Investment case and model result

Qualified equipment-parts platform / beneficiary

Covered company; this review does not independently establish current position ownership

Framework: 8.0, current verified consolidated source

Analytical score: 42/60 = 70%, Watchlist

Protected Excel Base: 72%, retained separately

The supplied master retains a CNY195.51 quote with no independently verified quote date. It is a frozen workbook reference. The model starts with 315M gross forward diluted shares; market capitalization from those two snapshot inputs is CNY61.585650B. No fresh market-price claim is made.

Active horizon: Q4 2027, pricing Q4 2027 through Q3 2028

H001 | Active model result | Q4 2027; model estimates

Measure	Value	Unit / period
Q4 2027 model ceiling	38.943490645584696	CNY/share
Priced operating window	Q4 2027 through Q3 2028	Current plus next3 quarters
Sum of four parent OP terms	0.6162807394663778	CNY billion
Sanctioned operating-profit multiple	20	x
Starting-quarter gross forward shares	316.5	Million shares
FY2027 model revenue	6.136479691778828	CNY billion
FY2027 parent economic OP	0.4947557709019093	CNY billion

Fortune supplies precision mechanical parts, assemblies, gas-delivery and vacuum/control components used by equipment manufacturers. Its opportunity comes from winning more qualified content as Chinese tools become more complex, then spreading existing factory and development costs over accepted customer deliveries. Selected coating qualifications, showerheads and heating products can improve content and mix. The commercial advantage rests on process knowledge, cleanliness, welding, customer co-design and consistent small-batch execution.

The investment question is how much of that technical progress reaches recurring parent operating profit after materials, people, depreciation, research, inventory losses and working capital. Customer spending reaches Fortune through tool procurement, qualified components and delivery acceptance. A larger fab budget is only an upstream demand signal. Parts embedded in modules are counted once.

Fortune has competing suppliers. A selected customer's exclusive coating qualification does not establish an industry-wide monopoly. Core established parts are scaling with the equipment cycle; new heaters and selected coatings have different adoption stages, while some chucks and valves remain in validation or early commercial rollout. These distinctions control capture, timing and costs. The company is classified as a qualified beneficiary with selective process advantages.

T001 | Analytical scorecard | separate from protected workbook Base

Category	Points	Maximum	Reasoning
Core	14	20	Qualified platform, process/customer switching costs and selected coating qualifications; no global monopoly.
Cycle	8	10	H1 recovery and accepted orders; Q2 gross margin slightly below Q1 and continuing impairment burden.
TAM	8	10	Equipment complexity and localization with eligible-component and paid-capacity limits.
Catalysts	4	5	October28 report/October29 briefing, collections, qualified repeat volume and acquisition conditions.
Macro	8	10	Domestic sourcing and equipment investment; policy and customer-funding risk.
Alpha	4	5	Reconcile component wallet, differentiated gas economics, paid resources and audited small acquisition.
Risks	-4	0	One deduction each: concentration; capital/funding/impairment; policy/export; qualification/execution/competition.

T002 | Score arithmetic and protected score

Measure	Value	Unit
Sum of all earned points	42	points
Positive category maximum	60	points
Analytical points / denominator	70	percent
Protected existing workbook Base	72	percent

T003 | Individual scored risk deductions

Risk class	Deduction
concentration	-1
capital/funding/impairment	-1
policy/export	-1
qualification/execution/competition	-1

Actuals, guidance and management evidence

The latest available financial result is the unaudited H1 2026 report. Revenue was CNY 2.317579054B, up 34.45%, with CNY 0.623089328B gross profit and 26.885% gross margin. Parent net income was CNY 134.169M and statutory parent net income excluding non-recurring items about CNY 89.899M. Q2 revenue, derived from H1 less Q1, rose 22.285% sequentially; its 26.748% gross margin was slightly below Q1's 27.054%.

订单规模显著增长，有效带动公司整体业务实现高速增长。报告期内，公司各生产基地产能逐步释放，规模生产带来单位制造成本优化，经营业绩实现改善。

公司持续推进平台化发展战略，着力开展核心技术迭代优化、产品矩阵完善及客户服务体系升级工作。作为长期服务国内外头部半导体设备厂商的精密零部件企业，公司坚持以自主创新为核心驱动力，不断推进核心技术升级与产品系列迭代，持续夯实研发创新与数智化建设能力。报告期内，公司获评“辽宁省智改数转标杆企业”，通过技术能力的持续提升，把握行业发展机遇。

1、产品研发方面

匀气盘方面，高端匀气盘领域长期被国际头部厂商垄断，市场技术壁垒与准入门槛较高。报告期内，公司聚焦先进制程零部件国产化需求，顺利完成多款高度集成化新型匀气盘产品研发落地，产品广泛适配先进逻辑、先进存储产线的刻蚀、薄膜沉积等核心化学反应工序。公司重点研发的多层钎焊内腔匀气盘，集成小孔遮蔽、多层钎焊、高洁净清洗、内腔阳极氧化等多项复杂精密工艺，实现全流程自主可控生产，保障表面处理量产稳定性，成功突破行业高端匀气盘制造瓶颈。同时，公司研发的高深宽比同心槽匀气盘可精准适配 Harp 先进工艺，为半导体先进制程薄膜沉积环节提供可靠的核心零部件支撑。此外，内腔喷砂匀气盘、超长进气流道焊接加热匀气盘等新品的开发落地，进一步丰富了公司高端匀气盘产品矩阵。报告期内，公司匀气盘业务同比翻倍，高难度、复杂结构匀气盘产品已实现在国内半导体先进制程领域的导入与推广，进一步夯实了公司在高端半导体精密零部件领域的市场地位，持续助力半导体设备核心零部件国产化进程。

静电卡盘方面，公司成功突破海外技术壁垒，相关产品完成国内部分设备厂商验证并实现国产化替代，跻身核心供应商行列，铝基与陶瓷板粘接类、浆料印刷类静电卡盘达成首件技术突破，产品可适配 ETCH、CVD、PVD、IMP、CD-SEM 等核心机台。

金属加热盘领域同样打破海外技术垄断，产品通过多家国内外头部设备厂商认证、实现国产化替代并成为核心供应商，其中铝合金加热盘实现多款量产及多型号小批量供货，不锈钢加热盘攻克焊接工艺与高温均匀性技术难点，实现多型号规模化生产，产品应用于 PECVD、Strip ETCH 等核心机台。

在阀门领域，公司针对关键物料国产化工作，已初步完成国内外主流品牌阀门性能对比测试。试验结果表明，相关产品有望具备一定国际竞争优势。公司持续优化国内品牌供应商体系，依托设备端应用验证与失效分析，推进阀门类关键物料国产化进程。

2、技术研发方面

报告期内，公司多项核心技术实现重要突破：一是表面处理领域“N 系列膜层”完成近千万级订单的生产与交付；二是建成国内领先的镀金工艺技术能力，可满足行业最高性能标准，已承接国内头部客户国产化替代的千万级新增订单；三是气体传输系统集成技术取得重大进展，气柜 S6 仿真技术可完整复现 SEMI S6 全部测试边界，处于行业领先水平。具体详见本半年度报告第三节“管理层讨论与分析”之“三、报告期内核心竞争力分析”之“（三）核心技术与研发进展”。

3、产能建设方面

H1 2026 operating discussion from the issuer. This supports the operating recovery and product-progress context; consolidated actuals and the numerical normalization are reconciled separately.

The issuer's October 23 notice schedules Q3 results for October 28 and the Q3 text briefing for October 29. No Q3 actual or completed Q3 call is claimed in this report. The reviewed September 21 H1 and May 14 annual/Q1 briefings are the newest two completed published management earnings interactions. Both were text events. All public records and their openings/closings were read; the separate precollection endpoint was unavailable. All six September 1-10 investor Q&As were also reviewed.

证券代码：688409　　证券简称：富创精密　　公告编号：2026-059

沈阳富创精密设备股份有限公司

关于召开 2026 年第三季度业绩说明会的公告

本公司董事会及全体董事保证本公告内容不存在任何虚假记载、误导性陈述或者重大遗漏，并对其内容的真实性、准确性和完整性依法承担法律责任。

重要内容提示：

- 会议召开时间：2026 年 10 月 29 日（星期四）09:00-10:00
- 会议召开地点：上海证券交易所上证路演中心（网址：https://roadshow.sseinfo.com/）
- 会议召开方式：上证路演中心网络互动
- 投资者可于 2026 年 10 月 23 日（星期五）至 10 月 28 日（星期三）16:00 前登录上证路演中心网站首页点击“提问预征集”栏目或通过公司邮箱 zhengquanbu@syamt.com 进行提问。公司将在说明会上对投资者普遍关注的问题进行回答。

沈阳富创精密设备股份有限公司（以下简称“公司”）将于 2026 年 10 月 28 日发布公司《2026 年第三季度报告》，为便于广大投资者更全面深入地了解公司 2026 年第三季度经营成果、财务状况，公司计划于 2026 年 10 月 29 日（星期四）09:00-10:00 举行 2026 年第三季度业绩说明会，就投资者关心的问题进行交流。

一、 说明会类型

本次投资者说明会以网络互动形式召开，公司将针对 2026 年第三季度的经营成果及财务指标的具体情况与投资者进行互动交流和沟通，在信息披露允许的范围内就投资者普遍关注的问题进行回答。

二、 说明会召开的时间、地点

（一） 会议召开时间：2026 年 10 月 29 日（星期四）09:00-10:00

（二） 会议召开地点：上证路演中心

October23 issuer notice schedules Q3 results on October28 and a text briefing on October29. This notice is not Q3 financial results or a completed Q3 call.

Revenue, product gross profit and operating-profit bridge

Reported China GAAP operating profit includes financing expense, grants, associate/investment income, fair-value changes and disposal items. The manufacturing spread after selling, administration, R&D and business taxes was CNY 213.550M before credit/asset impairments; retaining those CNY 73.890M charges leaves CNY 139.660M recurring pre-financing operating spread. This is a defined analytical bridge, rather than an alternative company-reported EBIT measure. Fair-value and associate gains do not become recurring manufacturing profit in the valuation.

（一）按经营持续性分类			
1.持续经营净利润（净亏损以“-”号填列）		157,293,644.74	3,661,323.52
2.终止经营净利润（净亏损以“-”号填列）			
（二）按所有权归属分类			
1.归属于母公司股东的净利润（净亏损以“-”号填列）		134,168,704.99	12,276,439.12
2.少数股东损益（净亏损以“-”号填列）		23,124,939.75	-8,615,115.60
六、其他综合收益的税后净额		-13,229,259.79	-857,822.55
（一）归属母公司所有者的其他综合收益的税后净额		-13,229,259.79	-857,822.55
1.不能重分类进损益的其他综合收益			
（1）重新计量设定受益计划变动额			
（2）权益法下不能转损益的其他综合收益			
（3）其他权益工具投资公允价值变动			
（4）企业自身信用风险公允价值变动			
2.将重分类进损益的其他综合收益		-13,229,259.79	-857,822.55
（1）权益法下可转损益的其他综合收益			
（2）其他债权投资公允价值变动			
（3）金融资产重分类计入其他综合收益的金额			
（4）其他债权投资信用减值准备			
（5）现金流量套期储备			

H1 2026 consolidated income statement. Sales, manufacturing costs, operating expenses, impairments, financing and investment marks are distinct lines. The recurring pre-financing manufacturing spread is derived in the adjacent bridge.

freight	8.089900
outsourcing other	300.989400

T018 | FY2025 disclosed mechanical electromechanical components | units / percent as named

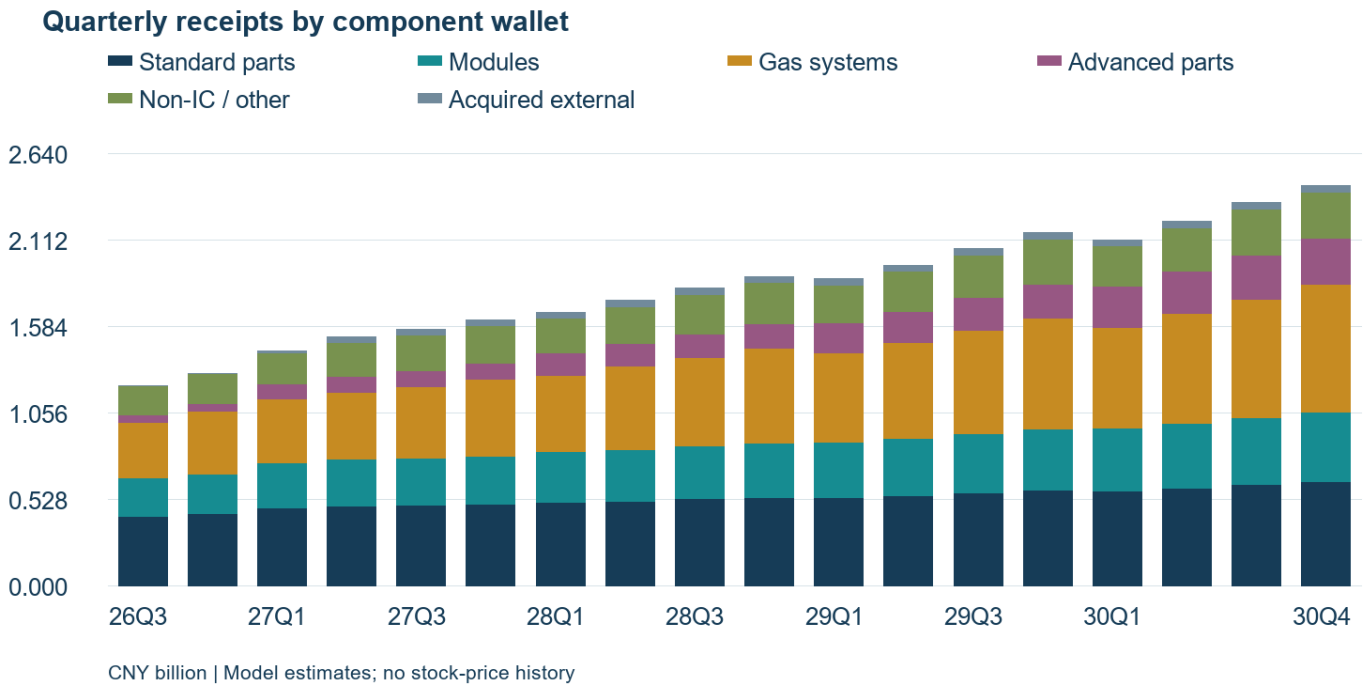

Source measure	Source units / percent
gross margin pct	24.250000
units sold	3,329,187.000000
units produced	3,317,823.000000

T019 | FY2025 disclosed gas transmission systems | CNY million

Source measure	CNYM
revenue	1,106.415800
cogs	901.293500
direct material	719.431300
direct labor	39.257800
manufacturing overhead	93.921100
freight	3.897800
outsourcing other	44.785600

T020 | FY2025 disclosed gas transmission systems | units / percent as named

Source measure	Source units / percent
gross margin pct	18.540000
units sold	338,516.000000
units produced	346,046.000000

Five legacy component wallets plus eligible acquired external receipts comprise one consolidated revenue path. Acquired receipts substitute into existing eligible demand before capacity limits, preventing a second count of the same wallet. Units are CNY billion per quarter.

2030	full calendar year	9.114704	0.940472

T064 | Financial-law derivations | explicit units and timing

Step	Approved-law translation
H1 inferred allocation	H1 IC receipts = reported H1 revenue □ joint-state non-IC/other hypothesis. The four IC receipts equal this amount × the common IC mix. Non-IC/other is the fifth wallet.
Variable resources	Variable COGS rate for each wallet = material rate + labor rate + outside-processing rate.
H1 fixed cost	H1 fixed manufacturing = reported H1 COGS □ sum(inferred wallet receipts × variable COGS rates).
Fixed cash cost	Annual fixed factory cash = 2 × H1 fixed manufacturing □ annual legacy manufacturing depreciation. Quarterly fixed factory cash = annual fixed cash × (1+annual fixed-cash growth)^(year□2026) ÷4.
H1 gross-profit reconciliation	H1 reproduced GP = sum(inferred wallet receipts) □ sum(inferred receipts × variable cost rates) □ H1 fixed manufacturing. Each path reproduces the same reported H1 consolidated GP.

Eligible wallets and qualified operating resources

The framework's China WFE spine is an industry boundary and timing reference. Regional and process forecasts are different views of the same equipment pool and are never added together. The IPO's historical 2020 estimate of about 22% eligible mechanical/module/gas content is distinct from the broader 50-55% all-parts estimate. The older 22% figure is a scope cross-check; it is not a current awarded market share.

统类等原材料品类）采购占比约为 50%-60%，同时考虑中微公司相应期间的毛利率和原材料占成本比例，利用采购占比*（1-毛利率）*原材料占成本比例估算发行人主要产品占刻蚀设备售价的比例区间。

最后，整合前两步所获得的区间，保守估计取区间中值得到发行人主要产品占下游不同类型设备售价的比例。根据不同类型设备 2020 年公布的市场规模累加得到发行人主要产品的市场规模。具体如下：

单位：亿美元

设备名称	2020 年全球市场规模	工艺和结构零部件占比	模组产品占比	气柜和气体管路占比	主要产品全球市场规模
薄膜沉积设备	172	14%	11.5%	9%	59
刻蚀设备	137	19.5%	8%	12.5%	55
光刻设备	134	7.5%	不适用	不适用	10
清洗设备	35	12%	不适用	不适用	4
涂胶显影设备	24	12%	17.5%	不适用	7
化学机械抛光设备	16	19.5%	12.5%	不适用	5
热处理设备	15	17.5%	11.5%	12.5%	6
离子注入设备	14	12%	5%	2%	3
去胶设备	5	17.5%	11.5%	12.5%	2
其他前道设备、测试设备和封装设备等	160	5%	不适用	不适用	8
合计	**712**	**11.8%**	**5.6%**	**5.0%**	**160**

注 1：不同设备 2020 年市场规模来自 SEMI、申万宏源研究、平安证券研究。
注 2：上表区间估计中刻蚀设备参考中微公司、薄膜沉积设备参考拓荆科技、清洗设备参考盛美上海、涂胶显影设备参考芯源微、化学机械抛光设备参考华海清科、热处理和去胶设备参考屹唐股份。
注 3：上表区间估计中光刻设备、离子注入设备和其他前道设备、测试设备和封装设备等均为发行人根据自身客户情况估计。
注 4：鉴于设备公司一般将气柜和气体管路产品统称为气体输送系统/模组，一般将工艺零部件和结构零部件统称为机械类零部件，从而测算市场规模将发行人工艺和结构零部件、气柜和气体管路合并进行测算。
注 5：计算模组产品占下游客户设备售价占比时已剔除包含的工艺零部件、结构零部件和气柜金额。
注 6：上表中不适用均为发行人不涉及相关产品或未配套相关设备，从而公司模组产品、气柜和气体管路占比低于前文中的机电一体类和气体/液体/真空系统类占半导体设备市场的比例。

如不考虑精密零部件备件销售，根据上表保守估计，发行人目前涉及的半导体设备精密零部件全球市场规模 2020 年约为 160 亿美元，占当年全球半导体设备市场规模的 22%。若根据 SEMI 预测的 2030 年半导体设备市场规模达到 1,400 亿美元，假设比例不变，则发行人主要产品全球市场规模有望在 2030 年超过 300

2022 prospectus using2020 industry context. The approximately22% eligible mechanical/module/gas-component scope differs from the broader all-parts estimate. It is a historical scope check, not a current awarded share.

FY2025 IC sales of CNY 2.992560B are separated from non-IC sales of CNY 510.518M and other revenue of CNY 40.358M. Product and industry disclosures describe the same business from different directions. H1 provides consolidated totals without a fresh product/industry split. Its inferred allocation remains LOW confidence and every conditional path reproduces the reported consolidated starting point.

应对半导体行业未来高速增长的市场需求，公司对销售团队进行优化精简，同时加大核心骨干人员的薪酬投入，致使销售费用整体有所上升。

（2）财务费用变动原因说明：财务费用较上年同比增长 244.71%，主要系利息费用及汇兑损失有所增加。

（3）经营活动产生的现金流量净额变动原因说明：主要系报告期内公司持续优化管理经营性现金流，客户回款情况较好，经营活动现金流持续改善。

（4）投资活动产生的现金流量净额变动原因说明：主要系报告期内公司投资浙江锴芯电子科技有限公司。

（5）筹资活动产生的现金流量净额变动原因说明：主要系报告期内公司筹资活动产生的现金流出减少。

FY2025 annual-report product and industry disclosures describe intersecting views of the same revenue. IC mechanical and gas sales are separated from non-IC/other receipts. These views are not additive independent markets.
Source: 2026-04-30 | PDF page 36 | https://static.cninfo.com.cn/finalpage/2026-04-30/1225265029.PDF
Original PDF SHA256: 55dec0db7e4b106269107a48163e3a27a5ab025089f0ac32b3624fb13d05ece3

A Plan-B customer-investment pool calibrates to the IC revenue reference. Its effective flow-through combines equipment procurement, localization, component content and recognition; it is not a disclosed procurement contract or measured share of domestic fab capex. International exposure and undisclosed account allocations remain limitations. The full conditional capture endpoints and their realization fractions are published in the model tables, followed by company-specific capacity and funding limits.

The three-phase expansion lens includes current tool content, more demanding advanced-process components and a longer-term installed-product/replacement opportunity. Engineering complexity can enlarge content, but future chucks, coatings and valves need acceptance and repeat volume. Robotics, edge and other advanced-compute uses are indirect demand drivers for semiconductor tools, rather than separate Fortune revenue pools. Their spending is not added again to equipment demand.

The regulatory reply gives three IC sites a combined CNY 6B historical design-output value. It does not disclose physical good-unit capacity, recipe yield or guaranteed external sales. Shenyang already operated at 81.87% in 2025, Nantong at 67.24% and Beijing at 7.05%; Beijing reached 16.82% inQ 1 2026. Low usage at one site cannot be assigned to every product or location.

公司深度落地华北区域产能与服务升级规划。其中，定位为国内头部半导体设备企业重点配套基地的北京工厂，已于 2025 年下半年投产运营，有效补齐华北区域服务短板，大幅提升公司在华北市场的客户响应速度、交付能力与综合服务效率；同时南通工厂顺利爬产，生产基地规模化效应逐步显现，为国内半导体设备产业链稳定配套、稳健发展提供有力支撑。与此同时，公司可精准匹配客户定制化生产需求，提供高效、专属的定制化配套服务与快速售后响应。此外，南通、沈阳基地持续夯实区域服务能力，依托属地资源优化区域市场布局，筑牢国内全域服务网络根基。报告期内，公司持续推进服务体系升级，深化全球布局、拓展多维度业务协同，全方位提升客户服务品质与综合服务能力。为增强全球供应链韧性、健全客户知识产权安全保护体系，公司持续强化各生产基地区域服务覆盖能力，构建国内外联动、多点协同的生产服务格局。

4、智能工艺方面

公司面向多品种微批量的制造模式，已建成覆盖工艺特征、加工方案、刀具及参数的全品类标准化体系，并依托智能工艺专家系统（含加工知识库、资源库、CAM 模板库及质量控制黑白名单）实现工艺策划、工装刀具调用、CAM 轨迹与切削参数自动生成，以及工艺文件自动输出和质量自动检查，覆盖工艺编制全流程业务与八成以上人工操作，在显著提升编制效率的同时，通过刚性执行企业标准，从源头杜绝人为质量波动和经验差异，大幅缩短新员工上手周期。在此基础上，系统的深层价值正不断显化：经济层面，自动匹配最优参数不仅降低编程耗时，更有效减少试切报废、刀具崩损和工件超差等隐性成本，尤其微批量下单件报废即影响批次良率，而系统级防错可将“试切件”转化为“首件合格”，并延长昂贵刀具寿命，同时工艺流转周期由小时级压缩至分钟级，释放柔性产能，赢得快速换型的时间红利；质量与市场层面，知识库的前置拦截将质量管控前移至事中控制，杜绝人为漏检，同时将工艺专家从重复劳动中解放，聚焦难加工材料攻关和新型工艺验证，为技术迭代注入内生动力。

面向智能工艺 4.0，系统核心功能已明确设计，将进一步采集机床切削载荷、振动及热变形数据，与预设参数闭环反馈，推动工艺参数的自学习与自进化，使加工精度持续逼近极限，最终构建起“硬知识、软工具、实战数据”三位一体的数字工艺资产包，形成不可替代的行业 Know-how 壁垒。这一体系不仅将“多品种微批量”从管理难点转化为企业舒适区，更以刚性的标准执行、柔性的生产响应和数据驱动的持续进化，支撑企业承接高门槛、高附加值订单，实现从“能制造”到“智造优”直至“不可替代”的价值跨越。

非企业会计准则财务指标变动情况分析及展望

□适用 √不适用

H1 2026 factory and product-progress discussion. Reported progress does not supply a new physical good-unit capacity or a fresh numerical product/site allocation.
Source: 2026-08-31 | PDF page 16 | https://static.cninfo.com.cn/finalpage/2026-08-31/1225534968.PDF
Original PDF SHA256: 34661db3358b3e87e8aa600fcab819c80239796609ebd402ab3110d813c3f44c

（二）列示公司主要固定资产分布和产能布局情况，包括资产的设计产能、实际产能、投资总额、建设周期、报告期内平均产能利用率、原值和净值等，并结合报告期内产品实际产销量、产品单价及毛利率变化、在手订单及同行业可比公司情况，分析公司固定资产规模与收入规模的匹配性、本期未计提减值的合理性

1、公司主要固定资产分布和产能布局情况如下：

单位：万元

序号	项目名称	业务领域	设计产能	2025 年实际产能	计划投资总额	建设周期	2025 年产能利用率	原值	净值
1	南通富创生产制造基地	集成电路	200,000	134,481	124,000	2020 年 12 月-2024 年 5 月	67.24%	118,081	97,277
2	沈阳富创生产制造基地	集成电路	200,000	163,735	不适用	不适用	81.87%	112,415	59,314
3	专用领域生产制造基地	非集成电路	122,000	36,010	106,500	2021 年 12 月-2026 年 12 月	52.67%[注1]	93,086	78,092
4	北京富创生产制造基地	集成电路	200,000	14,102	110,000	2020 年 11 月-2025 年 5 月	7.05%	70,300	66,243
5	表面处理业务生产制造基地	非集成电路	22,000	6,597	60,000	2023 年 1 月-2025 年 10 月	29.99%	46,766	44,214

注 1：专用领域生产制造基地建设共分为三期，其中一期、二期已经建设完毕，根据项目可研报告显示，2025 年设计产能为 6.84 亿元，故设计产能基数按照 6.8 亿元计算；
注 2：以上产能利用率计算方式为：生产制造基地年度产值金额/设计产能。

June16 regulatory reply, including dated2025 design-output values and site usage. The three IC sites total CNY6B historical design-output value. These are not disclosed physical good units or guaranteed sales.
Source: 2026-06-16 | PDF page 59 |
https://dataclouds.cninfo.com.cn/shgonggao/hsomarket/2026/20260616/0b1b8e4dbbcd4378ae8069c97e9c2393.PDF
Original PDF SHA256: 77607e0cc3537380683453d90add3bc79d47c418cfd83d273f7915ac3f4818ec

公司主要固定资产由以上五个项目组成，其中沈阳富创生产制造基地、南通富创生产制造基地、专用领域生产制造基地，生产基地运营体系成熟，产线运转稳定，产能利用率维持在良好水平。

北京富创生产制造基地作为专门面向北京地区客户的生产制造基地，于2025 年 5 月厂区建设完毕，于 10 月开始试生产，目前处于投产阶段，截至 2026 年 3 月，产能利用率由 2025 年的 7.05%提升到 16.82%。

2、报告期内产品实际产销量情况如下：

2025 年产品产销量情况

主要产品	单位	生产量	销售量	库存量	生产量比上年增减（%）	销售量比上年增减（%）	库存量比上年增减（%）
机械及机电零组件	个	3,317,823	3,329,187	175,835	178.89	187.41	-6.07
气体传输系统	个	346,046	338,516	38,451	65.96	63.71	24.35

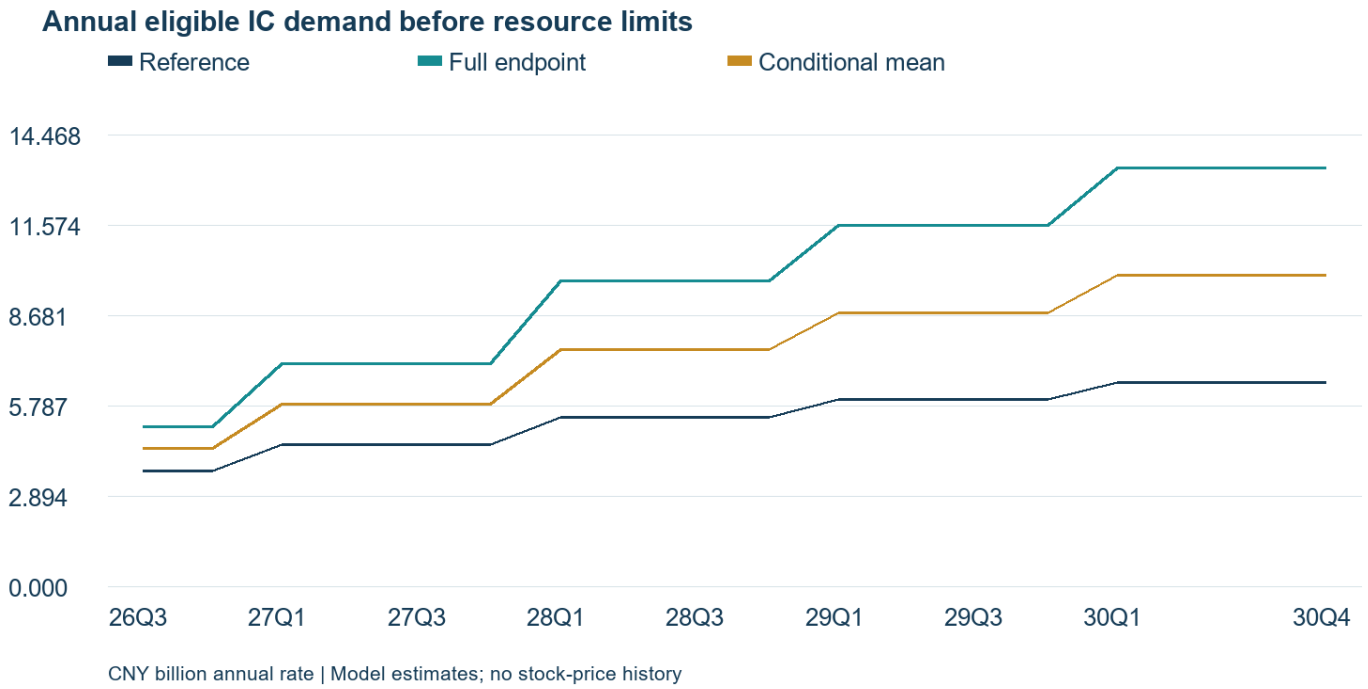

报告期内产销量基本平衡，产能均实现有效利用。北京生产制造基地、表面处理业务生产制造基地目前处于产能爬坡阶段，该情况为新厂区投产初期的正常阶段性特征。

June16 regulatory reply on factory ramp and Q1 2026 usage. The Beijing ramp and non-IC/surface denominators are kept separate; they cannot be assigned indiscriminately to all product wallets.
Source: 2026-06-16 | PDF page 60 |
https://dataclouds.cninfo.com.cn/shgonggao/hsomarket/2026/20260616/0b1b8e4dbbcd4378ae8069c97e9c2393.PDF
Original PDF SHA256: 77607e0cc3537380683453d90add3bc79d47c418cfd83d273f7915ac3f4818ec

The model uses explicit LOW sales-capacity allocations, with the central allocation calibrated to FY2025 IC product mix and alternative allocations retained in the joint outcomes. The non-IC special-domain and surface operations remain separate. The adverse path preserves inferred H1 qualified parts throughput; it does not manufacture an unsupported collapse in already accepted output.

New parts and gas capacity depends on paid expansion after a two-quarter commissioning lag. Parts and gas have different capital turns and cost structures. Gas's materials intensity and lower historical gross-PPE intensity make a uniform asset-turn assumption unsuitable. Maintenance funds upkeep and does not create expansion; missed upkeep reduces productive health under a disclosed LOW stress law. Existing paid designs and prepayments are not counted twice as new capacity.

Price realization is separated from physical output. Competitive pressure on a repriced gas tranche is paid through lower receipts while manufacturing resources still cost money. No unsupported blanket scarcity premium is assumed. Product-mix and modest productivity improvements are separate, correlated operating assumptions, with continuing R&D, ordinary labor and support costs retained.

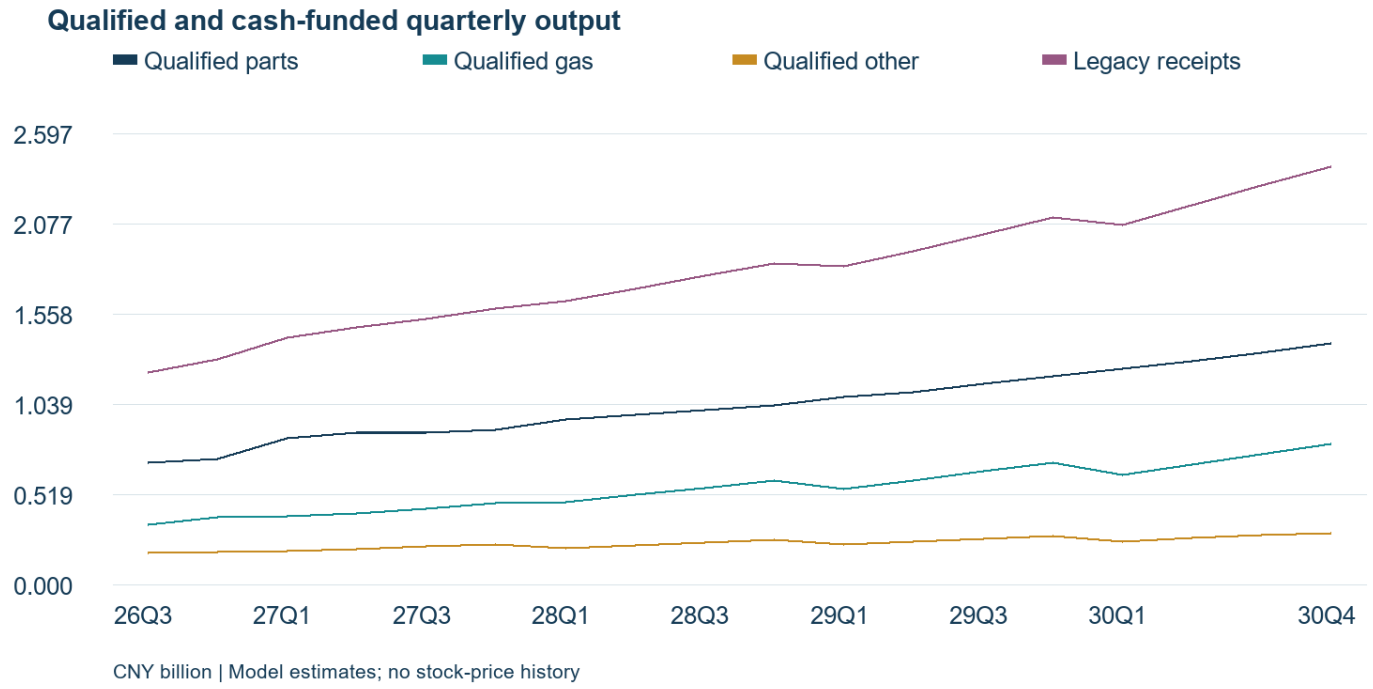

The customer-investment pool is an upstream annual proxy. Capture, equipment/component scope and recognition convert it into eligible component demand; it is not an awarded contract value or a disclosed current market share.

T065 | Financial-law derivations | explicit units and timing

Step	Approved-law translation
Historical effective capture	Historical IC flow-through = FY2025 IC receipts ÷ historical customer-investment pool. It is an effective calibration, not an awarded market share.
Annual eligible IC demand	Reference = annual customer pool × historical flow-through. Full conditional endpoint = annual pool × conditional capture endpoint. Conditional IC demand = reference + capture-realization fraction × (endpoint □ reference).
Quarterly demand timing	For2026, deduct each path’ s H1 IC/other amount from its annual demand; allocate the H2 remainder46%/54% toQ3/Q4. Later years use the printed quarterly seasonal fractions.
Product mix	Advanced share = reference advanced share + advanced-realization fraction × (advanced endpoint □ reference). Standard-parts share =1 □ module share □ gas share □ advanced share. The five wallets are standard parts, modules, gas, advanced parts and non-IC/other.
Paid productive capacity	Parts/gas capacity = (initial annual capacity + commissioned paid expansion × the product-specific capacity turn) × maintenance health. Only expansion paid at least the commissioning lag earlier enters this sum.
Other-site capacity	Other annual capacity = (initial capacity + commissioned paid phase cash ÷ conditional phase cost × added phase capacity × conditional phase realization) × maintenance health.
Qualified output limits	Parts request = standard + module + advanced demand. Qualified parts = min(parts request, available parts annual capacity × year utilization ÷4). Gas and other use their own demand/capacity/utilization limits. Parts allocation retains each requested wallet’ s share of the parts request.
Working-capital receipt limit	Available funding headroom = max(opening legacy cash □ cash floor □ mandatory maturity cash □ unpaid deal reserve,0) + unused incremental credit. Receipt limit = (opening net trade capital + headroom) ÷ (4 × net-trade-capital/annual-sales ratio).
Cash-funded output	WC scale = min(1, receipt limit ÷ qualified allocated receipts). Each legacy wallet’ s pre-price output is multiplied by this scale.
Gas pricing	Gas concession = pre-concession gas receipts × conditional gas-pressure realization × repriceable share × bounded discount. Recognized gas receipts fall by the concession; material/labor resources retain pre-concession output.

Manufacturing and operating cost resources

Product gross profit is built from differentiated materials, labor, outside processing, fixed factory cash expense and depreciation. Calibrated H1 product allocations reproduce reported gross profit without pretending that undisclosed product margins were reported. Incremental nonmanufacturing depreciation is explicitly charged before its cash addback. New target assets have separate cohorts.

T066 | Financial-law derivations | explicit units and timing

Step	Approved-law translation
Production resource charge	Variable resources = physical revenue-equivalent output × (wallet variable COGS rate □ productivity realization × bounded year-specific cost improvement). Gas uses output before its price concession.
Finite depreciation	New legacy quarterly D&A = commissioned paid capital ÷ asset life ÷4. Manufacturing charges legacy annual factory D&A ÷4 plus80% of new D&A; operating expense charges the other20%. Legacy annual nonfactory D&A remains separate.
Product gross profit	Product GP = recognized wallet receipts □ variable resources □ (factory fixed cash + manufacturing D&A) × wallet fixed-cost allocation.
Ordinary operating charges	Legacy opex = R&D + administration + selling + business taxes + impairment + incremental nonfactory D&A + conditional integration expense. Percentage costs apply to legacy receipts; ordinary SBC remains charged through the operating-cost basis.
Group and parent operating profit	Legacy OP = sum(product GP) □ legacy opex. Group OP = legacy OP + acquired OP after target costs/PPA. Parent economic OP = group OP □ preserved legacy minority allowance □ incremental acquired minority.

Paid capital and RiYang acquisition bridge

The proposed 65% RiYang purchase costs CNY 188.5M cash. Shareholders approved it on October 14; closing, payment and consolidation were not established at this review. The contract targets satisfaction of conditions by December 31, with extension or termination possible. Joint outcomes include no deal, later payment/consolidation and an earlier close.

（三）收购价款的支付和交割

1、收购价款

本次收购以标的公司整体估值为人民币 29,000.00 万元为基础（“本次交易估值”），股权转让款合计为人民币 18,850.00 万元（含税）。

2、收购价款的支付安排

股权转让款支付先决条件收购价款的支付安排

收购方按照协议约定向共管账户支付股权转让款，应当以下列条件全部满足或被收购方书面豁免为前提：

(1) 《投资协议》及与本次收购相关的投资协议、公司章程、股东决定等交易文件已签署完成；

(2) 本次收购获得收购方及乙方内部决策机构的批准；

(3) 本次收购已取得本次交易所必需的相关主管政府部门、监管机构事前审批、批准、许可、登记或事前备案（如涉及），并已取得公司债权人、客户等第三方同意（如适用）；

(4) 核心团队成员与公司已签署相关劳动合同、不竞争和知识产权归属协议；

(5) 截至股权转让款支付日，乙方和公司在《投资协议》项下做出的陈述、保证与承诺在所有重要方面均真实、准确、完整，且在所有重要方面未违反该等陈述、保证与承诺；

(6) 截至股权转让款支付日，公司的业务和基本情况无重大不利变化，公司未发生任何商业、技术、业务、法律、财务等方面的重大不利影响事件；

(7) 截至股权转让款支付日，不存在任何对本次收购的进行或对公司产生重大不利影响的诉讼或其他情形；

(8) 乙方、丙方不存在违反《投资协议》第 4 条所述过渡期安排的情形。

3、在前款约定的先决条件（已由收购方豁免或应由收购方完成的事项除外）全部实现时，公司及转让方应向收购方发出《投资协议》第 3.1 款约定的先决条件均已满足的书面通知及相关证明文件（如涉及）。收购方应自收到该书面通知之日起五（5）个工作日内完成审核确认；收购方如有异议，应在上述期限内以书面形式列明具体异议理由及补正要求，公司及转让方应及时予以补正；收购方逾期未提出书面异议的，视为收购方确认上述全部先决条件已满足。如果《投资

May27 contract specifies CNY290M whole-equity valuation and CNY188.5M65% purchase price, together with conditions and review notice. Amounts here are explicitly万元, separate from the earlier financial-summary table’s erroneous unit heading.

协议》任一方在任何时候知悉可能使某项先决条件不能得以满足的事实或情形，应立即通知其他方。虽有前述约定，收购方有权随时书面豁免全部或部分先决条件

4、在遵守《投资协议》各项条款和各项条件的前提下，各方应在收购方收到《投资协议》第 3.2 款约定的书面通知后的十（10）个工作日内或收购方与转让方一致书面同意的其它日期的当日完成以下事项：

（1）收购方应按照《投资协议》第 2.2 款的相应约定，将全部股权转让款一次性支付至收购方以其自身名义开立的并由收购方、转让方共管的一个银行账户（“共管账户”）；

（2）转让方及公司应当就标的股权转让、新章程以及收购方向公司委派的董事、法定代表人、总经理和财务总监的任命相关事宜，向公司主管市场监督管理部门提交变更登记/备案申请并被该部门受理。

5、在前款第（2）项所述变更登记手续办理完成后的一（1）个工作日内，收购方及转让方应共同促使公司提交办理向转让方指定账户汇入股权转让款的外汇登记手续及纳税手续。在本次交易的外汇登记手续及纳税手续完成后一（1）个工作日内，收购方、转让方应共同向共管账户开户行发送汇款解付指令将共管账户内扣除代扣代缴税金之外的全部资金（包括产生的利息）按照当日实时汇率转换为美元后汇入转让方指定账户（“股权转让款解付”），转让方指定账户收到前述全部资金之日即为本次交易的交割日。

6、各方同意积极配合在 2026 年 12 月 31 日前实现《投资协议》第 3.1 条约定的全部先决条件。如果前述约定时间内先决条件没有全部实现且未得到收购方豁免，协议各方可共同协商决定是否给予延期；如协商不成的，甲乙双方均有权单方解除《投资协议》，但此时不影响守约方依照《投资协议》追究违约方的违约责任。

（四）过渡期安排

过渡期内，标的公司及转让方应向收购方通知公司的所有重大事项，未获得甲方同意，乙方和/或标的公司不得实施下列行为：

（1）以任何作为或不作为的方式违反或促成违反《投资协议》第 13 条所述各项陈述与保证；

May27 acquisition contract, continued. Payment is conditional and completion depends on registration, foreign-exchange and tax steps. December31 is the stated conditions target, with extension or termination possible. Approval does not prove closing.

本次股东会由公司董事会召集，董事长郑广文先生因公出差，经过半数董事推举，本次股东会由董事梁倩倩女士主持，会议采用现场投票和网络投票相结合的表决方式。本次股东会的召集和召开程序、出席会议人员的资格和召集人资格、会议的表决程序和表决结果均符合《中华人民共和国公司法》及《沈阳富创精密设备股份有限公司章程》的规定。

（五） 公司董事和董事会秘书的列席情况

1、 公司在任董事9人，列席9人；

2、 董事会秘书的列席情况：董事会秘书郎羽女士列席了本次会议。

二、 议案审议情况

（一） 非累积投票议案

1、 议案名称：《关于收购日扬电子科技（上海）有限公司部分股权的议案》

审议结果：通过

表决情况：

股东类型	同意		反对		弃权	
	票数	比例（%）	票数	比例（%）	票数	比例（%）
普通股	115,365,155	99.9878	6,235	0.0054	7,761	0.0068

（二） 涉及重大事项，应说明 5%以下股东的表决情况

无

（三） 关于议案表决的有关情况说明

无

三、 律师见证情况

1、 本次股东会见证的律师事务所：北京市中伦律师事务所

律师：李亚东、姚阳光

October15 issuer resolution records the October14 shareholder approval. It does not independently establish payment, closing or consolidation.

The audited target's FY2025 sales were CNY 178.079M. Its CNY 12.203M net profit is a statutory after-tax result. The separately reconstructed CNY 8.932M manufacturing operating spread equals sales less cost of sales, selling, administration, R&D and business taxes. This bridge excludes financing, other/investment income, inventory reversal and the other tax and nonoperating lines; it is not derived by subtracting only three items from net profit. Target applications include chambers, valves, parts and exhaust components across semiconductor and other end markets. No segment split supports assigning every sale to one product wallet.

Eligible target receipts are conservatively substituted into the existing company demand wallets and recognized once. A separate LOW intercompany haircut is tested; it is not asserted as historical Fortune trading. Full conditional costs, integration spending, finite purchase-price amortization,35% minority and the purchase cash requirement are retained. No purchase-accounting tax shield is assumed.

The target funds its own working capital and capital spending in a separate conditional cash ledger. Its dated FY2025 cash is an uncertain closing proxy, with a zero-cash stress retained. Its productive-capacity proxy expands only from its own paid capital above maintenance after a commissioning lag. Target cash does not fund legacy expansion. Beijing Yisheng is a different potential transaction; absent price, ownership and funding terms, a profit trigger alone cannot establish an attributable acquisition revenue amount.

T067 | Financial-law derivations | explicit units and timing

Step	Approved-law translation
Audited acquisition spread	Target recurring manufacturing spread = audited revenue □ audited COGS □ selling □ administration □ R&D □ business taxes. Statutory net income is a separate source measure.
Finite purchase allocation	Annual incremental PPA = max(total equity value □ audited target net assets,0) × finite-uplift fraction ÷ finite life. Quarter PPA = annual PPA ÷4 after conditional consolidation.
Conditional requested receipts	Target requested external receipts = audited annual revenue × (1+annual target revenue growth)^(year□2025) ÷4 × (1□intercompany haircut).
Target working-capital limit	Target NWC ratio = audited target NWC ÷ audited annual sales. Target receipt limit = (opening target NWC + max(opening target cash,0)) ÷ (4 × target NWC ratio).
Target paid capacity	Target annual capacity = (audited revenue ÷ initial utilization proxy + commissioned target expansion cash × target capacity turn) × target maintenance health. Target expansion cash excludes its own maintenance allowance.
No double-counted acquisition wallet	Target external receipts = minimum(requested receipts, target WC limit, target annual capacity after haircut ÷4, available common-wallet limit). Target receipts are then carved from the five legacy demand wallets by the printed fractions before legacy output limits.
Target OP and new minority	Target OP = external receipts × audited target gross margin □ inflated ordinary target operating costs □ finite PPA □ new target D&A. Incremental acquired minority = acquired OP × (1□ownership). Conditional consolidation is on/off within each joint path, not another probability multiplier.
Target cash and paid capital	Target cash tax excludes an assumed PPA tax shield. Target economic cash = target OP + PPA + new target D&A □ cash tax □ change in target NWC. Target capex is capped by its own available cash after its lease payment. Target cash never funds legacy expansion.

Beijing Yisheng; distinct from RiYang | June16 regulatory reply, PDF pages79 – 81; status as of2026-03-31

These conditions trigger diligence, not an agreed acquisition or closing. The six-month criterion was not met at that dated source; no current October status is inferred.

At an illustrative exact CNY50M annual net-income criterion, an unknown0 – 100% ownership gives0 – 50M attributable after-tax target net income before price, funding, PPA, integration or dilution. This is neither an upper bound on future profit nor a pre-financing parent OP estimate. No source supplies an agreed ownership, consideration, usable recurring pre-finance OP bridge or purchase-resource interval.

No defensible numerical closing event and company economic amount can be specified from the reviewed terms. Do not multiply an invented purchase share or zero cost by a trigger probability. The model contains no quantified Beijing Yisheng acquisition contribution; this is a specific unquantifiable-economics gap, not a0% belief that a future transaction can happen.

Approved R3 has no Yisheng contribution and is unchanged by this disposition.

T071 | Yisheng dated diligence tests | CNY million

Dated source measure	CNYM
annual net income at least	50.000000
alternative each of six consecutive months at least	4.000000
reported FY2025 net income	20.021000
reported Q12026 net income	2.054600
reported prior six month net income	9.902300

Updated dated trigger performance and actual diligence decision

Purchase share, price, funding, timing and closing conditions

Financial bridge from statutory target NI to recurring pre-financing parent OP

Customer/product overlap, paid capacity and working-capital resources

Cash, working capital, debt and failure cases

Operating cash flow was CNY 286.612M versus CNY 397.677M cash capital expenditure. Cash capex includes prepayments and cannot be equated with CNY 69.466M newly added PPE. D&A totaled CNY 231.991M; ordinary share compensation stays charged to earnings. Receivables, inventories and supplier credit are material funding balances. The resulting manufacturing recovery has value, but expanding receipts requires cash as well as booked profit.

The available-cash plan starts from cash equivalents and excludes the restricted monetary-funds difference. It pays interest, tax, current debt obligations, leases, the approved interim dividend and transaction spending. Future credit availability and refinancing fractions are LOW conditional assumptions. There is no automatic equity rescue or liquidation of investments to fund the forecast.

H1 2026 consolidated asset statement. Cash equivalents, restricted monetary funds, receivables, inventory and capital balances have different funding roles.

Source: 2026-08-31 | PDF page 69 | https://static.cninfo.com.cn/finalpage/2026-08-31/1225534968.PDF
Original PDF SHA256: 34661db3358b3e87e8aa600fcab819c80239796609ebd402ab3110d813c3f44c

Working capital uses a net-trade-capital proxy. Forecast impairment reserves are withheld from available cash, rather than added back without a supporting allowance roll. The displayed cash plan is an economic available-cash measure, not a claim to forecast statutory GAAP cash flow. Capital spending occurs only above the named reserve; unpaid budgets do not buy future output. Expected average cash cannot finance an individual outcome.

The model's capital-asset pool combines the relevant PPE, CIP, prepayments, intangibles and right-of-use asset balances. It is not labeled closing GAAP fixed assets. Future product capacity, depreciation allocations, collections and funding terms remain explicit LOW proxies where company disclosure does not supply them.

T006 | H1 2026 balance sheet | CNY million

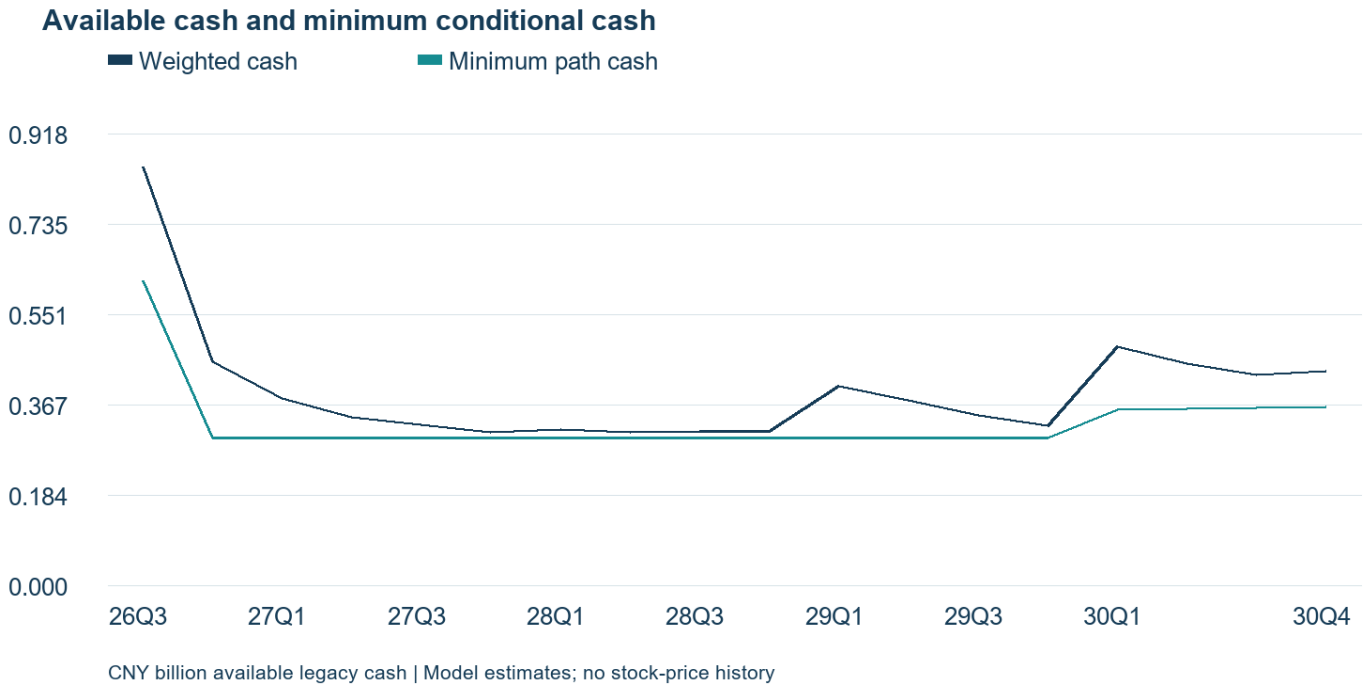

Source balance	Amount	Unit
cash	1,023.188582	CNYM
cash equivalents	1,018.190339	CNYM
restricted cash	4.998243	CNYM

construction in progress	130.224895	CNYM
prepaid construction	100.272097	CNYM
prepaid equipment	152.785251	CNYM
prepaid building purchase	54.173869	CNYM
debt less cash excluding lease	1,896.407697	CNYM

T007 | H1 2026 balance sheet | issued / treasury shares (units)

Source balance	Amount	Unit
shares issued	306,210,771	shares
treasury shares at notice	1,307,206	shares

T008 | Funding principal and capital-pool scope | CNY billion

Approved model control	Amount (CNYB)
Bank principal used by funding law	2.917995
Current bank principal maturity	0.847980
Lease balance, separate from bank principal	0.048028
Available cash equivalents	1.018190
Reported net PPE	3.625323
Broader modeled capital-asset pool; not GAAP PPE	4.294723

Economic available cash pays working capital, taxes, interest, debt, leases, dividends, acquisition and capital spending. Each conditional path must finance itself. The weighted average cannot lend money to an unfunded path; target cash is ringfenced.

T032 | CASH | Exact plotted data

T068 | Financial-law derivations | explicit units and timing

Step	Approved-law translation
Opening net trade capital	NWC = net AR + notes receivable + receivable financing + inventory + prepayments + contract assets □ AP □ notes payable □ contract liabilities □ employee payables □ other payables. NWC/annual-sales ratio = opening NWC ÷ (2 × reported H1 receipts).
Legacy NWC and cash	Required closing legacy NWC = legacy quarterly receipts ×4 × starting NWC ratio. Legacy economic cash generation = legacy OP + legacy D&A + income-linked SBC □ cash interest □ cash tax □ change in NWC. No separate forecast impairment cash addback is credited.
Interest and income tax	Legacy quarterly interest = opening bank principal × annual interest rate ÷4. Legacy cash tax = max(legacy OP □ interest,0) × tax rate. Statutory investment/FV gains are excluded from this recurring cash law.
Principal maturity	First four modeled quarters use current principal maturities ÷4; subsequent quarters use initial bank principal ×8% ÷4. Cash repayment = contractual maturity ×(1□conditional refinancing fraction). Lease cash remains a separate payment.
Cash spending order	Opening legacy cash + economic cash generation pays debt principal, leases, dividend and the full conditional acquisition payment. Bank draws are limited by unused conditional credit and the cash-floor/mandatory-capital requirement.
Capital priority	Available cash above the reserve pays maintenance first, then the named other-site phase, then any legacy-paid target capital and finally legacy expansion. Each payment is capped by remaining cash above the floor; unpaid budget buys no capacity.
Maintenance and asset pool	Maintenance health for the next quarter falls by the printed decay rate × unpaid maintenance fraction. The capital-asset pool adds paid capital and deducts legacy manufacturing plus nonfactory D&A; it is not asserted to equal GAAP PPE.
Borrowing and conditional failure	Closing bank principal = opening principal □ principal cash paid + new draw. Every joint path retains its own cash, debt and prior-quarter links. A positive-weight legacy reserve breach or target cash shortfall blocks the affected executable ceiling.

Rule16b joint paths and uncertainty

The model completes each joint operating and funding path before weighting its quarterly operating profit. Joint weights 25%,50%,25% are subjective judgments. They represent correlated qualification, productive capacity, commercial terms and funding outcomes; repeated management discussion is not another independent confirmation.

The first outcome retains reference demand with stalled incremental capture and tighter financing. The central outcome achieves half the defined incremental capture, advanced-mix and productivity endpoints with later acquisition timing. The final outcome achieves the full bounded endpoints with stronger paid execution. Inner realization fractions are conditional amounts. The outer joint weights are the probabilities.

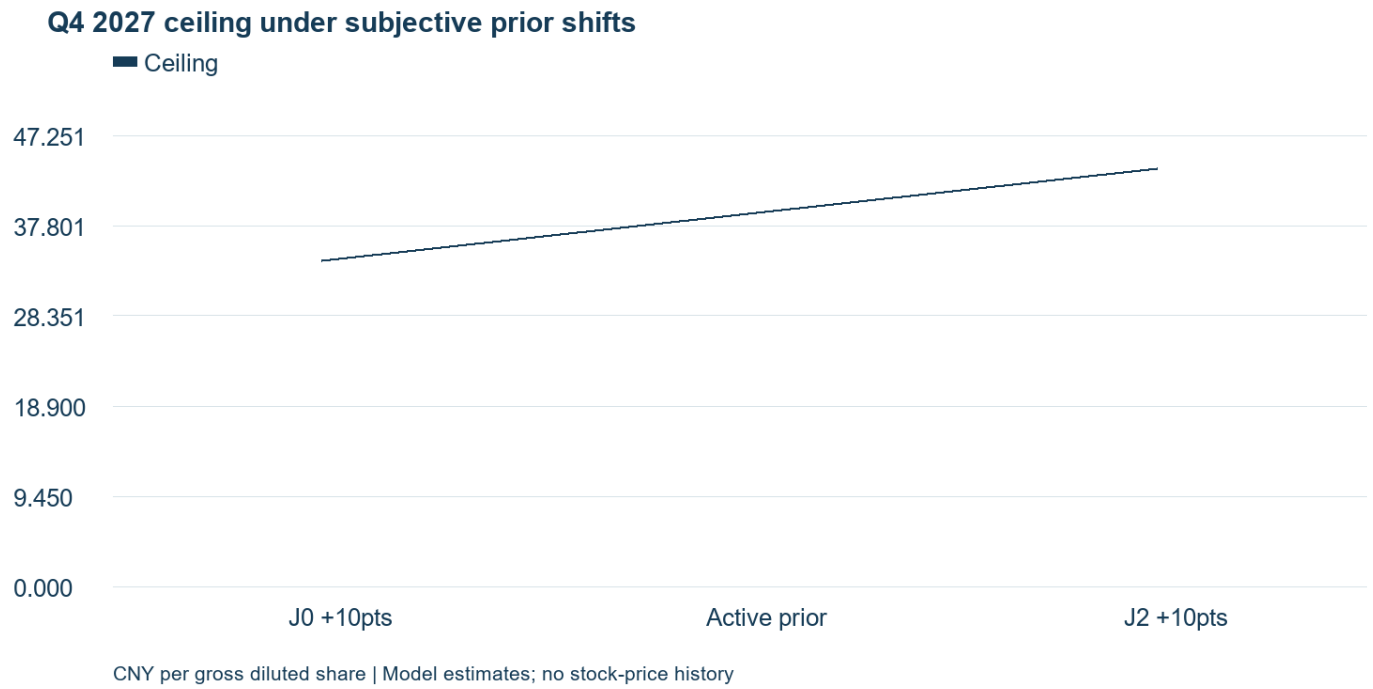

These priors recognize actual order conversion, customer qualifications and process progress, while preserving adverse outcomes for utilization, competing suppliers and capital funding. A future exact wallet award is not required to model a credible opportunity. Conversely, a small qualified product order does not establish the entire outer-year sales endpoint. The full numerical ledger identifies conditional amount, reference already modeled, overlap, timing, probability and counter-triggers.

Counterfactual contribution tests recalculate the whole cash/capacity path. Their marginal effects cannot be summed as independent target changes. Material prior and capacity uncertainty remains beside the active forecast. A positive-weight path with an unfunded cash gap makes the affected executable valuation unavailable. Raw arithmetic from an infeasible diagnostic is never presented as funded company value.

Four scored risk classes receive one point each: customer concentration; capital intensity, funding and impairment burden; policy/export exposure; and qualification, execution and competing suppliers. Top-five main-sales concentration was 70.36% inFY 2025. The customer-group related-party flag does not make the entire 17.21% group related revenue; disclosed related transactions within the top-five grouping were much smaller. Subsequent named related receivables require their own collection review.

Dated tests include the October 28 result and October 29 briefing, factory output and gross-margin evidence, accepted advanced-product repeats, inventory/receivable conversion, refinancing and acquisition conditions. More product validation without accepted volume should not mechanically raise a mature sales endpoint. Worse collection, repeated impairments or missed paid capital can lower both receipts and margins.

NAURA, AMEC, Piotech, ACM Research and Hwatsing illustrate the equipment ecosystem, but anonymized current customer ranks are not assigned invented identities. Fortune and other component suppliers can benefit from the same tool build while competing for different qualified content. Equipment revenue already contains purchased parts. It cannot be summed with all supplier sales as a unique industry TAM. No other covered company is rescored by this Fortune review.

Prior weights are subjective25%/50%/25% judgments applied after completing the full conditional cash/capacity paths. Ten-point weight shifts and whole-path controls are separate non-additive diagnostics, not additional independent catalysts.

Conditional controls are non-additive whole-path counterfactuals. Infeasible positive-weight paths make executable ceiling unavailable; raw arithmetic is diagnostic only. Weight perturbations are subjective-prior sensitivities, not evidence-based new priors.

Quarterly ceiling path and derivations

The sanctioned multiple remains 20x recurring parent economic operating profit, before financing and tax, after normal depreciation, ordinary share compensation, normalized impairment expense and both minority claims. Each ceiling prices its own quarter and the following three quarters. The starting quarter's gross forward diluted-share proxy is used; no cash/enterprise-value adjustment or after-tax multiple is substituted.

The active Q4 2027 horizon prices Q4 2027 through Q3 2028. The full fifteen-window table and all four operating-profit terms for every ceiling follow the same approved model. The forward share path retains the existing 315M starting proxy and subsequent annual increments. Known issued shares, treasury and the forward proxy are distinct measures. Treasury shares are not deducted and re-added as new cash issuance.

Quarterly and annual tables are research estimates. FY2026 forecast rows cover H2 only and must be added to the reported H1 result for a full-year comparison. Long-range outputs are conditional company trajectories, not management guidance. They remain constrained by eligible demand, paid resources, funding and continuing costs.

Each ceiling prices the named quarter and its following three quarters using20x parent recurring operating profit, CNYB×1000 and the starting-quarter gross diluted-share proxy. Q4 2027 is the active horizon. Joint outcomes represent subjective conditional uncertainty.

T069 | Financial-law derivations | explicit units and timing

Step	Approved-law translation
Native ownership formula	Parent OP consumer S = ((group OP+Q)×P□Q□R_legacy) □ P×incremental acquired minority. Preserved native P=1,Q=0 and legacy R remain separate from the new acquired35% claim.
Complete conditional paths first	For each quarter, active parent OP = sum(outer joint weight × completed conditional parent OP). Complete cost/capacity/cash paths before this weighted sum. Realization fractions inside a state are amounts, not additional probabilities.
Rolling valuation	For each starting quarter t: F4 parent OP = OP[t]+OP[t+1]+OP[t+2]+OP[t+3]. Ceiling CNY/share = F4 parent OP in CNYB × sanctioned multiple ×1000 ÷ starting-quarter gross forward diluted shares in millions.
Funding guard	If any positive-weight path has a legacy or target funding gap through the priced window, executable ceiling is unavailable. Unfunded raw arithmetic remains a labeled diagnostic, never a funded valuation.

Complete active quarterly ledger

Complete J0 conditional ledger

Target-only rows before the stated consolidation quarter carry the dated FY2025 audit balances as inactive calculation anchors. They do not forecast the target’ s cash before closing and do not represent group assets or funding. J0 assumes no acquisition; its target cash and working-capital rows are inactive historical carry. For closing paths, post-consolidation target operations are conditional forecast outputs, ringfenced from legacy funding.

Target-only rows before the stated consolidation quarter carry the dated FY2025 audit balances as inactive calculation anchors. They do not forecast the target’ s cash before closing and do not represent group assets or funding. J0 assumes no acquisition; its target cash and working-capital rows are inactive historical carry. For closing paths, post-consolidation target operations are conditional forecast outputs, ringfenced from legacy funding.

Complete J1 conditional ledger

Target-only rows before the stated consolidation quarter carry the dated FY2025 audit balances as inactive calculation anchors. They do not forecast the target’ s cash before closing and do not represent group assets or funding. J0 assumes no acquisition; its target cash and working-capital rows are inactive historical carry. For closing paths, post-consolidation target operations are conditional forecast outputs, ringfenced from legacy funding.

Target-only rows before the stated consolidation quarter carry the dated FY2025 audit balances as inactive calculation anchors. They do not forecast the target’ s cash before closing and do not represent group assets or funding. J0 assumes no acquisition; its target cash and working-capital rows are inactive historical carry. For closing paths, post-consolidation target operations are conditional forecast outputs, ringfenced from legacy funding.

Complete J2 conditional ledger

Target-only rows before the stated consolidation quarter carry the dated FY2025 audit balances as inactive calculation anchors. They do not forecast the target’ s cash before closing and do not represent group assets or funding. J0 assumes no acquisition; its target cash and working-capital rows are inactive historical carry. For closing paths, post-consolidation target operations are conditional forecast outputs, ringfenced from legacy funding.

Target-only rows before the stated consolidation quarter carry the dated FY2025 audit balances as inactive calculation anchors. They do not forecast the target’ s cash before closing and do not represent group assets or funding. J0 assumes no acquisition; its target cash and working-capital rows are inactive historical carry. For closing paths, post-consolidation target operations are conditional forecast outputs, ringfenced from legacy funding.

Source register and exact unresolved gaps

Reported consolidated actuals, official management text, primary capacity records and audited target financials are distinguished from LOW inferred mix, capture, utilization, paid-capacity turns, credit, purchase allocation and target closing cash. The two management streams were fully retrieved as served; unserved precollection material is a precise completeness gap. Original licensed or issuer exhibits remain private within this research artifact.

Numerical derivations, conditional paths, the active probability-weighted path and sensitivities are part of the full report. Charts are generated from those same values, with readable numerical tables adjacent. The advisory thesis score is 70%; the existing protected Excel Base remains 72%. Price-dependent allocation, returns and ranking belong to the live workbook.
