non-core items are outside this core-profit definition. All ordinary staff costs remain. The convention is not an attributable-net-income or enterprise-value valuation; minority interests and financing require the separate cash and share analysis.

The known initial ordinary share proxy is retained. Conditional stock settlements enter later window starts, with the Xianke exchange from Q1 2028 and Kemet/HuaFei from Q1 2030. The existing method and starting-quarter convention remain unchanged. These future issued shares and their issue price are model assumptions, not an announced placement or historical EPS denominator.

Every displayed ceiling has its own four-quarter operating-profit chain. The final three forecast quarters have no ceiling because the required later earnings tail has not been supplied. Reader-facing numbers are whole CNY millions or whole CNY per share; exact values remain in the model and workbook, so rounded terms can differ from rounded sums.

Quarterly operating ceilings

All observations are ASTRA model estimates; original source facts and assumptions are distinguished in the analysis.

Quarter	CNY per ordinary share
Q3 2026	79
Q4 2026	85

Q4 2028	841	849	896	937	3,523	20	486	145
Q1 2029	849	896	937	969	3,651	20	486	150
Q2 2029	896	937	969	974	3,776	20	486	155
Q3 2029	937	969	974	1,007	3,887	20	486	160
Q4 2029	969	974	1,007	1,037	3,987	20	486	164
Q1 2030	974	1,007	1,037	1,058	4,076	20	494	165

Each row uses the displayed quarter and the next three operating-profit observations. The full-precision sum is multiplied by 20 and divided by that starting quarter ordinary-share proxy. The final three model quarters have no supplied forward tail and receive no ceiling.

YOKE TECHNOLOGY | FRAMEWORK 8 | OCTOBER 21, 2026

Sensitivity: what controls the economic outcome

These are isolated tests around the single active case, not additional approved forecasts. Every ceiling retains 20x core operating profit and the corresponding starting-quarter share method. Dependent production, tax, distributions, asset cohorts and cash costs are recalculated with the stated exception for the conservative ASP stress.

Changed control	Q4 2027 CNY/share	Q1 2030 CNY/share	Mean path peak capital	Any reserve gap	End mean cash

Net continuation reserve 0%	118	165	737	52%	3,160

Changed control	Q4 2027 CNY/share	Q1 2030 CNY/share	Mean path peak capital	Any reserve gap	End mean cash
Net continuation reserve 8%	118	165	737	52%	3,114
Lease principal cash 2 x	118	165	747	52%	3,109
Lease cash interest 2 x	118	165	741	52%	3,128
Readiness and acceptance 2 Q later	96	155	1,038	53%	1,853

The active conditional model has about 52% probability of a reserve shortfall and 35% probability of negative available cash in at least one quarter. These are scenario-weight diagnostics with LOW financing and qualification inputs, not measured default frequencies. The mean of each path peak need is about CNY737 million even though the minimum mean available cash is above the reserve.

Sensitivity boundaries and active contribution

The 5% ASP stress cuts every semiconductor and resist sales component at unchanged accepted physical volume. Manufacturing, depreciation, novel support, startup and trade NWC stock remain at the original cash budget. Revenue-linked selling, turnover taxes, income taxes and distributions follow the lower receipts. This deliberately avoids a free inventory or production-cost release from price erosion.

The two-quarter delay moves receipt qualification and asset readiness together. Paid factory staff remains on the original unlagged schedule. Accepted-growth tests multiply only the incremental captured-growth control, leaving independent adoption parameters unchanged. Capex tests also change the corresponding new cohorts. Asset-life tests recalculate depreciation rather than changing source policy facts.

A zero-adoption test removes the current net commercial contribution and its linked variable costs; it retains paid research, committed factory costs and source anchors. Mo overlap tests leave the old removed content allowance fixed. Yarui funding tests retain its conditional commercial probability inside funded states and change matching outside capital, debt sweep, plant spending and R&D.

The active new-resist bridge contributes about CNY8 per share to the Q4 2027 operating ceiling versus zero new qualification. The analogous Mo contribution is below CNY1 per share. These are removals of active increments under the same method, not extra amounts to add to the displayed ceiling. Research and paid costs already constrain both.

Working-capital, cash-interest and continuation-reserve tests can change funding without changing the sanctioned pre-finance core-OP ceiling. A net continuation top-up can reduce later cash while leaving an earlier running peak unchanged. That unchanged peak is not proof that the claim has no economic cost. Share-price tests change conditional issued shares and later dividend outflows; they do not create new cash.

Analytical score and risk classes

The analytical score is 43 out of 60, rounded to 72. Core thesis earns 16 out of 20 for process qualification and recurring consumption, with competing suppliers limiting the score. Cycle earns 8 out of 10; TAM expansion 8 out of 10; catalysts 4 out of 5; macro 9 out of 10; and alpha 3 out of 5. Five scored risk classes deduct five points. Protected Excel Base remains 73 under the owner's standing control.

The five risk classes are: competitive pricing and substitution; customer and geographic concentration; commissioning, qualification and acceptance; financing and conditional investor rights; and minority attribution and governance. Each receives a one-point deduction. Financial score, execution probability and protected Excel Base are distinct quantities.

Evidence that would raise the operating probabilities includes sustained accepted production, qualified new-product receipts with disclosed margins, audited cash conversion and customer allocations. Missed loading dates, price erosion, weak cash collections or additional investor claims would reduce them. Funding completion improves only the funding branch until commercial qualification is demonstrated.

Category	Points	Maximum	Evidence / constraint
Core thesis	16	20	Qualified incumbent with repeat consumable demand, process compatibility and a diversified group.
Cycle stage	8	10	Domestic and Korean accepted-volume ramps continue; installed output and acceptance differ.
TAM expansion	8	10	More process steps, qualified resists and Mo delivery chemistry can add content.
Catalysts	4	5	New capacity, qualification and recognition milestones; numerical Q3 results still pending.
Macro	9	10	Memory and logic investment support materials; wafer starts govern conversion.
Alpha	3	5	Local-language contract and cash restrictions sharpen attribution; the broad theme is widely followed.
Risks	(5)	0	Competition/pricing; customer exposure; ramp/acceptance; funding/conditional investor rights; minority attribution/governance.
Total	43	60	Analytical 72 rounded; protected Excel Base 73 retained

Forward tests and dated counters

Hypothesis	Raise weight / support	Reduce or remove weight
Accepted-volume growth	Sustained loading, customer acceptance and repeat receipts	Commissioning or loading slips; weak receipts after installed assets
Advanced materials	Disclosed qualified sales, repeat orders and durable unit contribution	Qualification delays, substitution or gross-margin compression
Mo capture	Customer deployment, content and supplier share evidence	Wider replacement of existing tungsten sales or competing chemistry
Yarui funding and commercial ramp	Closing and cash-use proof; then independent qualification milestones	Funding delay, research overruns or plant spend without accepted sales
Capital exit	Executed appraisal, negotiated share exchange and disclosed schedule	Additional claims, worse appraisal/issue-price terms or cash exercise
Cash conversion	Collections and stock release with controlled capex	Inventory/receivable build, inaccessible subsidiary cash or earlier maturities
Next earnings	Actual numerical Q3 report and business-note reconciliation	Calendar reminder alone establishes no publication date or earnings amount

YOKE TECHNOLOGY | FRAMEWORK 8 | OCTOBER 21, 2026

Model inputs and exact calculation structure

All future parameters below are ASTRA estimates unless explicitly identified as a reported actual. Input precision is retained in the linked model. Rates are shown as percent or basis points; asset lives use months.

Control	Active setting / boundary
Fixed manufacturing / variable complement	12% / 88%; existing fixed costs grow 4% annually
New staff / maintenance	3% of new paid asset basis annually; opening-CIP overlap 50%; starts 2 quarters before original readiness
Small unit-cash efficiencies	Semiconductor 100bp; other chemicals 150bp; gas baseline 300bp by final quarter
New receipt cash gross profit before fixed / DA	Mo 40%; resist 45%; gas 34%; Yarui 35%
Yarui net overlap	50%; net commercial sales split equally to semiconductor and photoresist
New-receipt support	3% of net qualified, Mo and Yarui receipts
Selling cash	60% fixed anchor;40% revenue linked
Administration / research	Admin 8% annual growth; R&D15%,12%,10%,8% annual increments

Control	Active setting / boundary
Legacy depreciation	5% annual runoff; new cohorts calculated separately
Machine / building lives	Korea 66 /360 months; China 144 /240 months; China 5% residual
Common new asset allocation	75% machinery /25% building;40% Korea /60% China
Bank interest / cash tax	4% /14% planning proxies
Trade NWC	June trade stocks / twice H1 sales; target stock equals ratio times four quarterly sales
Parent distributions	AnnouncedQ3 payment once; future 70 fen per share annually split Q2/Q3
NCI distribution proxy	25% of modeled after-interest, after-tax minority share; known exit-holder fractions removed after settlement
Exit appraisal / share issue	Xianke 150% of dated NCIbook; Kemet/HuaFei 120% original capital; assumed issuepriceCNY100
Success-conditional settlement fee	50bp inQ4 before assumed settlement; zero unresolved; expected OP fee replaced per cash path
Unresolved continuation reserve	Additional NET4% inQ4 2029/2030 after ordinary payouts; not a contractual coupon
General cash cushion	CNY1,000 million; operating/transferability model reserve
No automatic financing	No inserted refinancing, unrestricted equity cash or buyback

Cash and asset schedules used in every path

Input / timing	CNY million or stated unit	Confidence / scope
June consolidated / parent cash	2,336 /867	Reported actual; parent balance is a separate lens, not additional group cash
June bank carrying / principal proxy	3,753 /3,751	Only identified accrued interest removed; complete maturity calendar unavailable
Identified accrued interest	2; paid once Q3 2026	LOW future cash date; source accrued balance retained
Current long / short bank principal	40 inQ4 2026;800 inQ2 2027	LOW maturity dates; funded Yarui pays earliest remaining schedule first
Noncurrent bank principal	2,911; equal Q4 portions 2027 through 2030	LOW maturity calendar; no automatic refinancing
Lease principal	28;14 equal payments fromQ3 2026	LOW cash proxy; no false source payment amount inferred from comparative data
Lease interest cash	Half reported H1 expense, scaled to remaining lease principal	LOW expense-to-cash proxy; tested separately from principal
June trade NWC stocks	2,846	Defined trade perimeter; different from broader source cash-flow working-capital adjustments
Initial NCI / Xianke / Kemet fractions	1,188 bp /798 bp /143 bp	Source H1 minority-profit fractions; subject to model exit timing
HuaFei potential fraction	81 bp;60% claim presence	LOW proxy using rounded disclosed subsidiary profit; branch adjustment preserves initial weighted NCI total
Ordinary NCI payout	25% of modeled after-tax minority profit	LOW; relevant exited-holder fractions removed after modeled settlement
Outside Yarui funded path	1,350 inQ1 2027;810 debt /540 plant	Proposal conditional; debt maturity sweep and earmark release each occur once
Xianke settlement	2,322 inQ1 2028; or assumedCNY100 share exchange	150% of dated NCI book proxy; no announced appraisal, issue or exercise
Kemet / HuaFei settlement	120% of 925 plus about 850 if claim exists;Q1 2030	Source 925 completed; unrounded capital-table figure retained in model; all future exit terms LOW
Funded Yarui cash-purchase risk	1,620 inQ4 2030	LOW conditional appraisal/risk proxy; zero automatic claim of legal due date
Opening paid CIP	1,166;35%/45%/20% readyQ4 2026/2027/2028	LOW readiness timing plus business lag; no duplicate cash spend
Future common capex	H2 2026:700; then 900/1,000/900/900 annual	LOW paid capital budgets; later quarterly weights 20%/25%/25%/30%

Input / timing	CNY million or stated unit	Confidence / scope
Funded Yarui extra plant capex	270 in 2028 and 270 in 2029	LOW timing; same quarterly weights; included once
Common capex readiness	Half 4 quarters /half 8 quarters after payment	LOW plus business lag; paid staff starts 2 quarters before original readiness
Yarui capex readiness	4 quarters after payment plus nonnegative lag	LOW; no new commercial qualification inferred from construction

Basis-point fractions and monetary figures are rounded for reading. The exact H1 numerator and denominator, branch amounts and unrounded ratios remain in the linked calculation model. Lease-principal cash 2 x is an isolated spending stress with the June carrying balance and baseline lease-interest profile held, rather than a restatement of source liabilities.

Reference factors are percentages of half-H1 source revenue and are overlapping planning envelopes. Semiconductor divides its factor by the old content path to isolate throughput, then replaces the old Mo allowance. Resist separates a mature path ending 35% above its anchor from conditional new qualification. Yarui gross receipts are reduced by conditional commercial success and 50% overlap before entering the five-bucket total.

Equations that connect inputs to the operating case

Stage	Calculation / scope
Timing	For 18 model quarters, maturity progress=index/17. Accepted-growth index is bounded between 0 and 17 after the state lag. Paid staff keeps the original unlagged start.
Semiconductor throughput	Old reference factor / (100% +28% x lagged progress). Apply growth capture 75%,100% or 125% to the incremental throughput.
Semiconductor content	Remove old 6% x post-Q2-2027 phase. Add 12% x phase x 50% net overlap x conditional Mo capture. Apply the state price haircut to revenue; manufacturing uses preprice accepted value.
Resist	Mature receipts=half-H1 sales x (100% +35% x progress). Extra qualified receipts=positive difference from old reference factor x adoption probability.
Other chemicals / gas	Chemicals apply captured reference growth; gas retains its actual anchor plus captured qualified growth. Small cash-unit efficiencies remain explicit.
Services	Accepted reference growth; cash GP normalizes toward 45%, without adding another fixed-cost leverage gain.
Gross profit	Five-bucket receipts minus variable manufacturing, existing fixed cash, new staff/maintenance and allocated paid-asset depreciation.
Core OP	Gross profit minus selling, administration, research, extra Yarui research, support, startup, turnover taxes, opex depreciation and expected settlement fees.
Cohort DA	Paid basis x life/mix annual depreciation rate /4 after readiness. Opening CIP has no new cash payment. Each future cash payment creates its own cohorts once.
Case probability	Business weight x funded/unfunded weight; cash adds capital-path and claim-presence weights. Commercial outcomes remain conditional means inside these declared states.
Valuation	Sum current and next 3 weighted core OP observations x 20 / expected ordinary shares at that starting quarter.
CFO	Path core OP after actual settlement fee minus bank/lease interest and cash tax, plus total depreciation, minus change in defined trade NWC stock.
Closing cash	Opening cash +CFO -capex -lease principal -dividends +outside Yarui capital -restricted debt sweep -regular maturities -cash exit -net continuation reserve.
Funding gap	Available cash=closing cash minus unspent Yarui earmark. Need=positive part of 1,000 minus available. Running peak and positive-part operations occur within each path before weighting.

Cross-book implications and investment conclusion

Memory producers such as Micron and SK hynix can report stronger prices before Yoke sees higher material consumption. TSMC and other logic capacity indicators help test the separate wafer-output channel. WFE delivery supports future installed capacity, while accepted production and material intensity determine the nearer consumable receipt. These are cross-checks on the same demand wallet, not independent additions.

The most valuable paired watches are memory bit demand versus wafer starts, equipment commissioning versus material acceptance, and Mo chemistry adoption versus the tungsten wallet it replaces. Power and compute expansion strengthen the demand backdrop without establishing a named Yoke allocation. The SpaceX signal receives a 35% company-demand relevance judgment and full existing-wallet overlap, giving zero separately added company revenue.

Yoke has a credible path to higher recurring materials profit as customers load more complex processes. The forecast requires accepted output and qualified content to outrun competition, research, staff, depreciation and working-capital demands. Conditional capital exits and minority claims remain meaningful constraints on what consolidated operating profit can deliver to ordinary shareholders.
