Sunway Communication / 信维通信

300136.SZ | Research date: October 24, 2026 | Private portfolio research | Framework 8.0

Holding status: unverified. The source holding field is genuinely blank. The analytical score is 37/60, rounded to 62 in the Fail band, with a beneficiary classification. Protected Excel Base 65 is a separate retained convention.

Current Q4 2027 forward operating-profit ceiling: CNY 32.19 per share. The dated market quote is CNY 45.59 on October 23, 2026. Actual issued shares are 967.568638 million; valuation uses starting-quarter gross share conventions of 970 million in 2026 and 1,070 million from 2027. The latter already includes the hypothetical 100 million future shares.

The opportunity is greater engineered component content in terminal hardware. The practical constraint is paid, qualified capacity and the cash needed to support it. The mature consumer franchise funds satellite interconnects and antenna modules, new RF products, chip-interface thermal components and MLCC. Qualification, yield, pricing and financing determine how much of that demand becomes parent operating profit.

T01 · Current valuation and score conventions

Measure	Current value
Q4 2027 forward parent core OP, CNY B	1.722173
Operating-profit multiple	20
Unit factor	1,000
Starting-quarter valuation shares, million	1,070
Ceiling, CNY/share (display)	32.190145
Analytical score / 60	37
Analytical rounded score	62
Protected Excel Base	65

All quarters from Q3 2026 onward are model estimates. H1 2026 is the latest actual located at the October 24 source cut; a forthcoming Q3 filing is the next actual anchor. The report contains 18 operating quarters and 15 complete forward four-quarter windows. The final three quarters have no invented valuation tails.

Component wallets and commercial access

Sunway combines materials, processes and custom component engineering. That can increase customer retention and content per device. Two North American low-earth-orbit operators in stable batch delivery demonstrate commercial access. The public record does not establish exclusivity or a physics-required bottleneck across product generations.

The useful demand chain runs from eligible terminal or device units, through qualified component content and captured supply, to accepted invoices. Starlink customers, quarterly additions, manufacturing capacity, replacements and direct-to-cell users have different denominators. AI compute investment and whole-vehicle revenue provide no direct Sunway revenue conversion.

Consumer and legacy products remain the funding base. The five-family forecast allocation is a LOW model decomposition; the issuer does not publish matching family revenue or margin accounts. In particular, current thermal and RF products must be removed from the project envelope before incremental opportunities are counted.

T02 · Product boundaries and evidence stages

Wallet	Eligible content / current evidence	Principal limit
Consumer / legacy	Incumbent antennas, RF and precision electronic components.	Mature demand, customer concentration and mix; modeled allocation is undisclosed.
Satellite	Ground-terminal connectors, antenna arrays and modules; selected stable batch deliveries.	Each model has its own qualification. Space service and all satellite content are outside the wallet.
New RF	LCP and other RF components for terminals; future AI-device content is conditional.	Named OpenAI award is unverified; qualified designs, ASP and captured units are unknown.
Thermal	TIM1 and heatspreaders; product-specific sampling, validation and volume stages.	Interface reliability and integration, substitutes, customer approval and paid equipment.
MLCC	Controlled Yiyang manufacturing business; domestic batch supply and overseas validation.	Accepted good units, grade mix, yield, costs, losses and 70% parent attribution.

1、商业卫星通信器件及组件项目

商业卫星通信器件及组件项目的主要产品为阵列天线、阵列天线模组以及高频高速线缆及连接器，相关产品的主要核心技术以及客户验证情况如下：

产品	企业掌握的核心技术	技术来源	是否实现规模化量产
阵列天线 A	通过 ATF 工艺技术，高频性能材料极低射频损耗，组件性能带宽更宽、性能更优，能够减少传统阵列天线纯高频硬板生产层数，及制板难度，提升硬板的生产良率及制程不稳定，可实现天线组件产品轻量化，结构与集成灵活的特点，成本低，易大规模量产	自主研发	通过客户可靠性测试验证、项目投产后即可量产
阵列天线 B		自主研发	已量产
阵列天线模组 A	1、阵列天线模组系统方案设计； 2、大规模批量的生产制造体系及量产测试技术。 通过两项关键核心技术，可提供定制化天线模组系统方案设计+ATF 天线自制+模组贴片组装+整机量产测试，一站式解决方案，可实现以消费电子的产品交付理念来匹配终端大规模量产交付	自主研发	已量产
阵列天线模组 B		自主研发	已小批量生产，通过客户可靠性测试验证、项目投产后即可量产
高频高速线缆及连接器	1、定制化线材设计。满足户外等级，耐 UV，性能满足 Cat5e 标准。 2、定制化户外高防水要求网络线缆。材料选型特殊，尺寸精度规格要求高，且定制化 IPX8 防水要求。 3、定制化自解锁连接器结构，可以在保证互配插拔力的基础上，同时强脱实现连接器分离。	自主研发	已量产

上述产品中阵列天线 A、阵列天线模组 B 尚未量产，目前处于送样验证中，预计将在本次项目投产之前完成客户验证。

2、射频器件及组件项目

射频器件及组件项目的主要产品为毫米波雷达天线组件、AI 智能终端天线及模组、LCP 传输线天线及模组、消费电子透明天线以及车载透明天线，相关产品的主要核心技术以及客户验证情况如下：

产品	企业掌握的核心技术	技术来源	是否实现规模化量产
毫米波雷达天线组件	1、精密模具和注塑：可满足精度在±0.03mm 以内，且不经整形平面度＜0.2mm，对于间隙柱状销钉结构可实现 100%无困气； 2、纯化镀铜表面处理和保护工艺：实现膜厚精度	自主研发	已量产

I04_p019 · The satellite process and qualification table separates product models. Selected antenna arrays and modules were in mass production; array A and module B remained in sample validation. Reliability approval is a condition for commercial expansion. Source: https://static.cninfo.com.cn/finalpage/2026-04-24/1225190582.PDF | 2026-04-24 | Physical PDF page 19 | Stage: Issuer inquiry reply: actual stage / management technical assertion as captioned | Original SHA-256: f54ab8d2aadc92d5235856ce2cfcd475a196c53a0ab3a25c5b6f2e9ef6241145

产品	企业掌握的核心技术	技术来源	是否实现规模化量产
	±0.5μm 控制，良率 98%以上； 3、全自动化组装焊接和性能检测系统，可实现从上料、刷锡、组装、焊接到下料检测全流程自动化，以及各检测工站信息上传 MES 追溯		
AI 智能终端天线及模组	自主开发 RF 性能测试系统，软硬件一体化，自研射频切换模组最多可实现 1 出 32 通道的 S11、S21、隔离度、TDR 等测试，并保持数据上传 MES	自主研发	已量产
LCP 传输线天线及模组	盲孔合金浆料填充及多层 LCP 高温一次压合技术，可实现多层 LCP 电路制造，效率较传统工艺提升 30%以上；内部各层电路可实现全盲孔任意层互联，有效提升布线密度及自由度；支持非对称叠构，支持传输线与天线一体化结构，天线与传输线之间 RF 信号损失可降低 5%左右	自主研发	已量产
消费电子透明天线	通过 Ultra-mesh 技术，能够实现透光率＞90%，方阻小于 2Ω/sq，做到肉眼近距离观看完全透明，给客户带来更好的视觉效果同时也兼具更优异的天线性能	自主研发	通过客户可靠性测试验证、项目投产后即可量产
车载透明天线		自主研发	通过客户可靠性测试验证、项目投产后即可量产

上述产品中消费电子透明天线、车载透明天线尚未量产，目前处于送样验证中，预计将在本次项目投产之前完成客户验证。

3、芯片导热散热器件及组件项目

芯片导热散热器件及组件项目的主要产品为散热片以及芯片导热 TIM 产品，相关产品的主要核心技术以及客户验证情况如下：

产品	企业掌握的核心技术	技术来源	是否实现规模化量产
芯片封装散热片（小尺寸）	1、高清洁表面电镀工艺，能够达到极高的外观标准，电镀后的散热片表面具有很高的清洁度； 2、物理成型工艺，能够实现极高的平面度要求，大尺寸散热片成品的平面度能够做到≤0.15mm。	自主研发	已量产
芯片封装散热片（大尺寸）		自主研发	已完成小批量生产，通过客户可靠性测试验证、项目投产后即可量产
芯片导热 TIM 产品	1、高导热复合材料体系配方，热阻≤0.03 K·cm^2/W； 2、实现极细颗粒分散的混料工艺技术。	自主研发	通过客户可靠性测试验证、项目投产后即可量产

I04_p020 · RF, LCP and thermal specifications refer to particular processes and products. Process yield assertions do not establish a company-wide yield, realized selling price or customer acceptance rate. Source: https://static.cninfo.com.cn/finalpage/2026-04-24/1225190582.PDF | 2026-04-24 | Physical PDF page 20 | Stage: Issuer inquiry reply: actual stage / management technical assertion as captioned | Original SHA-256: f54ab8d2aadc92d5235856ce2cfcd475a196c53a0ab3a25c5b6f2e9ef6241145

Actual earnings: a cash-generating base with real development costs

H1 revenue was CNY 4.032 billion and gross profit CNY 806 million. Core pre-financing operating profit was CNY 238 million, compared with statutory operating profit of CNY 169 million and parent net income of CNY 151 million. These measures answer different questions. The valued core removes finance, foreign exchange, grants, investment and fair-value effects, disposals and credit or inventory releases.

Full H1 R&D was CNY 314.499 million: reported expense of CNY 301.999 million plus CNY 12.501 million of capitalized development. The forecast retains ordinary engineering costs. Platform R&D and administration include their allocated noncash depreciation; development cash is part of sustaining capital, so the model avoids charging it twice.

H1 operating cash flow of CNY 440 million was below cash capital spending of CNY 575 million. The latest balance-sheet cash anchor is CNY 2.158 billion of unrestricted cash equivalents. Cash conversion, debt and acquisition commitments therefore matter alongside the growth narrative.

T03 · Latest actual anchors, CNY billion

47

F_H1_PL · The original H1 consolidated income statement provides revenue, manufacturing costs and reported operating expenses. The adjacent core-profit bridge excludes financing and nonoperating effects; it does not relabel statutory profit or parent net income. Source: https://static.cninfo.com.cn/finalpage/2026-08-28/1225522510.PDF | 2026-08-28 | Physical PDF page 47 | Stage: HIGH reported consolidated actual | Original SHA-256: b29134c7468a1d56afc8f2922cfae2280483069f9b09dce2bf63d5d67d2e3122

Satellite: qualification and order quality bound the ramp

The July clarification states that satellite lines moved to Vietnam and other overseas sites in 2025, with stable batch delivery. Satellite-related revenue was below 10% of 2025 group revenue. It rejects the reported change in customer staffing and equipment terms. Overseas production offers customer access while adding location, trade and execution risks.

The April reply separates models already in mass production from antenna array A and module B still undergoing sample validation. Mixed firm and intention orders total 84.8164 million pieces and sets as of March 31. A single price cannot be applied across those heterogeneous units, and intentions carry less certainty than accepted deliveries.

Starlink kit capacity is a useful external ceiling on one terminal flow, rather than a supplier award. Direct-to-cell service uses unmodified phones and can alter terminal demand. Satellite insourcing concerns another manufacturing boundary; neither metric proves the amount of Sunway content won or lost. The forecast uses a residual company project wallet and explicit cost-bearing outcomes.

证券代码：300136　　证券简称：信维通信　　公告编号：2026-034

深圳市信维通信股份有限公司

关于媒体报道的澄清公告

本公司及董事会全体成员保证信息披露的内容真实、准确、完整，没有虚假记载、误导性陈述或者重大遗漏。

一、媒体报道情况

近日，据日经亚洲（Nikkei Asia）引述消息人士称“某北美企业据报要求供应商排除中国籍员工及设备”，大量投资者对该事件表达了关切。针对上述情况，公司董事会高度重视，立即组织相关部门对公司涉及商业卫星通信业务的供应链、生产布局及人员配置情况进行了全面核查。

二、澄清说明与业务现状

1、经核实，该消息缺乏事实依据，公司与客户的商务合作条款均未发生任何变化。公司目前商业卫星通信相关业务产品的生产、交付及研发工作均处于正常状态。公司与相关大客户保持着长期、稳定的合作关系，各项业务正按计划稳步推进。

2、公司已于去年将商业卫星通信相关产品的生产线转移至越南等海外生产基地。目前，公司海外基地的生产设施完善、技术团队成熟，相关产线已实现规模化生产并持续向客户稳定交付。

3、公司商业卫星通信相关业务收入占公司 2025 年度营业收入比例未超 10%，业绩波动风险整体可控。为应对未来的其他不确定性风险，公司将密切关注客户及市场需求动态，不断提升自身核心竞争力，强化风险防范意识，多措并举保障公司整体经营的稳健与安全。

三、其他说明

公司将密切关注相关事项的后续进展，并严格按照相关法律法规的规定履行信息披露义务。公司指定信息披露媒体为《中国证券报》《证券时报》《上海证券报》和巨潮资讯网（http://www.cninfo.com.cn），公司所有信息均以在上述媒体刊登的公告为准。敬请广大投资者理性投资，注意风险。

I02_p001 · The issuer rejects the reported change in customer staffing and equipment terms. It says satellite production moved to Vietnam and other overseas sites in 2025 with stable batch delivery. Satellite-related revenue was below 10% of 2025 group revenue. This is the substantive clarification page; the next page is the signature. Source: https://disc.static.szse.cn/download/disc/disk03/finalpage/2026-07-31/975396de-4ac4-470b-8853-34fa1d8d2907.pdf | 2026-07-31 filing / 2026-07-30 document | Physical PDF page 1 | Stage: Issuer clarification | Original SHA-256: abab33f586756739fcd77d5918423efaa6634bc90a389cb483f99cda0a453e07

生产工艺为基础，对产线上的生产设备进行相应调整，其中调整周期本身导致的设备稼动率变化也是经济效益方面的重要考量，在满足客户季节性需求变动、产品利润区间和产线调整成本之间达成平衡，因此不存在公司整体而言一般意义上的可以明确量化的产能概念。

4、客户验证、在手订单及意向性合同情况

（1）行业及市场现状

在新一代信息技术快速迭代与新兴应用场景持续拓展的推动下，商业卫星通信、射频器件、芯片导热散热器件三大赛道市场需求旺盛，行业发展前景广阔，同时核心部件国产化需求日益迫切，为公司本次再融资募投项目提供了广阔的市场空间。具体行业及市场需求情况参见本回复“问题 1/三/（一）/1、募投项目拟生产产品下游应用领域、目标客户及市场需求情况”。

（2）客户验证情况

本次募投项目拟生产产品中，阵列天线 A、阵列天线模组 B、消费电子透明天线、车载透明天线、芯片封装散热片（大尺寸）和芯片导热 TIM 产品，目前处于送样验证中，通过客户验证不存在重大的不确定性。具体验证情况参见本回复“问题 1/二/（一）募投项目核心技术来源及技术成熟度”。

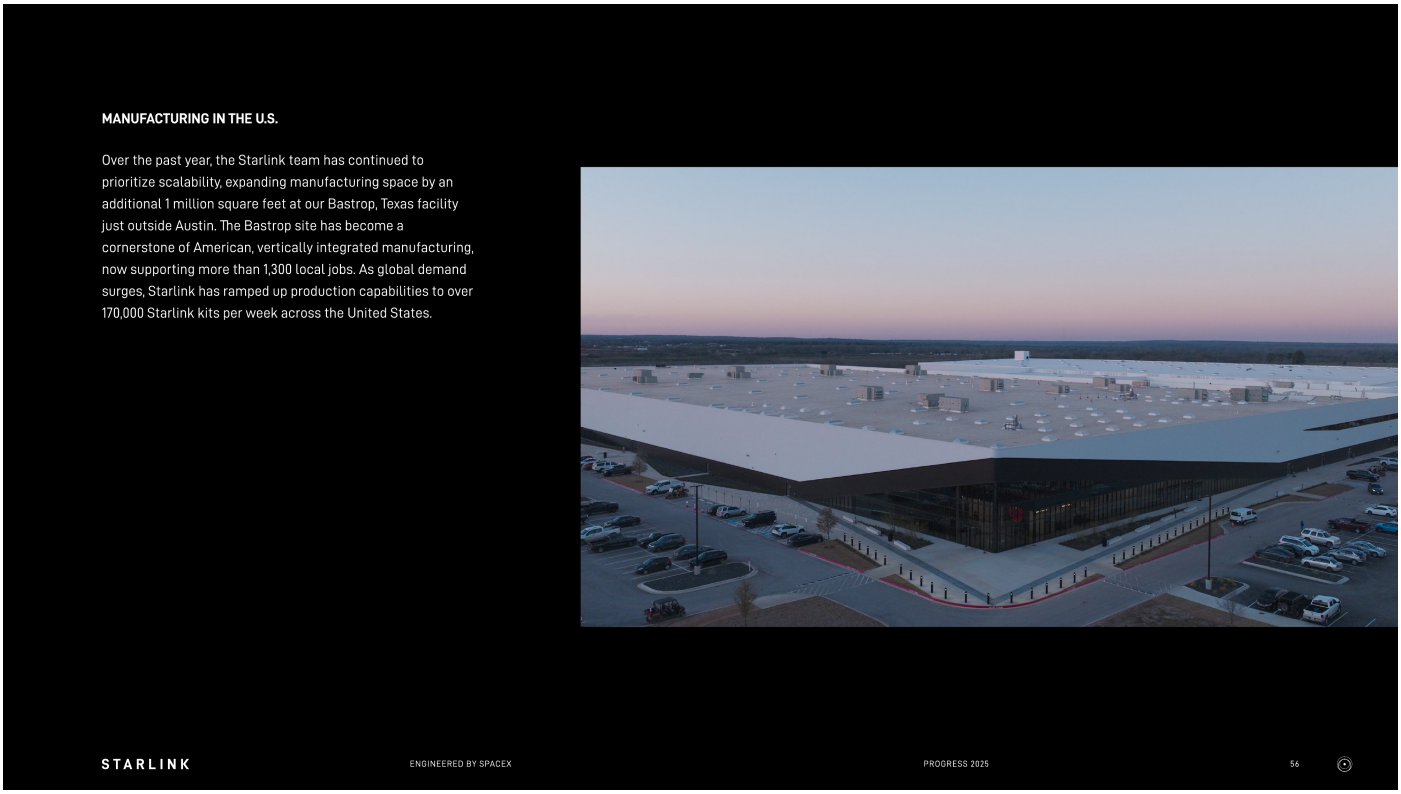

（3）在手/意向订单情况

截至 2026 年 3 月 31 日，本次募投项目相关产品的在手/意向订单合计 8,481.64 万片/套。

①商业卫星通信器件及组件项目

公司在商业卫星通信领域深耕多年，构建了深厚且多元的客户合作体系，具备充分的产能消化能力。一方面，公司持续深化与现有核心客户的合作。发行人在地面终端高频高速线缆和连接器领域已经是北美大客户的主力供应商。且 2025 年下半年，公司成功实现对新增北美商业卫星客户的批量供货，进一步打开国际市场局面。另一方面，公司亦在国内市场积极拓展新势力商业卫星通信客

I04_p030 · Customized products and line changeovers prevent one generally meaningful group capacity number. The March 31 order list combines firm and intention orders: 84.8164 million heterogeneous pieces and sets. These units cannot be converted into revenue at one average price. I09_p057 · Starlink reports United States kit production capability above 170,000 per week. This is manufacturing capacity rather than actual shipments. Sunway content per kit, captured share, replacement demand and product mix are undisclosed. Source: https://starlink.com/public-files/starlinkProgressReport_2025.pdf | 2025 report; publication day undisclosed | Physical PDF page 57 | Stage: Primary counterparty historical statement | Original SHA-256: 4473c208c371358426348bba4dad84ea08e3f46e8f88ccf2083d448acea6deef

RF, AI devices and robotaxi parts: bounded conditional content

The RF opportunity includes LCP and other materials and components that need design qualification and repeatable production. Murata commercialized an alternative low-dielectric substrate route through ULTICIRC. A competitor product announcement establishes substitution; it does not establish a particular Sunway lost account or quantified share.

The newer August 31 public management digest contains an OpenAI hardware breadcrumb, obvious errors and incomplete provenance. There is no verified primary named award, full prepared text, complete Q&A or reviewed audio. The selected model admits a small future supplier-ramp hypothesis at 25%, with 50% overlap removed from the broader RF opportunity. It carries full success and failure outcomes through capacity and cash.

Issuer answers confirm components for robotaxi Starlink applications. The 60% future volume-ramp hypothesis concerns these parts. It does not establish a Tesla or Cybercab whole-vehicle award. Device volume, part content, supplier capture and overlap are distinct LOW inputs. Both named hypotheses share the same component and paid-capacity limits as the general projects.

Only the specific small-parts hypotheses may use LOW headroom equal to 5% of the incumbent family line. Any spill and all generic project increments require prior paid engineering capital. Official answers concerning robot connector prototypes, strategic intentions and minority investments are not separate volume awards. Optical application and mature THz-product counterevidence keep those current sales outside the operating build.

T04 · Named-customer opportunity boundaries

Hypothesis	Evidence / conditional scope	Overlap and resource gate
OpenAI hardware	Public secondary digest; 25% future ramp, not a confirmed account. Conditional 2027-30 eligible devices: 5 / 6 / 8 / 10 million.	CNY 20 component content; 50% overlap removed; 5% specific existing-line headroom then paid new line.
Robotaxi Starlink parts	Issuer-confirmed part application; 60% future ramp. Conditional eligible devices: 0.1 / 0.5 / 1 / 2 million.	CNY 100 part content; 50% supplier capture and 50% overlap removed; same physical wallet.

（4）新增产能是公司获取募投项目产品大批量订单的必要条件

公司产品具有较强的客户定制化特点，公司的主要客户通常会根据下游市场情况向公司下单具体产品和数量，公司再根据客户的订单以及未来预测情况安排生产交货。公司在承接客户订单前，往往需要提前开展产能筹备工作，行业内下游客户在引入新供应商或遴选新项目合作供应商时，普遍要求供应商已具备匹配的产能基础。

因此，公司需结合市场态势及客户需求趋势，前瞻性进行产能规划与布局，公司具备充足产能，才能获得承接客户新增订单的资格。新增产能通常在接近投产阶段，才会与客户正式确定具体需求及交付安排。基于上述情况，本次募投项目新增产能目前在手及意向订单相对有限，具备合理性。当前公司下游应用领域市场需求旺盛，公司亟需通过产能扩充，以满足并承接更多客户订单。同时，优质的客户基础和良好的品牌知名度是未来销售增长的强有力保证，公司与现有客户建立了长期稳定的合作关系，形成了客户资源优势，为募投项目新增产能未来的消化提供了保障。

5、同行业可比公司扩产情况

为满足日益增长的市场需求并抢占先机，同行业公司亦存在陆续进行相关产品的扩产，具体情况如下：

公司名称	项目名称	项目简介	拟投入募集资金总额（万元）	达产/项目达到预定可使用状态日期
天箭科技（002977）	微波前端产业化基地建设项目	生产的产品主要为弹载固态发射机、新型相控阵天线等	32,000.00	2025 年
盛路通信（002446）	新型微波、毫米波组件系统研发生产中心建设项目	项目主要产品为新型微波、毫米波组件系统，应用于卫星通信、雷达通信等领域高敏度接收机，负责无线电接收、放大等过程	20,000.00	计划建设周期为 2 年，预计在第 6 年完全达产
思泉新材（301489）	越南思泉新材散热产品项目	主要生产石墨散热材料、导热界面材料等产品	36,916.40	项目建设期为 3 年，预计在第 6 年完全达产
苏州天脉（301626）	苏州天脉导热散热产品智能制造	扩充高端均温板产品产能，提升智能制造水平	78,600.00	项目建设周期 2 年，预计在第 3

I04_p032 · Capacity preparation can precede customer awards. Delivery commitments may arrive close to commissioning. Paid equipment and floor space therefore need separate tests for qualification, order conversion and cash absorption. Source: https://static.cninfo.com.cn/finalpage/2026-04-24/1225190582.PDF | 2026-04-24 | Physical PDF page 32 | Stage: Issuer inquiry reply: actual stage / management technical assertion as captioned | Original SHA-256: f54ab8d2aadc92d5235856ce2cfcd475a196c53a0ab3a25c5b6f2e9ef6241145

Thermal: the interface is valuable and competitive

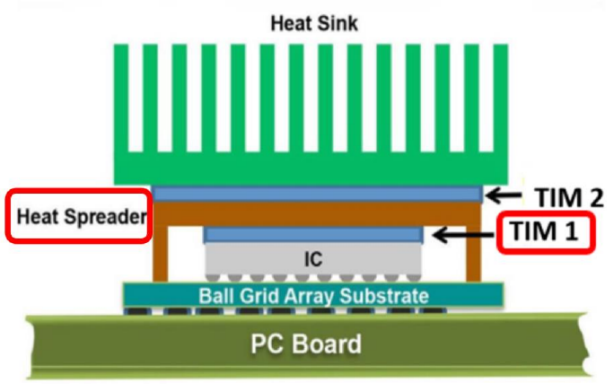

Sunway targets TIM1 and the heatspreader near the chip package. Their performance matters to heat transfer, yet the eligible invoice remains a material or component invoice. Whole cooling systems, cold plates and AI chip or compute revenue are outside this wallet.

The April reply identifies small heatspreaders and selected RF products in volume, while large heatspreaders and TIM were still sampling. These stages cannot be collapsed into one commercial claim. Customer qualification tests interface resistance, reliability, assembly compatibility and process stability; a bulk conductivity number alone cannot price the product.

Indium offers liquid metal, paste and solder TIM routes. The alternatives and Murata RF products prevent an exclusivity inference. A stronger Sunway moat would require evidence of sustained design retention, accepted production at good yield, qualified substitutions that remain uneconomic, and margins that survive engineering and service costs.

触 Die 的液冷冷头。材料上，追求更高导热系数的下一代界面材料（如液态金属）、高性能导热凝胶以及石墨烯等新型材料被应用。这一阶段的散热系统，已发展成为融合精密机械、材料科学、流体力学与智能控制算法的关键子系统，是释放并维持芯片极限算力的根本保障。

目前芯片的典型散热结构示意图

注：本次募投项目产品“芯片导热 TIM 产品”即属于上图中 TIM1，“芯片封装散热片”即属于上图中的 Heat Spreader

（2）主要竞争对手

陶氏化学（Dow Chemical）是全球知名的材料科学公司，在电子与半导体热管理领域，陶氏化学是高性能热界面材料，尤其是液态金属界面材料的领先者。在面向 AI 算力芯片的尖端散热方案中，陶氏化学的镓基液态金属合金导热系数远超传统硅脂，能有效填充芯片与散热器间的微观空隙，将接触热阻降至极低水平，是应对千瓦级芯片散热挑战的关键技术。此外，陶氏还提供包括导热硅脂、凝胶及面向未来数据中心的浸没冷却液在内的完整热管理材料科学平台，以配合多样化的散热技术路线。

信越化学（Shin-Etsu Chemical）是全球知名的高性能材料科学公司，其在电子散热领域提供包括液态金属在内的各类热界面材料。该公司的液态金属产品基于镓基合金体系，适用于部分高功率芯片的散热需求。此外，信越化学也供应导热垫片、相变材料、凝胶等其它类型的热管理材料，用于电子设备与数据中心

I04_p047 · The original thermal stack shows the project scope at TIM1 and the heatspreader; it does not establish current mass-qualified delivery. A whole cold plate, liquid-cooling system, AI chip or compute service lies outside these component wallets. Source: https://static.cninfo.com.cn/finalpage/2026-04-24/1225190582.PDF | 2026-04-24 | Physical PDF page 47 | Stage: Issuer inquiry reply: actual stage / management technical assertion as captioned | Original SHA-256: f54ab8d2aadc92d5235856ce2cfcd475a196c53a0ab3a25c5b6f2e9ef6241145

上述产品中芯片封装散热片（大尺寸）、芯片导热 TIM 产品尚未量产，目前处于送样验证中，预计将在本次项目投产之前完成客户验证。

综上，公司具备募投项目相关的核心技术积累，相关核心技术均来源于自主研发，其中阵列天线 B、阵列天线模组 A、高频高速线缆及连接器、毫米波雷达天线组件、AI 智能终端天线及模组、LCP 传输线天线及模组、芯片封装散热片（小尺寸）已实现量产。

未量产产品均属于定制化产品，公司在产品研发和生产工艺设计过程中需要深度介入客户终端产品方案，以满足客户后续进一步加工组装生产所需，因此从过往情况来看，客户产品定型后，公司从产品结构、性能等方面满足客户需求从而通过客户验证不存在重大不确定性。未量产产品具备产业化实施条件，通过客户可靠性测试验证、项目投产后即可量产。

（二）补充风险提示

公司已在募集说明书“重大事项提示”之“二、特别风险提示”之“（四）下游客户认证周期风险”以及“第六节 与本次发行相关的风险因素”之“二、经营风险”之“（六）下游客户认证周期风险”中进一步补充披露如下：

“本次募投项目所生产的产品，主要应用于商业卫星通信、消费电子及智能汽车领域，服务客户以全球知名科技企业为主。虽然公司在相关领域已具备一定的技术实力与客户积累，但若未来公司在拓展新客户或承接现有客户新项目时，未能及时通过下游客户的验证，或认证周期延长、导入进度不及预期，可能导致公司订单获取及新增产能消化不及预期，进而对本次募集资金投资项目的效益实现以及公司的经营业绩产生不利影响。”

I04_p021 · Large heatspreaders and TIM remained at the sampling stage in this April reply. Certification delays can reduce orders and leave planned capacity under-absorbed. Later issuer replies must be read product by product. Source: https://static.cninfo.com.cn/finalpage/2026-04-24/1225190582.PDF | 2026-04-24 | Physical PDF page 21 | Stage: Issuer inquiry reply: actual stage / management technical assertion as captioned | Original SHA-256: f54ab8d2aadc92d5235856ce2cfcd475a196c53a0ab3a25c5b6f2e9ef6241145

THERMAL INTERFACE MATERIALS

Metal Thermal Interface Materials (TIMs) aid in the transfer of heat between surfaces and minimize the thermal resistance at each device connection. Metals are known to have higher thermal conductivity than any non-metals, such as greases. The keys to deciding the best metal TIM include:

- Thermal conductivity
- Compressibility
- Operating temperature
- Long-term reliability
- Interfacial resistance

Thermal Conductivity: *Rate at which heat flows through a material.*

Thermal Resistivity: *Rate at which a system resists heat flow. Thermal resistivity is more representative of actual heat dissipation of a system because it includes the contact interfaces.*

Indium Corporation offers a variety of options for thermal management including:

- Processors
  - TIM1 (die-to-lid)
  - TIM1.5 (die-to-heat spreader/heat-sink)
  - TIM2 (lid-to-heat spreader/heat-sink)
- Power semiconductor devices
  - IGBT
  - MOSFET
- High-power LED
- Burn-in and test
- Liquid immersion cooling
- Cryogenic applications
- Other applications requiring high thermal dissipation and high-reliability

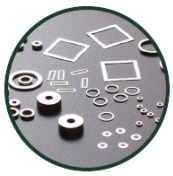

Our Approach:

- TIM is an integral part of the thermal system
- Collaborative design and manufacturing
  - Material selection based on system requirements
  - Comprehensive applications engineering
  - World-class thermal laboratory
  - Optimized supply chain and logistics
  - Worldwide fabrication and service
  - Customized solutions
  - 40 years and >1 billion TIM preforms

World-Class Thermal Lab:

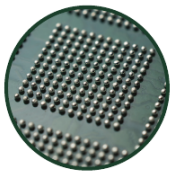

Indium Corporation's Advanced Thermal Lab allows us to:

- Analyze the thermal resistance and conductivity of thermal interface materials
- Develop new reliability tests and test vehicles
- Partner with equipment suppliers and customers in process optimization
- Create industry-leading thermal materials and products to solve problems for today and tomorrow

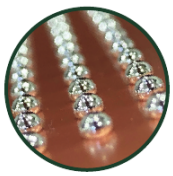

SOLDER TIM SOLUTIONS

Reflowed solder joints are also thermally conductive because of the intermetallic bond that is created. Indium Corporation offers a wide variety of fluxes and solders including indium-, gold-, and silver-based alloys for socketed and non-socketed package types that undergo multiple reflow cycles.

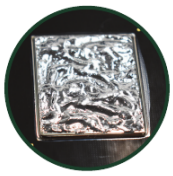

SOLDER TIM SOLUTIONS FOR BGAS

Revolutionary new manufacturing processes enable uniform distributions of IMCs ensuring consistent reflow and void performance over multiple reflow cycles.

LIQUID METAL

Gallium-based liquid metals show a lot of promise as a thermal interface material in TIM1 and TIM1.5 applications due to their high thermal conductivity, reduced interfacial resistance, excellent wetting to most surfaces, including bare silicon, and eliminating the need for soldering or surface metallization. Indium Corporation has been a trusted supplier of gallium-based liquid metals around the globe for decades.

LIQUID METAL PASTE

Unlike traditional gallium-based liquid metal which is prone to pump-out and typically requires specialized spreading processes, liquid metal paste has a higher viscosity that offers predictable spreading characteristics required for scalable high-volume applications.

I20_p002 · Indium offers alternative metal TIM routes, including liquid metal, paste and solder across TIM1, TIM1.5 and TIM2. Interface resistance, reliability, pump-out and process integration matter alongside bulk conductivity. The brochure does not compare customer shares with Sunway. Source: https://www.indium.com/wp-content/uploads/2025/08/TIMs-Brochure-99342-A4-R4.pdf | ©2023Form99342A4R4;URLupload2025/08doesnotproveproductlaunchdate | Physical PDF page 2 | Stage: Primarycompetitorproductbrochure;alternativetechnology,notawardedshare | Original SHA-256: 4a332c4490b24b9be83c44c17ef2d8f3a59a44825b7c8d6365df4459d75698a0

MLCC control brings the factory, losses and cash bill

The September registration establishes 70% ownership and control of the Yiyang business. H1 target revenue of CNY 125.825 million and net loss of CNY 92.410 million describe the pre-acquisition company; net income is not operating profit. The forecast builds volume, materials, factory costs, depreciation, R&D and selling costs explicitly.

The government-attributed 4.5 billion pieces per month implies a 54 billion annual reference. The source does not specify gross starts versus accepted good units. The selected LOW convention treats it as gross-start-equivalent resource. Accepted pieces are capped by the quarterly resource times yield. Material and variable cost use accepted pieces divided by yield, preserving scrap cost under edits.

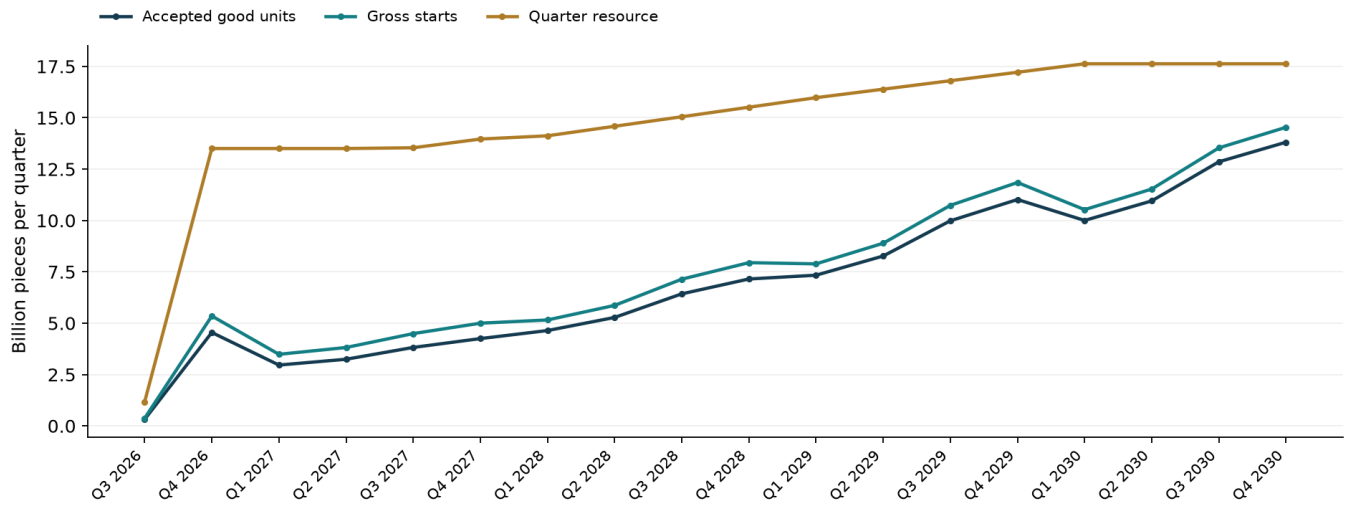

The funded-expansion macro outcome carries a 25% joint weight. Its upper endpoint is 120 billion pieces per year, equivalent to 10 billion per month, contingent on CNY 2 billion of additional own-funded capital. Prior paid capital adds capacity; 7-year depreciation, extra R&D and factory costs follow. This is substantially below the unreliable digest aspiration of 20 billion per month and is not announced qualified output.

Parent operating profit receives 70% of MLCC operating economics, while consolidated cash bears 100% of the controlled operation. Allocating 30% of an early loss to outside owners raises parent profit relative to group profit; it does not generate cash. Unknown target closing cash and purchase accounting remain gaps. No seller unpaid capital, minority contribution or uncommitted July capital intention is treated as funding.

T05 · LOW MLCC unit economics; R&D is annual CNY billion

Year	ASP CNY	Good yield	Gross-unit cash CNY	Base R&D B
2027	0.022	85.00%	0.0145	0.100
2028	0.025	90.00%	0.0150	0.110
2029	0.028	93.00%	0.0155	0.120
2030	0.030	95.00%	0.0160	0.130

MLCC good units and gross resource

Model estimates; actual/proxy scopes stated in adjacent table

C01 · Expected values of complete conditional paths. Q3 2026 resource is pro-rated by the LOW control-period allocation. Gross starts = accepted units / year-specific yield. The gross resource constraint is applied within each path before weighting.

C01_data_1 · MLCC good units and gross resource — plotted data

Quarter	Accepted good units	Gross starts	Quarter resource
Q3 2026	0.316206	0.372007	1.173913
Q4 2026	4.545455	5.347594	13.500000
Q1 2027	2.959740	3.482047	13.500000
Q2 2027	3.241620	3.813671	13.500000
Q3 2027	3.817141	4.490754	13.536300
Q4 2027	4.247400	4.996942	13.960173
Q1 2028	4.639005	5.154450	14.118750
Q2 2028	5.277206	5.863563	14.582812
Q3 2028	6.425528	7.139475	15.046875
Q4 2028	7.149116	7.943462	15.510937
Q1 2029	7.333200	7.885161	15.975000
Q2 2029	8.266890	8.889129	16.387500
Q3 2029	9.980820	10.732065	16.800000
Q4 2029	11.016810	11.846032	17.212500

Quarter	Accepted good units	Gross starts	Quarter resource
Q1 2030	9.998100	10.524316	17.625000
Q2 2030	10.950300	11.526632	17.625000
Q3 2030	12.854700	13.531263	17.625000
Q4 2030	13.806900	14.533579	17.625000

Gross starts = accepted units / year-specific yield. The gross resource constraint is applied within each path before weighting.

Project envelopes require paid equipment and accepted product

The registered prospectus describes three Jiangsu projects with CNY 7.585 billion of total investment: engineering of CNY 5.033 billion, contingency of CNY 252 million and initial working capital of CNY 2.300 billion. The proposed fundraise ceiling is CNY 6 billion. These uses and receipt envelopes provide company-specific boundaries rather than an industry growth multiplier.

Feasibility maturity receipts are CNY 9.499 billion for satellite products, CNY 7.067 billion for RF and CNY 3.105 billion for thermal. They refer to project-year 6. Relevant existing products are already inside the envelopes. The model subtracts the same-year incumbent base before applying a LOW net receipt fraction, which combines qualification, capture, ramp, yield, mix, selling price and recognition.

The source schedule has 36-month construction, production beginning in project year 2 and maturity in year 6; it does not give exact intermediate calendar capacity. The model uses prior-quarter paid engineering divided by total engineering as a LOW commissioning proxy. Unpaid spending is carried, not converted into tools. New receipts are capped at one quarter of the residual maturity envelope times that prior-paid fraction.

The disclosed price erosion is already inside the feasibility envelope. The build does not add an early higher-price uplift. Manufacturing cash, scrap, idle-factory cash, depreciation, development and customer support remain costs even when qualification disappoints. The public order-coverage warning is material counterevidence to rapid full utilization.

重大事项提示

公司特别提请投资者注意，在作出投资决策或价值判断之前，务必仔细阅读本募集说明书正文内容，并特别关注以下重要事项。

一、特别风险提示

与本次发行相关的风险因素详见本募集说明书“第六节 与本次发行相关的风险因素”。其中，特别提醒投资者应注意以下风险：

（一）募集资金投资项目新增产能消化风险

公司本次募集资金投资于“商业卫星通信器件及组件项目”、“射频器件及组件项目”和“芯片导热散热器件及组件项目”。截至 2026 年 3 月 31 日，公司本次募投项目相关产品在手订单合计 8,481.64 万片/套，占本次募投项目达产后年产各类产品 85,375 万片/套的比例为 9.93%；2026 年 1-3 月，公司本次募投项目相关产品实现收入 34,661.39 万元，年化后占本次募投项目达产后年实现收入 1,967,060.89 万元的比例为 7.05%，占比均较低。

本次募投项目新增产能消化有赖于公司未来能够在下游商业卫星通信、消费电子、智能汽车以及芯片封装导热散热领域获得目标重点客户的新增大批量采购，相关产品市占率明显提升，其中部分募投项目产品在达产后占目标市场的份额接近 50%，占比较高。

公司本次募投“商业卫星通信器件及组件项目”产品的市场需求与商业卫星通讯，特别是低轨商业卫星提供的卫星互联网用户数量高速增长所带来的地面终端设备需求高度相关，而卫星发射能力、网络服务的连续性与稳定性，以及终端成本、资费水平与规模化用户培育周期等商业卫星通信行业发展的关键要素均存在较大的不确定性。如果大型商业卫星组网项目发展不及预期，用户数量增长不足，或公司未能获得预期的目标市场份额，则会出现下游市场需求不足，无法覆盖“商业卫星通信器件及组件项目”产能的情况。

公司本次募投“射频器件及组件项目”产品的市场需求与消费电子高端化、智能化升级进度和汽车智能驾驶水平提升、渗透率提高密切相关；本次募投“芯片导热散热器件及组件项目”产品的市场需求与高性能计算芯片出货量、终端和

I05_p003 · The prospectus warns that present coverage is weak relative to maturity assumptions: 84.8164 million mixed pieces/sets versus 853.75 million maturity output, or 9.93%. Relevant-product Q1 annualized revenue covers 7.05% of maturity receipts. Some product assumptions approach 50% target-market share. The detailed reply identifies the order list as firm plus intentions. Source: https://static.cninfo.com.cn/finalpage/2026-05-27/1225334278.PDF | 2026-05-27registeredfiling;byte-identicalMay8content | Physical PDF page 3 | Stage: Sourceactualcomparisonsandmanagementmaturityfeasibility/risk | Original SHA-256: bbdcaa14af21231e83a45ad8f93cbd738030f3cc5c85004e277693d9a1198f75

第三节 董事会关于本次募集资金使用的可行性分析

一、本次募集资金投资计划

本次发行股票预计募集资金总额不超过 600,000.00 万元（含本数），扣除发行费用后将全部用于“商业卫星通信器件及组件项目”、“射频器件及组件项目”和“芯片导热散热器件及组件项目”，具体情况如下：

单位：万元

序号	项目名称	项目总投资	拟用募集资金投入
1	商业卫星通信器件及组件项目	356,316.21	285,000.00
2	射频器件及组件项目	285,270.72	215,000.00
3	芯片导热散热器件及组件项目	116,941.91	100,000.00
合计		**758,528.84**	**600,000.00**

二、本次募集资金投资项目的基本情况

（一）商业卫星通信器件及组件项目

1、项目概况

本项目实施主体为公司全资子公司信维通信（江苏）有限公司，建设地点位于江苏省常州市金坛区金龙大道 369 号。本项目将利用现有厂房并进行改造，不涉及新增土地。

2、项目投资计划

本项目预计总投资 356,316.21 万元，拟使用募集资金 285,000.00 万元，项目投资构成具体情况如下：

单位：万元

序号	名称	总投资	拟使用募集资金	是否属于资本性投入
1	建设投资	239,588.60	230,759.55	-
1.1	工程费用	228,179.62	219,771.00	是
1.1.1	建筑工程费	17,769.62	9,361.00	是
1.1.2	设备购置费	210,410.00	210,410.00	是
1.2	基本预备费用	11,408.98	10,988.55	否
2	铺底流动资金	116,727.61	54,240.45	否

I05_p057 · The three proposed Jiangsu projects require total investment of CNY 7.5852884 billion; proposed proceeds are capped at CNY 6 billion. Engineering, initial working capital and contingency are distinct uses. A registration or budget is not money received. Source: https://static.cninfo.com.cn/finalpage/2026-05-27/1225334278.PDF | 2026-05-27 registered filing; byte-identical May8 content | Physical PDF page 57 | Stage: Management feasibility estimate / source actual comparison | Original SHA-256: bbdcaa14af21231e83a45ad8f93cbd738030f3cc5c85004e277693d9a1198f75

序号	名称	总投资	拟使用募集资金	是否属于资本性投入
合计		356,316.21	285,000.00	-

本项目投资测算根据项目实际需求确定，测算具备合理性。

3、项目效益测算

（1）效益测算假设条件

本次募集资金能够及时到位，募集资金投资项目能够顺利如期完成；公司经营管理层和核心技术人员未发生重大变化；公司主要经营所在地及业务涉及地区的社会经济环境无重大变化；公司所遵循的国家现行法律、法规及产业政策无重大不利变化；公司所处行业及市场处于正常的发展状态，未出现重大的市场突变；原材料价格供应和价格处于正常变动范围内；无其他不可抗力因素造成的重大不利影响。

（2）测算过程

①收入测算

本项目主要生产高频高速线缆及连接器、阵列天线及天线模组，各项产品销售价格主要以相同或类似产品历史销售价格、本次募投项目产品生产成本和合理利润空间为基础，结合未来市场行情预估进行测算。基于谨慎性原则，对前述产品自第三年至第五年分别预测 4%、4%和 3%的价格年降幅，达产年（即第六年）之后价格趋于稳定。

本次项目分三期投资建设，分别于第一年、第二年及第三年投入。项目自第二年开始投产，第六年达产比例爬坡至 100%。

②成本测算

直接材料：参考公司相应产品的工艺消耗定额，合理考虑未来情况进行测算；

直接燃料和动力：参考公司相应产品的工艺消耗定额，合理考虑未来情况进行测算；

直接人工：人工成本根据需要使用的人员数量，结合同类岗位员工工资水平进行测算；

I05_p058 · The satellite feasibility schedule has three investment years, production from project year 2 and full maturity in year 6. Price erosion of 4%, 4% and 3% is already included in the later feasibility years. Calendar commissioning and intermediate qualified output remain uncertain. Source: https://static.cninfo.com.cn/finalpage/2026-05-27/1225334278.PDF | 2026-05-27 registered filing; byte-identical May8 content | Physical PDF page 58 | Stage: Management feasibility estimate / source actual comparison | Original SHA-256: bbdcaa14af21231e83a45ad8f93cbd738030f3cc5c85004e277693d9a1198f75

部分传统业务，以及项目达产后产能规模效应凸显，单位生产成本随产能利用率提升而摊薄产生规模优势所致，具有合理性。

4、项目涉及报批事项情况

截至本募集说明书出具日，本项目已取得常州市金坛区发展和改革局出具的投资项目备案证和常州市生态环境局出具的环评批复，本项目不涉及新增土地，不涉及用地审批。

5、募集资金的预计使用进度，是否包含董事会前投入的资金

本项目建设期为 36 个月，预计总投资为 285,270.72 万元，该项目拟使用募集资金 215,000.00 万元。在本次发行募集资金到位之前，公司以自筹资金先行投入，并在募集资金到位后，按照相关法规规定的程序以募集资金置换自筹资金。

本项目拟使用募集资金投入的部分不包含本次发行相关董事会决议日前已投入资金。

（三）芯片导热散热器件及组件项目

1、项目概况

本项目实施主体为公司全资子公司信维通信（江苏）有限公司，建设地点位于江苏省常州市金坛区金龙大道 369 号。本项目将利用现有厂房并进行改造，不涉及新增土地。

2、项目投资计划

本项目预计总投资 116,941.91 万元，拟使用募集资金 100,000.00 万元，项目投资构成具体情况如下：

单位：万元

序号	名称	总投资	拟使用募集资金	是否属于资本性投入
1	建设投资	85,023.42	77,086.80	-
1.1	工程费用	80,974.69	73,416.00	是
1.1.1	建筑工程费	8,114.36	3,818.00	是
1.1.2	设备购置费	72,860.33	69,598.00	是
1.2	基本预备费用	4,048.73	3,670.80	否
2	铺底流动资金	31,918.49	22,913.20	否

I05_p062 · The RF project describes a 36-month construction period. The thermal budget follows on the same source page. Regulatory approvals and engineering spending do not establish customer volume qualification. Source: https://static.cninfo.com.cn/finalpage/2026-05-27/1225334278.PDF | 2026-05-27 registered filing; byte-identical May8 content | Physical PDF page 62 | Stage: Management feasibility estimate / source actual comparison | Original SHA-256: bbdcaa14af21231e83a45ad8f93cbd738030f3cc5c85004e277693d9a1198f75

（三）因实施募投项目而新增的折旧和摊销对发行人未来经营业绩的影响

本次募集资金投资项目建成后，固定资产、无形资产将大幅增加，公司每年将新增一定规模的折旧摊销费。根据初步测算，本次募投项目完全达产后首年将新增折旧摊销金额 48,237.80 万元。

报告期内，公司营业收入分别为 754,764.57 万元、874,361.06 万元和 890,977.98 万元。本次募投项目完全达产后，首年将新增 48,237.80 万元折旧摊销费，占 2023 年至 2025 年公司年平均营业收入的 5.74%。考虑到项目完全达产后首年预计可新增收入 1,967,060.89 万元，该部分新增折旧摊销金额占预计新增收入的比例为 2.45%，占比较低。

（四）发行人的实施能力及资金缺口的解决方式

发行人通过持续的研发投入和技术创新，构建了从材料研发到产品设计、精密制造的一站式服务能力，形成了较强的技术护城河。目前，公司已与多家国内外知名企业建立了长期稳定的合作关系，产品广泛应用于智能手机、平板电脑、智能穿戴、商业航天及汽车电子等领域，具备较强的市场竞争力和品牌影响力，为募投项目的实施提供了有力保障。

本次募集资金项目总投资金额为 758,528.84 万元，本次发行股票预计募集资金总额不超过 600,000.00 万元（含本数），不足部分由公司以自有或自筹资金解决。

（五）本次募集资金是否存在用于补充流动资金的情形

发行人本次募投项目不存在补充流动资金项目，拟将募集资金 141,587.08 万元用于募投项目中的非资本性支出，其中项目基本预备费 22,920.65 万元、项目铺底流动资金 118,666.43 万元，占本次发行募集资金总额的 23.60%，该等非资本性支出规模符合《证券期货法律适用意见第 18 号》等相关法律法规，具有可行性。

（六）本次募投项目符合国家产业政策的要求和板块定位

本次发行满足《注册管理办法》第三十条关于符合国家产业政策和板块定位（募集资金主要投向主业）的规定

I05_p070 · The full-maturity first-year incremental depreciation and amortization is CNY 482.378 million. Combined project maturity receipts are CNY 19.6706089 billion. These are conditional feasibility estimates and carry manufacturing and operating costs. Source: https://static.cninfo.com.cn/finalpage/2026-05-27/1225334278.PDF | 2026-05-27 registered filing; byte-identical May8 content | Physical PDF page 70 | Stage: Management feasibility estimate / source actual comparison | Original SHA-256: bbdcaa14af21231e83a45ad8f93cbd738030f3cc5c85004e277693d9a1198f75

Complete outcomes precede probability weighting

Four mutually exclusive macro outcomes carry 30% funded core, 25% funded core with MLCC expansion, 30% delayed partial and 15% restricted weights. These are LOW forward funding and qualification judgments. Confirmed control and existing customer access are treated as facts, without another probability haircut.

Each macro outcome contains all four 0/1 combinations of the OpenAI and robotaxi ramps, then full versus 90% bank-refinancing branches. The result is 32 complete paths. Each path pays its own manufacturing, R&D, depreciation, capital, tax and cash costs before weighting. Applying a marginal probability before a capacity MIN or cash MAX would change this law.

Named-customer independence conditional on the macro state is a LOW assumption. Dependence stress interpolates to exact Fréchet bounds, not an estimated Pearson correlation. Credit probabilities of 95%, 95%, 85% and 75% apply conditionally to the four macro outcomes. Full renewal is a future event, and aggregate maturity timing is a model convention.

T06 · Macro outcomes and financing assumptions

Macro outcome	Weight	Full refi p	Gross equity B	Issue quarter
funded core	30.00%	95.00%	4.000	Q1 2027
funded MLCC expands	25.00%	95.00%	4.000	Q1 2027
delayed partial	30.00%	85.00%	3.000	Q3 2027
restricted	15.00%	75.00%	0.000	Unavailable

The delayed Q3 2027 equity case requires renewed or new valid registration and corporate authorization before issuance. The May 27 consent notice has a 12-month validity from its consent date, whose exact date is not printed; that notice alone cannot authorize the delayed issue. All issue prices, volumes and regulatory VWAP conditions remain hypothetical.

Generic satellite, RF and thermal increments: four macro outcomes use maturity less incumbent receipts, net receipt indices and paid-capacity limits. The one-at-a-time active forward-parent-OP attribution is CNY 849.189 million. Qualification, cost, financing and timing risks remain inside complete paths.

MLCC expansion: the 25% joint outcome pays CNY 2 billion from free own cash, with 7-year D&A and extra R&D. The current active forward-parent-OP attribution is negative CNY 11.179 million because early costs can precede scaled receipts.

OpenAI future ramp: a 25% conditional hypothesis based on a flawed public digest. Eligible units, component content and 50% overlap give a bounded RF proposal. Its active forward-parent-OP attribution is CNY 3.789 million.

Robotaxi Starlink parts: issuer-confirmed application, with a 60% hypothesis for future volume. Unit content, capture and overlap are explicit; the active forward-parent-OP attribution is CNY 1.663 million.

These four attributions are one-at-a-time full-rebuild counterfactuals. They interact through capacity and cash and are not additive contributions. No protected Base multiplier or second success probability is applied to the final result.

T07 · Rule 16b: nonadditive parent-OP attribution, CNY billion

Hypothesis	Primary weight / p	F4 OP attribution
Generic satellite/RF/thermal qualified capital outcomes	100.00%	0.849189
MLCC financed expansion	25.00%	-0.011179

Product growth must survive full operating costs

The expected product mix is the weighted result of full paths. Depreciation remains manufacturing cost. Cash gross margin is an intermediate cost assumption; it is not the valued operating margin. New-project engineering and support, platform R&D and administration, selling costs and operating taxes sit below product gross profit.

H1 cash-flow depreciation anchors the annual total, while the production-versus-overhead allocation is LOW. Forward platform R&D of CNY 660 million includes CNY 80 million of noncash R&D depreciation; administration of CNY 420 million includes CNY 40 million. These charges are added back only for cash conversion, not removed from operating profit.

The parent bridge deducts the 30% outside-owner share of MLCC core operating profit. The bridge retains group costs and does not book a control-date remeasurement gain, financing income, hypothetical subsidy or asset release as recurring operating profit.

Expected revenue by component family

Model estimates; actual/proxy scopes stated in adjacent table

C02 · All Q3 2026 onward values are LOW model estimates; 2026 is H2 only. Each family is weighted after full conditional costs, capacity and cash gates.

Active forward-year full-cost bridge

Model estimates; actual/proxy scopes stated in adjacent table

C04 · Q4 2027 through Q3 2028. A negative outside-owner loss claim adds to parent profit and creates no cash receipt. Production D&A is separated from cash production; operating-cost D&A remains inside book operating costs exactly once.

C04_data_1 · Active forward-year full-cost bridge — plotted data

Step	Amount
Revenue	13.523753
Cash production	-9.263534
Production D&A	-0.919138
Book operating costs	-1.654375
Outside-owner claim	0.035466
Parent core OP	1.722173

Production D&A is separated from cash production; operating-cost D&A remains inside book operating costs exactly once.

Cash priorities and a real planning-buffer shortfall

Starting June cash already incorporates H1 borrowings, repayments, interest and the May dividend. Neither the registered CNY 6 billion ceiling nor board-approved credit facilities are deposits. The conditional equity cases deduct fees and ringfence capital, working-capital and contingency pools for eligible project uses.

The acquisition reserve is CNY 1.1 billion; it is not a claim that consideration has been paid. Further reserves cover all CNY 639.656 million of target opening liabilities, CNY 175.029 million of old acquisition and patent obligations and CNY 287.050 million of foreign-location cash pending fungibility. No credit is given for unknown target closing cash. These are conservative funding boundaries, not extra operating expenses.

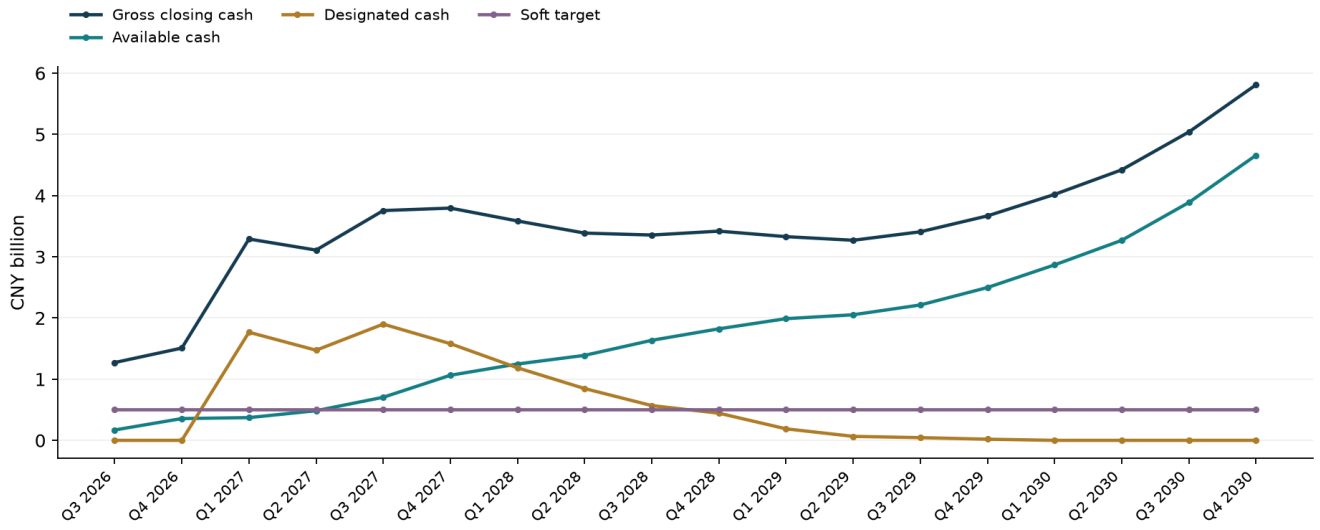

Issuer confirmation of leading the RuoYu investment does not disclose ticket, stake or payment date. A founder interview reports a whole roughly hundred-million-yuan round with several investors. The selected LOW budget reserve is CNY 50 million from Q4 2026, based on a CNY 100 million round reference and a 50% lead-share proxy. It is neither a reported payment nor a proven upper bound.

The lowest reserved-obligations liquidity is CNY 169.353 million, positive but CNY 330.647 million below the CNY 500 million planning target. The target is a soft policy, not a legal covenant. Mandatory flows can breach it. Optional dividends and own-funded capital contract before free cash is used twice.

Fully earmarked project capital can still be spent below that soft target when the capital and contingency pools both cover the payment. Their draw and payment consume no additional free liquidity. MLCC expansion uses only free own cash above the target. This policy does not release project pools for acquisitions, robot investments or unrelated spending.

Forecast gross closing cash is a modeled funding balance that includes remaining designated-use and reserved amounts. Available cash subtracts those pools and reserves. These are planning measures, not forecast statutory consolidated cash-equivalents balances. Interest, tax, working capital, debt repayment and leases remain distinct cash claims.

Funding balance, available cash and reserves

Model estimates; actual/proxy scopes stated in adjacent table

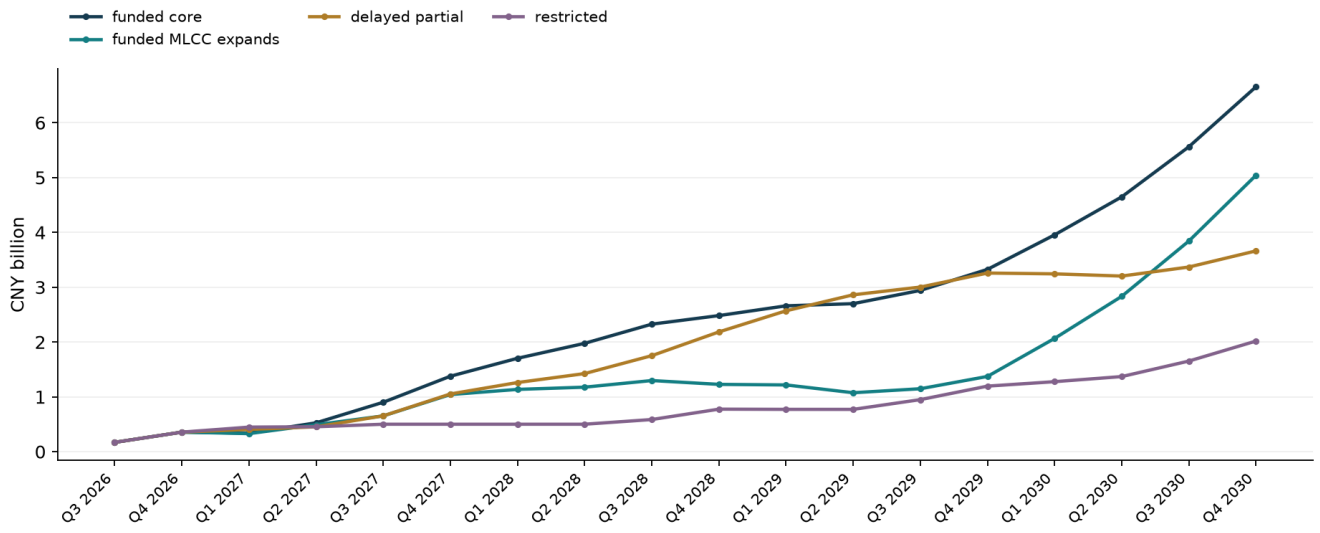

C05 · Weighted paths can conceal a weak tail; the full branch register and minima below retain that risk. Available cash = gross funding balance minus designated-use pools and conservative reserves. Neither is a statutory cash forecast.

C05_data_1 · Funding balance, available cash and reserves — plotted data

Conditional mean = sum(joint probability x path available cash) / macro probability. Full-path minima are shown separately.

T08 · Full-path liquidity minima by macro

Macro outcome	Lowest available B
funded core	0.169353
funded MLCC expands	0.169353
delayed partial	0.169353
restricted	0.169353

Credit paths renew all or 90% of the known current bank maturity in a LOW aggregate Q2 2027 timing bucket. The partial branch repays CNY 260.779 million and each branch pays a 0.5% fee on gross refinancing. Later bank interest reflects the repayment. No new incremental bank borrowing is credited. Lease principal, noncash lease additions, depreciation and interest are separate.

The forward working-capital reserve follows demand budgets and can exceed capacity-clipped sales. The source initial project working-capital estimate is not charged again as a second full bill. Closing cash, purchase accounting, creditor composition and cash fungibility remain important unknowns that could require more funding.

Analytical score and evidence that could change the thesis

T09 · Current analytical scorecard

Category	Pts	Max.	Evidence	Limiting evidence
Core Thesis	12	20	Integrated materials and custom parts, supported by incumbent production.	No demonstrated exclusive route or durable cross-generation choke point.
Cycle Stage	7	10	Two North American LEO customers in stable batch delivery; new facilities are early.	Consumer hardware remains mature; qualification and commissioning can slip.
TAM Expansion	8	10	Satellite, AI-terminal RF, TIM and high-capacitance MLCC expand component content.	Content, captured share and qualified output remain much narrower than whole-system demand.
Catalysts	3	5	Issue cash, commissioning, customer acceptance and MLCC yield can change economics.	Exact commercial dates and future financing terms are uncertain.
Macro	8	10	Orbital connectivity, AI hardware and domestic substitution support demand.	SpaceX service and compute revenue are separate from Sunway component receipts.
Alpha	4	5	Legal cash restrictions and shipment/qualification stages distinguish investable receipts.	Public disclosures do not establish that every opportunity is overlooked.

T10 · Current risk deductions

Risk class	Deduction
Customer, trade and geopolitics	-1
Competitive qualification and capture	-1
Funding, dilution and refinancing	-1
MLCC integration, yield and purchase accounting	-1
Working capital, cash conversion and capital execution	-1

Category points total 42 before five one-point risk deductions: 37/60, or 61.67%, rounded to 62. This is the Fail band with a beneficiary classification. Protected Excel Base 65 remains distinct. The score is not a valuation multiplier.

The next genuine Q3 filing should test recognized revenue, gross profit and MLCC control-period accounting, with purchase accounting and foreign exchange isolated. Financing tests require actual issue terms, net cash, use restrictions and credit rollover evidence. Registration alone does not meet them.

For satellite, RF and thermal, track qualified model-specific batch volumes, accepted customer content and paid tools. For MLCC, track accepted good units, realized grade and ASP, yield and scrap, factory depreciation, R&D, cash and payables. Raise the conditional outcome when paid equipment, qualified deliveries and positive cash-cost evidence align; reduce it when timing, price, yield or creditor claims disappoint.

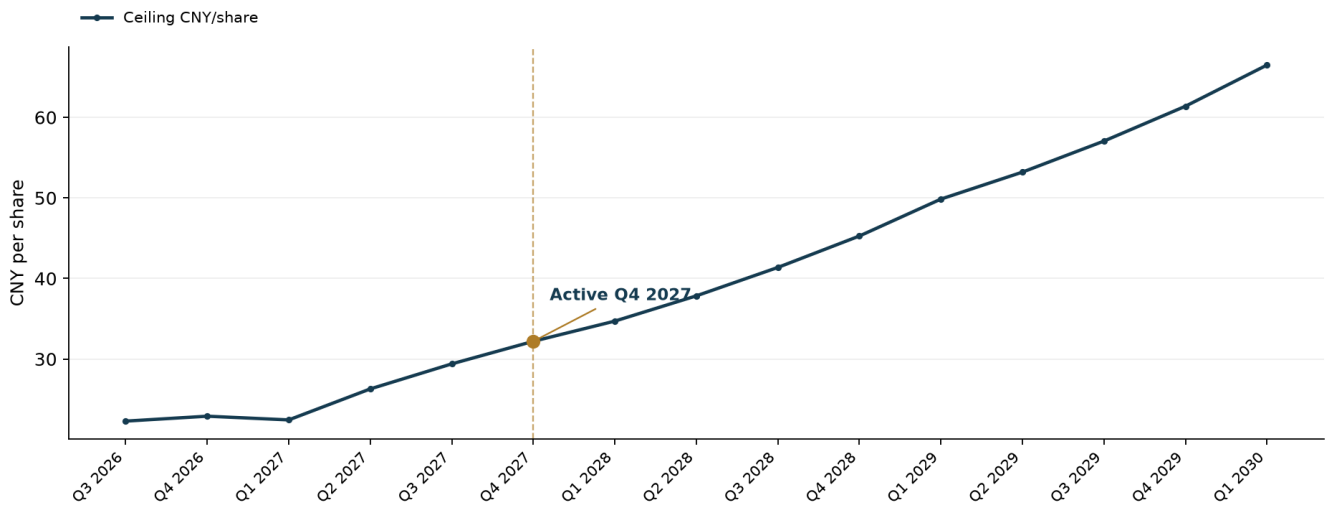

Cross-book monitoring compares Fenghua on qualified high-capacitance MLCC mix and cost, interconnect peers on accepted terminal content, and thermal vendors on interface performance and installed cost. These comparisons do not import another company's market or service revenue into Sunway invoices.

Valuation windows and bounded sensitivities

The sanctioned method is 20 times parent economic core pre-financing operating profit. Each ceiling uses its starting quarter and the next three quarters, the CNY billion-to-million unit factor of 1,000 and that starting quarter's gross share convention. Calculations are unrounded; display rounding does not feed back into the model. Cash tests financeability and is not added to operating-profit value.

For Q4 2027, forward parent OP is CNY 1.7221727559510378 billion. Multiplying by 20 and 1,000 and dividing by 1,070 million shares gives CNY 32.19014497104744 per share. Actual issued shares are a separate header fact. The future 100 million share proxy is already included, and the model does not add it again.

Same-method forward operating-profit ceilings

Model estimates; actual/proxy scopes stated in adjacent table

C07 · Each point has its own exact four-quarter OP window. Ceiling = sum(parent core OP over four quarters) x 20 x 1000 / starting-quarter modeled shares. Values shown below; exact chains follow.

C07_data_1 · Same-method forward operating-profit ceilings — plotted data

Q2 2030	Fewer than four modeled quarters remain; no extrapolated ceiling.
Q3 2030	Fewer than four modeled quarters remain; no extrapolated ceiling.
Q4 2030	Fewer than four modeled quarters remain; no extrapolated ceiling.

The following sensitivities are isolated full rebuilds of current assumptions. Their results are nonadditive. More cash can change the timing of paid capacity and early MLCC costs, so a liquidity improvement need not increase the active operating-profit ceiling. The actual economic owners and method remain unchanged after every diagnostic.

Management record and source completeness

The latest actual located is H1 2026. No genuine Q3 report, preliminary result or guidance was located at the October 24 cut; all Q3 onward figures in this report are model estimates. A forthcoming Q3 filing remains the next actual verification event.

The newest earnings communication found is a reported August 31 H1 call available as a public secondary digest. All visible text was read. It contains obvious automated errors and conflicting companion dates. Its primary host, full verbatim prepared remarks, complete Q&A and audio were not verified. The report retains credible commercial breadcrumbs at bounded LOW probabilities and preserves those completeness gaps.

The previous April 28 annual-results event is an official text-only source: 31 unique answered Q&As and 68 event records, with all pagination and terminal pages recovered. This is a complete published written record, not a reviewed spoken transcript. April 22 business remarks and three Q&As are an earlier supplement.

The official product-answer retrieval returned 161 records and 43 relevant unique answers. A requested October filter was not reliably enforced: record updates span July through October. Update timestamps are not assumed to be first answer-publication dates or cash-payment dates. Investor questions naming customers or sales are not issuer admissions.

Source confidence is attached to scope. HIGH actual refers to financial statements and completed legal events; HIGH management refers to what the issuer actually says about stages or plans. Government-attributed capacity and public secondary digests keep their provenance. LOW denotes model allocation, future outcomes, physical conversion, costs, calendar, prices, capital and funding assumptions. A high-confidence disclosure of a plan does not turn its outcome into an actual.

T15 · Latest management communications and genuine gaps

Record	Available scope	Missing / limitation
Reported August 31 H1 call	Public secondary digest; all visible content reviewed.	Primary host, complete prepared remarks/Q&A, full verbatim transcript and audio unverified; date and automated errors retained.
April 28 annual-results event	Official text-only 31 answered Q&As / 68 event records; pagination complete.	No spoken-audio review or complete spoken-transcript claim.
April 22 supplement	Primary business remarks and three Q&As.	Earlier supplementary record, not the second-newest earnings event.
Current official product replies	161 returned records, 43 relevant unique answer texts.	Server filter unreliable; updated date does not establish first publication.
Q3 financial disclosure	Forthcoming filing; H1 remains latest actual.	No Q3 actual or guidance found as of October 24.

Appendix A. Reproducing laws and calendar conventions

A01_laws · Formula families

Family	Reproducing law
Incumbent receipts	For each family, 2027 annual base x (1 + family growth)^(year - 2027) x quarter weight. H2 2026 uses explicit bases. The H1 family allocation is LOW and balances to reported revenue.
Generic project receipts	MAX(0, maturity receipts - same-year incumbent base) x macro/year net receipt fraction x incremental quarter weight. Named proposals join their family after overlap deductions.
Physical receipt constraint	Specific existing-line receipt = MIN(named proposal, incumbent quarter receipts x 5%). Remaining incremental receipts = MIN(generic + named - existing-line receipt, residual maturity x prior paid engineering fraction / 4). No unpaid-capital floor.
Named proposals	OpenAI: full qualifying outcome x devices in millions x CNY 20 / 1000 x (1 - 50% overlap), with 1 million-device Q4 2026 proposal. Robotaxi: full outcome x devices in millions x CNY 100 / 1000 x 50% capture x (1 - 50% overlap). Annual device proposals use incumbent seasonal weights.
Non-MLCC manufacturing	Materials = (incumbent receipts + incremental receipts x state scrap factor) x material rate. Conversion = total receipts x (1 - cash gross margin - material rate). Idle factory cash = (0.020 + 0.060 x commissioned fraction) B/year x family allocation / 4. GP deducts materials, conversion, idle cash and production D&A.
MLCC capacity	Base annual gross-start proxy 54 B pieces plus (120 - 54) x MIN(1, prior cumulative expansion capital / 2 B). Accepted good units = MIN(capacity x qualified utilization x quarter weight, capacity / 4 x yield). H2 control-period fraction is applied after the corresponding cap.

Family	Reproducing law
MLCC costs	Revenue = accepted B pieces x ASP CNY. Variable cash = accepted / yield x gross-unit cash cost. Fixed factory cash scales with installed capacity / 54. D&A = (plant 0.070 + PPA 0.015 + prior expansion capital / 7) / 4 B. R&D, admin, selling and operating taxes remain explicit. Expansion branch pays extra 0.040 B annual R&D even before scaled output.
Operating profit	Group GP = sum of family GP. Book opex = platform R&D + platform admin + project R&D + support + selling + operating taxes + MLCC opex. Group core OP = GP - opex. Outside claim = (1 - 70%) x MLCC core OP. Parent core OP = group core OP - signed outside claim.
Cash from operations	CFO = group core OP + charged total D&A - cash interest - cash tax - change in planning NWC. No finance income, grant, fair-value gain or minority-loss cash credit is introduced.
Designated-use funds	Net equity = gross cash x (1 - 2% fee). Allocate exact capital/WC/contingency fractions. Release each pool only against its eligible current or future project payment. WC release is a subset of total NWC outflow.
Capital cash gate	Let h = MAX(0, mandatory available cash - 0.5 B), C = capital pool, T = contingency pool, r = contingency ratio. Capital capacity = MAX(0, MIN(h + C, (h + T)/r, (h + C + T)/(1 + r))). For r = 0 use h + C. Paid engineering = MIN(planned plus carry, capital capacity). Contingency = r x paid engineering. Carry unpaid amounts.
MLCC own-funded expansion	After project capital, expansion payment = MIN(planned plus carry, MAX(0, remaining available cash - 0.5 B)). No designated project pool can finance it. Prior cumulative paid expansion determines later capacity and D&A.
Funding balance	Closing funding cash = opening cash + CFO - all capital + net equity - acquisition reserve payment - optional dividend - lease principal - bank net repayment - refinancing fee. Available cash subtracts designated balances and target, legacy, foreign and venture reserves.
Domain and solvency	Financial owners must be finite and nonnegative, except bounded dependence control. Fractions and probabilities must lie in admissible ranges; macro weights sum to one; pool shares sum to one. Any positive-weight path with negative reserved-obligations liquidity is rejected. A shortfall against 0.5 B remains a warning, not an automatic hard rejection.
Joint probabilities	At independence, P(both named ramps) = pO x pR. Positive dependence interpolates toward MIN(pO,pR); negative toward MAX(0,pO+pR-1). Four customer cells are then multiplied by macro and conditional credit probabilities. All 32 full paths precede weighted expectations.
Forward valuation	At each starting quarter sum four parent core OP values, multiply by 20 x 1000 and divide by that starting quarter share convention. No rounding, Base adjustment, second probability or terminal extrapolation.

A01_calendar · All calendar and finite-life conventions

Scope	Convention
Calendar	Forecast begins Q3 2026. The 2026 forecast aggregate is H2 only. Annual 2027-2030 matrices have four quarters.
Incumbent seasonality	Q1/Q2/Q3/Q4 weights 0.21 / 0.23 / 0.27 / 0.29. H2 2026 product bases are explicit quarter forecasts.
New receipt phasing	2027 Q1-Q4 weights 0.10 / 0.20 / 0.30 / 0.40. Later years 0.22 / 0.24 / 0.25 / 0.29.
Paid capacity and D&A	Opening cumulative paid engineering determines this quarter capacity. Current payment contributes from the next quarter. Existing and platform D&A grow 2% annually after 2027.
MLCC control period	Q3 2026 consolidation 8/92 is LOW; Q4 onward full. H2 proposal revenue 0.08 / 0.10 B divided by ASP 0.022, capped by resource and 85% yield before consolidation fraction.
Working-capital target	2026 annual demand reference = reported H1 4.03195095081 + non-MLCC H2 5.72 + 0.08 x 8/92 + 0.10 B. Thereafter incumbent plus unclipped generic demand and MLCC annual volume proposal; excludes named-customer proposal. NWC change is 1/2 of year-start gap each H2 2026 quarter, 1/4 each later quarter.
Eligible project WC	Project WC reference = current incremental receipts x 4 x 12%. Eligible pool release = MAX(0, MIN(total NWC outflow, change in project WC reference)). No retroactive reimbursement.
Financing and cash timing	Equity at selected conditional quarter; 2% fee. Aggregate current bank maturity in Q2 2027 is LOW timing. Interest uses opening bank/lease debt. Lease principal capped by opening lease balance; noncash additions 0.09 B/year.
Finite MLCC assets	Incremental expansion D&A = cumulative prior paid expansion capital / 7 years / 4. Base plant and PPA annual proxies 0.070 / 0.015 B. PPA life/split awaits audited purchase accounting.
Tax and parent claim	Cash tax = MAX(0, group core OP - modeled interest) x 15%. Parent core OP = group core OP - 30% of MLCC core OP. Minority loss allocation is not cash received.

The exact source model preserves all selected equations, cases and numeric owners. The tables below retain exact parameter values, with explicit array indices and units embedded in owner names or the formula definitions. All prospective product split, capture, cost and calendar inputs are LOW; legal and actual anchors keep their original source scope.

Owner / index	Exact value	Scope
multiple	20.0	LOW model convention; source fact only where explicitly identified
unit factor	1000.0	LOW model convention; source fact only where explicitly identified
sharesM 2026	970.0	LOW model convention; source fact only where explicitly identified
sharesM 2027on	1070.0	LOW model convention; source fact only where explicitly identified
dated quote CNY	45.59	LOW model convention; source fact only where explicitly identified
quote date	2026-10-23	LOW model convention; source fact only where explicitly identified
actual registered sharesM	967.568638	LOW model convention; source fact only where explicitly identified

Hypothetical issue prices are financing assumptions, not announced placement terms. Actual issue must satisfy valid authorization, registration and applicable VWAP conditions. The delayed Q3 2027 branch requires a renewed or new valid registration and corporate authorization; the May notice alone is insufficient.

Appendix C. Expected quarter-by-quarter operating and funding schedules

CNY billion except margins, share counts and MLCC piece volumes. All 18 quarters are forecasts. The first two rows cover H2 2026 only; they are not FY2026 actuals. Family COGS equals revenue less GP and includes manufacturing D&A. Shared platform D&A remains in book operating costs. Exact raw values and source pointers accompany every displayed cell in the offline model and audit bindings.

Appendix D. Full joint probability register

Each row is a mutually exclusive complete path. OpenAI and robotaxi columns indicate full 0/1 future-ramp outcomes. Full credit means complete renewal of the selected current-maturity aggregate; No means 90% renewal with the net repayment and fee. All paths retain their costs, capital and cash schedules. Joint probabilities sum to one.

Appendix E01. Funded core - O0 / R0 / credit full

Joint probability 8.55000000%. Each outcome retains its own costs and cash path. Values are CNY billion except explicit physical units and capacity fractions. O and R denote the OpenAI and robotaxi full 0/1 outcomes, respectively. Credit is full or 90% renewal. All are computed before weighting.

Appendix E02. Funded core - O0 / R0 / credit 90%

Joint probability 0.45000000%. Each outcome retains its own costs and cash path. Values are CNY billion except explicit physical units and capacity fractions. O and R denote the OpenAI and robotaxi full 0/1 outcomes, respectively. Credit is full or 90% renewal. All are computed before weighting.

Appendix E03. Funded core - O1 / R0 / credit full

Joint probability 2.85000000%. Each outcome retains its own costs and cash path. Values are CNY billion except explicit physical units and capacity fractions. O and R denote the OpenAI and robotaxi full 0/1 outcomes, respectively. Credit is full or 90% renewal. All are computed before weighting.

Appendix E04. Funded core - O1 / R0 / credit 90%

Joint probability 0.15000000%. Each outcome retains its own costs and cash path. Values are CNY billion except explicit physical units and capacity fractions. O and R denote the OpenAI and robotaxi full 0/1 outcomes, respectively. Credit is full or 90% renewal. All are computed before weighting.

Appendix E05. Funded core - O0 / R1 / credit full

Joint probability 12.82500000%. Each outcome retains its own costs and cash path. Values are CNY billion except explicit physical units and capacity fractions. O and R denote the OpenAI and robotaxi full 0/1 outcomes, respectively. Credit is full or 90% renewal. All are computed before weighting.

Appendix E06. Funded core - O0 / R1 / credit 90%

Joint probability 0.67500000%. Each outcome retains its own costs and cash path. Values are CNY billion except explicit physical units and capacity fractions. O and R denote the OpenAI and robotaxi full 0/1 outcomes, respectively. Credit is full or 90% renewal. All are computed before weighting.

Appendix E07. Funded core - O1 / R1 / credit full

Joint probability 4.27500000%. Each outcome retains its own costs and cash path. Values are CNY billion except explicit physical units and capacity fractions. O and R denote the OpenAI and robotaxi full 0/1 outcomes, respectively. Credit is full or 90% renewal. All are computed before weighting.

Appendix E08. Funded core - O1 / R1 / credit 90%

Joint probability 0.22500000%. Each outcome retains its own costs and cash path. Values are CNY billion except explicit physical units and capacity fractions. O and R denote the OpenAI and robotaxi full 0/1 outcomes, respectively. Credit is full or 90% renewal. All are computed before weighting.

Appendix E09. Funded mlcc expands - O0 / R0 / credit full

Joint probability 7.12500000%. Each outcome retains its own costs and cash path. Values are CNY billion except explicit physical units and capacity fractions. O and R denote the OpenAI and robotaxi full 0/1 outcomes, respectively. Credit is full or 90% renewal. All are computed before weighting.

Appendix E10. Funded mlcc expands - O0 / R0 / credit 90%

Joint probability 0.37500000%. Each outcome retains its own costs and cash path. Values are CNY billion except explicit physical units and capacity fractions. O and R denote the OpenAI and robotaxi full 0/1 outcomes, respectively. Credit is full or 90% renewal. All are computed before weighting.

Appendix E11. Funded mlcc expands - O1 / R0 / credit full

Joint probability 2.37500000%. Each outcome retains its own costs and cash path. Values are CNY billion except explicit physical units and capacity fractions. O and R denote the OpenAI and robotaxi full 0/1 outcomes, respectively. Credit is full or 90% renewal. All are computed before weighting.

Appendix E12. Funded mlcc expands - O1 / R0 / credit 90%

Joint probability 0.12500000%. Each outcome retains its own costs and cash path. Values are CNY billion except explicit physical units and capacity fractions. O and R denote the OpenAI and robotaxi full 0/1 outcomes, respectively. Credit is full or 90% renewal. All are computed before weighting.

Appendix E13. Funded mlcc expands - O0 / R1 / credit full

Joint probability 10.68750000%. Each outcome retains its own costs and cash path. Values are CNY billion except explicit physical units and capacity fractions. O and R denote the OpenAI and robotaxi full 0/1 outcomes, respectively. Credit is full or 90% renewal. All are computed before weighting.

Appendix E14. Funded mlcc expands - O0 / R1 / credit 90%

Joint probability 0.56250000%. Each outcome retains its own costs and cash path. Values are CNY billion except explicit physical units and capacity fractions. O and R denote the OpenAI and robotaxi full 0/1 outcomes, respectively. Credit is full or 90% renewal. All are computed before weighting.

Appendix E15. Funded mlcc expands - O1 / R1 / credit full

Joint probability 3.56250000%. Each outcome retains its own costs and cash path. Values are CNY billion except explicit physical units and capacity fractions. O and R denote the OpenAI and robotaxi full 0/1 outcomes, respectively. Credit is full or 90% renewal. All are computed before weighting.

Appendix E16. Funded mlcc expands - O1 / R1 / credit 90%

Joint probability 0.18750000%. Each outcome retains its own costs and cash path. Values are CNY billion except explicit physical units and capacity fractions. O and R denote the OpenAI and robotaxi full 0/1 outcomes, respectively. Credit is full or 90% renewal. All are computed before weighting.

Appendix E17. Delayed partial - O0 / R0 / credit full

Joint probability 7.65000000%. Each outcome retains its own costs and cash path. Values are CNY billion except explicit physical units and capacity fractions. O and R denote the OpenAI and robotaxi full 0/1 outcomes, respectively. Credit is full or 90% renewal. All are computed before weighting.

Appendix E18. Delayed partial - O0 / R0 / credit 90%

Joint probability 1.35000000%. Each outcome retains its own costs and cash path. Values are CNY billion except explicit physical units and capacity fractions. O and R denote the OpenAI and robotaxi full 0/1 outcomes, respectively. Credit is full or 90% renewal. All are computed before weighting.

Appendix E19. Delayed partial - O1 / R0 / credit full

Joint probability 2.55000000%. Each outcome retains its own costs and cash path. Values are CNY billion except explicit physical units and capacity fractions. O and R denote the OpenAI and robotaxi full 0/1 outcomes, respectively. Credit is full or 90% renewal. All are computed before weighting.

Appendix E20. Delayed partial - O1 / R0 / credit 90%

Joint probability 0.45000000%. Each outcome retains its own costs and cash path. Values are CNY billion except explicit physical units and capacity fractions. O and R denote the OpenAI and robotaxi full 0/1 outcomes, respectively. Credit is full or 90% renewal. All are computed before weighting.

Appendix E21. Delayed partial - O0 / R1 / credit full

Joint probability 11.47500000%. Each outcome retains its own costs and cash path. Values are CNY billion except explicit physical units and capacity fractions. O and R denote the OpenAI and robotaxi full 0/1 outcomes, respectively. Credit is full or 90% renewal. All are computed before weighting.

Appendix E22. Delayed partial - O0 / R1 / credit 90%

Joint probability 2.02500000%. Each outcome retains its own costs and cash path. Values are CNY billion except explicit physical units and capacity fractions. O and R denote the OpenAI and robotaxi full 0/1 outcomes, respectively. Credit is full or 90% renewal. All are computed before weighting.

Appendix E23. Delayed partial - O1 / R1 / credit full

Joint probability 3.82500000%. Each outcome retains its own costs and cash path. Values are CNY billion except explicit physical units and capacity fractions. O and R denote the OpenAI and robotaxi full 0/1 outcomes, respectively. Credit is full or 90% renewal. All are computed before weighting.

Appendix E24. Delayed partial - O1 / R1 / credit 90%

Joint probability 0.67500000%. Each outcome retains its own costs and cash path. Values are CNY billion except explicit physical units and capacity fractions. O and R denote the OpenAI and robotaxi full 0/1 outcomes, respectively. Credit is full or 90% renewal. All are computed before weighting.

Appendix E25. Restricted - O0 / R0 / credit full

Joint probability 3.37500000%. Each outcome retains its own costs and cash path. Values are CNY billion except explicit physical units and capacity fractions. O and R denote the OpenAI and robotaxi full 0/1 outcomes, respectively. Credit is full or 90% renewal. All are computed before weighting.

Appendix E26. Restricted - O0 / R0 / credit 90%

Joint probability 1.12500000%. Each outcome retains its own costs and cash path. Values are CNY billion except explicit physical units and capacity fractions. O and R denote the OpenAI and robotaxi full 0/1 outcomes, respectively. Credit is full or 90% renewal. All are computed before weighting.

Appendix E27. Restricted - O1 / R0 / credit full

Joint probability 1.12500000%. Each outcome retains its own costs and cash path. Values are CNY billion except explicit physical units and capacity fractions. O and R denote the OpenAI and robotaxi full 0/1 outcomes, respectively. Credit is full or 90% renewal. All are computed before weighting.

Appendix E28. Restricted - O1 / R0 / credit 90%

Joint probability 0.37500000%. Each outcome retains its own costs and cash path. Values are CNY billion except explicit physical units and capacity fractions. O and R denote the OpenAI and robotaxi full 0/1 outcomes, respectively. Credit is full or 90% renewal. All are computed before weighting.

Appendix E29. Restricted - O0 / R1 / credit full

Joint probability 5.06250000%. Each outcome retains its own costs and cash path. Values are CNY billion except explicit physical units and capacity fractions. O and R denote the OpenAI and robotaxi full 0/1 outcomes, respectively. Credit is full or 90% renewal. All are computed before weighting.

Appendix E30. Restricted - O0 / R1 / credit 90%

Joint probability 1.68750000%. Each outcome retains its own costs and cash path. Values are CNY billion except explicit physical units and capacity fractions. O and R denote the OpenAI and robotaxi full 0/1 outcomes, respectively. Credit is full or 90% renewal. All are computed before weighting.

Appendix E31. Restricted - O1 / R1 / credit full

Joint probability 1.68750000%. Each outcome retains its own costs and cash path. Values are CNY billion except explicit physical units and capacity fractions. O and R denote the OpenAI and robotaxi full 0/1 outcomes, respectively. Credit is full or 90% renewal. All are computed before weighting.

Appendix E32. Restricted - O1 / R1 / credit 90%

Joint probability 0.56250000%. Each outcome retains its own costs and cash path. Values are CNY billion except explicit physical units and capacity fractions. O and R denote the OpenAI and robotaxi full 0/1 outcomes, respectively. Credit is full or 90% renewal. All are computed before weighting.

Appendix F. Consolidated source financial statements

Source statement amounts below are CNY, except earnings-per-share rows in CNY/share, with original exact decimal strings and original Chinese labels. These are consolidated statements; legal-parent and equity-statement tables are outside this appendix. A dash is a blank source cell, distinct from zero. All-null regulatory template or heading rows are omitted from the readable tables; the complete source JSON and exact omission pointers are retained. Material wrapped label continuations are joined with their source pointers preserved.

Income and cash-flow comparisons: FY2025 against FY2024; H1 2026 against H1 2025; Q1 2026 against Q1 2025. Balance-sheet comparisons: FY2025 December 31 against FY2024 December 31; H1 June 30, 2026 and Q1 March 31, 2026 against December 31, 2025. H1 and Q1 current-period noncontrolling income cells remain blank, not zero.

Appendix H. Original evidence, read scope and omissions

Every reproduced source page is an unchanged full-page raster from the retained original and carries its URL, source date, physical page, stage and full original SHA-256 beside its English reading. Derived charts share their exact plotted data with adjacent tables. HTML and Markdown embed image bytes for offline portability; the PDF embeds the same images.

The 68-page issuer/sponsor inquiry reply was read on physical pages 1-56, with the rest extracted and searched. The 101-page registered prospectus was read in relevant project, risk and financing sections, including physical pages 3, 57-71 and 81-82; this is not a claim of full legal review. The May registered prospectus is byte-identical to the earlier saved version and represents one content event.

The counterparty progress report was read in the relevant customer, kit-capacity, direct-to-cell and insourcing sections; its exact publication day is unavailable. The Indium brochure is an original supplier document, copyright 2023 with a 2025 upload path; upload month is not a launch date. The Murata December 2025 product disclosure is separate primary competition evidence.

Secondary management digest material and the founder interview are paraphrased with their provenance; no licensed raw secondary screenshot is reproduced. An AI-assisted government-article image is excluded. The signature-only clarification page and an irrelevant industry-classification prospectus page are omitted because they add no evidence to the point-of-use analysis.
