AMEC / 中微公司 - qualified platforms and funded expansion

Research cutoff: October 24, 2026. AMEC is a bottleneck challenger with an established etch qualification base and a widening set of film, compound-semiconductor, CMP and metrology products. Recipe integration, switching costs and intellectual property support its position; several capable incumbent and domestic alternatives remain.

The selected growth path already recognizes localization and new process opportunities. Customer acceptance, paid engineering, factory readiness and usable funding determine how much of that opportunity becomes parent-economic operating profit. The active Q4 2027 ceiling is CNY 82.64 per share under the protected 20-times next-four-quarter method.

The current modeled ceiling of CNY 82.64 is approximately 0.31 times the dated CNY 266.70 quote. Strong process growth is already counted in this estimate, and the quote exceeds the model value. Model and source uncertainty remain substantial; this comparison is neither a guaranteed future price nor a trade instruction.

Analytical quality is 46/60, rounded to 77. The protected Excel Base remains 82. Saved portfolio status is unmarked: the source holding cell is genuinely blank, which does not establish a current brokerage holding.

H1 2026 is the latest reported actual. Q3 2026 is a completed-quarter model estimate; no Q3 filing or preliminary result was available in the complete current announcement inventory. A future filing is the next actual reconciliation anchor.

T00 · Private current context

Measure	Value	Scope
Dated close	266.70	CNY/share; October 23, 2026 daily close, retrieved October 24. Daily bar timestamp is not the exact closing trade time.
Active horizon	Q4 2027	Q4 2027 + Q1 2028 + Q2 2028 + Q3 2028
Modeled ceiling	82.64	CNY/share; conditional model result
Forward shares	981.76	Million gross reserved shares; independent quarter owner
H1 reported shares	957.842348 million	June financial statement count; June/July matching-share registration dating conflict remains.
Market-cap proxy	255.46	CNY billions; October 23 quote x June BS reported share count. Mixed-date reported-share proxy; current registered shares are unverified and the June/July registration-date conflict remains.
Saved portfolio rank	230 of 245	Actual saved master, verified by Root; portfolio ordering context, separate from company financial law.
Analytical quality	77.00	46/60 rounded; separate from financial multiplication
Protected Excel Base	82.00	82 retained as the portfolio convention

Navigation: the main chapters present the company, source stages, demand, resource constraints, costs, cash, probabilities, valuation and risk. The appendices retain complete quarter schedules, financial inputs, captured programme diagnostics and original financial-statement rows. Major sections have PDF bookmarks and HTML navigation.

Business and process wallets

The six modeled vectors are etch, thin film, EPI/compound equipment, CMP, metrology and support/other. Advanced-packaging etch and film are separate bottom-up unit hypotheses inside the etch and film vectors. They use a separate eligible budget from silicon front-end WFE. Mo and InP have their own live owners inside film and EPI.

Established CCP and ICP products serve logic, DRAM, 3D NAND, power and MEMS processes. W and several TiN applications have customer validation and repeat production orders. New product variants preserve their own qualification requirements. An installed process recipe can raise switching friction while price, throughput, uniformity, yield, spare availability and customer integration still determine a win.

The product catalogue includes mature and developing models. Goals covering equipment categories representing 60% of front-end and 70% of packaging markets describe category reach. They do not establish corporate market share. More than 8,800 cumulative reaction stations across 220 lines and about 800 stations delivered to an overseas advanced-logic customer are installed/delivered credentials, with undisclosed annual recognition and mix.

V01 · The issuer product-family map spans CCP/ICP etch, film, EPI, CMP, MOCVD, display and metrology. Its inclusion of a model does not prove accepted revenue for that model. Source: https://static.amec-inc.com/uploads/20261022/6ad9cc45d2dac.jpg | 2026-10-14 | Original issuer/industry image in dated article | Stage: Issuer catalogue, October 2026; mixed maturity | Original SHA-256: c5addece17a15b8ec3ab3e2e223bee4bf6b5f1b1d641ac65bb143b9e3153cf57

T01 · Source stage boundaries

Programme	Available evidence	Next economic test
CCP / ICP	Mature production; XD Beta validation; several ICP families have repeat orders.	Accepted process mix, pricing, throughput and repeat receipts.
Domingo	First AMEC-model unit shipped on October 22.	Customer acceptance and repeat units; price and award quantity remain unknown.
Non-Mo film / Mo	W/TiN qualification differs from newly released ALD-Mo and dielectric platforms.	Separate chemistry qualification and paid ramp.
EPI / compound / InP	LED and several compound tools have repeat orders; advanced EPI validation; InP laboratory development/planned samples.	Qualified customer production and accepted unit receipts.
CMP / metrology	Acquired CMP seller references and separate metrology ramp assumptions.	Entity cost, delivery and acceptance before parent attribution.
AP etch / film	TSV repeat orders coexist with dicing/PVD development or validation.	Eligible packaging process wallet and model-specific qualification.

报告期内重点任务完成情况

报告期内，公司在研发创新、知识产权体系建设、生产经营、外延式生长等方面取得了积极成果：

1、产品研发及客户拓展方面

公司坚持自主创新，产品布局及技术研发面向世界科技前沿。报告期内，公司继续保持较高的研发投入，与国内外一流客户保持紧密合作，相关设备产品研发进展顺利、客户端验证情况良好，在部分关键客户市场占有率稳步提升。2026 年上半年公司研发投入约 20.41 亿元，同比增加约 5.50 亿元（增长约 36.86%），2026 年上半年研发投入占公司营业收入比例约为 30.51%。公司目前在研项目涵盖六大类设备，包含多个关键制程工艺的核心设备开发。

公司积极参与有影响力的市场活动，不断强化公司技术和品牌优势。报告期内，公司发挥产品性能、技术及销售服务竞争优势，持续深化同海内外客户的业务合作，以更好的市场形象和更专业的服务为客户提供产品解决方案。在持续改善量产机台的运行时间和生产效率的同时，研发团队和客户紧密合作，进行更多的关键制程工艺开发和验证，进一步提高产品的技术先进性和市场竞争力，拓宽机台的生产能力并赢得更多的量产机会。

公司主要产品的进展情况如下：

（1）CCP 刻蚀设备

公司 CCP 刻蚀设备中双反应台 Primo D-RIE、Primo AD-RIE、Primo AD-RIE-e，单反台 Primo HD-RIE 等产品已广泛应用于国内外一线客户的生产线。持续推进用于高深刻比刻蚀的 Primo UD-RIE 设备的迭代，不断拓展应用场景，有效提高了该系列设备的工艺覆盖范围。同时，公司积极开拓晶圆及先进封装及超透镜等领域，持续推进产品在多个客户端的验证，顺利取得重复订单。

公司针对超高深宽比刻蚀工艺，开发了全新的 Primo XD-RIE。该设备采用全新腔体结构设计，适用于高腐蚀性气体和超低温刻蚀工艺，刻蚀工艺显著减少碳氟气体使用，刻蚀效率较上一代产品提升明显。该设备还具备国内首创镜像磁场等离子体调节功能及等离子体边缘鞘层主动调节功能，可以更有效地改善深孔的刻蚀形貌，提高设备的生产稳定性。目前，Primo XD-RIE 的 Alpha 机已完成实验室马拉松测试，Beta 机在客户端验证顺利。针对更加先进的 7 纳米及以下的逻辑器件生产中所需要的更高选择比和均匀度的接触孔，通孔以及金属掩膜大马士革工艺，开发的全新的高选择比高均匀度刻蚀设备，在实验室开展多个客户工艺开发，测试与迭代工作稳步推进，预计 2026 年内，运付客户端进行工艺验证。

此外，公司持续开展先进射频技术的研究，探索新的反应方式，通过多维度技术攻关，持续夯实技术储备，强化产品差异化竞争力。

（2）ICP 刻蚀设备

V02 · H1 distinguishes established CCP production from XD-RIE Beta customer validation. Mature-family evidence does not qualify every new variant. Source: https://static.cninfo.com.cn/finalpage/2026-08-20/1225482884.PDF | 2026-08-20 | Physical PDF page 15 | Stage: H1 2026 product disclosure | Original SHA-256: 182e2062fed950cd32310099cdf47f392c791440ce251f5e3bab7137dbc932fe

New products, competition and acceptance

The October 22 first Domingo shipment advances the H1 Alpha laboratory stage. Its customer is unnamed, and the announcement supplies no acceptance, recognized revenue, price or multi-unit award. Lam introduced the Argos/Prevos/Selis selective-etch suite in 2022. The first-unit wording belongs to AMEC’s Domingo model and does not establish worldwide invention of selective etch.

The September 1 six-product launch and October references to XD-RIE and ALD-Mo share the same launch signal. The new devices extend process capability, while a repeated event does not create a second customer budget. Technical wafer positions, process aspect ratios and configuration limits remain separate from annual factory output.

Competitors include process-specific platforms from Lam, Applied Materials, TEL and domestic suppliers such as NAURA. Applied’s June 2026 release includes SiN ALD and selective Mo etch. Mo etch and Mo ALD occupy different process steps, so adjacent competition evidence requires a chemistry-specific reading. Primary release text is available, while the direct Applied PDF download was blocked.

报告期内，公司的 ICP 刻蚀设备包括 Primo Twin-Star、Primo Nanova、Primo Menova 等产品在涵盖逻辑、DRAM、3D NAND、功率和电源管理、以及微电机系统等芯片和器件的 50 多个客户的生产线上量产，并继续验证更多 ICP 刻蚀工艺。

报告期内，公司低温高深宽比 ICP 刻蚀设备 Primo Nanova LUX-Cryo 在客户的下一代产品的产线上稳定量产。与此同时，为应对先进节点高深宽比挑战，公司研发的下一代高精度 ICP 刻蚀设备的 Primo Angnova 在实验室开展多个客户的工艺验证，全面满足客户的刻蚀需求，Beta 机器在客户端认证顺利，并取得多个重复订单。Primo Twin-Star 装机量快速增长，在海内外客户的逻辑芯片、功率器件、微型发光二极管 Micro-LED、AR 和 VR 智能眼镜用的超透镜（Metalens）等特色器件的产线上实现量产。公司的 Primo Menova 金属刻蚀设备，在客户端认证顺利，已投入量产。

公司开发的高选择比气相刻蚀设备 Primo Domingo，在实验室的 Alpha 腔上开展多个工艺验证，全面满足客户的刻蚀需求。

报告期内，公司 ICP 刻蚀设备类中的 8 英寸 Primo TSV 2G 200E 和 12 英寸深硅刻蚀设备 Primo TSV 2G 在晶圆级先进封装、2.5D 封装和微机电系统芯片生产线等成熟市场继续获得重复订单的同时，在 12 英寸的 3D 芯片的硅通孔刻蚀工艺上得到成功验证，并在欧洲客户 12 英寸微机电系统芯片产线上获得认证的机会，这些新工艺的验证为公司 Primo TSV 2G 刻蚀设备拓展了新的市场。与此同时，公司针对更高金属污染和颗粒物控制要求等技术需求的第三代硅通孔刻蚀机 Primo TSV 3G，取得 BVR 和 0.15s Bosch 工艺验证成功。

此外，报告期内，公司根据客户和市场技术发展需求，继续推进包括方波技术，ALE 技术和 ALD 技术在 ICP 等离子体刻蚀设备上的应用研发，为未来推出更多的 ICP 刻蚀设备做技术储备，以满足三维逻辑、三维 DRAM 和更多堆叠的 3D NAND 存储等芯片制造对更先进 ICP 刻蚀设备的持续需求。

（3）薄膜沉积设备研发

公司开发的多款薄膜沉积产品已推向市场。中微公司钨系列薄膜沉积产品：CVD（化学气相沉积）钨设备，HAR（高深宽比）钨设备和 ALD（原子层沉积）钨设备，可覆盖存储器件所有钨应用；该系列设备均已通过关键存储客户端现场验证，满足先进存储应用中所有金属互连应用（包含高深宽比金属互连应用）及三维存储器件字线应用各项性能指标，并获得客户重复量产订单。同时，公司钨系列产品也可满足先进逻辑器件中多道金属钨互连应用需求，已通过关键逻辑客户端现场验证，满足先进逻辑应用中各项性能指标，已获得客户重复量产订单。此外，公司钨系列产品也通过了特殊器件客户金属钨应用现场验证。基于公司钨系列产品独特的性能优势，已顺利完成先进逻辑、先进存储和特殊器件的现场验证，未来将进一步扩大市场占有率。

同期，公司开发出应用于先进逻辑器件的金属栅系列产品 Preforma Uniflash ® ALD 氮化钛，ALD 钛铝，ALD 氮化钽产品，已完成多个先进逻辑客户设备验证，可满足先进逻辑客户性能需

V03 · H1 reports Domingo Alpha laboratory work, mature ICP usage, Angnova Beta/repeat orders and W deposition validations. These are separate stages within the product portfolio. Source: https://static.cninfo.com.cn/finalpage/2026-08-20/1225482884.PDF | 2026-08-20 | Physical PDF page 16 | Stage: H1 2026; customer qualification varies | Original SHA-256: 182e2062fed950cd32310099cdf47f392c791440ce251f5e3bab7137dbc932fe

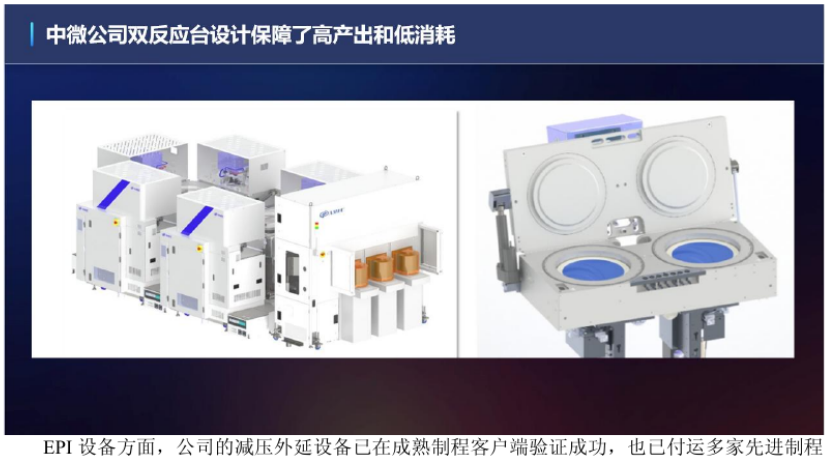

V04 · Original issuer rendering accompanying the October 22 first shipment. The rendering does not establish customer acceptance or revenue. Source: https://static.amec-inc.com/uploads/20261022/6ad9caf47f3a1.png | 2026-10-22 | Original issuer/industry image in dated article | Stage: First shipped AMEC-model unit | Original SHA-256: cce2d961a1035fbc9096bfd587fbb3753c8ffff280e914ee6b0dc964f3349b9b

求的同时，设备的薄膜均一性，污染物控制和生产效率均达到世界先进水平。该系列设备已付运到多个先进逻辑客户端进行验证，已顺利通过客户现场验证。其中，ALD 氮化钛薄膜也可运用于先进存储器件中钨填充阻挡层和粘结层、先进存储及先进封装中的电容器极板等关键应用场景，公司开发的 ALD 氮化钛设备可满足高深宽比及三维结构的台阶覆盖率需求及各项性能指标，并已交付多个关键客户进行现场验证，有利于进一步扩大市场规模。

针对先进逻辑、先进存储器件的高选择比、低电阻金属-半导体接触层需求，公司推出了金属硅化物集成系统 Preforma Uniflash ®，包含原位高选择性前清洁产品 SA & SU，等离子体增强化学气相沉积金属钛 SPTi，和原子层沉积氮化钛 ALD TiN^{M} 产品。该系列产品已交付多个先进逻辑、先进存储客户，现场验证顺利推进，能够满足客户各项性能需求的同时，实现高生产效率。中微公司金属硅化物集成系统适配先进逻辑器件中的源漏接触层，背部供电接触层及三维存储器件中的源漏接触层等关键应用场景，可以在小尺寸、高深宽比的复杂结构中实现高质量填充，在金属薄膜沉积领域中扩展了全新的市场版图，将为中微公司的持续高速增长提供更充足的空间。

公司的薄膜沉积设备采用独特的双腔设计，每个腔体可独立进行工艺调节，保证产品性能的同时，大大提高了生产效率，降低了材料成本。此外，中微独立自主的 IP 设计，确保了更优化的产品性能，也保障了产品未来的可持续发展。

EPI 设备方面，公司的减压外延设备已在成熟制程客户端验证成功，也已付运多家先进制程客户端，部分先进工艺已进入量产验证阶段；常压外延设备现已完成开发，进入晶圆验证阶段。

（4）MOCVD 设备

报告期内，公司用于蓝光照明的 PRISMO A7、用于深紫外 LED 的 PRISMO HiT3、用于 Mini-LED 显示的 PRISMO UniMax 等产品持续服务客户。截止 2025 年，公司持续保持国际氮化镓基

V05 · Metal-gate/TiN, integrated Ti/TiN and EPI evidence has different field-validation stages. Integrated preclean and deposition remain one customer process wallet. Source: https://static.cninfo.com.cn/finalpage/2026-08-20/1225482884.PDF | 2026-08-20 | Physical PDF page 17 | Stage: H1 2026; mature and early variants | Original SHA-256: 182e2062fed950cd32310099cdf47f392c791440ce251f5e3bab7137dbc932fe

MOCVD 设备市场领先地位。其中 PRISMO UniMax 产品自 2021 年 6 月正式发布以来，凭借其高产量、高波长均匀性、高良率等优点，受到下游客户的广泛认可，在 Mini-LED 显示外延片生产设备领域处于国际领先。

公司于 2023 年底付运 Micro-LED 应用的设备样机 Preciomo Udx 至国内领先客户开展生产验证。报告期内样机验证进展顺利，其性能与可靠性已满足客户产线要求，并获得客户的重复订单。同时，公司正进一步推进该新产品在 Micro-LED 市场的应用拓展与推广。

随着电动汽车、消费电子、人工智能、风力与光伏储能和轨道交通等应用的快速发展，市场对氮化镓和碳化硅功率器件的需求呈现爆发式增长。公司已经建立了氮化镓 LED 外延装备的优势，在此基础上，进一步研发了面向硅基氮化镓异质外延功率器件的专用设备。于 2022 年推出了用于氮化镓功率器件生产应用的 MOCVD 设备 PRISMO PD5，目前已交付客户进行生产验证，并取得了重复订单。除此之外，公司正开发新一代氮化镓功率器件应用的 MOCVD 设备，将进一步提升设备性能，降低客户生产成本；报告期内，公司已付运新型氮化镓功率器件应用 MOCVD 设备至领先客户端开展生产验证。

公司也启动了应用于碳化硅功率器件外延生产设备的开发，报告期内，公司持续提升优化该设备的工艺性能，并与多家行业领先客户开展技术对接和商务洽谈。目前，该新型 8 寸碳化硅外延设备已进入国内头部企业进行生产验证，并取得了重复订单。

此外，公司紧跟市场发展趋势，积极拓展 MOCVD 设备的应用范围，进一步推进应用于红黄光 LED 的 MOCVD 设备开发，实验室已实现了优良的 LED 波长均匀性能。报告期内，公司已付运红黄光 LED 应用的设备样机至国内领先客户开展生产验证，目前样机验证进展顺利。针对光通讯等新兴应用需求，公司积极与行业领先客户开展合作，于报告期内启动磷化铟（InP）材料体系专用 MOCVD 设备的开发，实验室已取得良好进展。下半年将结合客户反馈意见，加快产品开发，尽早付运样机至客户端开展生产验证。

（5）先进封装相关设备

报告期内，公司用于 2.5D、SoIC WoW 及高深宽比深槽电容刻蚀的 Primo TSV 300E 产品持续服务客户，并获得重复订单。公司用于先进封装等离子体切割的 Primo Matrix 即将发往国内头部客户产线验证。同时，先进封装所用的第三代 TSV 刻蚀机研发顺利，获得优良的工艺结果，并且已得到多家客户订单，即将发往客户端验证。

此外，先进封装所用的 TSV CuBS PVD 集成设备开发顺利，报告期内得到了优良的工艺结果，正与多家领先客户开展商务洽谈。同时，公司已启动 UBM PVD 集成设备研发，进一步完善先进封装平台化产品布局。

（6）气体净化设备

V06 · MOCVD, compound and packaging products retain individual development, validation, order and delivery stages. Generic TSV applications do not establish a named HBM award. Source: https://static.cninfo.com.cn/finalpage/2026-08-20/1225482884.PDF | 2026-08-20 | Physical PDF page 18 | Stage: H1 2026 stage disclosure | Original SHA-256: 182e2062fed950cd32310099cdf47f392c791440ce251f5e3bab7137dbc932fe

Addressable demand and the China process bridge

The forecast uses the current framework's China WFE series as the regional starting pool. Etch and film fractions are non-overlapping categories of that pool. Domestic access, AMEC capture and shipment/acceptance recognition then govern the modeled receipts. The same regional spending cannot also be counted as a separate global or application increment.

The public SEMI July OEM forecast and October 300mm fab-equipment outlook have different scopes and vintages. July describes global OEM sales including mask/reticle and fab facilities within WFE; October is bottom-up 300mm fab-equipment spending, with construction separate. Neither public article supplied exact China 2027-2028 figures reconciling the framework's attributed MS July series. The underlying MS report was not recovered.

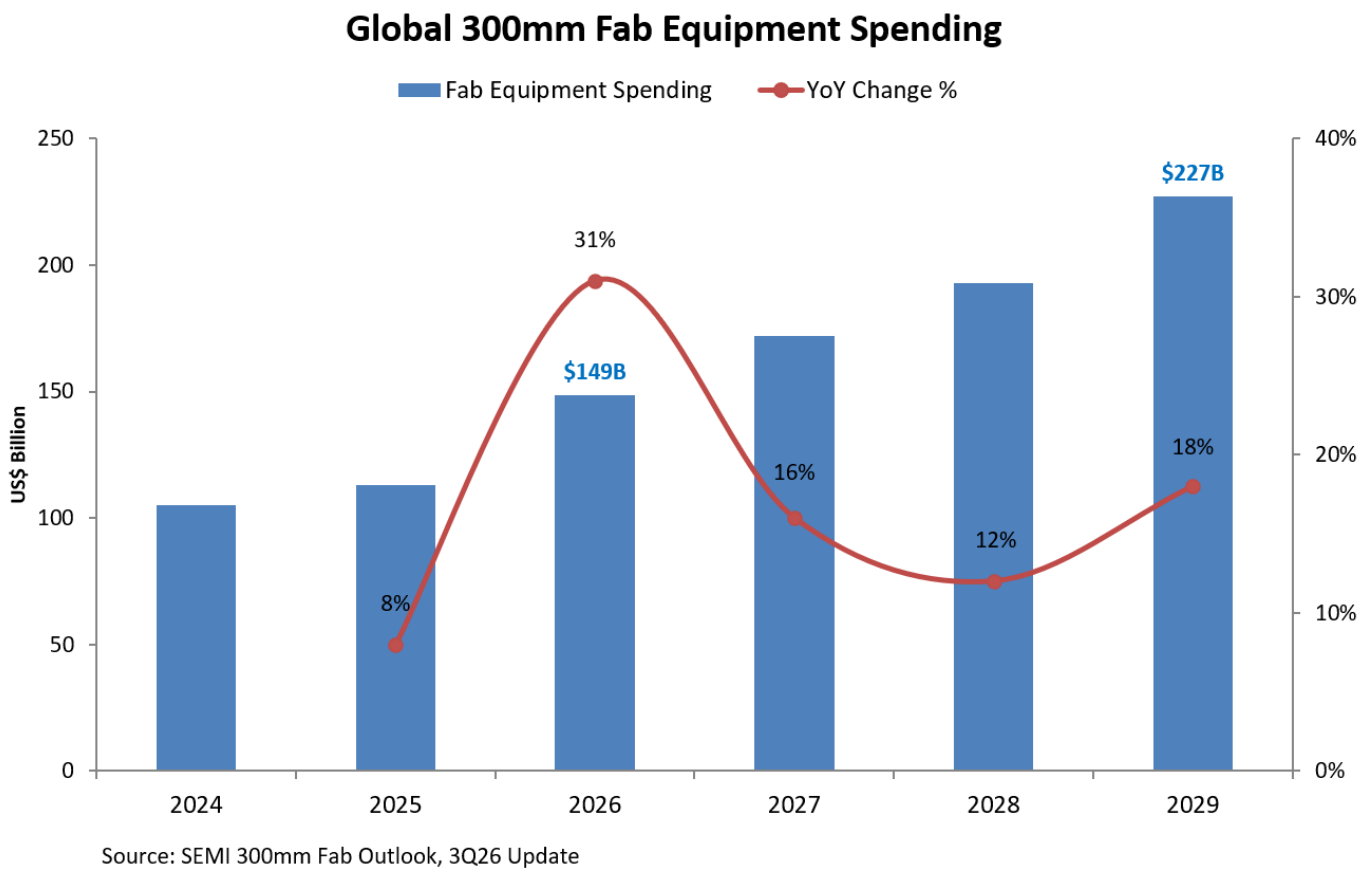

SMIC's USD 8.1B FY2025 capital expenditure and roughly flat 2026 guide, H1 cash asset purchases of CNY 19.725B, and CXMT H1 cash asset purchases of CNY 21.594B provide customer-budget context. These broad figures include assets and vendors outside AMEC's eligible process wallet. Earnings growth at a memory manufacturer does not establish a supplier award.

Advanced packaging uses separately owned eligible unit/ASP hypotheses. Compound/LED demand has its own proxy rather than automatic scaling by silicon WFE. All future process fractions, accessible localization, capture, recognition and unit/ASP values remain LOW modeling assumptions.

T02 · Regional WFE and process fractions

Year	China WFE USD B	Etch fraction	Film fraction
2,026	48.7000	30.00%	28.00%
2,027	57.9000	30.00%	28.00%
2,028	68.2000	31.00%	28.00%
2,029	75.0200	32.00%	28.00%
2,030	81.0216	32.00%	28.00%

2026-2028: framework DB12 attributed MS July prior. 2029 +10% and 2030 +8% are Root extensions. No raw global SEMI series is added.

V07 · SEMI's October global 300mm fab-equipment forecast labels USD149B in 2026 and USD227B in 2029. Intermediate growth rates are rounded; the chart is neither China WFE nor AMEC revenue. Source: https://www.semi.org.cn/site//file/2026-10/8a162842cb004e28927ff2ef1ec976d5@wm.png | 2026-10-14 | Original issuer/industry image in dated article | Stage: Industry forecast; scope differs from OEM WFE | Original SHA-256: ab850a72ad4cb47aa0e398470225cd97928e89521f9d337aee64b3c2c9020621

Semiconductor Equipment Market Revenue by Region

(U.S. Dollars in Billions)

Region	2Q 2026	1Q 2026	2Q 2025	2Q (QoQ)	2Q (YoY)
Europe	$1.23	$0.95	$0.72	30%	70%
Japan	$2.44	$2.16	$2.68	13%	-9%
North America	$3.50	$3.28	$2.76	7%	27%
Korea	$9.08	$8.93	$5.91	2%	54%
Taiwan	$10.89	$8.77	$8.77	24%	24%
China	$11.91	$10.99	$11.36	8%	5%
Rest of the World	$1.47	$1.48	$0.87	-1%	69%
Total	**$40.53**	**$36.55**	**$33.07**	**11%**	**23%**

Sources: SEMI (www.semi.org) and SEAJ (www.seaj.or.jp), September 2026
Note: Summed subtotals may not equal the total due to rounding.

V08 · SEMI/SEAJ September table shows Q2 2026 all-equipment billings: China USD11.91B and global USD40.53B. This is broader than front-end WFE and is the same event as the Chinese chart. Source: https://www.semi.org/sites/semi.org/files/styles/webp/public/inline-images/image_1003.png.webp?itok=e4YPjVYF | 2026-09-04 | Original issuer/industry image in dated article | Stage: Industry actual billings, not supplier awards | Original SHA-256: beff7caf235a23f461a283abd73bcd9e8a1cfe5a7ed1d8ff3af4d4b8c87d3202

Production, engineering and source units

FY2025 reports 1,660 chambers produced, 1,240 sold and 1,010 in inventory. Dedicated-equipment revenue was CNY10.527B. The implied mixed revenue per sold chamber is used as a normalization only. It is neither a complete-tool ASP nor official capacity. The disclosed growth rates do not reconcile to a simple opening-stock plus production minus sales ledger, leaving stock-scope and timing gaps.

AMEC primarily builds to order and prebuilds some modules. Long-lead parts, quality and supplier qualification, terminal testing, customer commissioning and preventive maintenance all consume working capital and skilled support. H1 full R&D investment was CNY2.041B, including CNY1.353B expensed investment and CNY0.689B capitalized investment. Its 1,908 R&D staff represented 51.85% of employees.

The plan for102 devices and about CNY13B R&D over3-5 years overlaps the existing group research budget. The model treats that amount as a floor/subset, with a selected start and case-specific duration. It is not another CNY13B expense above the modeled base or a source-proven legal payment obligation. Shared technology/reuse can reduce duplication, while product-specific qualification remains cost-bearing.

用于 Mini-LED 生产的 MOCVD 设备 PRISMO UniMax，具有行业领先的高产能和高灵活性的特点，在同一系统中可配备多达 4 个反应腔，每个反应腔都可实现独立控制。PRISMO UniMax 配置了 785mm 大直径石墨托盘，可实现同时加工 164 片 4 英寸或 72 片 6 英寸外延晶片，有效提高产能并降低生产成本；创新的多区辅助加热调节系统，能精确控制托盘局部区域温度，有助于更大程度上提升 LED 波长均匀性。PRISMO UniMax 已在领先客户端开始进行规模化生产，助力公司在全球氮化镓基 LED MOCVD 市场中持续占据领先地位。

用于硅基氮化镓功率器件用 MOCVD 设备 PRISMO PD5，具有高灵活性的特点，在同一系统中可配备多达 4 个反应腔，每个反应腔都可实现独立控制，仅通过更换石墨托盘即可实现 6 英寸与 8 英寸工艺的便捷切换，PRISMO PD5 设备已在客户生产线上验证通过并获得重复订单。

用于 Micro-LED 生产的 MOCVD 设备 Preciomo Udx，具有高度生产灵活性，在同一系统中最多可配置两个反应腔，每个反应腔可以独立控制，可同时加工 18 片 6 英寸或者 12 片 8 英寸高性能氮化镓基蓝绿光 Micro-LED 外延晶片。系统配置了自主开发的基于模型的温控系统，具有优异的波长均匀性和产出稳定性等优势；设备集成了腔内原位清洁功能，实现长周期免维护连续运行，结合业界领先的片盒到片盒自动化生产模式，有效降低了 Micro-LED 外延片的颗粒缺陷数。Preciomo Udx 已在领先客户生产线上验证通过并获得重复订单。

Sites, paid capital and readiness

Current production bases at Jinqiao, Lingang I and Nanchang and approximately600,000sqm of building area provide operating context. Guangzhou and Chengdu were planned for H1 2027 operation. Lingang II is proposed at CNY3.5B total investment, including1.7B fixed assets and1,500-2,000 personnel. Its mature CNY3B locally attributable sales goal is a plan, with no reported annual chamber nameplate or firm commercial first-receipt date.

The completed industrialization base is distinct from HQ/R&D fitout. The former completed in August2026; the latter has partial use and a latest full-availability goal of December2027. The model applies explicit conditional partial/full dates. Partial-floor percentages and delayed-case dates remain LOW assumptions.

The Guangzhou EIA's12 Gen8.6 PECVD and3 etch systems per year concern display/panel equipment. Those15 systems contribute no new silicon300mm capacity. Source book CIP of CNY105.032M selected from Chengdu and Lingang I is an eligible readiness proxy, with unknown exact function and paid composition. Known opening capital AP is settled inside the capex budget and creates no second asset.

Modeled productive readiness is separate from book availability. Core receipt capacity rises only through eligible commissioned capital, with HQ, target-CMP-project, display and other allocations kept distinct. The resulting mixed-chamber revenue equivalents, reinvestment intensity and current-quarter productive-readiness factors remain LOW financial proxies. New generic book assets use finite one/two-quarter lags, while HQ and CMP projects follow selected project-specific availability.

子公司中微惠创利用分子筛的吸附原理的化学反应器，开发制造了工业用大型净化设备。设备可根据客户的要求灵活配置不同处理规模的系统，提供给客户可靠、稳定、安全和节能的净化解决方案。中微惠创与德国 DAS 环境专家有限公司签订战略合作协议后，双方秉承协议内容按计划实施，在半导体行业尾气处理设备领域展开紧密的合作，目前已经生产制造的净化设备顺利地应用在各个客户端，共同推动环保科技行业的发展。此外，中微惠创还在积极探索新能源领域的相关研究。

（7）分布式生态工业互联网平台

子公司中微汇链基于多年来在中微公司沉淀的业务管理经验以及在高科技制造领域多家企业的数字化服务实践经验，研发和推广数字化运营体系及产品，专注服务以集成电路为代表的高科技制造行业与行业内企业。

汇链推出的“We”系列数字化产品为提升企业从研发、制造，到质量、售后的管理能力，助力企业融入产业生态，为高科技制造产业打造企业间协同互信、资源共享的生态型平台 We-Linkin。目前，中微汇链产品已涵盖超 80 个场景应用、超 900 项微服务功能。

基于半导体产业数字化领域的战略布局，专注为中国半导体设备、核心零部件及特种材料领域的科创型、高成长性企业，提供端到端的数字化运营整体解决方案。以“研发运营一体化、运营管理指标化”为核心理念的产业数字合伙人，致力于帮助客户将技术创新高效、可靠地转化为市场成功与可持续增长。汇链科技已成功服务超过 50 家半导体领域的科创企业，产业链数字化解决方案覆盖率 85%。

中微汇链为国家“星火·链网”半导体骨干节点技术建设单位、中国产业区块链企业 50 强，并被授予上海市集成电路产业数字化转型“链主”培育服务企业；入选上海市专精特新企业；入选上海市质量管理数字化转型十佳案例；并参与制定《区块链服务基于区块链的去中心化标识（DID）技术要求》、《区块链服务数字孪生开发平台技术规范》等多项数字化领域团体标准。

2、生产基地建设

为更好地完善公司的产业链布局，进一步提升公司的产能规模和综合竞争实力，公司在上海临港新片区建设中微临港产业化基地及中微临港总部和研发中心，在南昌高新区建设中微南昌产业化基地，在广州建设华南总部研发及生产基地，在成都建设成都研发及生产基地暨西南总部项目。公司位于南昌的约 14 万平方米的生产和研发基地已于 2023 年 7 月正式投入使用；公司在上海临港的约 18 万平方米的生产和研发基地已于 2024 年 8 月正式投入使用，临港二期约 20 万平方米的生产和研发基地拟于 2026 年下半年开工建设；上海临港滴水湖畔约 10 万平方米的总部大楼暨研发中心已于 2026 年 8 月 1 日举办落成典礼；位于广州的华南总部研发及生产基地总体规划占地约 130 亩，一期项目占地约 50 亩，主体结构已于 2026 年 7 月封顶，计划 2027 年投产；

V12 · The original site descriptions report building areas and planned project milestones. Area is not annual sellable chamber capacity. Guangzhou display scope is preserved separately. 1、募投项目建设实施期间，经公司研究和分析，优化施工工艺，有效实现资源的合理配置；

2、在募投项目建设过程中，公司从项目的实际情况出发，在保证项目质量的前提下，坚持合理、节约、有效、谨慎的原则，加强项目建设各个环节成本费用的控制、监督和管理，合理降低项目总支出；

3、因募集资金投资项目建设需要一定的周期，根据募集资金投资项目建设进度，公司对短期内出现的部分闲置募集资金进行了现金管理，有效提高了募集资金的使用效率，增加了公司收益。

（三）节余募集资金使用计划

结合公司实际经营情况，为提高资金使用效率，公司拟将该项目结项后的节余募集资金永久补充流动资金（实际金额以资金转出当日计算的该项目募集资金剩余金额为准），用于日常生产经营活动。

四、本次募投项目延期具体情况及原因、对公司的影响

（一）本次部分募投项目延期的具体情况及原因

中微临港总部和研发中心项目原计划实施周期 5 年，项目计划分以下阶段实施完成，包括:前期准备、基地建设、设备购置与安装、员工招聘以及试运营。自募集资金到位以来，公司一直积极推进募投项目的实施，并根据实际情况，审慎规划资金的使用。截至本公告披露日，“中微临港总部和研发中心项目”主体建筑工程已顺利完工，部分功能楼层已完成内部装潢并可投入前期使用。为匹配后续业务扩容节奏以及研发人员分批入驻的统筹安排，剩余楼层将采取分批次装修、分阶段投用的精细化推进模式。为保障项目建成后整体运营效能与研发承载能力达到最优标准，经公司审慎评估与统筹规划，拟将该募投项目整体达到全面预定可使用状态的时间顺延至 2027 年 12 月。

（二）是否存在影响募集资金使用计划正常推进的情形

V13 · The notice separates proposed industrial-base surplus use from HQ/R&D full readiness delayed to December2027. Completed/partially used floors do not make every future asset available. Source: https://static.cninfo.com.cn/finalpage/2026-08-20/1225482911.PDF | 2026-08-20 | Physical PDF page 4 | Stage: August20 issuer notice | Original SHA-256: 9a9e6584fdee35342059b37c5645c3b55d143f3145af595c77f82230c0ccc0c3

（一）投资项目具体情况

中微临港将在临港新片区投资建设中微临港产业化基地（二期），拟选址于闵联临港园区内，项目计划总投资人民币 350,000 万元（以下币种同），其中固定资产总投资人民币 170,000 万元，预计人员入驻 1500-2000 人，其中研发人员 600-800 人。

（二）投资项目用地及建设规模

项目拟选址于闵联临港园区内，地块规划编号为 J04-03，土地性质为工业用地，土地面积约 70 亩，具体以中微临港与政府土地管理部门签署的《上海市国有建设用地使用权出让合同》为准。

（三）项目可行性分析

本项目属于公司的主营业务，公司已有多年和本项目相关的生产、技术、试验、管理和市场方面的积累。在建设方案方面，充分使用公司现有已经获得的土地和厂房的便利条件，采用合理的、成熟可靠的、高精度的生产设备，保证项目建设最大化的顺利实施。本项目具有以下特点：

第一、本项目基于公司在技术和市场方面的积累，与本公司现有主业紧密相关，上述项目的实施将进一步提高公司产品的生产供应能力，优化产品结构，提高公司盈利水平。项目将进一步增强公司的核心竞争力，促进公司的可持续发展。

第二、本项目符合国家产业政策对本行业发展的要求，建设和运行期间对环境影响较小。同时，本项目具有良好的预期财务效益，能够增加公司的盈利水平，也能对当地在就业和税收方面起到积极作用。

综上所述，本项目符合国家产业政策及环境保护政策，在技术上是可靠的、经济上是可观的，能够产生很好的经济效益和社会效益，项目的实施是非常必要的、可行的。

V14 · Lingang II proposal:3.5B total,1.7B fixed assets and planned1,500-2,000 staff including600-800 R&D. No annual chamber nameplate is given. Six-vector forecast and full operating costs

The single active forecast weights complete delayed, controlled and accelerated outcomes25%/55%/20%. Each outcome first evaluates receipts, capacity, cash manufacturing cost, warranty, research, depreciation, SBC, entity costs, outside owners and funding. The weighted projection is then calculated once. Product GM is weighted GP divided by weighted revenue.

Cash manufacturing margins are LOW normalization assumptions before production SBC/D&A and warranty provisions. All of those costs are then charged once. R&D floors retain paid development through unsuccessful programme states. Capitalized D&A enters WIP and is excluded from expensed cash addbacks. Idle production costs persist when receipts are zero.

Active forward operating-profit bridge

Model estimates; actual/proxy scopes stated in adjacent table

C03 · Q4 2027 through Q3 2028. Each outside-owner bridge contribution equals minus outside-owner OP. A negative subsidiary loss share therefore produces a positive bridge contribution to parent OP. Exact selected model fields or explicitly listed arithmetic; the paired table is the plotted data.

C03_data_1 · Active forward operating-profit bridge — plotted data

Bridge	CNY B
GP	13.093221
Full operating cost	-9.190898
Less CMP outside-owner OP	0.022334
Less metrology outside-owner OP	0.131927
Parent OP	4.056584

Exact selected model fields or explicitly listed arithmetic; the paired table is the plotted data.

Joint outcomes and financing

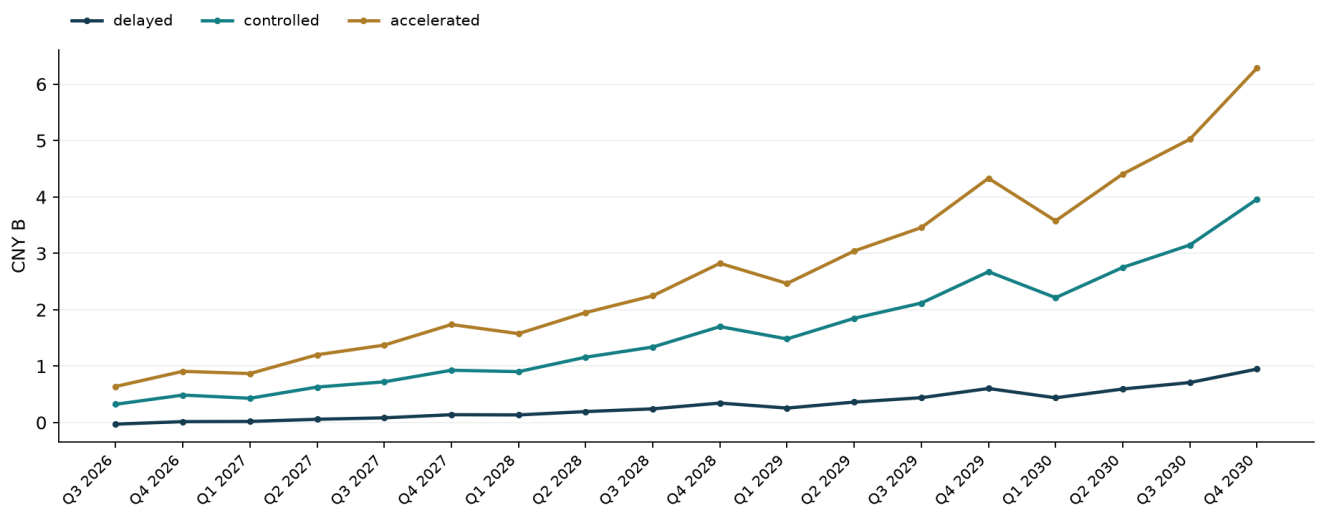

The delayed25% outcome combines softer spending, slower qualification, a lower receipt envelope and no modeled new debt. Controlled55% and accelerated20% add different paid-capital, product and financing paths. These are subjective joint scenarios. Source authenticity is a separate question and does not introduce another probability multiplier.

Modeled debt is uncommitted. No quantified approved undrawn line was found. The usable-cash floor of CNY0.5B is a planning requirement, separate from the zero-cash insolvency boundary. A positive-weight funding or readiness failure latches forward and blocks primary F4 prices; raw failed economics remain diagnostics. The no-bank sensitivity is unavailable as a primary price.

T04 · Current joint scenarios

Outcome	Weight	Resource / qualification	Financing
delayed	25.00%	Slower qualification and paid readiness; source plans can slip.	No new debt modeled.
controlled	55.00%	Controlled capture, product and site execution.	Conditional limit10% of source parent equity.
accelerated	20.00%	Faster acceptance and investment, with higher capacity demand.	Conditional limit25% of source parent equity.

Conditional parent-economic operating profit

Model estimates; actual/proxy scopes stated in adjacent table

Matching cash is already included in opening group cash. It releases only against traced eligible costs and reclassifies restricted to general cash. Funded R&D expense cannot also release the parent working-capital pool. Reimbursement is a conditional eligibility/execution assumption and creates no new total cash. Venture-fund payments and Qinghe reserves are separate from eligible operating uses.

Valuation method and complete forward windows

The method is20 times unrounded next-four-calendar-quarter parent-economic pre-financing operating profit. CNY billions multiplied by1,000 and divided by million forward shares produces CNY/share. Every horizon owns its four quarters and share denominator; the active Q4 2027 window ends in Q3 2028.

Parent-economic OP subtracts signed outside-owner operating profit after subsidiary costs. CMP uses77% parent attribution and metrology47% as rounded future proxies. Full group cash costs remain. Negative subsidiary results can create a modeled outside-owner loss share; this is not a universal haircut to group net income or proof of outside-owner cash funding.

There are18 modeled quarters and15 complete four-quarter windows. The final three quarters have no complete valuation window; the model does not extrapolate a tail. Cash governs funding admission and is not added to operating-profit value.

Programme contributions and overlap

The ten flags control inclusion of localization, non-Mo film, Mo, power/MicroLED, InP, CMP integration, metrology, AP etch, AP film and Domingo. They are diagnostic inclusion controls. Full conditional outcomes retain the same25%/55%/20% weights, and no additional independent success probability is multiplied into a programme.

The ordered bridge evaluates one declared path and telescopes to the selected result. Remove-one marginal effects share paid capacity, cost budgets, assets and cash constraints. Their sum differs from the joint increment. A new receipt can substitute for another product under the common roof, so early Mo or AP film contributions can be negative. Captures come from the same accepted law and are static diagnostics with a documented refresh method.

October14 repeated launch references and the earlier Nomura localization theme create no separate additive programme. The Nomura standalone increment remains zero because of100% thematic overlap, with the underlying report unavailable. Every source claim retains its date, scope, confidence and counter-trigger in the evidence register.

The CNY35.67/share selected-minus-reference span decomposes broad current programme inclusion on the declared path. Domingo contributes approximately CNY0.35/share on that path. These scales describe model inclusion choices and carry no claim that markets missed all public evidence or that October22 news alone created the broad span.

T10 · Current programme decomposition scope

Diagnostic	Value	Unit
Current reference	46.967473	CNY/share

Risk, catalysts and analytical quality

The next useful evidence is accepted repeat Domingo units; Mo/ICP chemistry qualification; paid and usable2027 sites; CMP delivery and metrology tests. Each has failure triggers: slower acceptance, lower mix/price, process performance misses, scarce components, excess inventory, development delays or funding beyond the modeled conditional limits.

Risk also includes customer concentration, export and parts licensing, development capitalization and minority attribution. The December2024 VEU removal is distinct from an Entity List designation. Licensing can both restrict input/customer access and change localization incentives. No complete current legal licence opinion or intraday entity-cash transfer proof is claimed.

Public technical evidence and local-language financial detail improve the causal model, while public availability alone does not establish that markets ignored it. Strong process expansion is already included in the selected probability-weighted growth path. Current analytical quality and financial value remain separate judgments.

T06 · Analytical scorecard

Category	Pts	Max	Evidence / limiting evidence
Core thesis	16	20	Qualified etch ecosystem, recipe/IP and switching friction. Lam/TEL/NAURA and process alternatives prevent monopoly.
Cycle stage	8	10	China fab/localization growth and product qualification. Acceptance, inventory and development conversion.
TAM expansion	9	10	Broader etch/film/compound/CMP/metrology scope. Category coverage differs from company capture; same-pool overlap.
Catalysts	4	5	Accepted repeat units, qualification and site readiness. Shipment and plans do not ensure receipts.
Macro	8	10	Domestic penetration and memory/foundry investment. Forecast misses, export and component constraints.
Alpha	4	5	Technical stages, legal cash restrictions, development and NCI detail. No proof that public information is unpriced.

Raw category points49, risk deduction-3, total46/60, rounded77. Protected Excel Base82 remains separate; score is not multiplied into profit or probability.

T07 · Risk deductions

Risk class	Deduction	Evidence
Competition / qualification	-1	Multiple process alternatives and customer acceptance.
Funding / development / commissioning	-1	Cash, capitalization and project execution.
Concentration / policy / source precision	-1	Customer and regulatory exposure; unresolved financial-source scopes.

The three-1 allocations are the Root-approved rationale for the selected total risk deduction-3.

T08 · Same-law sensitivities

Diagnostic	Primary Q4 2027 CNY	Funding status

Source completeness and precise limitations

The latest H1 cycle has the September10 official published written7 Q&A plus closing, within a complete195-record collective event. August's issuer-authored H1 phone record contains9 curated Q&A, prepared summary and participant appendix on a mirror. Its exact meeting day, original host, audio and complete spoken verbatim remain unavailable. Both records cover the same H1 cycle.

The prior May13 official Q1 event has21 published posts:16 Q&A,2 management statements and3 host records. All available written answers were read. No additional AMEC audio or deck was found. The report claims written completeness within those records and does not assert a full spoken transcript.

No quantified future AMEC company revenue or gross-margin guidance was recovered in the reviewed written records. SEMI industry forecasts and peer long-run R&D comparisons are not AMEC guidance. Management describes qualification, ongoing R&D and shared modular technology; its reported 60-70% technology reuse and 30-40% product-specific work are engineering descriptions, not factory unit capacity.

Exact per-model ASP, annual qualified manufacturing capacity, customer process allocation, inventory grades, complete gross/allowance stock movements and precise functional noncash cost allocation remain missing. Legal-parent upstreaming, future statutory tax consolidation, PPA tax basis and source registration dates also retain gaps. Conditional financing is a model hypothesis, not a recovered credit line.

T09 · Unresolved source/accounting boundaries

No.	Treatment
1	H1 is latest reported actual as of the cutoff; Q3 2026 is a completed-quarter model estimate. No unavailable Q3 report is invented.
2	R&D headline/note, D&A/SBC, money-funds/CCE and share-registration source differences remain explicit. No exact functional manufacturing cost or acquired-technology life is invented from those gaps.
3	Cash manufacturing margins, capitalization/functional allocations, cost intensity, project partial availability, normalized mixed-chamber capacity and its cash-per-equivalent mapping are Root LOW hypotheses, not issuer guidance, observed tool ASP or certified paid/sellable nameplate.
4	The initial book-net inventory as cash-backed cost stock and future cash-stock schedule are disclosed conservative proxies, not a complete gross allowance, physical chamber, production/acceptance or inventory-grade ledger.
5	Cash is a consolidated/group economic funding proxy with explicit designated-use pools. Complete legal-parent/subsidiary upstreaming, statutory tax consolidation and intraday payment solvency are not proven. Entity cash CIT is a LOW proxy; PPA tax basis/deductibility and exact future tax/NOL timing remain unavailable.
6	No quantified approved/undrawn bank line was found. Modelled debt draws and their fees/rates are conditional uncommitted financing hypotheses inside the joint outcomes. The 0.5B usable-cash buffer is a Root planning threshold, distinct from the separately shown zero-cash insolvency boundary.
7	77% CMP and 47% metrology parent OP attribution are disclosed future rounded ownership/function proxies. Full group cash costs remain; no outside-owner funding injection or universal NI haircut is introduced.
8	Seller 2026/27/28 target revenue promises are full-target contractual references, not AMEC group guidance or guarantees. Existing acquired facilities may support conditional receipts; the new CMP project is not claimed installed before its selected completion.
9	H1 note53 share-capital table is physical163; actual amounts and registration-date source conflict remain.

Appendix A - complete expected quarter schedules

All rows below are model estimates in CNY billions unless labeled. Forecast2026 covers Q3 andQ4 only; H1 actuals are kept separately. Complete source precision remains in the bound JSON, and displayed six decimals are a readability convention.

Model estimates. CNY billions unless the column states another unit. H2 2026 covers Q3 and Q4 only.

Appendix B - every exact forward chain

Each horizon below retains the four calendar quarters, unrounded component parent OP, exact denominator and selected20x/1,000 conversion. Final three quarters have no complete four-quarter valuation.

F4_00 · Q3 2026 forward components

Quarter	Parent OP B
Q3 2026	0.298121
Q4 2026	0.452691
Q1 2027	0.414320
Q2 2027	0.599876

F4 = sum of these four unrounded quarters. Ceiling = F4 ×20 ×1,000 / the owning horizon shares. Horizon denominator and total are inT05; all individual share owners are retained.

Programme floor after2030	2.600000

Book assets and designated cash are distinct from unpaid cash obligations. Programme tail is the selected floor/calendar scenario plan, with no source-proven legal payment obligation inferred.

Appendix C - controlled full conditional outcome

This outcome retains its own costs, assets and cash path. Its existing joint weight is 55%; it is evaluated before weighting. All money schedules are CNY billions.

controlled_terminal · End2030 balances and plan tail

Item	CNY B
Group CCE	11.274656
Remaining designated cash	0.069357
Usable cash	11.205299
Existing bank principal	0.000000
Modeled new bank debt	0.000000
Legacy lease principal	0.000000
Warranty reserve	0.517414
Opening capital AP remaining	0.000000
Group CIP book value	0.450000
Programme floor after2030	0.000000

Book assets and designated cash are distinct from unpaid cash obligations. Programme tail is the selected floor/calendar scenario plan, with no source-proven legal payment obligation inferred.

Appendix C - accelerated full conditional outcome

This outcome retains its own costs, assets and cash path. Its existing joint weight is 20%; it is evaluated before weighting. All money schedules are CNY billions.

Remaining designated cash	0.009312
Usable cash	16.263009
Existing bank principal	0.000000
Modeled new bank debt	0.000000
Legacy lease principal	0.000000

Item	CNY B
Warranty reserve	0.733889
Opening capital AP remaining	0.000000
Group CIP book value	0.675000
Programme floor after2030	0.000000

Book assets and designated cash are distinct from unpaid cash obligations. Programme tail is the selected floor/calendar scenario plan, with no source-proven legal payment obligation inferred.

Appendix D - reproducible formula families

Receipts: China WFE × FX × process fraction × domestic access × AMEC capture × recognition, with explicit chemistry/process components. AP uses separate units × LOW ASP. The common etch/film financial roof scales every related component proportionally. Compound units, CMP seller-reference scenarios, metrology and support have separate owners.

Paid resource: cash capex first settles opening capital AP. Remaining new investment removes target project and HQ allocations. Selected40%/55%/70% eligible core fractions feed the LOW productive-readiness meter after case readiness. Incremental equivalents equal cumulative modeled qualified capital divided by case capital per equivalent; the operating-envelope upper bound still applies.

Book readiness: six opening CIP tags retain source values and selected partial/full dates. New HQ capital holds to its full date; CMP project capital holds through its three-year programme; generic capital uses50% one-quarter and50% two-quarter lags. Book transfers create finite90% PPE/10% other vintages; charges begin after placement and cannot exceed remaining basis.

Costs: cash manufacturing COGS + production SBC + production D&A + equipment warranty provision = product COGS. Operating functions and idle production charges remain once. Group OP = GP - full operating cost; parent-economic OP subtracts signed CMP/metrology outside-owner OP after entity costs.

Development: cash R&D is at least the selected programme floor net of startup R&D already included. Only eligible modeled cash R&D and selected D&A capitalize. WIP transfer creates dated finite completed-development cohorts. Organic old technology, acquired PPA, new technology, PPE and other assets have separate capped balances/lives.

Cash: group OP + expensed noncash addbacks + warranty provision - claims - entity cash tax - cash-stock changes - capitalized research - capex - source obligation settlements - debt service - fund/reserve/dividend payments. Restricted releases reclassify cash only. The same expense cannot release two pools. Opening inventory can cash-release only through bounded recognized cash-cost consumption.

Admission: probabilities are bounded and sum1; process/capture fractions have coupled same-wallet bounds; source denominators, lives, calendars and numeric domains must be valid. Each positive-weight outcome must satisfy cumulative funding/readiness conditions. A horizon requires four admitted parent-OP quarters. Complete diagnostic states remain separate from the active forecast.

Appendix E - all current numerical owners

The exact selected values below reproduce the financial law together with the formula families and dated schedules. Source actuals, source-derived selections, LOW forecasts and immutable conventions retain distinct roles. Quote context appears only in the private header. Textual revision/workflow metadata is excluded from the reader register.

All rate and margin deltas are stored as fractions: 0.01 equals one percentage point, and -0.03 equals minus three percentage points. The frozen unit name percentage_point_delta for GM_adjust and RD_cash_adjust denotes a fractionally stored delta, rather than a numeric point count.

Paths identify selected inputs, not new sources. Confidence and exact source provenance remain in canonical metadata. Root LOW owners are conditional hypotheses rather than issuer forecasts.

Appendix F - captured programme diagnostics

Twenty-two captures retain the same law, input selection and three joint scenarios. These static tables can be refreshed by rerunning the same selected law with only the declared flags changed. Ordered10 is an exact alias of selected; all-zero reference retains planned research/operating commitments. They are diagnostic decompositions, not additional active forecasts. Full54 conditional cost/cash rows for each capture remain self-contained in the accompanying canonical JSON; readable expected-quarter and F4 summaries follow.

Appendix G - all41 source dispositions

Source evidence may be actual, management stage/plan, primary industry forecast or incomplete secondary context. Source confidence is distinct from the three selected joint-state weights. Reposts and overlapping stages share the existing programme owner.

CLAIM_P01 · P01 | 2026-10-22

Scope	Reading
Evidence	Primo Domingo gas-phase high-selectivity etch first unit shipped to an unnamed important domestic IC R&D/manufacturing customer.
Boundary	Shipment only; no acceptance, recognized revenue, order amount, unit ASP, qualification completion or multi-unit award disclosed. The global-first wording is scoped to the first unit of this AMEC model; competing selective-etch products predate it.
Disposition	new_stage_with_conditional_receipts
Programme flags	Domingo
Overlap group	DOMINGO_FIRST_SHIPMENT_20261022

CLAIM_P02 · P02 | 2026-08-20

Scope	Reading
Evidence	Primo Domingo was undergoing multiple customer process validations in the laboratory Alpha chamber at H1.
Boundary	H1 period status; later shipment does not rewrite H1 revenue.
Disposition	already_included_prior_stage
Programme flags	Domingo
Overlap group	DOMINGO_STAGE_CHAIN

CLAIM_P03 · P03 | 2026-10-14

Scope	Reading
Evidence	Company plans102 new devices over3–5years with totalR&D aboutCNY13B; plans20+new film products over5years for7–3nm logic and300–500+layerNAND.
Boundary	Company plan, not awarded orders or incremental R&D above the existing budget. It overlaps the disclosed broad product programme and R&D staffing.
Disposition	shared_cost_floor_subset_not_extra_expense
Programme flags	localization, nonMo_platform, Mo, power_MicroLED, InP, CMP_integration, metrology, APetch_expansion, APfilm, Domingo
Overlap group	102_DEVICE_13B_BROAD_PROGRAMME

CLAIM_P04 · P04 | 2026-10-22

Scope	Reading
Evidence	Company states54 developed equipment types and more than8,800 reaction stations across more than220 production lines byJune30,2026.
Boundary	Installed/cumulative stations and developed product types; not annual manufacturing capacity, annual accepted shipments or all currently revenue-producing models.
Disposition	installed_base_context_already_included
Programme flags	localization, nonMo_platform, Mo, power_MicroLED, InP, CMP_integration, metrology, APetch_expansion, APfilm, Domingo
Overlap group	H1_8800_STATIONS_220_LINES

CLAIM_P05 · P05 | 2026-10-14

Scope	Reading
Evidence	Five-year goals cover equipment categories representing60% of front-end and70% of advanced-packaging equipment markets.
Boundary	Category coverage/SAM aspiration; not market share, company capture or funded demand.
Disposition	context_no_standalone_increment
Programme flags	localization, nonMo_platform, Mo, power_MicroLED, InP, CMP_integration, metrology, APetch_expansion, APfilm, Domingo
Overlap group	60_70_CATEGORY_COVERAGE_GOAL

CLAIM_P06 · P06 | 2026-08-20

Scope	Reading
Evidence	CCP D-RIE/AD-RIE/AD-RIE-e/HD-RIE products have mass-production usage; XD-RIE Beta machine is in customer validation after laboratory marathon tests.
Boundary	Each model/process has its own qualification; family maturity does not qualify every new variant.
Disposition	existing_etch_platform_with_new_variant_risk
Programme flags	localization
Overlap group	CCP_XD_RIE_STAGE_CHAIN

CLAIM_P07 · P07 | 2026-09-01

Scope	Reading
Evidence	Six products were launched: XD-RIE70–90:1; QuaStarONPECVD; QuaStarGEPECVD; UnicoreAMALD-Mo; UniflashSPTi/TiN; PDS8SiCepi.
Boundary	Release date isSeptember1, before oldSeptember18report. Technical launch is not an accepted-volume award.
Disposition	already_included_repeated_launch_not_new_pool
Programme flags	localization, nonMo_platform, Mo, power_MicroLED, APfilm
Overlap group	SEPT01_SIX_PRODUCT_LAUNCH

CLAIM_P08 · P08 | 2026-09-01

Scope	Reading
Evidence	QuaStarON supports4chambers×4stations=16simultaneouswafers; QuaStarGE supports4stations/chamber up to12simultaneouswafers.
Boundary	Parallel wafer positions are not wafers/hour or annual output. Chamber, station and complete tool counts are different units.
Disposition	technical_context_within_existing_film
Programme flags	nonMo_platform
Overlap group	SEPT01_SIX_PRODUCT_LAUNCH

CLAIM_P09 · P09 | 2026-09-01

Scope	Reading
Evidence	ALD-Mo compact4station platform; Ti/TiN combines preclean+PECVDTi+ALDTiN with up to5dualstationchambers; PDS8 handles up to4×8inchwafers simultaneously.
Boundary	Product configuration, not accepted throughput or customer production capacity.
Disposition	subcomponents_inside_existing_vectors
Programme flags	Mo, nonMo_platform, APfilm, power_MicroLED
Overlap group	SEPT01_SIX_PRODUCT_LAUNCH

CLAIM_P10 · P10 | 2026-08-20

Scope	Reading
Evidence	ICP products operate on production lines of50+customers in logic,DRAM,3DNAND,power andMEMS. NanovaLUX-Cryo is in stable production; Angnova Beta validation has repeated orders; Menova metal etch entered production.
Boundary	Production and orders relate to named product families; customers are largely unnamed and no per-customer allocation is disclosed.
Disposition	mature_base_and_current_capture_context
Programme flags	localization
Overlap group	H1_ICP_50PLUS_CUSTOMERS

CLAIM_P11 · P11 | 2026-08-20

Scope	Reading
Evidence	CVDW/HARW/ALDW have passed key memory/logic/specialty field validation and won repeat production orders; metal-gate TiN/TiAl/TaN passed multiple advanced-logic validations. Some memory/packaging electrode and integratedTi/TiN variants remain in field validation.
Boundary	ValidatedW/TiN is not blanket qualification ofALD-Mo/PECVDdielectric/EPI.
Disposition	mature_film_base_plus_conditional_platform
Programme flags	nonMo_platform
Overlap group	H1_W_TIN_PRODUCTION_VALIDATION

CLAIM_P12 · P12 | 2026-08-20

Scope	Reading
Evidence	Reduced-pressureEPI validated at mature nodes and shipped to advanced customers, some production validation; atmosphericEPI development completed and wafer validation ongoing.
Boundary	Different product maturity and wafer scopes; source does not disclose accepted units/ASP.
Disposition	conditional_nonInP_component
Programme flags	power_MicroLED
Overlap group	H1_EPI_STAGE_CHAIN

CLAIM_P13 · P13 | 2026-08-20

Scope	Reading
Evidence	LED A7/HiT3/UniMax mature; MicroLEDUdx has repeat orders; GaNPD5 repeat orders with new model validation;8inchSiCepi in customer production validation/repeat orders; GaAs prototype validation;InPMOCVDlabdevelopment and plannedH2samples.
Boundary	Compound-semiconductor/LED markets are not interchangeable with siliconWFE; InP samples do not establish photonics revenue.
Disposition	mature_nonInP_and_early_InP_separate_within_epi
Programme flags	power_MicroLED, InP
Overlap group	H1_COMPOUND_MOCVD_STAGE_CHAIN

CLAIM_P14 · P14 | 2026-08-20

Scope	Reading
Evidence	TSV300E has repeat packaging/deep-trench orders; Matrix plasma dicing awaits firstleadingdomesticclientvalidation; third-generationTSVorders received pending delivery/validation; CuBSPVD commercial discussions after laboratory work;UBMPVD R&Dstarted.
Boundary	Packaging equipment stages differ; order, lab success, delivery and accepted sales are separate.
Disposition	separate_AP_budget_within_two_vectors
Programme flags	APetch_expansion, APfilm
Overlap group	H1_PACKAGING_TSV_PVD

Appendix H - Complete retrieved BS, income and cash-flow statements

Original consolidated-group and legal-parent BS, income and cash-flow statements are grouped separately below. All1,022 structured rows in15 retrieved tables, current/comparative source cells and blanks are retained. Repeated headers identify Group as the consolidated group and Legal parent as the standalone parent. Source currency is CNY, without a billions conversion. Blank source cells remain unavailable/blank rather than zero. Original labels and material English translations, original period rows and source pointers remain. This appendix does not reproduce every equity-movement or disclosure-note table; the full originals are preserved and relevant notes were reviewed. No source balance-sheet stock is subtracted to manufacture a Q2 flow.
