PCL: acquired precision earnings and paid laser-processing capacity

PCL's earnings opportunity has two distinct engines. Pingood adds an acquired precision-parts business with a much stronger historical operating margin than PCL's existing optical business. The new Malaysia line could earn processing fees on customer-owned laser bars and chips as optical networks expand. The investment case depends on the profit these activities can deliver after acquisition accounting, factory staff, customer acceptance and funding.

The useful information gap sits in the local prospectus. Its acquired-company profit figures and detailed Malaysia processing economics provide a better company receipt bridge than a broad AI spending forecast. The prospectus also exposes the cost of the ramp: initial depreciation and staffing can overwhelm processing revenue. A larger sales perimeter can arrive well before strong free cash flow.

Classification: beneficiary with customer qualification barriers and a conditional manufacturing ramp. Available evidence does not establish a monopoly, an exclusive claim on optical demand or a separately billable share of each AI system. Holding status is unavailable in the saved portfolio row. Analytical quality and the owner's protected Excel Base are reported separately.

Current case	Value / scope
Q4 2027 operating ceiling	TWD 153 per ordinary share
Four-quarter window	Q4 2027 through Q3 2028
Method	25x consolidated core OP / starting-quarter ordinary-share proxy
Dated market quote	TWD 165; October22,2026 TWSE closing price, rounded
Analytical score	37/60; rounded 62
Protected Excel Base	67; separate from analytical score and event probabilities
Financial source	H1 ended June30,2026; Q3 sales reported, profit modeled

Reader financial displays use whole TWD million except the per-share header and labeled units. Nonzero amounts below one million remain <1. Exact source and model precision is retained; displayed rounded sums can differ.

The acquired precision business supplies most modeled operating profit in the active earnings window. Legacy operations and the probability-weighted Malaysia ramp remain net costs during that window.

Active earnings-window component	Core OP TWD M
Pingood	672
legacy	(35)
Malaysia	(77)
Group	559

The table shows model estimates for Q4 2027 through Q3 2028. Components and group are independently rounded from exact values, so displayed totals can differ. These are not reported company actuals.

Business, technology and company capture

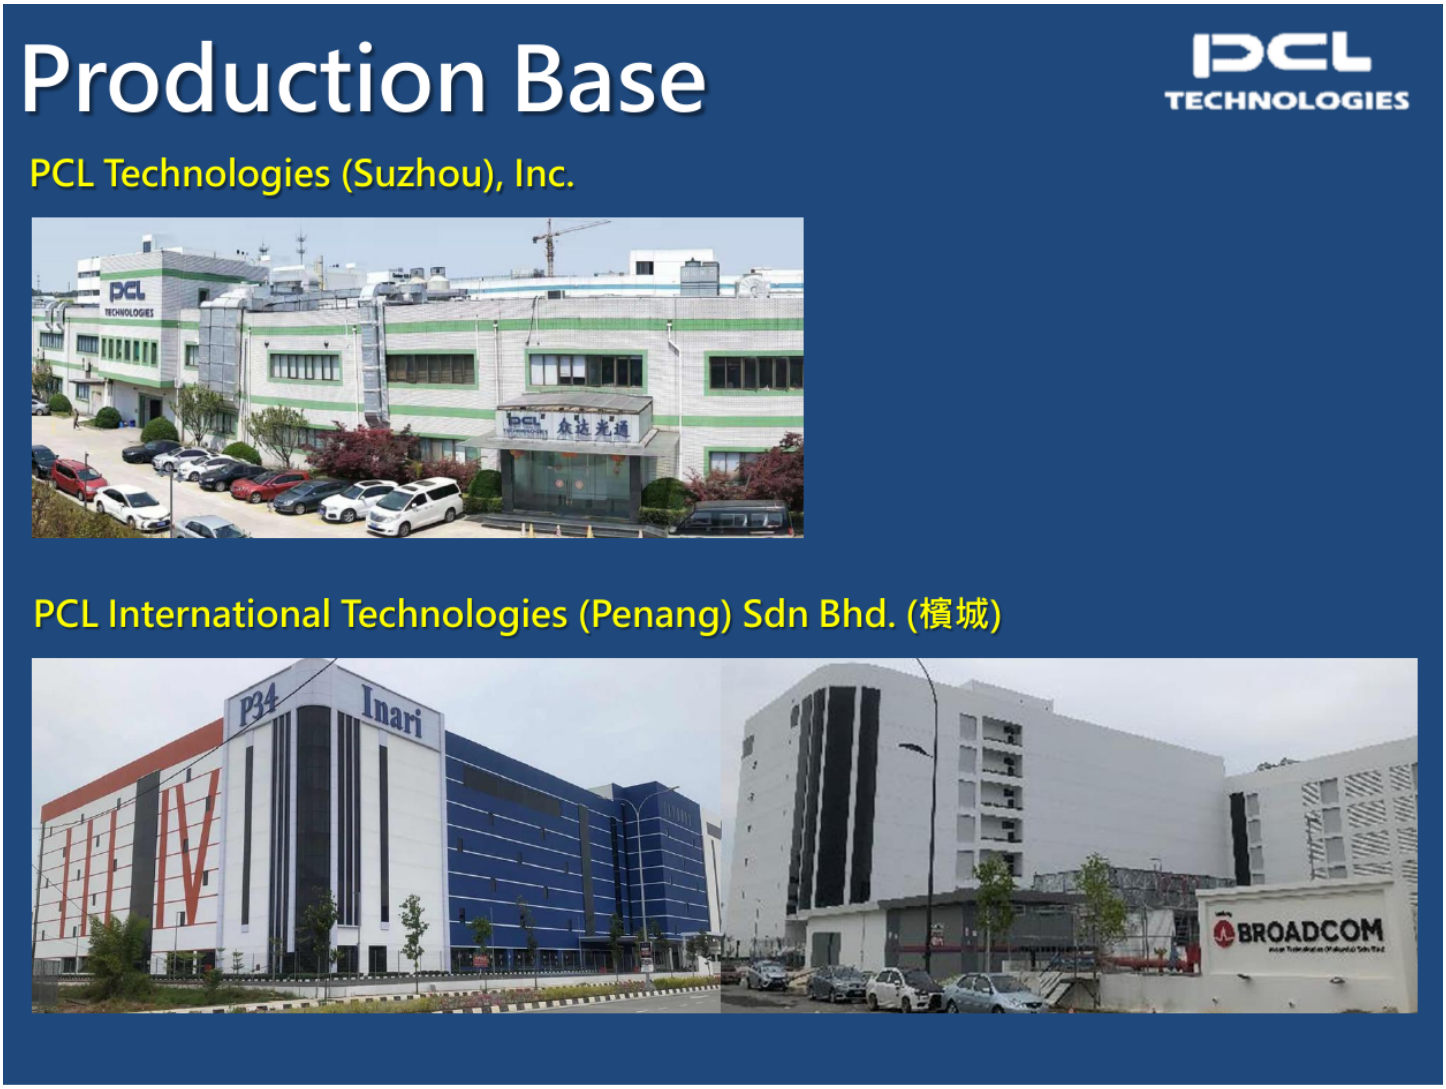

Existing optical products and services, acquired Pingood precision parts, and Malaysia laser processing are the three exhaustive revenue buckets in the model. The acquired Thailand operation belongs inside Pingood. The forecast includes its additional staff and assets without creating another revenue pool.

The Malaysia process starts with customer-owned laser bars. PCL screens the material, separates dies, bonds and packages them, and tests the result. Revenue therefore follows accepted processing pieces and the fee or service mix per piece. A finished optical module has a different selling price and includes other suppliers' content. Multiplying processing pieces by a finished-module price would overstate PCL's receipts.

Broadcom's network architecture and industry optical demand help establish why the process could matter. Architecture diagrams, switch counts and a named customer's AI budget do not identify the number of paid PCL pieces. Customer allocation, usable yield, product mix and acceptance remain company-specific execution variables.

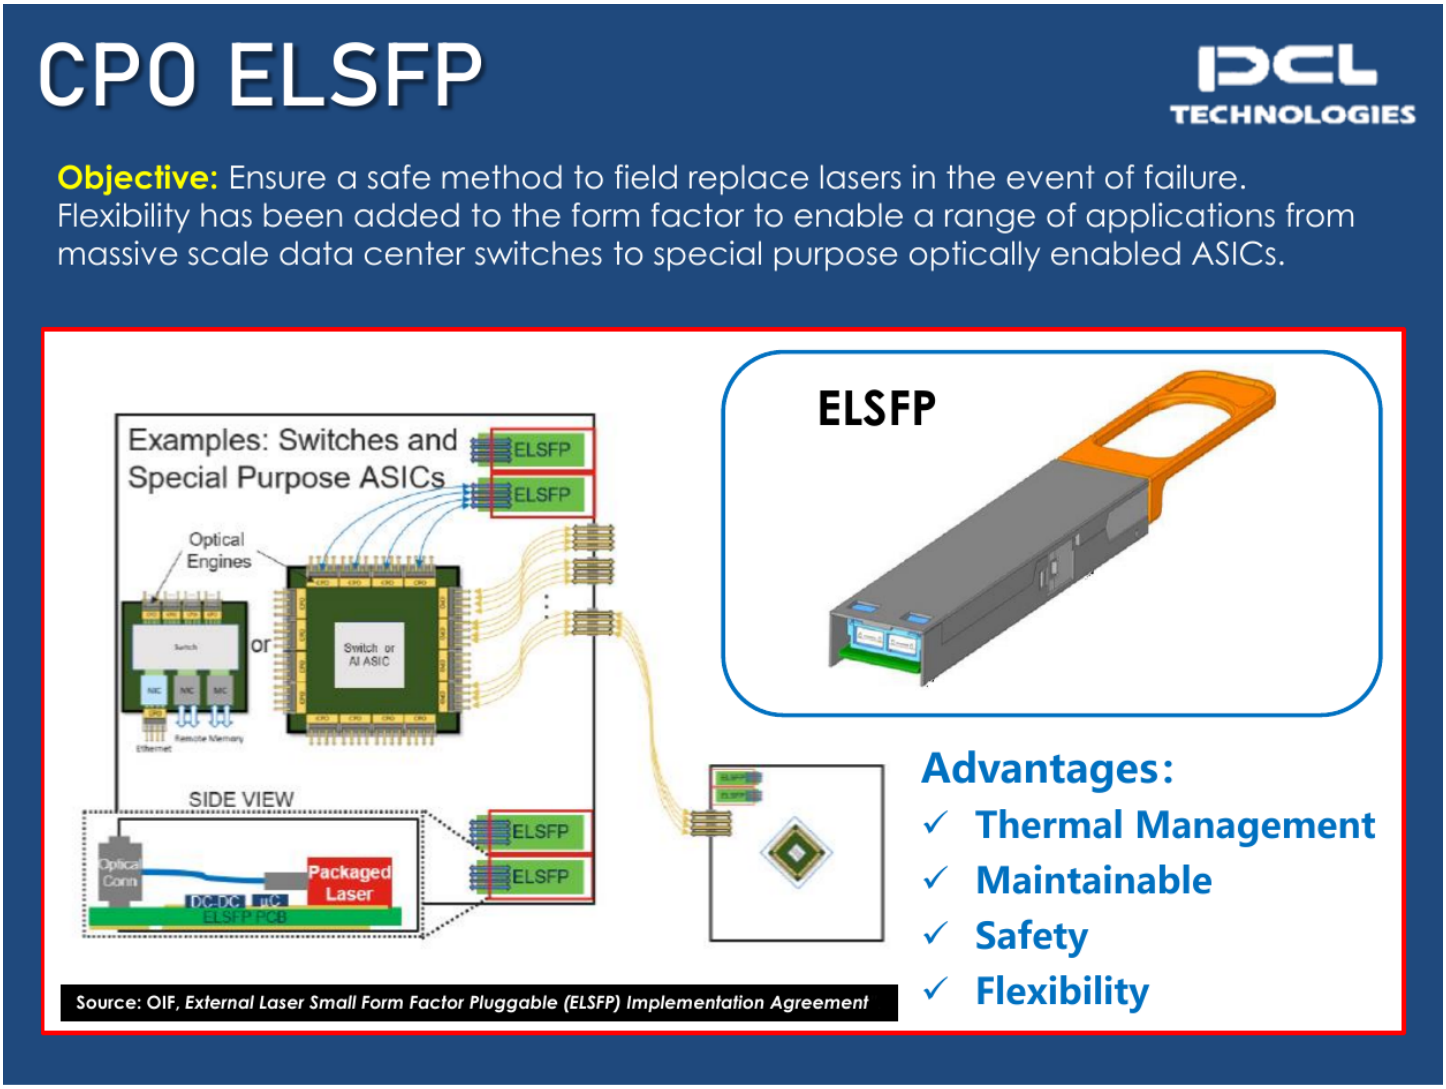

The near-term market is AI optical connectivity and the acquired business's existing electronics and mechanical-parts customers. Industrial automation and physical AI could broaden the same product wallets over three to five years; the framework's 50% relevance weight is applied with full overlap against the existing acquired and optical activity envelopes, producing no second sales pool. More distant distributed compute and space applications receive 20% relevance with the same overlap boundary. These phase weights describe possible market relevance, while customer qualification and paid factory execution have their separate numerical probabilities. The broad application set supports TAM expansion without establishing a universal monopoly.

Latest actuals, guidance and management completeness

The latest located financial statements cover the first half of 2026. Revenue was about TWD 431 million, gross profit about 92 million and operating loss about 29 million. Q2 revenue was about 222 million and operating loss about 21 million. Large financial-asset income and gains sit below operating profit; they do not establish manufacturing profitability and are excluded from the sanctioned operating-profit valuation.

Pingood entered consolidation on July 1. The three reported monthly sales figures for Q3 sum to about TWD 621 million. That consolidated revenue is a hard actual anchor in every forecast branch. The acquired-versus-legacy split, gross profit, acquisition charges and operating profit are not reported Q3 actuals in the located evidence. Their modeled allocation is labeled explicitly.

The issuer presents Pingood's 2025 figures as unaudited proforma information: sales about TWD 1,349 million, gross profit 915 million and operating profit 725 million. The five-year 2026-2030 forecast provides aggregate revenue of about 7,423 million and operating profit of 3,934 million, with no annual split. The model's annual allocation and quarterly seasonality are research assumptions. They must be compared with that aggregate rather than described as annual guidance.

The newest two formal management events located in the checked issuer and WebPro records are December 9, 2025 and December 3, 2024. Both complete saved prepared slide decks were read. Original audio and complete spoken questions and answers were not verified, and an unlisted event cannot be ruled out. These are the latest located formal presentations, with an explicit gap against a conventional newest-two-earnings-calls requirement. The later prospectus and 2026 financial and monthly filings provide more recent numerical evidence.

A bounded October 22 refresh found no new substantive financial, capital or monthly disclosure in the checked official indexes. A later official TWSE response includes the completed October 22 regular session, which supplies the dated header quote. Every period after Q2 has Model profit status even when its reported sales are fixed.

會計師查核報告

PCL TECHNOLOGIES, INC. 公鑒：

保留意見

PCL TECHNOLOGIES, INC.及其子公司民國一一五年六月三十日及民國一一四年六月三十日之合併資產負債表、民國一一五年四月一日至六月三十日及民國一一四年四月一日至六月三十日與民國一一五年一月一日至六月三十日及民國一一四年一月一日至六月三十日之合併綜合損益表，暨民國一一五年一月一日至六月三十日及民國一一四年一月一日至六月三十日之合併權益變動表、合併現金流量表，以及合併財務報表附註(包括重大會計政策彙總)，業經本會計師查核竣事。

依本會計師之意見，除保留意見之基礎段所述事項之可能影響外，上開合併財務報表在所有重大方面係依照證券發行人財務報告編製準則暨經金融監督管理委員會認可並發布生效之國際會計準則第34號「期中財務報導」編製，足以允當表達PCL TECHNOLOGIES, INC.及其子公司民國一一五年六月三十日及民國一一四年六月三十日之合併財務狀況，民國一一五年四月一日至六月三十日及民國一一四年四月一日至六月三十日與民國一一五年一月一日至六月三十日及民國一一四年一月一日至六月三十日之合併財務績效，暨民國一一五年一月一日至六月三十日及民國一一四年一月一日至六月三十日之合併現金流量。

保留意見之基礎

本會計師係依照會計師查核簽證財務報表規則及審計準則執行查核工作。本會計師於該等準則下之責任將於會計師查核合併財務報表之責任段進一步說明。本會計師所隸屬事務所受獨立性規範之人員已依會計師職業道德規範，與PCL TECHNOLOGIES, INC.及其子公司保持超然獨立，並履行該規範之其他責任。本會計師相信已取得足夠及適切之查核證據，以作為表示查核意見之基礎。

如合併財務報表附註四.3所述，列入上開合併財務報表之非重要子公司之本期財務報表未經會計師查核，其民國一一五年六月三十日及民國一一四年六月三十日之資產總額分別為324,983千元及219,121千元，占合併資產總額之5%及5%；負債總額分別為16,327千元及19,517千元，占合併負債總額之1%及2%；其民國一一五年四月一日至六月三十日及民國一一四年四月一日至六月三十日與民國一一五年一月一日至六月三十日及民國一一四年一月一日至六月三十日之綜合損益總額分別為(43,009)千元及(27,571)千元與(54,903)千元及(49,337)千元，占合併綜合損益總額之(17)%及19%與(21)%及43%。另合併財務報表附註十三所揭露前述子公司相關資訊亦未經會計師查核。

關鍵查核事項

關鍵查核事項係指依本會計師之專業判斷，對PCL TECHNOLOGIES, INC.及其子公司民國一一五年一月一日至六月三十日合併財務報表之查核最為重要之事項。該等事項已於查核合併財務報表整體及形成查核意見之過程中予以因應，本會計師並不對該等事項單獨表示意見。

存貨備抵跌價損失估計之評估

截至民國一一五年六月三十日止，PCL TECHNOLOGIES, INC.及其子公司存貨淨額為新臺幣260,996千元，由於高科技產業產品技術快速變遷，集團可能因顧客需求及技術規格改變等因素，導致存貨呆滯過時產生跌價，管理階層須針對存貨因技術規格改變而呆滯過時致未來價值可能下跌之情事估列備抵存貨跌價損失。由於存貨跌價損失金額之估計涉及管理階層主觀判斷，其關鍵假設係考量存貨之通用性、重複利用性、時效性決定呆滯提列比率及庫齡區間，同時評估各存貨之淨變現價值，故存貨評價之查核係屬複雜，因此，本會計師決定為關鍵查核事項。

本會計師之查核程序包括(但不限於):

1. 瞭解及評估與存貨評價流程有關之內部控制設計，並針對內部控制執行之有效性進行測試，例如測試管理階層複核存貨呆滯跌價損失評估方法及關鍵假設。

2. 抽選存貨樣本測試存貨庫齡區間之正確性，透過比較存貨呆滯損失與存貨銷售及異動紀錄之情形，評估管理階層所決定存貨庫齡區間及其存貨呆滯提列比率方法之適當性，並依據存貨呆滯提列比率重新計算所提列之呆滯金額。

3. 抽選存貨樣本核對近期銷貨或進貨單據以測試管理階層計算淨變現價值所使用市場價格基礎之正確性。

本會計師亦評估存貨揭露之適當性，請參閱合併財務報告附註六。

管理階層與治理單位對合併財務報表之責任

管理階層之責任係依照證券發行人財務報告編製準則暨經金融監督管理委員會認可並發布生效之國際會計準則第34號「期中財務報導」編製允當表達之合併財務報表，且維持與合併財務報表編製有關之必要內部控制，以確保合併財務報表未存有導因於舞弊或錯誤之重大不實表達。

A member firm of Ernst & Young Global Limited

Inventory valuation is a key audit matter, with inventory net balance and the stated audit procedures. This is separate from the subsidiary-scope qualification on the preceding page. Original amounts are TWD thousand. Source: P14_H1_2026; 2026-08-25 signed auditor report; H1 ended2026-06-30; board approval2026-08-20; original PDF page 4. Original source.

Legacy optical economics and paid costs

Q2 manufacturing cost is separated into a paid staffing and plant budget, an activity-linked cost proxy, depreciation and the reported inventory write-down. The fixed-versus-variable split is a LOW research calibration. A lower invoice price reduces receipts without automatically reducing the materials, labor and processing activity needed to serve the order.

The Q2 administrative expense increase is retained. No quantified primary attribution to transaction advisers or another identified one-off was located. The fast operating branch alone allows a bounded future efficiency outcome from 2028; a separate sensitivity removes that outcome. The ordinary case carries current administration, research, selling and support costs.

Existing depreciation and right-of-use charges remain operating costs. The existing right-of-use asset has a finite book balance and cannot generate unlimited future cash addbacks. Lease principal and interest are paid separately. Reported share compensation is retained in operating costs; future cash forecasts budget replacement compensation rather than assume free labor or an undisclosed stream of share awards.

Original source exhibit F15

5.主要進銷貨客戶名單

(1)最近二年度任一年度中曾占進貨總額百分之十以上之客戶名稱及其進貨金額與比例，並說明其增減變動原因

單位：新臺幣仟元

項目	2024年度				2025年度				2026年上半年度			
	名稱	金額	占全年度進貨淨額比率(%)	與發行人之關係	名稱	金額	占全年度進貨淨額比率(%)	與發行人之關係	名稱(註)	金額	占全年度進貨淨額比率(%)	與發行人之關係
1	AVAGO	57,993	12.57	無	PANGAEA	162,484	26.80	無	AVAGO	66,990	25.15	無
2	PANGAEA	47,881	10.38	無	AVAGO	118,825	19.60	無	PANGAEA	60,339	22.66	無
	其他	355,624	77.05		其他	325,047	53.60		其他	138,989	52.19	
	進貨淨額	461,498	100.00		進貨淨額	606,356	100.00		進貨淨額	266,318	100.00	

主要變動原因說明：

本公司前二大進貨對象大致相同。

(2)最近二年度任一年度中曾占銷貨總額百分之十以上之客戶名稱及其銷貨金額與比例，並說明其增減變動原因

單位：新臺幣仟元

項目	2024年度				2025年度				2026年上半年度			
	名稱	金額	占全年度銷貨淨額比率(%)	與發行人之關係	名稱	金額	占全年度銷貨淨額比率(%)	與發行人之關係	名稱	金額	占全年度銷貨淨額比率(%)	與發行人之關係
1	AVAGO	994,250	91.06	無	AVAGO	961,929	89.48	無	AVAGO	344,563	80.02	無
2	A 公司	80,027	7.33	無	A 公司	109,162	10.15	無	SANSHIN	38,030	8.83	無
	其他	17,529	1.61		其他	3,884	0.37		其他	47,981	11.15	
	銷貨淨額	1,091,806	100.00		銷貨淨額	1,074,975	100.00		銷貨淨額	430,574	100.00	-

主要變動原因說明：

本公司於 2026 年度上半年度第二大銷貨對象自 A 公司轉變為 Sanshin，主係因 A 公司內部進行業務組織調整，並指派 Sanshin 代為採購之對象所致。

攤銷費用	13	160	173	94	192	286

母公司係以當年度扣除分派員工及董事酬勞前之稅前淨利，分別以最低1%至最多10%提撥員工酬勞及最多5%提撥董事酬勞。

母公司民國一一五年上半年度依獲利狀況，分別以4.58%及1.72%估列員工酬勞及董事酬勞，民國一一五年四月一日至六月三十日認列員工酬勞及董事酬勞金額分別為6,323千元及2,371千元，民國一一五年一月一日至六月三十日認列員工酬勞及董事酬勞金額分別為6,323千元及2,371千元，帳列於薪資費用項下；民國一一四年上半年度依獲利狀況，分別以1.05%及0.68%估列員工酬勞及董事酬勞，民國一一四年四月一日至六月三十日認列員工酬勞及董事酬勞金額分別為2,214千元及1,434千元，民國一一四年一月一日至六月三十日認列員工酬勞及董事酬勞金額分別為2,214千元及1,434千元，帳列於薪資費用項下。

本公司於民國一一五年三月十日董事會決議以現金發放民國一一四年度員工酬勞及董事酬金分別為14,031千元及3,430千元，除匯率變動之影響外，與民國一一四年度財務報告以費用列帳之金額並無重大差異。

Reported factory versus overhead labor, benefits and depreciation, in TWD thousand and staff counts where printed. These costs are already reflected in reported profit. The functional split does not disclose a fixed-versus-variable manufacturing split. Source: P14_H1_2026; 2026-08-25 signed auditor report; H1 ended2026-06-30; board approval2026-08-20; original PDF page 33. Original source.

Acquired Pingood earnings and accounting

Pingood changes the group's operating perimeter materially. Its historical precision-parts margin is the central earnings anchor. The model decomposes that anchor into fixed manufacturing, activity-linked manufacturing and operating expense, then applies explicit price, volume and paid-cost outcomes. The source's roughly 67% forecast gross margin is a comparison point; it is never treated as a 67% operating margin.

The final purchase-price allocation, identifiable acquired intangibles and their useful lives were not located. The model therefore includes a provisional acquired-intangible amortization charge and materially wider alternatives. This is a research charge, with a LOW confidence label, and will be replaced by the actual allocation when available. Existing target depreciation is already inside historical costs and is not deducted twice. The active cash plan assumes no tax deduction for the incremental provisional acquisition charge; a separate sensitivity allows a full deduction. Actual tax basis and deductibility remain unknown.

Thailand's planned factory adds a separate asset and staffing obligation inside the acquired business. The existing Thailand trading company was established in 2024; the source targets factory registration in Q1 2027 and production in Q2. The new capital budget, staff and asset lives are explicit research assumptions because a complete factory budget was not found. New factory staff and depreciation sit in manufacturing cost. No new factory asset depreciates before its assumed readiness date, and a readiness stress keeps paid staff and capital cash visible.

The issuer's acquired-company aggregate forecast and the model have different assumptions about annual phasing, price, fixed-cost inflation, acquisition amortization and new factory costs. The report shows that reconciliation. A gap is not filled by an unexplained profit margin or a second acquisition synergy pool.

Original source exhibit F12

附件十三、其他經金管會規定應記載事項

本公司辦理一一五年度現金增資發行新股案，業經中華民國 115 年 8 月 17 日金融監督管理委員會金管證發字第 1150351913 號申報生效，金融監督管理委員會要求，就長期股權投資(取得品固企業等相關公司之 100%股權)之必要性、總金額及預計效益，於公開說明書中揭露，並於未來申報募集與發行有價證券案件時，應具體評估效益達成情形。茲將其達成情形評估說明如下：

【公司說明】

(1)被投資公司背景

品固集團創立於 1982 年，生產產品涵蓋所有電腦、電子、電機、汽車零件等所需之配線器材及各類微型塑膠緊固件。提供客戶涵蓋產品設計、模具開發、自動生產與客製包裝的一站式解決方案，台灣生產基地位於中壢工業區，另於中國大陸有品基電子(東莞)有限公司及蘇州品基電子科技有限公司，主要從事設計及製造塑膠緊固件。泰國於 2024 年 5 月 29 日成立 Pingood (Thailand) Co., Ltd.，為塑膠電子機構元件的貿易商，目前以貿易買賣方式出貨，服務集團客戶於泰國之業務，未來將朝向在地自行生產並銷售的方式進行營運。

(2)投資合理性與必要性

隨著數據中心與 AI 應用爆發，矽光子共同封裝技術（Co-Package Optics, CPO）被視為未來最核心的技術之一。而 CPO 技術需要極致精密的物理支撐與定位（如 ELSFP 散熱連接元件），品固集團在精密模具與緊固零件擁有的技術，正好能優化本公司現有光通訊產品的設計與成本結構，進一步強化其全球競爭力。另考量品固現有跨國生產據點，具備地緣政治風險下的生產彈性，以及成立超過 40 年，憑藉其超過 400 人的團隊與獨家自主模具生產技術，提供涵蓋產品設計、模具開發、自動生產與客製包裝的一站式解決方案，以高品質的服務與超過上萬件的產品組合，在全球電子產業供應鏈中建立了龐大且穩固的客戶群。

故本公司於 2026 年 5 月 8 日經董事會決議由本公司之子公司眾達光電股份有限公司取得品固企業股份有限公司 100%股權；孫公司 Pinnaclite Technologies, Inc.取得品基電子(東莞)有限公司及蘇州品基電子科技有限公司等兩家公司 100%股權；子公司 PCL Technologies Trading, Inc.及孫公司 Pinnaclite Technologies, Inc.共同取得 Pingood (Thailand) Co.,Ltd. 100%股權。本公司於收購基準日(2026 年 7 月 1 日)將品固企業納入合併報表，將藉由品固集團在微型塑膠緊固件、精密模具與自動化生產優勢，將使本公司從過往光收發模組單一產品元件供應商升級為整機構光通訊整合供應商，可提升本公司業務成長綜效，並擴大在資料中心應用場景中散熱、連接、結構支撐等方面之產品供應及客群。

Pingood acquisition business scope and rationale in the August25 prospectus supplement. Consolidation starts July1,2026. Strategic fit and expected synergy are issuer statements; a separate incremental invoice or acquired profit allocation is not established here. Source: P46_Final_202608_prospectus; 2026-08-25 final prospectus; original PDF page 530. Original source.

Original source exhibit F13

(3)預計效益

單位：新臺幣千元

會計項目	實際效益(註) 2025 年度	預計效益 2026~2030 年度
營業收入	1,348,600	7,423,035
營業毛利	914,800	4,973,432
營業淨利	725,000	3,934,208
營業外收支	12,500	62,500
所得稅費用	136,900	799,342
稅後淨利	600,600	3,197,366
累計可回收金額	-	3,197,366

註：非經會計師查核之擬制性合併數。

A.營業收入

品固公司 2025 年度營收為 1,348,600 千元，而 2026 年主要銷售客戶的電源供應器及伺服器元件的訂單量持續穩定成長。此外，泰國工廠預計在 2027 年第一季底將可申請到工廠登記，並於第二季開始進行生產，主要產品為塑膠扣件及固定座等金屬機構元件，以滿足品固泰國最大客戶之需求。故在受惠於 AI 蓬勃發展下，以及 2028 年度起泰國工廠係全年運作，加上生產達學習曲線，產能利用率逐步提高下，本公司保守推估 2026~2030 年度之營收將逐年成長。

B.營業毛利

由於品固公司擁有自主模具生產技術、自動生產與客製組裝的一站式解決方案，依此在訂價上具有強勢地位，故 2024~2025 年度毛利率皆可維持在 67%以上，故本公司保守推估 2026~2030 年度之毛利率皆為 67%。

C.營業淨利及稅後淨利

品固公司 2025 年度營業淨利為 725,000 千元，稅後淨利為 600,600 千元，品固公司成立超過 40 年，透過集團整合資源及調整分工方式，控管營業費用，長年以來費用率穩定，使得 2024~2025 年度營業淨利率皆維持在 50%以上，營業外收支係以營業外收益率約 1%估算，所得稅費用係以所得稅率 20%進行估算。故本公司保守預估，未來在泰國新廠挹注下，2026~2030 年度之營業淨利及稅後淨利變動走勢與營業收入呈同向變動。

依品固公司企業價值加上預估帳上現金餘額共計 3,123,561 千元，本公司收購價金估計回收年限約為 4.9 年。

【承銷商說明】

該公司之子公司眾達光電、PCL TRADING 及孫公司 Pinnaclite，為跨足精密塑膠及金屬等機構元件，強化現有光通訊相關產品設計與成本結構，促進集團業務多

Pingood FY2025 unaudited pro forma figures and one aggregate2026-2030 issuer forecast, in TWD thousand. Original source exhibit F14

元與研發技術跨領域發展以擴大產品供應及客群，於 2026 年 5 月 8 日經董事會決議通過取得品固企業股份有限公司、品基電子(東莞)有限公司、蘇州品基電子科技有限公司及 Pingood (Thailand) Co.,Ltd. 等公司 100%股權，以發揮集團之營運綜效。該公司及其子公司係以銀行借款及自有資金支應本案款項，依照 2026 年 5 月 8 日所簽訂契約約定方式，本案交易價格係以業經外部專家出具之盡職調查報告、雙方合意之標的實質營運公司之企業價值新台幣 26.8 億元為基礎，另加計品固泰國股權價款泰銖 149,543 千元(約新台幣 1.5 億元)，整體企業價值約為新台幣 28.3 億元；再依合約約定加計交割日現金並扣除負債及淨營運資金調整新台幣 3 億元後，作為最終買賣總價之計算基礎，買賣總價約新台幣 31.3 億元。依取處準則第 10 條規定，該公司已於事實發生日前取得建誠聯合會計師事務所李定安會計師出具之價格合理性意見書，經參照意見書評估之企業股權價值，整體企業價值區間為 2,738,059 千元至 4,932,758 千元之間，本案交易價格 3,123,561 千元介於前揭價格區間內，尚屬合理；另該公司已依取處準則第 31 條規定於事實發生之即日起算二日內辦理公告申報，經評估尚無重大異常之情事，對其財務狀況亦無重大不利影響。

經詢問該公司對品固公司未來損益表之估算假設，該公司預期品固公司營業規模將持續提升，營業收入係以產銷量之成長假設做為評估依據，而預估之營業毛利率及營業費用率均有其計算依據，故該公司預估投資品固公司自 2026 年起之稅後淨利加總後，截至 2030 年度可全數收回，投資回收年限約 4.9 年，應屬合理。

根據 Research Nester 統計，2025 年工業緊固件市場規模 1,096 億美元，預計 2026 年工業緊固件產業規模預計為 1,165 億美元，到 2035 年底將達到 1,899 億美元，2026-2035 年複合年增長率約為 6.3%。其成長動力主要來自永續發展措施、基礎設施投資、航空航天現代化和汽車電氣化。另塑膠緊固件，預計將在優先考慮永續性、成本效益和輕質材料的領域中得到更廣泛的應用，其中複合材料和可生物降解塑膠的創新將促使開發出更耐用、耐熱和環保的緊固件。而汽車和航空航太工業注重輕量化和燃油效率，也預計將推動複雜塑膠緊固件的使用。其市場規模從 2025 年的 72.4 億美元成長至 2026 年的 76.9 億美元，預計將以 6.26%的複合年增長率進一步擴張，到 2032 年達到 110.8 億美元。綜上所述，該公司收購品固公司之預期效益經評估尚屬合理。

3

Underwriter acquisition-value discussion and estimated consideration bridge, in TWD thousand. PCL TECHNOLOGIES, INC.及子公司合併財務報表附註(續)
(金額除另予註明外，均以新臺幣千元為單位)

截至一一五年六月三十日，本集團將其持有子公司眾達光電股份有限公司、PCL TECHNOLOGIES TRADING, INC.、PCL (BVI), INC.及孫公司Pinnaclite Technologies, Inc.之全數股票作為長期借款之擔保品，受質押股數分別為21,800千股、39,000千股、4千股、13千股。

九、 重大或有負債及未認列之合約承諾

無此事項。

十、 重大之災害損失

無此事項。

十一、 重大之期後事項

1. 本集團母公司於民國一一五年七月三十日於公開資訊觀測站發布重大訊息，擬現金增資發行普通股共8,300千股，預計發行總股數為8,300千股，暫訂發行價格為每股新臺幣100元，預計募集總金額新臺幣830,000千元，上述現金增資案業經金管會證券期貨局於民國一一五年八月十七日核准申報生效。

2. 本集團母公司於民國一一五年五月八日董事會決議，為邁向國際化與擴大經營規模，進一步提升經營績效及強化全球競爭力，故向策略有限公司、Sino Future Investments Ltd.、Foresee Fortune Investment Limited及其他自然人股東收購品固企業股份有限公司、品基電子(東莞)有限公司、蘇州品基電子科技有限公司及Pingood (Thailand) Co., Ltd. 4間公司100%股權，截至民國一一五年八月二十五日共支付新臺幣3,103,302千元等值外幣。

十二、 其他

1. 金融工具之種類

	115.6.30	114.12.31	114.6.30
金融資產			
透過損益按公允價值衡量之金融資產	$1,954,935	$1,654,613	$1,671,685
透過其他綜合損益按公允價值衡量之金融資產	1,259,183	1,771,245	1,508,522
按攤銷後成本衡量之金融資產			
現金及約當現金(不含庫存現金)	704,319	525,494	797,167
按攤銷後成本衡量之金融資產	2,259,692	47,611	22,739
應收帳款	115,245	114,275	94,125

Acquisition cash paid as of the August25 financial-report date and financial-asset disclosures. The source is dated after June30; payment timing and financial-asset categories must remain separate from cash available for later factory spending. Source: P14_H1_2026; 2026-08-25 signed auditor report; H1 ended2026-06-30; board approval2026-08-20; original PDF page 39. Original source.

Malaysia processing: paid assets, acceptance and costs

The prospectus budgets about TWD 1,402 million for Malaysia: 679 million for property and 723 million for equipment. About 186 million was scheduled as paid in the first half, with the remaining cash concentrated in the second half of 2026 and Q1 2027. The equipment table is part of that budget; its rows are not another addition to capital spending.

The issuer's plan progresses through property transfer, equipment installation, trials, customer qualification and commercial production. February 2027 qualification and April commercial production are planned milestones. The located evidence does not verify completed acceptance. The active model requires paid capacity as well as technical qualification, and delays the receipt curve when project cash is deferred.

Source annual processing volumes rise from about 32 million pieces in 2027 to 58 million in 2028 and 70 million thereafter. Corresponding revenue rises from about TWD 161 million to 513 million and 601 million. The changing implied fee reflects the issuer's price or service-mix forecast; it is not a verified contract repricing. The generic industry yield illustration is not measured PCL yield.

The source expects a substantial operating loss in 2027, followed by profit as the line fills. Fixed manufacturing staff, startup expense and depreciation explain that transition. The model calibrates annual fixed and per-piece costs to the first two source years, then reconciles the later cost-learning requirement explicitly. It never applies a success probability to net profit while erasing failed-qualification costs.

New-product language for an existing US customer supports an incremental processing opportunity. Manufacturing diversification away from China also creates possible transfer overlap. The model removes a bounded share of Malaysia receipts from legacy receipts and gives back only avoidable activity costs. Fixed staff remain paid. Zero overlap and higher overlap are shown as separate sensitivities.

	餐廳/祈禱室	199
	大廳	595
	空壓機及儲氣槽	828
	停車場	5,095
2F	辦公區	595
3F	辦公區	595
總坪數		17,023

資料來源：本公司提供

B.機器設備取得之可行性

在購置機器設備方面，本公司本次擬架設 CPO 外部雷射光源封裝及測試製程。茲說明如下：

資料來源：本公司提供

由於光通信模組中所使用的雷射晶片是邊射型晶片，CPO 外部雷射光源封裝及測試製程，係由本公司之客戶提供已從晶圓切割成一條條的巴條，交由本公司負責雷射巴條的品質篩選與物理加工。透過雷射巴條測試機針對

Malaysia service workflow and floor plan: customer-supplied laser bars move through processing, die separation, COC packaging and testing. A processing piece is distinct from a finished external-laser module. Original area units remain unchanged. Source: P46_Final_202608_prospectus; 2026-08-25 final prospectus; original PDF page 76. Original source.

Original source exhibit F08

現金增資發行新股 8,300 仟股，其中保留擬發行股數總額之 10%計 830 仟股由員工認購，另依「外國發行人募集與發行有價證券處理準則」第 13 條規定提撥本次增資發行新股之 10%計 830 仟股，採公開申購方式對外公開承銷，其餘 80%，計 6,640 仟股，由原股東按增資認股基準日股東名簿記載之持股比例認購，其認購不足一股之畸零股，由股東自停止過戶日起五日內自行拼湊成整股認購，原股東及員工放棄認購或拼湊後仍不足一股之畸零股部份，擬請授權董事長洽特定人按發行價格認購之；而對外公開承銷部分，如有未認購部分將由證券承銷商採餘額包銷方式認購，應足以確保資金順利募集完成，故本次計畫資金完成應具可行性。

(3)資金運用項目之可行性

本公司本次購置土地建物及機器設備，係用於擴充 CPO(Co-Package Optics)外部雷射光源封裝及測試製程，主要涵蓋雷射巴條加工、晶粒分離、載板雷射晶片 COC（Chip on Carrier）封裝與最終測試，以下茲就本公司本次購置土地及廠房、機器設備取得及市場銷售之可行性，評估說明本次計畫之可行性：

A.購置土地及廠房之可行性

在購置土地及廠房方面，本公司主係因應客戶需求，於 2026 年 4 月經董事會決議通過於馬來西亞購置土地及廠房，作為工廠使用，並於 2026 年 4 月正式簽約，預計 2026 年 10 月支付尾款，完成產權移轉作業。該廠房共 3 層樓，為使廠房符合本公司生產作業所需，本公司與業主協議，得於 4 月支付訂金後，先將廠房予以整建，本公司已於 2026 年 6 月先開始進行機電工程發包，之後進行廠房隔間、水電、空調以及廠房內部各項設施增添安裝等工程，最後進行機臺安裝工程，整改工程預計將於 2026 年第三季完成。購置土地及廠房資金預計投入 678,840 仟元，本公司已於 2026 年第二季投入 121,353 仟元，本公司預計分別於 2026 年第三季及第四季分別投入 121,353 仟元及 436,134 仟元，由於本公司先前已有中國擴廠經驗，對於相關程序熟稔，故本次計畫應屬可行。

廠房工程進度及後續預計進度

項目	時程
簽訂廠房合約	2026/4
廠房設計規劃	2026/5
機電工程發包	2026/6
水電及室內裝潢施工	2026/6~9
使用執照取得	2026/10
進行機臺安裝	2026/10~12
產線試產	2026/12
客戶驗證	2027/02
產線正式啟用	2027/04

資料來源：本公司提供

August25 plan for property transfer, installation, December2026 trials, February2027 customer qualification and April2027 formal production. Dates are issuer plans. Original source exhibit A05

巴條進行光電特性測試，並搭配光學頻譜分析儀確認其發光波長與頻譜分佈是否符合規格，完成電性與光學測試；之後透過畫線機在巴條上進行高精度畫線，作為後續劈裂的基準線；再由 3D 輪廓儀檢查畫線深度一致性，以確保後續劈裂品質。隨後，劈裂機依晶體解理面將巴條分離為單一晶粒，並透過自動光學檢測機對晶片外觀進行檢驗與分類，合格晶片才能進入封裝段，上述製程其核心目的在於確保進入封裝段的單顆晶粒具備穩定且一致的性能。而後封裝製程則透過固晶與打線機將雷射晶片與載板進行機構與電性整合，形成可測試的 COC（Chip on Carrier）結構。此階段對貼裝精度、打線品質與製程穩定性要求極高，直接影響後續產品良率。測試製程著重於產品驗證，包含 COC 光電特性測試、高溫燒測以及最終外觀檢測與分類。

綜上所述，本公司考量 5G、物聯網、網路大數據、雲端運算、資料中心等網路應用產品所帶動矽光子傳輸之市場趨勢，規劃擴充產能以因應客戶之訂單需求，擬陸續採購移載機設備、巴條測試機設備、光學頻譜分析儀相關設備、畫線機設備、3D 輪廓儀設備、劈裂機設備、自動光學檢測機設備、固晶機設備、打線機設備、COC 測試及燒測機等相關機器設備，其採購數量係依照本公司客戶所設定之目標產能、產業市況並預估未來客戶訂單需求之規劃，而採購對象則為本公司合作之設備廠商。另本公司在機器設備之採購及安裝已累積相當經驗，故對於機器設備之裝設、工程施作之時程規劃及安裝執行並無困難。

此外，本公司安裝機器設備時亦須先經過使用及測試，故無操作及使用上之疑慮，且其操作人員已具備豐富之生產經驗，設備之操作技術亦相當純熟，生產技術上應屬可行，本次購置機器設備就設備取得及機臺安裝、操作使用等能力應屬無虞，故本次計畫購置機器設備之取得及操作技術來源應屬可行。

本次購置機器設備預計投入 722,918 仟元，配合廠房整改工程完工進度及機器設備採購至進廠安裝、試製、驗收等前置作業時間，2026 年第一季及第二季已依機器設備購置進度陸續支付訂金，已分別投入 62,972 仟元及 1,808 仟元，後續交機款與驗收款預計 2026 年第三季、第四季至 2027 年第一季期間每季預計分別投入 413,659 仟元、204,318 仟元及 40,161 仟元。本公司本次在購置機器設備方面購置項目如下表所示：

單位：新臺幣仟元

項次	設備名稱	設備用途	金額
1	移載機設備	1.將完成固晶的 COC 轉移到打線的治具上。 2.將完成打線的 COC 轉移到測試的治具上。 3.將完成測試的 COC 轉移到出貨包裝上。	27,632
2	巴條測試機設備及光學頻譜分析儀相關設備	1.對雷射巴條光電特性測試 2.分析發光波長與頻譜分佈是否符合規格	104,737
3	畫線機設備	於巴條上精準畫線作為劈裂的基準	9,839

C.產品市場銷售之可行性

市調機構 TrendForce 表示，為加速 AI 應用導入與升級，全球雲端服務供應商(CSP)將持續加強投資 AI 伺服器（server）及相關資料中心基礎建設，預計 2026 年八大主要 CSP 的合計資本支出將超越 7,100 億美元，年增率約 61%。隨著 AI 應用爆發，全球進入超大規模資料中心時代，動輒需要每秒 800G 傳輸速率，傳統銅線逐步無法應付龐大資料處理，而矽光子技術具備高頻寬、低功耗、遠傳輸距離等特性。另根據 YOLE 報告指出，全球矽光子市場規模將在 2027 年突破 50 億美元，從 2022 年到 2027 年，年複合成長率高達 30%，隨著未來高速傳輸需求不斷快速進展，預期矽光子技術將成為高階 AI 資料中心的標準配置。

然由於矽光子技術難以整合高功率雷射光源所產生之散熱問題，故透過將雷射源外置，避免與光模組中之交換機晶片過熱，可提供穩定的光源給光引擎使用，將可解決散熱問題，其技術門檻在如何讓雷射光高功率與穩定輸出、光纖陣列耦合精度與熱管理。經搜尋公開資訊並綜觀目前市場同業中，同業如前鼎光電亦進行開發 CPO 外部雷射光源元件，並預計 2027 年量產，因此評估光源模組外置將逐漸成為主流趨勢。

承前所述，市場的發展趨勢穩定向上，而本公司憑藉著優異的光學元件封裝與相關生產技術，長期協助客戶量產其所需規格之產品，讓客戶可以持續專注高速光收發元件之開發，將產品之生產委由本公司負責，因此本公司與主要客戶長期維持穩定之合作關係。此次計畫為客戶代工 CPO 外部雷射光源封裝及測試之製程，以因應未來資料中心興建大量需求及 5G 行動通訊商用化所帶動之矽光子元件需求商機，故本公司本次計畫，預計生產之產品已有明確之客戶對象及潛在市場需求，其市場銷售應具可行性。

綜上所述，本公司本次辦理現金增資發行新股之計畫，就其法定程序、資金取得及資金運用計畫等各方面評估均具可行性，故整體而言，本公司本次募集與發行有價證券計畫應屬可行。

Original source exhibit F10

2026 年第三季、第四季至 2027 年第一季期間每季預計分別投入 413,659 仟元、204,318 仟元及 40,161 仟元。

本公司本次辦理現金增資發行新股計畫，考量土地及廠房支付尾款時間，以及機器設備之訂購、交運、安裝、試車及驗收進度及付款條件等因素加以編列，經考量主管機關審查時間、公開承銷期間及繳款作業等因素，以本案於 2026 年 7 月向金融監督管理委員會證券期貨局提出申報，本次募集與發行計畫預計可於 2026 年第三季完成資金募集，即可依計畫動用本次募集之資金。故本次籌資之資金運用計畫及預計進度尚屬合理。

(2)預計可能產生效益之合理性

本公司本次購置土地廠房及機器設備預計可能產生之效益如下：

單位：仟顆；新臺幣仟元

年度	產品項目	產量	銷量	銷售值	營業毛利	營業淨利
2027	CPO外部雷射光源	31,512	31,512	160,969	(150,038)	(176,258)
2028	CPO外部雷射光源	57,830	57,830	512,569	115,249	104,876
2029	CPO外部雷射光源	70,171	70,171	600,830	175,198	161,182
2030	CPO外部雷射光源	70,171	70,171	600,830	175,198	162,934
2031	CPO外部雷射光源	70,171	70,171	600,830	183,342	172,342
2032	CPO外部雷射光源	70,171	70,171	600,830	183,342	172,342
合計		370,026	370,026	3,076,858	682,291	597,418

資料來源：本公司提供

A.產銷量與銷售值之合理性

本公司在光收發模組產品之製程，已累積相當豐富之生產技術與經驗，經參酌新設產線之產量，並考量機器設備安裝、測試、驗收及試產時間，故推估自 2027 年 4 月開始進行 CPO 外部雷射光源元件之封裝及測試，並於 2028 年度起機器設備係全年運作，根據光通信行業市場研究機構 Light Counting 預估 2026 年高階光模塊的出貨量將接近 4 仟萬個，至 2030 年高階光模塊的出貨量將接近 1.8 億個，而以一個光模塊約需 2~8 個雷射光源來估算，其雷射光源代工需求量將達 3.6~14.4 億個，若再考慮良率 5 成情況下則數量至少再加一倍，其代工的產能需求極高，本公司新設產線之產量預估，係依據客戶所設定之目標產能、產業市況、生產良率及本公司生產光收發模組產品經驗所作之估計值，並預估未來客戶訂單需求之規劃，預估高速光收發模組產品 2027 年至 2032 年度產量分別為 31,512 仟顆、57,830 仟顆、70,171 仟顆、70,171 仟顆、70,171 仟顆及 70,171 仟顆，故應屬合理可行。

在銷售量方面，本公司綜合考量以往對客戶之接單狀況、終端客戶銷售及市場需求強度等因素，產品銷售應屬可期，由於本公司係配合客戶訂單接單式生產，故本公司預估未來年度銷售量與生產量大致相同；

Issuer Malaysia project forecast,2027-2032. The table states thousands of pieces and TWD thousand. Planned output and sales are processing-service quantities; the surrounding hypothetical50% yield example is a market illustration, not measured PCL yield or a signed order book. Source: P46_Final_202608_prospectus; 2026-08-25 final prospectus; original PDF page 82. Original source.

Original source exhibit F11

而產品之售價方面，係考量人力成本及銷售數量等因素，並考量目前市場行情，憑藉本公司累積多年與客戶之合作經驗，因此本公司對於未來年度產品之銷售值預估，應屬合理。

B.營業毛利及利益之合理性

本公司 2023 年度至 2025 年度之平均毛利率均介於 21%~24%，依本公司過去產銷經驗，考量新產線現於 2027 年 4 月正式量產，初期之良率及相關產線人員之工作效率較不及現行中國人員成熟加上新架設之機器設備所需分攤之固定成本較高，且尚未達規模經濟，故保守推估本次預計代工之 CPO 外部雷射光源產品，首年(即 2027 年第二季起)之毛利率為(93.21)%，其後因 2028 年度起機器設備係全年運作，加上新產品因技術門檻較高，預期在放量後，將對整體毛利率帶來正面貢獻，隨著產銷量上升、代工之製程技術成熟及生產良率上升等因素影響，保守推估 2028~2032 年度之毛利率預估分別為 22.48%、29.16%、29.16%、30.51%及 30.51%，帶動營業毛利呈現成長趨勢，其估計基礎應尚屬合理。

在營業利益方面，係以馬來西亞廠 2025 年及 2026 年 1-5 月營業費用比率 1.30%為估算基礎，其費用包含人事成本、交通運輸、水電及其他雜項支出等日常營運開銷，而購置之機器設備的相關費用攤提均主要反映在製造成本，本公司預估未來年度隨著營收規模擴增，管理費用占比將逐漸減少，估計 2027~2032 年營業費用率分別為 16.29%、2.02%、2.33%、2.04%、1.83%及 1.83%，預估 2027~2032 年度之營業利益分別為(176,258)仟元、104,876 仟元、161,182 仟元、162,934 仟元、172,342 仟元及 172,342 仟元，其所估計之營業利益應屬合理。

C.資金回收年限之合理性

本公司折舊費用係依據本次購置土地廠房及機器設備之價款及本公司會計政策之折舊攤提期間估算折舊提列費用，應尚屬合理。本公司本次計畫預估資金回收年限，依據預計增加之營業利益加回所提列折舊費用之累積資金回收金額估算，本次購置土地廠房及機器設備之預計資金回收年限約 5.73 年。

單位：新臺幣仟元

年度	營業利益 (A)	折舊費用 (B)	現金流量 (A+B)	累計現金流入
2027	(176,258)	150,622	(25,636)	(25,636)
2028	104,876	158,213	263,089	237,453
2029	161,182	158,213	319,395	556,848
2030	162,934	158,213	321,147	877,995
2031	172,342	150,408	322,750	1,200,745
2032	172,342	101,423	273,765	1,474,510

二、本次現金增資、發行公司債、發行員工認股權憑證或限制員工權利新股計畫應記載事項

(一)本次募集與發行有價證券計畫內容

1.本次計畫所需資金總額：新臺幣 1,401,758 仟元。

2.資金來源：

(1)現金增資發行普通股 8,300 仟股，每股面額新臺幣壹拾元整，每股發行價格 105 元，募集總金額 871,500 千元。

(2)本公司本次計畫所需資金總額為新臺幣 1,401,758 仟元，其中新臺幣 186,133 仟元已於 2026 年度第一季至第二季以本公司自有資金支應；餘 1,215,625 仟元將以本次籌資計畫所募資金總額 871,500 仟元，及 344,125 仟元以自有資金方式支應。

3.計畫項目及預計資金運用進度

單位：新臺幣仟元

計畫項目	預計完成日期	所需資金總額	預計資金運用進度				
			2026 年度(註 1)		2026 年度		2027 年度
			第一季	第二季	第三季(註 2)	第四季	第一季
購置土地廠房	2026 年第四季	678,840	-	121,353	121,353	436,134	-
購置機器設備	2027 年第一季	722,918	62,972	1,808	413,659	204,318	40,161
合計		1,401,758	62,972	123,161	535,012	640,452	40,161

資料來源：本公司提供

註 1：考量本次籌資計畫資金到位時間落差，故於資金到位前先以自有資金支應。

註 2：惟如實際資金到位時間落差，本公司擬先以銀行借款支應，待本次籌資計畫資金募集完成後即用於償還該等借款。

4.預計可能產生效益

本公司為因應馬來西亞孫公司建置廠房並佈局矽光子相關元件，本次計畫分別以 678,840 仟元購置土地廠房及 722,918 仟元購置機器設備，預計 2027 年至 2032 年共可增加營業收入 3,076,858 仟元及增加營業利益 597,418 仟元，相關預計效益如下：

單位：仟顆；新臺幣仟元

年度	產品項目	產量	銷量	銷售值	營業毛利	營業淨利
2027	CPO外部雷射光源	31,512	31,512	160,969	(150,038)	(176,258)
2028	CPO外部雷射光源	57,830	57,830	512,569	115,249	104,876
2029	CPO外部雷射光源	70,171	70,171	600,830	175,198	161,182
2030	CPO外部雷射光源	70,171	70,171	600,830	175,198	162,934
2031	CPO外部雷射光源	70,171	70,171	600,830	183,342	172,342
2032	CPO外部雷射光源	70,171	70,171	600,830	183,342	172,342
合　計		370,026	370,026	3,076,858	682,291	597,418

Original source exhibit A07

本公司於馬來西亞擴充廠房，主係因近年中美貿易戰持續延燒，美國對中國製造的電子零組件、課徵高額關稅，致在中國生產並出口至美國市場的廠商面臨顯著成本壓力與市場競爭力削弱。本公司主要產品包括光收發模組及光通訊元件等，大型交換器等網通設備所需之核心元件，其主要客戶為國際光通訊元件大廠，再進而由其銷售至更下游的設備廠商，以供電信運營商或企業使用，雖主要出貨地為新加坡、日本及中國等亞洲地區，惟終端客戶群包括美系國際級大廠，終端之銷售區域係以美國及歐洲為主。由於美國關稅政策反覆，若仍以中國生產基地為主要出口來源，將難以避免被納入美方關稅清單範圍，導致產品毛利受侵蝕並影響客戶下單意願。

另由於馬來西亞具備語言與文化優勢、東協戰略地位及租稅優惠，符合本公司長期產能擴充之所需，確保未來成長發展並滿足客戶需求，降低地緣政治及關稅引起的貿易風險。

綜上所述，本公司於馬來西亞擴充廠房，不僅可有效迴避中美關稅衝擊，降低貿易成本與市場波動風險，亦可憑藉其區位、政策與產業聚落優勢，鞏固本公司於全球市場的競爭地位，實現跨區域生產與客戶供應鏈多元化的長期發展策略，確有其必要性。

3.本次資金運用計畫、預計進度及預計可能產生效益之合理性

(1)資金運用計畫及預計進度之合理性

單位：新臺幣仟元

計畫項目	預計完成日期	所需資金總額	預計資金運用進度				
			2026 年度(註 1)		2026 年度		2027 年度
			第一季	第二季	第三季(註 2)	第四季	第一季
購置土地廠房	2026 年第四季	678,840	-	121,353	121,353	436,134	-
購置機器設備	2027 年第一季	722,918	62,972	1,808	413,659	204,318	40,161
合計		1,401,758	62,972	123,161	535,012	640,452	40,161

資料來源：本公司提供

註 1：考量本次籌資計畫資金到位時間落差，故於資金到位前先以自有資金支應。

註 2：惟如實際資金到位時間落差，本公司擬先以銀行借款支應，待本次籌資計畫資金募集完成後即用於償還該等借款。

本公司於 2026 年 4 月經董事會決議通過於馬來西亞購置土地及廠房，作為工廠使用，並於 2026 年 4 月正式簽約，預計 2026 年 10 月支付尾款，完成產權移轉作業。購置土地及廠房資金預計投入 678,840 仟元，本公司已於 2026 年第二季投入 121,353 仟元，預計分別於 2026 年第三季及第四季分別投入 121,353 仟元及 436,134 仟元，而本次購置機器設備預計投入 722,918 仟元，配合廠房整改工程完工進度及機器設備採購至進廠安裝、試製、驗收等前置作業時間，2026 年第一季及第二季已依機器設備購置進度陸續支付訂金，已分別投入 62,972 仟元及 1,808 仟元，後續交機款與驗收款預計

本集團之不動產、廠房及設備未有提供質押或擔保之情事。

H1 PPE roll-forward and pending construction/acceptance balance. Original amounts are TWD thousand. Pending assets are included within PPE; this page does not certify accepted productive output or authorize a second addition of the same capital spending. Source: P14_H1_2026; 2026-08-25 signed auditor report; H1 ended2026-06-30; board approval2026-08-20; original PDF page 22. Original source.

Rule16b: probabilities, overlap and company bridges

The three operating environments receive 25% for slower acceptance, 55% for the paid ramp and 20% for faster utilization. They combine customer allocation, pricing, acquired execution and legacy activity coherently. They are subjective research judgments rather than historical frequencies. The same demand comment is not counted as several independent signals.

Within those environments, technical qualification receives 35%, 65% and 85% probabilities. The resulting marginal technical probability is about 62%. Existing customer relationships and the detailed project plan support a material success weight. Unverified execution, uncertain acceptance and the startup cost curve limit it. Actual modeled receipts also require the selected capital history to pay for capacity on time.

Capital histories receive 55% for orderly redemptions, 30% for stressed liquidity and 15% for limited cash conversion. These describe undisclosed settlement and financing outcomes, not verified bank transactions. The model combines them with the six operating outcomes to produce eighteen joint paths. Their independence is a LOW approximation; nonlinear funding limits are evaluated within each path before averaging.

Every material hypothesis has a numerical disposition and an active company bridge. Pingood's known consolidation is included with full perimeter weight while its profit outcomes vary. Malaysia's processing receipts pay their own costs and overlap. The provisional acquisition charge and future financing have explicit numerical alternatives. Broad AI spending and CPO system counts add no second revenue wallet on top of those modeled activities.

Cash, credit and conditional settlement

June unrestricted cash and the acquisition reserve are different balances. The reserve releases against the known acquisition payment. Selected use of the remaining signed acquisition facility is disclosed as a model assumption. Neither a credit limit nor the acquired company's due-diligence cash balance is presented as cash actually received.

The completed September issue raised about TWD 872 million gross. Estimated issue fees reduce available proceeds. Those proceeds can also require a debt sweep. The old TWD 249 million illustration came from the earlier proposed raise and a 30% sweep, and cannot independently establish an additional ordinary amortization calendar. Actual net proceeds, the applied covenant tier and the exact principal installment schedule remain gaps.

The signed acquisition loan runs to June 2029; a further two years requires consent. The model separates interest, proceeds sweeps, bounded ordinary principal assumptions, the maturity balloon and conditional extension. A sweep reduces the earliest future principal buckets so the same debt is not repaid twice. The separate short-term loan and lease balances remain visible.

June investments include quoted shares and funds, illiquid funds, pledged bonds, structured notes and deposits. Only the quoted candidate pool is considered for bounded stock sales, with a realization haircut. A

fair-value classification does not prove immediate redemption. Already pledged or restricted balances cannot simultaneously finance another project.

Twelve June equity purchase contracts can require periodic share purchases and larger quantities under leverage conditions. The reported derivative liability is a fair-value measure, separate from remaining cash settlement. Whole-contract maximum quantities are not the undisclosed remaining quantities. The cash scenarios therefore label selected remaining purchase amounts as research assumptions and retain the unresolved exposure.

Funded structured notes can settle in shares. Their already invested principal is not another fresh share-purchase obligation, and their face value is not guaranteed cash redemption. All scheduled maturities in the saved inventory end by Q1 2027. Any modeled noncash or unresolved residual thereafter is labeled as a converted-security or recovery asset, with no automatic cash yield. Later contracts and actual settlement were not verified.

Cash forecasts include trade working capital, tax, paid staff, project and maintenance capital, interest, lease principal, dividend and settlement payables, asset realizations and explicit share financing. The trade working-capital and future tax assumptions are LOW proxies. Reported financial gains are excluded from core operating profit and are not guaranteed future funding.

利率區間	1.20%~2.20%	0.55%~2.20%	0.45%~1.98%

本集團之短期借款未有以資產提供擔保情事。

10.長期借款

本集團長期借款明細如下：

債權人	115.6.30	利率(%)	償還期間及辦法
擔保借款			
台北富邦銀行(註)	$1,887,000	2.64%	自民國 115 年 6 月 29 日至民國 118 年 6 月 29 日，按月付息，分期償還本金。
減：一年內到期	(249,000)		
合　　計	$1,638,000		

註：子公司眾達光電股份有限公司及孫公司Pinnaclite Technologies, Inc.為進行併購案於民國一一五年六月十八日與以台北富邦商業銀行為統籌主辦銀行之聯合授信銀行團簽訂額度新臺幣2,800,000千元之聯合貸款。於民國一一五年六月三十日已動用新臺幣1,887,000千元。合約內容摘要如下：

授信期間：自首次動用日起算至屆滿三年之日止，如獲同意可展延兩年。

額度及動用方式：總授信額度為新臺幣2,800,000千元，分別以下列授信方式辦理：

A. 甲項授信：授信額度新臺幣974,000千元，需一次動用，動用授信額度金額不得超逾股份買賣合約書內容所載之台灣收購案交割款及本聯合授信案融資與收購相關費用。

B. 乙項授信：授信額度新臺幣1,826,000千元，得分兩次動用，動用授信額度金額不得超逾股份買賣合約書內容所載之大陸及泰國收購案交割款及本聯合授信案融資與收購相關費用。

PCL TECHNOLOGIES, INC.及子公司合併財務報表附註(續)
(金額除另予註明外，均以新臺幣千元為單位)

財務比率承諾：於債務清償前，借款人受有流動比率、淨金融負債比率、利息保障倍數及有形淨值之限制，與銀行團約定每半年檢核一次，並以本公司提供之經會計師查核合併財務報表為準，如未維持上述財務比率，至符合財務比率之該利息期間末日止，需按未清償餘額加碼0.20%利息按月計付予授信銀行。

強制提前清償：借款人於借款期間若有處分併購案標的公司、母公司辦理現金增資發行或私募新股、發行或私募可轉換公司債或其他任何具股權性質之有價證券，所收取之款項應依據最近一期經會計師查核簽證/核閱之合併財務報表計算之淨金融負債比率清償本聯合授信案之未清償餘額。依本合約任何條款所為之提前清償通知一經發出即不得撤回，借款人必須依之提前清償，借款人並應一併支付當期應付之利息及其他一切應付款項，且提前清償之部分不得再行動用，提前清償所有未清償餘額後，本合約即為終止。清償比例參照下表為之：

淨金融負債比率(X)	款項應償還比例
X≥2.5倍	60%
1.5倍≤X<2.5倍	30%
X<1.5倍	0%

淨金融負債比率：係指依本集團合併財務報表計算之金融負債淨額(金融負債總額(含租賃負債)-現金及約當現金)÷過去十二個月EBITDA(稅前淨利(損)+財務成本+折舊+攤銷)。為免疑義，本聯合授信案淨金融負債比率之計算應加計擬動撥金額(如適用)，且於：

(a) 本集團出具經會計師核閱之民國一一五年第三季合併財務報表前，均應以(1)本集團最近一期經會計師查核之合併財務報表之財務數據，併同(2)股份買賣合約書及依據所提供併購標的公司(品固企業股份有限公司、品基電子(東莞)有限公司、蘇州品基電子科技有限公司及Pingood (Thailand) Co., Ltd.)財務盡職調查報告所載之財務數據(金融負債總額(含租賃負債)新臺幣0千元、現金及約當現金新臺幣300,000千元及過去十二個月EBITDA新臺幣660,000千元)合併計算。

(b) 依據本集團民國一一五年第三季/民國一一五年第四季/民國一一六年第一季合併財務報表計算淨金融負債比率時，「過去十二個月EBITDA」應分別以民國一一五年第三季/民國一一五年第三季至民國一一五年第四季/民國一一五年第三季至民國一一六年第一季EBITDA數值年化計算。

Credit agreement equity-proceeds repayment tiers and its financial-ratio definition. The printed tentative-issue repayment illustration is dated; it does not establish the final September payment or the current loan balance. PCL TECHNOLOGIES, INC.及子公司合併財務報表附註(續)
(金額除另予註明外，均以新臺幣千元為單位)

於資產負債表日尚未到期之結構型商品係連結標的證券股價之票據，其設定有股價觸發價格機制，交易條件可分為：(1)股票價格若高於提前出場價格，則票據提前到期，取回本金加計固定配息，若於到期日股票價格小於履約價，除取得固定配息，本金則以履約價格轉換為持有連結標的之股票；(2)若於到期日股票價格落在合約股價區間，取回本金加上變動配息，若於到期日股票價格小於履約價，本金則以履約價格轉換為持有連結標的之股票；(3)若於到期日股票價格高於合約價格，取回本金加上變動配息，若於到期日股票價格小於履約價，本金則以履約價格轉換為持有連結標的之股票，若於到期日股票價格落在合約價格及履約價格之間，則取回本金。

遠期外匯合約

遠期外匯合約係為管理部分交易之暴險部位，但未指定為避險工具。遠期外匯合約如下：

項　　目	合約金額	合約金額(千元)	期　　間
115.6.30			
買入遠期外匯	美元兌港幣	USD10,000/HKD77,200	113年10月10日至115年10月15日
買入遠期外匯	港幣兌美元	HKD77,200/USD9,946	115年4月16日至115年10月15日
114.12.31			
買入遠期外匯	美元兌港幣	USD10,000/HKD77,430	113年5月21日至115年5月26日
買入遠期外匯	美元兌港幣	USD10,000/HKD77,400	113年5月21日至115年5月26日
買入遠期外匯	美元兌港幣	USD10,000/HKD77,200	113年10月10日至115年10月15日
114.6.30			
買入遠期外匯	美元兌港幣	USD10,000/HKD77,430	113年5月21日至115年5月26日
買入遠期外匯	美元兌港幣	USD10,000/HKD77,400	113年5月21日至115年5月26日
買入遠期外匯	美元兌港幣	USD10,000/HKD77,200	113年10月10日至115年10月15日

遠期外匯合約交易，主要係規避淨資產或淨負債之匯率變動風險，到期時有相對之現金流入或流出，且公司之營運資金亦足以支應，不致有重大之現金流量風險。

Funding feedback and operational consequences

An unpaid factory cannot sell fully funded output. Each path first meets modeled ordinary and financing obligations, then pays Malaysia project commitments only from cash above the planning reserve. Deferred commitments remain visible. Full project payment and technical acceptance are both needed before the source-style processing curve begins. Existing paid staff and available assets keep costing money through a delay.

The model tests bounded financial-asset recoveries before restricting output. It can sell a selected portion of remaining quoted assets, securities delivered against paid purchase contracts, and a limited converted-note or recovery balance. Each pool has a date, one-time availability limit and realization discount. Future scheduled note cash is reserved, and an unpaid share purchase creates no saleable stock. Transferability and actual recovery remain uncertain; a separate control removes these additional recoveries. The cash proceeds help fund the business without becoming new operating revenue or an added portfolio NAV in the target.

The cash reserve is a planning choice, not a disclosed covenant. A shortfall against that reserve is reported separately from inability to fund modeled operating and financing requirements. The model records the unfunded requirement rather than invent a new loan. An affected branch receives an explicit adverse operating-cessation outcome with a bounded closure cost. Any selected later asset recoveries serve the cash and claim bridge; no additional terminal recovery is added to the ordinary-share valuation.

Closure and debt resolution are LOW conditional outcomes rather than claims of a declared default or a legal recovery estimate. The last trade working-capital balance is not automatically collected on closure. Debt claims do not vanish when production ceases. The report shows the path probabilities, unpaid amounts and sensitivity to principal timing, funding and new-share approval.

Future share issues are conditional on a new approval, pay fees and applicable debt sweeps, and affect only subsequent window-start shares. The completed issue is already encompassed by the retained starting share proxy. The model assumes no automatic unlimited refinancing, share issuance, buyback or investment-portfolio liquidation.

PCL TECHNOLOGIES | OCTOBER 22, 2026

Analytical score, accounting and risk classes

The H1 auditor issued a qualified opinion because specified subsidiary financial statements had not been audited. The disclosed affected assets, liabilities and comprehensive-result figures have their own denominators; they cannot be described as the same percentage of group revenue. Inventory valuation is a separate key audit matter. Neither item alone establishes fraud, and neither is silently treated as a clean audit opinion.

Five scored risk classes each deduct one point: competitive pricing; factory and acquisition execution; customer concentration; balance-sheet and derivative funding; and governance and accounting visibility. AVAGO represented about 80% of H1 sales before the acquired perimeter. The post-acquisition customer mix was not located, so the old ratio is not automatically applied to the larger group.

The analytical score is 37 out of 60, rounded to 62. Core thesis receives 12 out of 20, cycle 7 out of 10, TAM 7 out of 10, catalysts 4 out of 5, macro 8 out of 10 and alpha 4 out of 5, before the five risk deductions. Qualification relationships and local source detail support the case, while concentration, financing and unverified execution constrain it. The owner's protected Excel Base remains 67. Neither score is used as a second contract probability or target haircut.

The derived analytical score falls in the framework's Fail band. The retained workbook Base is separately protected.

The sanctioned valuation method

The sanctioned method remains 25 times consolidated core operating profit in the ceiling quarter and the following three quarters, divided by the expected ordinary share proxy at the beginning of that window. The starting proxy is 92 million shares when rounded for readers. Exact shares remain in the linked calculations. New conditional financing affects only its applicable later window starts.

Interest, financial investment gains and an added investment-portfolio NAV are outside this operating-profit convention. The separate cash and financing build exposes that limitation rather than quietly substituting another valuation method. The model gives each materially different paid-capacity or cessation outcome its own operating path before applying the unchanged multiple.

The report contains eighteen forecast quarters and fifteen complete four-quarter valuation chains. The final three quarters have no unsupported ceiling because their earnings tail is not supplied. The active horizon is Q4 2027, using Q4 2027 through Q3 2028. Every model chart has a numerical table, and all reader amounts are rounded to whole TWD unless a technical input requires precision. Exact calculations remain in the model and workbook.

Expected operating case: all eighteen quarters

2030	70	601	163	158	601	163	295	(24)

PCL TECHNOLOGIES | OCTOBER 22, 2026

Pingood annual allocation and source perimeter

The source aggregate covers full calendar2026 through2030 for the acquired business. PCL group model2026 includes only the post-July consolidation period. Annual phasing, price, fixed costs, PPA and Thailand costs are research assumptions; the incomplete2026 group perimeter must not be forced to equal a full target year.

Year	Allocation sales	Compare sales	Compare OP	Joint sales	Joint OP
2026	1,350	741	376	742	376
2027	1,450	1,450	696	1,405	662
2028	1,500	1,500	714	1,443	680

Selected cost and cash controls

Control	Rounded input	Unit / scope
Legacy fixed manufacturing cash	46	TWD million per anchor quarter
Legacy variable manufacturing cash	108	TWD million per anchor activity quarter
Legacy factory depreciation	14	TWD million per anchor quarter
Legacy overhead depreciation	4	TWD million per anchor quarter
Legacy ordinary opex	72	TWD million per anchor quarter
Legacy fixed growth	400	Basis points per year
Legacy opex growth	400	Basis points per year
Pingood provisional acquired amortization	71	TWD million per year; LOW proxy
Pingood existing depreciation cash addback	20	TWD million per year; reallocated within unchanged normal manufacturing cost
Thailand new-asset life	5	Years; LOW planning proxy
Malaysia fixed manufacturing cash	66	TWD million per year
Malaysia variable cost per piece	299	TWD cents per processing piece, rounded
Malaysia annual learning increment	12	TWD cents per piece, rounded; exact source algebra retained
Acquisition interest	264	Basis points per year
Short borrowing interest	220	Basis points per year
Cash tax	2,000	Basis points of positive taxable cash proxy
Trade NWC	1,500	Basis points of annualized activity; LOW proxy
Planning cash reserve	100	TWD million; not a legal covenant
Starting share proxy	92	Million ordinary shares; later conditional issues separate

Active contribution removals under the same model

Each contribution is active minus the named same-build removal, with all related costs and funding feedback retained. These are analytical comparisons, not amounts to add again to the current target.

Component	Active TWD/share	Removal TWD/share	Contribution TWD/share
Malaysia processing	153	116	37
Acquisition amortization	153	172	(19)
Transfer overlap	153	159	(6)

Six unconstrained operating comparisons

These six cases assume scheduled project funding and are excluded from the active weighting. They explain the operating opportunity; the eighteen joint capital/operating paths determine the selected case.

How to reproduce the operating, cash and valuation build

Use the unrounded named inputs and quarterly rows in the linked model. Source images retain their original precision; reader tables round financial amounts independently. The equations below define the same current case. All forward allocations, dates, cost splits, willingness to fund and cash transferability remain research assumptions where identified.

Company receipts and operating profit

Group revenue is the sum of legacy optical and services receipts, Pingood receipts, and Malaysia processing receipts. Group gross profit is their gross profit sum. Group operating profit is gross profit less the three buckets' operating expenses. Thailand receipts are already inside Pingood, with its new factory costs included once. Financial investment gains, interest income, share sales and recovery cash add no operating revenue or operating profit.

In Q3 2026 only, Pingood receipts equal reported consolidated monthly sales less modeled legacy receipts. This fixes actual group sales in every branch while retaining estimated product allocation and profit. The pure-price controls begin in Q4, leaving that calibration intact.

Legacy activity, price and paid costs

Preprice legacy value equals Q2 actual revenue times the declared activity index. The annual price factor is one less the environment's annual price cut times years since 2026. The step is linear. Nominal transferred legacy value equals accepted Malaysia pieces at the source fee and mix times the selected overlap fraction. Removed activity equals that nominal transfer divided by Q2 legacy revenue; removed receipts equal that nominal transfer times the legacy price. Neither selling-price stress changes physical activity relief.

Legacy manufacturing variable cost equals its calibrated variable budget times net activity. Fixed cost equals the calibrated fixed budget times annual cash-cost inflation and remains paid during delay. Source Q2 cost less manufacturing depreciation, amortization and the inventory charge defines the starting manufacturing proxy; the staff floor plus a share of residual cost defines fixed cash. Gross profit subtracts fixed cash, variable cash and actual factory depreciation. Cash operating expense equals the source operating-expense total less its original depreciation and any selected future normalization, multiplied by cash-cost inflation; actual overhead depreciation is added separately.

The existing right-of-use charge is capped by remaining right-of-use book value. The other existing depreciation and amortization budget persists over this finite forecast. Factory and overhead charges share the right-of-use runoff in their source charge proportions. Cash flow adds back exactly the depreciation charged, with no additional future share-compensation addback under the paid replacement-compensation budget.

Pingood manufacturing, expense and acquired assets

Except for the hard Q3 allocation, quarterly Pingood activity value equals the declared annual allocation times quarter seasonality times the operating environment's activity factor. Receipts equal that activity value times the environment's price factor. Variable manufacturing uses the variable share of proforma manufacturing cost divided by proforma revenue, multiplied by activity value. Fixed manufacturing is its source fixed calibration less embedded existing depreciation, inflated as cash cost, plus unchanged existing depreciation. Existing target depreciation is not deducted again from normal operating profit.

Pingood operating expense contains a fixed cash-inflating share and an activity-linked share of source proforma expense. Provisional new acquisition amortization equals the selected enterprise-value allocation divided by its assumed useful life and by four. New Thailand staff and actual new-asset depreciation are manufacturing costs. No separate forecast gross-margin allowance is charged on top of the new factory staff budget.

A Thailand capital cohort contains only cash actually paid. Its depreciation begins at the later of the following quarter and the selected Q2 2027 readiness floor, then follows the assumed life. The asset-delay control shifts readiness once and keeps cash spending and staff visible. Existing-DA allocation controls reallocate the same normal manufacturing total between cash and noncash expense; any resulting funding consequence is evaluated inside the path.

Malaysia pieces, cost calibration and paid readiness

Nominal quarterly pieces and receipts follow the source annual processing plan and declared quarter weights. Technical qualification and a fully paid project determine when that curve may start. Its delay is the operating environment's qualification lag plus any lag in full project payment relative to Q1 2027. The first receipts occur no earlier than the quarter after full payment. The selected price or mix factor changes receipts while physical processing cost follows pieces.

Annual variable manufacturing cost per piece equals the difference between source 2028 and 2027 cash manufacturing costs divided by the difference in their processed pieces. Annual fixed manufacturing equals source 2027 cash cost less that variable rate times 2027 pieces. The fixed budget is annual and is divided by four, with no second adjustment for nine months. The later learning amount is the fit's 2029 cash-cost excess over source 2029 cash cost, divided by 2029 pieces. Its environment multiplier changes the later variable rate.

Malaysia gross profit equals processing receipts less fixed manufacturing, piece-linked manufacturing and actual depreciation. Operating profit also subtracts the separate startup or recurring operating budget. Planned calendar depreciation is multiplied by cumulative project cash paid at the start of the quarter divided by the full project budget, capped at one. This is a LOW paid-asset readiness proxy rather than a certified accounting schedule. Qualification failure retains paid fixed staff, available assets and operating costs.

Cash conversion, tax and working capital

Cash flow from operations equals path operating profit less cash interest and cash tax, plus exactly its noncash depreciation and provisional acquisition amortization, less the change in modeled trade working capital. Cash tax is the selected rate times the positive part of operating profit plus incremental acquisition amortization less interest. The active plan assumes no new PPA tax deduction; the separate full-deduction control removes that tax addback. No loss refund or deferred-tax cash receipt is invented.

Target trade working capital equals the selected share of annualized quarterly receipts. Opening legacy and acquired trade balances are explicit proxies. The acquired opening balance is already inside the known acquisition-price perimeter and is not paid a second time. On cessation the last trade balance is retained unrecovered. Investment gains and hypothetical redemption income do not fill ordinary cash flow.

Opening cash includes unrestricted cash plus the identified acquisition reserve, with the reserve released only against the completed acquisition use. The selected additional draw uses the signed facility limit without claiming an actual draw. Completed issue cash is gross proceeds less estimated fees. Actual acquisition cash, dividend and settlement-payable uses, requested share purchases, maintenance and factory cash budgets remain separate. Internal group transfers create no new consolidated money.

Debt, interest and conditional new shares

Acquisition principal starts with the reported draw plus any selected subsequent draw. The LOW ordinary principal calendar has seven installments from Q3 2027 through Q1 2029, with a remaining June 2029 balloon. Proceeds sweeps reduce the earliest outstanding calendar buckets first. Actual principal payment reduces both the bank balance and any tagged overdue subset once. An unpaid amount remains a claim rather than a fictitious new loan. Short-term and lease principal have their own stock and payment ledgers.

Interest uses opening principal and the declared partial-quarter treatment of the selected initial draw. The orderly capital history alone can extend half the residual maturity with assumed consent; other histories owe the residual at maturity. Future equity requires a new assumed approval, pays issue fees and its applicable proceeds sweep, and changes the next quarter's starting share proxy. No future issue or ordinary growth capex is assumed after the selected absorbing cessation.

Finite asset recoveries and the cash waterfall

Additional old quoted-asset eligibility is a once-set fraction of original candidate book remaining after the upfront sale. Newly delivered stock eligibility is a once-set fraction of each actually paid purchase cohort, available only from its next quarter. Converted-note eligibility is a once-set fraction of June book less all scheduled selected cash redemptions; future scheduled cash remains reserved. Each pool tracks book allowance, disposed book, realized cash and residual assets. Book sold times the selected realization factor gives cash. The book-to-cash loss belongs to the nonoperating investment bridge and is not charged twice to operating profit.

Before the payment waterfall, limited eligible assets may be sold only for the current cash gap, in the order old quoted assets, new delivered securities, then converted-note residual. The gap includes due operating and financing needs, arrears, currently due project cash and the planning reserve. No sale exceeds the eligible unsold allowance. After cessation, deferred project cash is disclosed separately and excluded from the recovery-sale gap because the selected path has no restart or new project spending.

Cash first meets current ordinary operating and selected contractual uses, with actual share-purchase payment recorded separately. It then addresses prior nonprincipal arrears, lease, short-term and acquisition principal, current maintenance, Thailand cash, and finally Malaysia cash above the planning reserve. Within each principal class, old arrears precede current amounts. Only paid share purchases create a new security cohort, and only paid Thailand cash creates an asset cohort. Unpaid requirements remain visible with their legal or analytical scope labels.

Malaysia project cash payment is capped by cumulative due unpaid project cash and residual cash above the reserve. Deferred project cash remains visible. A path unable to fund non-project operating or financing requirements enters the selected adverse cessation in the following quarter. Its first closure quarter retains a bounded staff and fixed-cost budget plus noncash charges; later receipts and recurring production cash costs cease while existing noncash charges and claims remain. This is a LOW conditional operating boundary, not a legal insolvency finding or a measured default frequency.

PCL TECHNOLOGIES | CURRENT MODEL EQUATIONS

Joint weighting and complete valuation chains

Each joint probability is its operating-environment weight times the conditional qualification or failure weight times its capital-history weight. The correlation control changes conditional capital weights while retaining the same marginal capital weights. Cash minima, taxes, asset caps, payment limits, unpaid amounts, cessation and running peak funding need are calculated within each path before probability weighting.

Expected quarterly revenue, gross profit, operating expense and core operating profit are the sums of path values times path probabilities. Expected margins divide expected profit by expected receipts; they are not averages of path margins. External need is unpaid nonproject requirement plus any planning-reserve shortfall. Deferred project cash is shown separately, with a second total need measure including that deferred cash. Positive cash in another path cannot cancel a path's need before weighting.

For each of fifteen complete windows, add the expected operating profit in the start quarter and following three quarters. Multiply by 25 and divide by the probability-weighted ordinary-share proxy at that window's start, with unit factor one. The last three forecast quarters have no unsupported ceiling. The protected Excel

Base is neither a contract probability nor a second valuation haircut. No financial-asset NAV, general AI spending wallet or additional multiple rerating enters this method.

PCL TECHNOLOGIES | OCTOBER 22, 2026

Conditional path appendix: scope of the cash panels

Every path shows all eighteen operating quarters and its complete manufacturing, operating and funding costs. Overdue bank and lease figures are tagged subsets of outstanding claims and total unpaid obligations; do not add them twice. Deferred project commitments and the planning-reserve gap have separate scopes. Asset book sold and cash received are different measures; only cash received enters funding. Disposal losses remain below core OP. No ordinary-share recovery or extra investment NAV is added to the operating ceiling.

PCL TECHNOLOGIES | OCTOBER 22, 2026

Joint path: slower acceptance accepted orderly redemptions

Path probability 5%. Full project paid: Q1 2027. Production cessation: None in modeled window. These are conditional model states, not declared company defaults.

Management and financial-source completeness

Source area	Observed coverage / remaining gap
Latest financial source	H1 2026; later reported monthly sales do not establish quarterly profit
Latest located formal presentations	December9,2025 and December3,2024; full prepared English decks read
Original audio and spoken Q&A	Not verified through closing; unlisted events not ruled out
Acquired Q3 profit and purchase accounting	Not disclosed in the located sources; model allocations and charges are explicit assumptions
Malaysia commissioning and acceptance	Source plans retained; actual accepted-good production and billed processing evidence remain gaps
Financing and derivative settlement	Actual current principal/repayment and remaining share deliveries are not verified by the dated inventory

Cross-book implications and decision triggers

Higher AI optical demand can help multiple suppliers while paying for different content. Laser makers provide the light source, PCL processes selected customer-owned material, and module assemblers package larger systems. A budget already captured in one activity cannot be added again as a second wallet. SpaceX's compute plans strengthen the broad demand context without proving a separate PCL order.

The next decisive evidence is acquired Q3 operating profit and cash conversion; the final acquisition allocation; accepted and paid Malaysia equipment; customer qualification; actual billed processing pieces and fees; and a current loan, investment and derivative settlement bridge. These disclosures can move the model in either direction without changing the preserved valuation multiple.

Strong source-year margins at Pingood and successful processing acceptance would support higher operating outcomes. Weak acquired cash conversion, a larger amortization charge, lower realized fees, extra transferred legacy sales or restricted funding would reduce them. An official confirmation is useful evidence, while a credible earlier breadcrumb can still receive an explicit bounded probability and company bridge.
