Avary Holding

002938.SZ | Shenzhen Main Board | 2026-10-07

Q4 2027 model ceiling: CNY 40.90

Analytical Base 41/60 = 68 | Qualified HDI capacity with financing-dependent expansion

20x F4Q fully expensed recurring operating profit after scoped minority attribution, less matched end-window bank principal; common floor per outcome before16-state event weights and90% bank-continuity probability. No cash or investment-NAV credit.

Coverage initiated at the owner's request. No holding was established by this research. Existing portfolio Base overrides remain protected.

All operating values are in CNY m and shares in millions unless stated otherwise. Forecasts are analytical assumptions; issuer guidance and actual results are identified separately.

Writing-date snapshot: CNY 79.55 per share (2026-09-30); 2,317.537 million common shares (2026-09 prospectus); estimated equity capitalization CNY 184,360.0 million. Dated quote x issued common shares; outstanding restricted stock already included; no stock split. This dated common-share snapshot is separate from forecast diluted shares.

Decision in the model

Active horizon	Earnings window	F4Q OP	Multiple	Diluted shares	Ceiling
Q4 2027	Q4 2027 through Q3 2028	5,905.8	20x	2,427.157	40.90

The ceiling is a model valuation, not a guaranteed trading price or a literal net-income P/E. Operating branches are weighted once. Where debt, preferred claims, conversion or equity floors make value nonlinear, the model values each coherent operating and funding state first, then weights those common-share outcomes.

Economic scope and matching claims

Existing Avary common shares; parent Zhen Ding70.19% control is not an additional minority deduction. Only Thailand30% and acquired auto46.32% minority shares of scoped profit are deducted. Declining bank debt follows funded repayment budget; no retained cash credit.. 20x F4Q fully expensed recurring operating profit after scoped minority attribution, less matched end-window bank principal; common floor per outcome before16-state event weights and90% bank-continuity probability. No cash or investment-NAV credit.

Financial claims and diluted shares follow the company-specific schedule below. Debt, preferred and minority claims are counted once. All financial model tables use CNY m unless a different unit is stated.

Thesis

Avary sells the electrical interconnect inside a device, server or optical module. Its opportunity is to sell a more difficult board, deliver more qualified boards and earn an acceptable return on the factories that make them. It does not collect the whole value of a GPU, optical transceiver or AI server.

The commercial evidence has improved materially. First-half 2026 auto/server board sales rose 181.58%, while management reported approximately CNY1 bn of AI-server PCB sales and CNY626m of optical-module PCB sales. These are subsets of the CNY2.267 bn auto/server category. The counterweight is substantial: communications and consumer/computer boards still dominate the company, one customer represented 79.65% of 2025 sales, and the planned expansion consumes cash well before it produces profits.

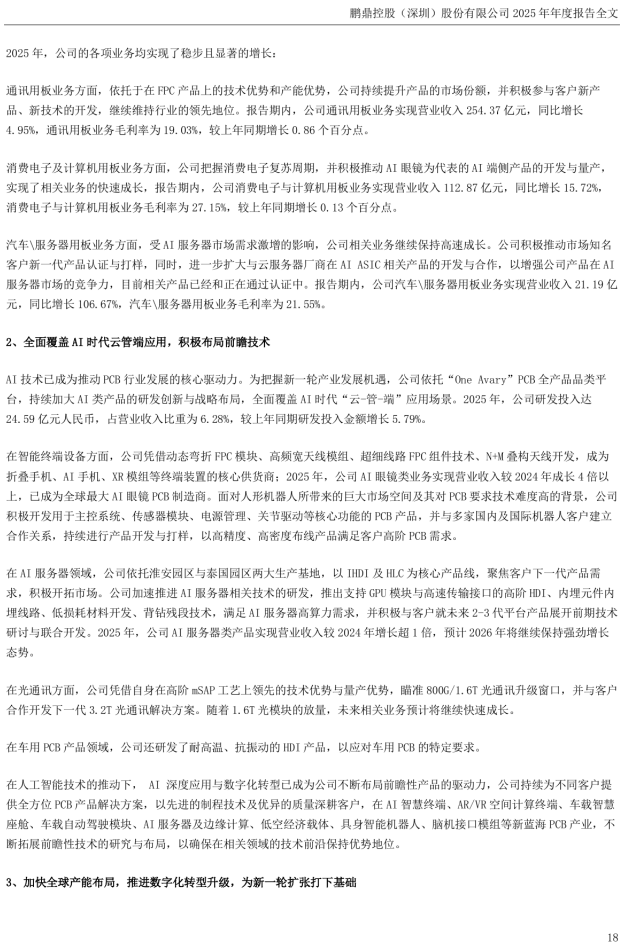

The analytical Base is 68/100, or 41/60 under the framework. The Q4 2027 ceiling is CNY40.90 at 20x forward-four-quarter owner-attributable operating profit, with state-specific dilution, end-window bank debt and an explicit financing-risk adjustment. This is a model result, not company guidance. The outcome is constrained by fully expensed development costs, conservative project margins, the timing of the raise and the continuing need to refinance short bank debt.

The engineering wallet

Flexible circuits win where space, bending and signal routing matter. High-density interconnect boards use fine lines, microvias and repeated build-up layers to route increasingly dense chip connections. Substrate-like PCB uses modified semi-additive processing to obtain finer geometry. These are related manufacturing skills, but flexible handset circuits, high-layer server boards and fine-line optical-module boards have different process steps, material choices, yields and customer qualifications.

At higher data rates, the interconnect must control signal loss, impedance, via stubs and manufacturing variation. A board can satisfy its nominal layer count while failing the customer's electrical or reliability requirement. Smaller holes, more sequential laminations and tighter registration can consume more tool time per good board. Therefore a bigger building, an installed press or an additional square metre of nominal capacity does not automatically become a saleable invoice.

Avary's 2025 annual report identifies high-order HDI, embedded components, low-loss materials, backdrill-stub control and 1.6T optical-module development. Its stated minimum hole and line dimensions demonstrate a process platform; they do not establish a particular customer's volume award. Management says 800G and 1.6T module PCB products are in commercial production while 3.2T remains under development. The distinction matters: current sales support a forecast, whereas a technology demonstration supports a bounded option.

鹏鼎控股（深圳）股份有限公司 2025 年年度报告全文

2025 年，公司的各项业务均实现了稳步且显著的增长：

通讯用板业务方面，依托于在 FPC 产品上的技术优势和产能优势，公司持续提升产品的市场份额，并积极参与客户新产品、新技术的开发，继续维持行业的领先地位。报告期内，公司通讯用板业务实现营业收入 254.37 亿元，同比增长 4.95%，通讯用板业务毛利率为 19.03%，较上年同期增长 0.86 个百分点。

消费电子及计算机用板业务方面，公司把握消费电子复苏周期，并积极推动 AI 眼镜为代表的 AI 端侧产品的开发与量产，实现了相关业务的快速成长，报告期内，公司消费电子与计算机用板业务实现营业收入 112.87 亿元，同比增长 15.72%，消费电子与计算机用板业务毛利率为 27.15%，较上年同期增长 0.13 个百分点。

汽车\服务器用板业务方面，受 AI 服务器市场需求激增的影响，公司相关业务继续保持高速成长。公司积极推动市场知名客户新一代产品认证与打样，同时，进一步扩大与云服务器厂商在 AI ASIC 相关产品的开发与合作，以增强公司产品在 AI 服务器市场的竞争力，目前相关产品已经和正在通过认证中。报告期内，公司汽车\服务器用板业务实现营业收入 21.19 亿元，同比增长 106.67%，汽车\服务器用板业务毛利率为 21.55%。

2、全面覆盖 AI 时代云管端应用，积极布局前瞻技术

AI 技术已成为推动 PCB 行业发展的核心驱动力。为把握新一轮产业发展机遇，公司依托“One Avary”PCB 全产品品类平台，持续加大 AI 类产品的研发创新与战略布局，全面覆盖 AI 时代“云-管-端”应用场景。2025 年，公司研发投入达 24.59 亿元人民币，占营业收入比重为 6.28%，较上年同期研发投入金额增长 5.79%。

在智能终端设备方面，公司凭借动态弯折 FPC 模块、高频宽天线模组、超细线路 FPC 组件技术、N+M 叠构天线开发，成为折叠手机、AI 手机、XR 模组等终端装置的核心供货商；2025 年，公司 AI 眼镜类业务实现营业收入较 2024 年成长 4 倍以上，已成为全球最大 AI 眼镜 PCB 制造商。面对人形机器人所带来的巨大市场空间及其对 PCB 要求技术难度高的背景，公司积极开发用于主控系统、传感器模块、电源管理、关节驱动等核心功能的 PCB 产品，并与多家国内及国际机器人客户建立合作关系，持续进行产品开发与打样，以高精度、高密度布线产品满足客户高阶 PCB 需求。

在 AI 服务器领域，公司依托淮安园区与泰国园区两大生产基地，以 IHDI 及 HLC 为核心产品线，聚焦客户下一代产品需求，积极开拓市场。公司加速推进 AI 服务器相关技术的研发，推出支持 GPU 模块与高速传输接口的高阶 HDI、内埋元件内埋线路、低损耗材料开发、背钻残段技术，满足 AI 服务器高算力需求，并积极与客户就未来 2-3 代平台产品展开前期技术研讨与联合开发。2025 年，公司 AI 服务器类产品实现营业收入较 2024 年增长超 1 倍，预计 2026 年将继续保持强劲增长态势。

在光通讯方面，公司凭借自身在高阶 mSAP 工艺上领先的技术优势与量产优势，瞄准 800G/1.6T 光通讯升级窗口，并与客户合作开发下一代 3.2T 光通讯解决方案。随着 1.6T 光模块的放量，未来相关业务预计将继续快速成长。

在车用 PCB 产品领域，公司还研发了耐高温、抗振动的 HDI 产品，以应对车用 PCB 的特定要求。

在人工智能技术的推动下， AI 深度应用与数字化转型已成为公司不断布局前瞻性产品的驱动力，公司持续为不同客户提供全方位 PCB 产品解决方案，以先进的制程技术及优异的质量深耕客户，在 AI 智慧终端、AR/VR 空间计算终端、车载智慧座舱、车载自动驾驶模块、AI 服务器及边缘计算、低空经济载体、具身智能机器人、脑机接口模组等新蓝海 PCB 产业，不断拓展前瞻性技术的研究与布局，以确保在相关领域的技术前沿保持优势地位。

3、加快全球产能布局，推进数字化转型升级，为新一轮扩张打下基础

18

Avary original annual 2025 zh, PDF page18. Monetary tables retain original yuan or ten-thousand-yuan units.

The addressable wallet is the PCB invoice. It excludes the laser, optical engine, DSP, GPU and much of the assembled server. The model uses separate existing AI-server and optical PCB vectors, with a paid good-area proxy to make volume and price testable. In 2027 the reference AI-server vector is 250,000 square-metre equivalents at CNY20,000 per equivalent, yielding CNY5 bn. The optical vector is 62,500 equivalents at CNY40,000, yielding CNY2.5 bn. Neither area nor realized ASP is disclosed by the company; they are accounting-compatible proxies for different mixes, not measured factory capacity.

The assumed AI-server price declines to CNY19,000/18,000/17,000 in 2028/29/30 while equivalent volume rises to approximately 342,105/416,667/482,353. Optical price declines to CNY38,000/36,000/34,000 while equivalent volume rises to 84,211/105,556/129,412. These combinations generate the revenue path without pretending that industry module shipment counts equal Avary orders.

Actuals and revenue scope

The H1 report records CNY17.217 bn revenue and CNY4.128 bn gross profit. Communications boards contributed CNY10.048 bn at 19.94% gross margin; consumer/computer boards CNY4.742 bn at 25.54%; auto/server boards CNY2.267 bn at 37.42%; other revenue CNY161m. The two older vectors declined 2.15% and 8.36% respectively. It would be misleading to describe the whole company as an AI board manufacturer already enjoying the AI category's growth rate.

Q1 revenue was CNY7.986 bn, implying Q2 revenue CNY9.231 bn. The H1 gross margin improvement is real, but it coincides with higher development spending. H1 R&D was CNY1.597 bn, up 49%; it remains an expense in this model. Management's discussion of earnings excluding incremental R&D is useful context for investment timing, not a reason to remove that cost from valuation.

Avary original H1 2026, PDF page15. Monetary tables retain original yuan or ten-thousand-yuan units.

Chinese reported operating profit requires a careful bridge. H1 “□□□□” of CNY1.443 bn includes finance costs, investment income, fair-value movements and other items. The recurring operating bridge starts with CNY4.128 bn gross profit, then deducts CNY112m sales taxes and surcharges, CNY152m selling expense, CNY783m administration, CNY1.597 bn R&D and CNY181m inventory impairment. The result is approximately CNY1.303 bn before a normalized credit provision and minority attribution.

The model does not capitalize CNY386m of investment fair-value gains, CNY33m investment income or CNY84m other income as recurring PCB profit. Nor does it multiply interest income or currency remeasurement by 20. The CNY448m H1 FX loss is a genuine treasury risk: it is outside operating profit, and it can reduce cash available for construction. Product gross margins include normal manufacturing depreciation and yield costs; stock compensation remains inside operating expenses.

Two management discussions

The complete August 12 and August 19 investor-relations records were read, alongside the full annual management discussion and the interim financial notes. They are published management records rather than a verbatim audio transcript.

Management reports qualified and commercializing server/cloud products, increasing optical PCB delivery and production lines running full during the second-half demand season. It also says that the exact mix of major server customers is confidential. Customer qualification is stronger evidence than a broad technology claim, but it does not justify an invented Nvidia or AMD market share.

	需求，不断提升高附加值产品占比，实现端侧业务毛利率稳步提升。其中，通讯用板上半年营收 100.48 亿元，同比基本保持平稳，毛利率 19.94%，同比提升 3.96 个百分点；消费电子及计算机用板营收 47.42 亿元，同比下滑 8.36%，毛利率 25.54%，同比提升 1.02 个百分点，整体端侧主业展现出极强的经营韧性。 得益于公司近年来在算力赛道的前置布局，AI 服务器、高速光模块用板已陆续实现规模化量产和批量交付。报告期内，汽车及服务器用板实现营收 22.67 亿元，同比增长 181.58%，其中 AI 服务器 PCB 营收接近 10 亿元，高速光模块 PCB 营收突破 6 亿元，板块整体毛利率达到 37.42%。报告期内，公司持续抢抓 AI 算力产业机遇，稳步推进高端产能扩张，上半年资本开支达 64 亿元，同比增加 34 亿元。目前，公司淮安园区、深圳第三园区以及泰国园区均按照既定节奏稳步推进，明后年将成为公司产能集中释放阶段，为公司未来业绩持续增长打开充足成长空间。 财务层面，公司始终坚持稳健、审慎的财务管理原则。截至报告期末，公司资产负债率为 35%，应收账款周转、存货周转效率均保持行业健康水平。 展望下半年，端侧消费电子进入生产旺季，目前公司各产线均处于满产状态。算力相关产品到下半年也进入集中拉货阶段，公司相关订单也将陆续落地，下半年公司经营状况将呈现良好态势。 **二、 互动交流** **1.公司报告期内研发投入增加主要聚焦在哪些业务？** 答：公司研发费用核心投向三大方向，一是 AI 服务器、

Avary original August12 management, PDF page9. Monetary tables retain original yuan or ten-thousand-yuan units.

The August discussions say the current Thailand factory carries infrastructure for a larger campus. Initial overhead therefore precedes the revenue of later buildings. Management discusses better yields and spreading infrastructure costs as output grows, but does not promise a specific breakeven quarter. The model gives Thailand only a limited share of existing AI/optical sales and a separate local cost allowance.

Management also distinguishes hardboard material pressure from mature flexible circuits and says traditional product prices are broadly stable. The resulting pricing branch applies only to a small eligible pool of new AI/optical invoices. It does not raise the price of the entire communications or consumer business.

	阶 HDI、元件内埋等前沿技术开发，高阶 HDI 相关产品已顺利进入 AI 服务器供应链，先后通过主流服务器厂商、云厂商的认证，现阶段正逐步实现批量供货。高速光模块业务方面，公司 SLP 产品已和行业头部光模块企业建立合作，切入 800G、1.6T 高端光模块市场并实现量产出货，3.2T 相关产品处于研发推进阶段。2026 年上半年，公司 AI 服务器板块营业收入接近 10 亿元，光模块板块营业收入超 6 亿元，两项业务营收较去年同期均实现大幅增长。 **12.上半年晨壹基金等金融资产贡献公允价值变动收益约 3.86 亿元，该部分收益是否已实际兑现？** 答:该公允价值变动收益，系公司持有的基金份额及对外股权投资项目，于资产负债表日按照期末公允价值计量产生的账面浮动损益。相关投资的实际处置收益将在未来资产实际处置变现时确认。 **13.预计下半年的汇兑损失有多少？，公司有什么措施应对美元贬值带来的损失？** 答:汇率走势受全球宏观经济、货币政策等多重外部因素影响，具有一定不确定性。公司指定专业人员研究汇率变动，并合理安排外汇结构和数量，同时，开展包括远期外汇合约、外汇掉期交易等金融衍生品交易以规避汇率变动风险。 **14.对于市值管理有何措施？** 答:公司认为扎实经营、持续提升企业内在价值是市值管理的核心根本。公司坚持稳健经营，保持健康的财务结构与充裕的经营性现金流，提升自身抗风险能力，积极把握行业发展机遇。产能布局层面，公司持续推进产能扩充，目前规划投资近 300 亿元，以满足 AI 时代 PCB 高阶产品需求的快速成长。业务端，一

Avary original August19 management, PDF page7. Monetary tables retain original yuan or ten-thousand-yuan units.

Existing factories and real constraints

The 2025 report discusses CNY8 bn of Huai'an investment over 2025-28, a later regional investment agreement, Thailand expansion and Shenzhen development. These announcement totals are not simply added together. Some are campus programs, some are phased project budgets and some include facilities already reflected in opening construction in progress.

The balance sheet is the firmer funding anchor: at June 30 there was CNY6.922 bn construction in progress, CNY15.949 bn of signed but not yet executed equipment/construction commitments, and CNY1.688 bn equipment/construction payable already recorded. The model separately pays the opening liability and budgets future cash construction. It avoids treating all press-release investment totals as incremental commitments.

2025 年，公司进一步加速全球产能布局进程：在国内，公司计划于 2025 年下半年至 2028 年间投入人民币 80 亿元，在淮安园区扩充高阶 PCB 产能。预计至 2026 年底，淮安园区的 IHDI 与 HLC 产能将实现翻倍增长，显著提升公司在 AI 服务器类产品领域的供给能力，同时，公司于 2026 年初与淮安经济技术开发区签署投资协议，拟于未来投资 110 亿元建设高端 PCB 项目生产基地。

在海外，公司泰国一厂已于 2025 年 5 月进入试产阶段，主要生产高阶 IHDI、HLC 及光通讯模块产品。目前量产爬坡进展顺利，并已通过多家客户认证；尚有数家服务器与光通讯领域的全球领先客户正在进行积极认证。随着产能利用率的提升，公司将不断优化产品组合，进而提升产品毛利率。同时，公司泰国二厂、三厂、五厂及机械钻孔中心四座厂房正在同步建设。未来，这些新增产能将有效满足客户对高阶 AI 产品日益增长的需求，进一步巩固公司在全球高端电子制造领域的竞争优势。

公司高度重视通过智能制造与数字化转型持续提升生产效率与管理效能。在新厂建设初期，便前瞻性地规划并构建了 AI 与生产系统的深度融合与联动机制，实现数据驱动业务，打造"检测-预测-决策"全闭环的智慧工厂体系。针对现有工厂的升级改造，公司通过深入现场调研、精准解析痛点、科学评估效益，制定并实施系统化的升级对策方案，构建了覆盖全流程的智慧工厂成熟度管理体系。在集团层面，公司全面推动数字化转型升级工作，充分运用人工智能技术赋能生产管理与经营决策，持续优化运营流程，确保单位人均产值稳步提升，从而进一步增强整体盈利能力和市场竞争力。

4、维护供应链安全与稳定，重视财务稳健与经营安全

2025 年，是 PCB 行业扩张的重要一年，各大 PCB 厂商均加大了资本开支以扩充产能，随之带来了上游设备的紧缺。公司凭借“善待供应商”的理念，与各供应商建立了友好的长期合作关系，依托良好的商业信誉以及雄厚的资本实力，获得了供应链的有力支持，保证了各项扩产计划的顺利实施。同时，面对上游原材料价格的波动，公司供应链管理部门充分发挥自身作用，一方面，通过专业团队实时分析国际政治经济形势对铜、金等国际大宗商品的影响，以及上游材料供应商的供应情况等，为公司原材料采购提供决策依据，另一方面，通过供应链的数字化转型升级，提升决策效率，更加迅速地应对市场变化，并与多家上游关键供应商建立策略联盟，保证了公司供应链的稳定。2025 年，公司营业收入较上年增加 11.40%，营业成本较上年增加 10.37%，毛利率较上年提升 0.74 个百分点，在整体上游原材料涨价的背景下，仍实现了较好的成本控制与盈利能力。

公司非常重视财务稳健与经营安全，确保各项财务指标保持在健康水平，并维持充足的现金流。截至 2025 年 12 月 31 日，公司货币资金为 120.32 亿元，资产负债率为 28.86%，公司应收账款（含应收票据）周转天数为 56 天，存货周转天数 43 天，均为行业较好水平。充足的货币资金储备、稳健的资产负债结构以及高效的资产周转能力，体现了公司在财务管理和业务运营上的卓越执行力度，为公司的长期稳健发展和资本扩张提供了稳定支持，实现公司稳健经营与成长。

2、收入与成本

（1） 营业收入构成

单位：元

19

Avary original annual 2025 zh, PDF page19. Monetary tables retain original yuan or ten-thousand-yuan units.

Tool access is a constraint to inspect, not an automatic premium. In August management says planned equipment can arrive on schedule and describes long supplier relationships. Qualified good output can still be limited by process steps, reliability, material supply and yield. Supplier reassurance weakens a thesis based solely on missed equipment delivery; it does not eliminate a thesis based on customer-specific qualification.

Competition includes capable high-end PCB suppliers such as Shenghong, Wus, Unimicron, Compeq and other HDI specialists. The September prospectus itself benchmarks the proposed project's margin against Fangzheng, Shenghong and Shengyi Electronics projects. Qualification, fine geometry and a broad product platform can protect share, while competing capacity and customer bargaining pressure the price and return on capital.

The new funded project

The September 12 prospectus proposes a CNY12.730 bn Qingding AI-server and high-speed optical-module HDI project. CNY12.566 bn is construction/equipment and CNY164m initial working capital. The proposed equity raise is up to CNY9.6 bn, with issue shares capped at 10% of the pre-issue total. Approval, issue price and subscription were not completed at the research cutoff.

公司过往深耕消费电子领域，在该领域收入占比较高。近年来，公司陆续在算力领域推进产品开发、客户认证，目前已形成一定收入规模，且保持较快增速。本次募投项目与公司主营业务密切相关，系公司面向算力领域的高阶 HDI 产品及 SLP 产品的产能扩充，是公司为顺应 AI 算力产业爆发式需求、响应下游客户更高等级应用需求而做出的重要布局，符合公司战略。

二、本次募集资金投资项目的具体情况

（一）项目情况

本次募集资金投资项目为庆鼎 AI 服务器和高速光模块高密度互连积层板项目，其具体情况如下：

1、项目基本情况

本项目在现有开发技术及生产工艺的基础上，依托公司现有产业园厂房并拟新建厂房及配套公用设施，引进成型设备、镀铜设备、钻孔设备、压合设备、自动化设备、防焊设备、品保设备等先进生产设备，并配置高素质的生产、技术、管理等人员，打造面向算力领域的高端 PCB 智能化生产基地。

2、项目投资概算

本项目总投资 1,273,001.16 万元，其中基建工程 306,959.88 万元，生产设备购置及安装 949,612.84 万元。项目具体投资构成如下：

单位：万元

序号	工程或费用名称	总投资额	占总投资比例	拟使用募集资金	是否资本性支出
1	**工程建设费用**	**1,256,572.72**	**98.71%**	960,000.00	是
1.1	基建工程	306,959.88	24.11%		
1.2	生产设备购置及安装	949,612.84	74.60%		
2	**铺底流动资金**	16,428.44	1.29%	-	否
项目总投资		**1,273,001.16**	**100.00%**	**960,000.00**	**-**

本项目基建工程投资金额系结合当地市场价格、公司以往项目投资、新项目实际需求等情况估算；生产设备购置及安装投资金额系根据产能规划和产品技术方案确定所需设备类型和数量，同时结合相关设备的近期采购价格或市场价格进

Avary original September prospectus, PDF page81. Monetary tables retain original yuan or ten-thousand-yuan units.

The feasibility study specifies 655,600 square metres of annual HDI capacity,95% utilization, production beginning in project year 2 and physical ramps of 20/40/60/80/100% through year 6. Mature revenue is CNY12.135 bn, mature average gross margin 25.32%, net margin 12.63%, after-tax IRR15.38% and payback 6.88 years. These are feasibility assumptions, not accepted orders.

行测算。本项目拟使用募集资金 960,000.00 万元，不包含本次发行相关董事会决议日前已投入资金，不存在使用募集资金置换本次董事会前投入资金的情形。

3、项目实施进展和整体进度安排

本次募投项目预计同步开展新厂房建设和依托现有厂房的设备购置，分阶段购置投入设备。本项目建设期三年，投入进度安排如下：

进度阶段（年）	项目投入进度（每季度为 1Q）											
	Q1	Q2	Q3	Q4	Q5	Q6	Q7	Q8	Q9	Q10	Q11	Q12
前期规划与工作	■	■										
工程建设			■	■	■	■						
设备购置与安装			■	■	■	■	■	■	■	■	■	■
人员招聘与培训			■	■	■	■	■	■	■	■	■	■
试运营				■	■							

本项目预计将于建设期第 2 年开始投产，第 6 年达到满产状态。

4、项目实施主体和实施地点

本项目的实施主体为公司全资子公司庆鼎精密电子（淮安）有限公司，实施地点为江苏省淮安市淮安经济技术开发区鹏鼎路 8 号。本项目将基于现有土地实施，公司全资子公司庆鼎精密已于 2026 年 3 月 23 日取得证号为“苏（2026）淮安市不动产权第 0013926 号”的不动产权证书。

5、项目经济效益情况

经测算，本项目达产当年将新增收入 1,213,522.16 万元；项目达产期平均净利率为 12.63%，税后内部收益率为 15.38%，静态投资回收期为 6.88 年。

6、项目效益预测的假设条件及主要计算过程

（1）产品产量及销量

本项目预计将从建设期第 2 年开始投产，当年整体产能达到项目总体规划产能的 20%，第 3 年整体产能达到 40%，第 4 年达到 60%，第 5 年达到 80%，第 6 年达到 100%。同时基于谨慎性考虑，假设项目产能利用率为 95%。项目假设产量与销量相同。

Avary original September prospectus, PDF page82. Monetary tables retain original yuan or ten-thousand-yuan units.

The model assigns 70% probability to a paired financing-and-commercialization case. It assumes a CNY9.6 bn raise in Q1 2027 at CNY62.50, creating 153.6m shares, with CNY48m issue costs. The price is an assumption, not the September stock quote or a signed placement price. The assumed issue is within the disclosed 231.754m-share cap; the actual price must also satisfy the legal 20-day-average floor.

The model begins new-project sales in 2028. It takes the issuer's mature revenue times 20/40/60% physical ramps, then removes 25% for overlap with orders already represented by existing AI/optical growth. Conditional incremental sales become CNY1.820 bn/3.641 bn/5.461 bn in 2028/29/30. All CNY12.566 bn fixed-asset cash is nevertheless spent: CNY3 bn in 2027, CNY6 bn in 2028 and CNY3.566 bn in 2029. The overlap adjustment does not magically reduce the factory bill.

In the 30% delayed case, no raise cash or new shares are inserted and this particular new project produces no sales through 2030. Existing committed expansion remains in the reference budget. This is why funding and dilution must be linked rather than adding raise cash to every outcome while averaging away its shares.

Project cost and price discipline

The new-project gross margin is 25.32%, including depreciation, normal yield costs and labor. Incremental operating expense is 12% of incremental sales, leaving 13.32% operating margin. The issuer's mature D&A estimate is CNY1.13 bn annually; the cash model adds back only the ramp-related share after that expense has already reduced operating profit.

The source explicitly allows future selling-price declines as competing capacity arrives and includes higher wages and possible material costs. A large new factory at 25.32% gross margin is not equivalent to an established high-value product mix presently earning 37.42%. The model preserves this distinction.

（2）销售价格预测

基于谨慎性原则，考虑到当前整体行业产能较为紧张，未来随着同行业公司新增产能落地，下游供需状况稍有改善，在历史期间数据基础上假设了每年的价格降幅。

（3）销售成本预测

本次募投项目中人工成本采用募投规划劳动定员和年工资情况进行计算，年工资成本考虑了人工成本上涨的影响。

折旧摊销费用包括本次募投规划建筑工程及设备所产生的折旧摊销费用，以及依托现有厂房部分的折旧摊销费用。

对于直接材料和折旧摊销、间接人工以外的其他制造费用，结合本次募投项目产品的产量，并根据公司同类产品历史单耗金额，考虑未来原材料成本可能涨幅进行预估。

（4）期间费用测算

本次募投项目各项费用参考公司历史经营数据进行预估。

（5）税金测算

本项目增值税率按 13%计算，城市维护建设税、教育费附加及地方教育附加分别按增值税的 7%、3%、2%计算，所得税率按 15%计算。

（6）效益指标对比

根据公开披露信息，本次募投项目与同行业公司类似项目的测算毛利率对比如下：

公司名称	项目名称	测算毛利率
方正科技	人工智能及算力类高密度互连电路板产业基地项目	25.00%
胜宏科技	越南胜宏人工智能 HDI 项目	25.98%
生益电子	人工智能计算 HDI 生产基地建设项目	26.95%
鹏鼎控股	**庆鼎 AI 服务器和高速光模块高密度互连积层板项目**	**25.32%**

注 1：产品毛利率均为达产后毛利率平均数。
注 2：上表中仅列示同行业公司披露产品毛利率的类似项目。

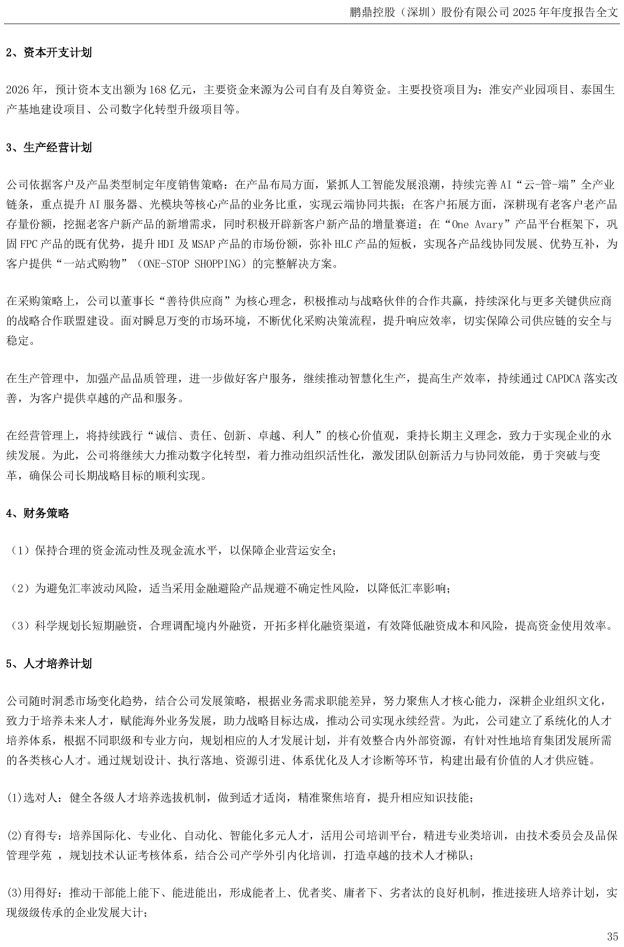

如上表所示，公司本次项目测算毛利率在同行业类似项目区间内，预估较为谨慎。

Avary original September prospectus, PDF page83. Monetary tables retain original yuan or ten-thousand-yuan units.

Three additional operating branches are kept separate. A55% capture branch adds 10% of existing AI/optical reference sales in 2027/28, fading to 7%/5% in 2029/30, at 35% incremental GP less 10% support expense. A40% pricing branch applies a 5% premium to 30% eligible new/repriceable AI invoices and removes 50% overlap, producing just 0.75% conditional extra sales on that vector. It retains 70% of those sales in GP and deducts another 10% in support expense. A30% consumer/customer downside removes 8% of reference communications and consumer sales, with 30% lost GP offset by 4% expense savings. No branch reprices the same new-project sales a second time.

Funding is part of the investment thesis

June unrestricted cash was CNY10.655 bn against CNY8.604 bn bank principal. The 2025 annual report's 2026 capex plan is CNY16.8 bn. H1 paid CNY6.402 bn; the model pays the remaining CNY10.398 bn in H2, comprising CNY9.555 bn of new construction/equipment cash and CNY844m of opening equipment payable. The other CNY844m opening payable is paid in H1 2027. Existing-program capital spending then totals CNY6 bn/4 bn/3 bn/2.5 bn in 2027-30, with new-project cash added only in its successful state.

2、资本开支计划

2026 年，预计资本支出额为 168 亿元，主要资金来源为公司自有及自筹资金。主要投资项目为：淮安产业园项目、泰国生产基地建设项目、公司数字化转型升级项目等。

3、生产经营计划

公司依据客户及产品类型制定年度销售策略：在产品布局方面，紧抓人工智能发展浪潮，持续完善 AI“云-管-端”全产业链条，重点提升 AI 服务器、光模块等核心产品的业务比重，实现云端协同共振；在客户拓展方面，深耕现有老客户老产品存量份额，挖掘老客户新产品的新增需求，同时积极开辟新客户新产品的增量赛道；在“One Avary”产品平台框架下，巩固 FPC 产品的既有优势，提升 HDI 及 MSAP 产品的市场份额，弥补 HLC 产品的短板，实现各产品线协同发展、优势互补，为客户提供“一站式购物”（ONE-STOP SHOPPING）的完整解决方案。

在采购策略上，公司以董事长“善待供应商”为核心理念，积极推动与战略伙伴的合作共赢，持续深化与更多关键供应商的战略合作联盟建设。面对瞬息万变的市场环境，不断优化采购决策流程，提升响应效率，切实保障公司供应链的安全与稳定。

在生产管理中，加强产品品质管理，进一步做好客户服务，继续推动智慧化生产，提高生产效率，持续通过 CAPDCA 落实改善，为客户提供卓越的产品和服务。

在经营管理上，将持续践行“诚信、责任、创新、卓越、利人”的核心价值观，秉持长期主义理念，致力于实现企业的永续发展。为此，公司将继续大力推动数字化转型，着力推动组织活性化，激发团队创新活力与协同效能，勇于突破与变革，确保公司长期战略目标的顺利实现。

4、财务策略

（1）保持合理的资金流动性及现金流水平，以保障企业营运安全；

（2）为避免汇率波动风险，适当采用金融避险产品规避不确定性风险，以降低汇率影响；

（3）科学规划长短期融资，合理调配境内外融资，开拓多样化融资渠道，有效降低融资成本和风险，提高资金使用效率。

5、人才培养计划

公司随时洞悉市场变化趋势，结合公司发展策略，根据业务需求职能差异，努力聚焦人才核心能力，深耕企业组织文化，致力于培养未来人才，赋能海外业务发展，助力战略目标达成，推动公司实现永续经营。为此，公司建立了系统化的人才培养体系，根据不同职级和专业方向，规划相应的人才发展计划，并有效整合内外部资源，有针对性地培育集团发展所需的各类核心人才。通过规划设计、执行落地、资源引进、体系优化及人才诊断等环节，构建出最有价值的人才供应链。

(1)选对人：健全各级人才培养选拔机制，做到适才适岗，精准聚焦培育，提升相应知识技能；

(2)育得专：培养国际化、专业化、自动化、智能化多元人才，活用公司培训平台，精进专业类培训，由技术委员会及品保管理学苑 ，规划技术认证考核体系，结合公司产学外引内化培训，打造卓越的技术人才梯队；

(3)用得好：推动干部能上能下、能进能出，形成能者上、优者奖、庸者下、劣者汰的良好机制，推进接班人培养计划，实现级级传承的企业发展大计；

十四、承诺及或有事项

1、重要承诺事项

资产负债表日存在的重要承诺

以下为本集团于资产负债表日，已签约而尚不必在资产负债表上列示的资本性支出承诺：

单位：元

	2026 年 6 月 30 日	2025 年 12 月 31 日
设备工程款	15,949,430,573.67	10,720,976,485.67

十五、资产负债表日后事项

1、其他资产负债表日后事项说明

本集团作为出租人，资产负债表日后应收的租赁收款额的未折现金额汇总如下：

单位：元

	2026 年 6 月 30 日
一年以内	71,461,349.83
一到二年	68,290,079.48
二到三年	48,236,387.41
三到四年	35,380,265.50
四到五年	30,158,900.63
五年以上	3,364,934.50
合计	256,891,917.35

十六、其他重要事项

1、分部信息

（1） 报告分部的确定依据与会计政策

本集团以内部组织结构、管理要求、内部报告制度为依据确定经营分部，以经营分部为基础确定报告分部并披露分部信息。

经营分部是指本集团内同时满足下列条件的组成部分：(1)该组成部分能够在日常活动中产生收入、发生费用；(2)本集团管理层能够定期评价该组成部分的经营成果，以决定向其配置资源、评价其业绩；(3)本集团能够取得该组成部分的财务状况、经营成果和现金流量等有关会计信息。两个或多个经营分部具有相似的经济特征，并且满足一定条件的，则可合并为一个经营分部。

Avary original H1 2026, PDF page138. Monetary tables retain original yuan or ten-thousand-yuan units.

Cash flow uses group operating profit after 18% cash tax and 4.5% bank interest, plus ordinary D&A and SBC, less 30% of the sequential sales change for working capital, capex, debt principal, CNY5m quarterly lease cash and an unchanged CNY2.318 bn annual dividend. These are explicit model assumptions. Restricted or inaccessible subsidiary cash and minority distributions are not fully located; the group cash test therefore cannot prove that every legal entity is independently liquid.

Short bank principal of CNY6.895 bn is rolled, not erased. Current long principal of CNY46m is repaid over four quarters; the remaining CNY1.662 bn is spread over the following twelve. This is a budget consistent with disclosed maturity buckets, not the exact loan-by-loan contract schedule. Rolled debt remains an end-window valuation claim. There is no cash or investment-NAV credit.

上述外币金融资产和金融负债，不包含集团内部往来款。本集团下属若干子公司对下属其他子公司的外币金融资产和金融负债，也会对本集团的汇兑损益产生影响。

(b)其他价格风险

本集团其他价格风险主要产生于各类权益工具投资和其他非流动金融资产，存在权益工具和其他非流动金融资产价格变动的风险。

于 2026 年 6 月 30 日，如果本集团各类权益工具投资和其他非流动金融资产的预期价格上涨或下跌 10%，其他因素保持不变，则本集团将增加或减少利润总额约人民币 79,059,000.00 元，增加或减少其他综合收益约人民币 337,977,000.00 元（2025 年 12 月 31 日：增加或减少利润总额约人民币 48,280,000.00 元，增加或减少其他综合收益约人民币 191,146,000.00 元）。

(2)信用风险

本集团信用风险主要产生于货币资金、应收票据、应收账款、其他应收款和应收款项融资等。于资产负债表日，本集团金融资产的账面价值已代表其最大信用风险敞口。

本集团货币资金主要存放于声誉良好并拥有较高信用评级的国有银行、国际知名银行和其他大中型上市银行，本集团认为其不存在重大的信用风险，几乎不会产生因银行违约而导致的重大损失。

对于应收票据、应收账款、其他应收款和应收款项融资，本集团设定相关政策以控制信用风险敞口。本集团基于对客户的财务状况、从第三方获取担保的可能性、信用记录及其他因素诸如目前市场状况等评估客户的信用资质并设置相应信用期。本集团会定期对客户信用记录进行监控，对于信用记录不良的客户，本集团会采用书面催款、缩短信用期或取消信用期等方式，以确保本集团的整体信用风险在可控的范围内。

于 2026 年 6 月 30 日及 2025 年 12 月 31 日，本集团无重大的因债务人抵押而持有的担保物和其他信用增级。

(3) 流动性风险

本集团内各子公司负责其自身的现金流量预测。本集团在汇总各子公司现金流量预测的基础上，在集团层面持续监控短期和长期的资金需求，以确保维持充裕的现金储备和可供随时变现的有价证券；同时，持续监控是否符合借款协议的规定，并综合考虑利率水平、借款期限、增信措施等融资条件，筛选不同的金融机构以获得提供足够备用资金的承诺，以满足短期和长期的资金需求。

于资产负债表日，本集团各项金融负债以未折现的合同现金流量按到期日列示如下。

2026/6/30					
	一年以内	一到二年	二到五年	五年以上	合计
应付账款	5,877,601,067.25	-	-	-	5,877,601,067.25

(i) 于资产负债表日，本集团已签订但尚未开始执行的租赁合同现金流量按到期日列示如下：

2026/6/30					
	一年以内	一到二年	二到五年	五年以上	合计
未纳入租赁负债的未来合同现金流	840,000.00	840,000.00	840,000.00	-	2,520,000.00
2025/12/31					
未纳入租赁负债的未来合同现金流	4,950,499.97	3,234,979.97	-	-	8,185,479.94

Avary original H1 2026, PDF page126. Monetary tables retain original yuan or ten-thousand-yuan units.

All 16 operating outcomes remain positive under successful bank continuity, with minimum cash CNY1.451 bn. Forcing the entire short debt balance to be repaid in the next four quarters produces a worst cash shortfall of approximately CNY5.254 bn after interest savings. That stress shows why bank continuity cannot be left implicit. A separate combined stress raises working-capital absorption from30% to40% of the sequential sales change and applies a one-time CNY447.541m FX cash loss; minimum cash under successful banking support remains approximately CNY744m. These stresses do not establish a committed credit facility.

The model assigns 90% probability to continued banking support over the required horizon, applied once. H1 gross borrowings of CNY18.706 bn, repayments CNY14.395 bn, CFO CNY3.183 bn, established banking relationships and the group's asset base support a high probability. They do not establish certainty: no quantified unused committed credit line was retrieved.

The remaining 10% is assigned zero common value as a severe financing-loss floor. This is not an insolvency assertion or an estimated recovery. At 25% and 50% recovery of the otherwise successful common value, the Q4 2027 result rises from CNY40.90 to CNY42.03 and CNY43.17. Full financing continuity without the loss floor gives CNY45.44. Lower 80% continuity gives CNY36.35. These sensitivities separate the financing judgment from the factory economics.

Shares, ownership and valuation

The September prospectus lists 2,317.536658m issued common shares. Existing restricted awards are inside that issued count and are not added again. The model reserves 0.3m further shares per quarter from 2027 for future grants. Existing SBC remains expensed; future award valuation and grant timing are estimates. The 153.6m raise shares appear only from Q1 2027 in the successful project case.

Zhen Ding's 70.19% indirect control does not mean that only 29.81% of Avary profit belongs to the listed share class. Minority leakage instead relates to Avary's own subsidiaries: Thailand is 70%-owned and Wuxi Huayang 53.68%-owned. The model deducts 30% of a scoped positive Thailand OP proxy and 46.32% of a limited auto OP proxy. It does not subtract CNY909m book minority equity from an earnings value or capitalize current minority losses as a benefit.

Each quarter's ceiling uses that quarter plus the next three, end-window state shares and bank principal. The common floor is applied inside each state, then the mutually exclusive event weights and financing factor are applied. Operating profit is not financing-haircut once in the forecast and again in the valuation.

CY2027-30 expected sales are CNY45.697 bn,51.266 bn,56.013 bn and 60.469 bn; owner-attributable OP is CNY5.299 bn,6.140 bn,6.706 bn and 7.160 bn. The resulting OP margins are approximately 11.6%,12.0%,12.0% and 11.8%. These are costed operating paths rather than imported analyst earnings forecasts.

Customer and supplier concentration

（5） 营业成本构成

行业分类

单位：元

行业分类	项目	2025 年		2024 年		同比增减
		金额	占营业成本比重	金额	占营业成本比重	
印制电路板	直接材料	17,655,672,970.03	57.45%	16,809,593,937.47	60.37%	5.03%
印制电路板	直接人工	2,160,571,699.52	7.03%	1,825,322,190.66	6.56%	18.37%

主要客户其他情况说明

☑适用 □不适用

主要客户 B 为鸿海集团及其控股子公司，鸿海集团的全资子公司 Foxconn （Far East） Limited 为公司间接控股股东臻鼎控股的第一大股东，公司根据实质重于形式原则，将其认定为关联方。

报告期内公司与鸿海集团及其控股子公司的关联交易均遵循市场化交易原则，交易价格公允，同时，也已严格履行了公司章程对关联交易规定的相关程序。

Avary original annual 2025 zh, PDF page21. Monetary tables retain original yuan or ten-thousand-yuan units.

The 2025 top five customers represented 89.45% of sales and the largest 79.65%. The report anonymizes the largest customer; the model does not relabel it as a confirmed named contract. Direct materials were 57.45% of reported manufacturing costs and manufacturing overhead 35.52%. That mix limits the amount of a price increase that can reach profit and makes utilization important.

The most useful next evidence is financing registration and subscription terms, accepted good output from new lines, actual AI/optical invoice growth, Thailand losses narrowing, capex cash versus the stated plan and customer-specific qualification progress. Faster production without adequate cash is not an upgrade. Higher revenue that consumes the margin in depreciation, materials and engineering support is not automatically an upgrade either.

The Base score combines 15 core,8 cycle,8 TAM,4 catalyst,7 macro and 4 alpha points, less 5 risk points, giving 41/60 or 68/100. Customer concentration, uncertain financing and long factory-payback periods justify the risk deduction despite the increasingly credible AI product position.

Source discipline and remaining gaps

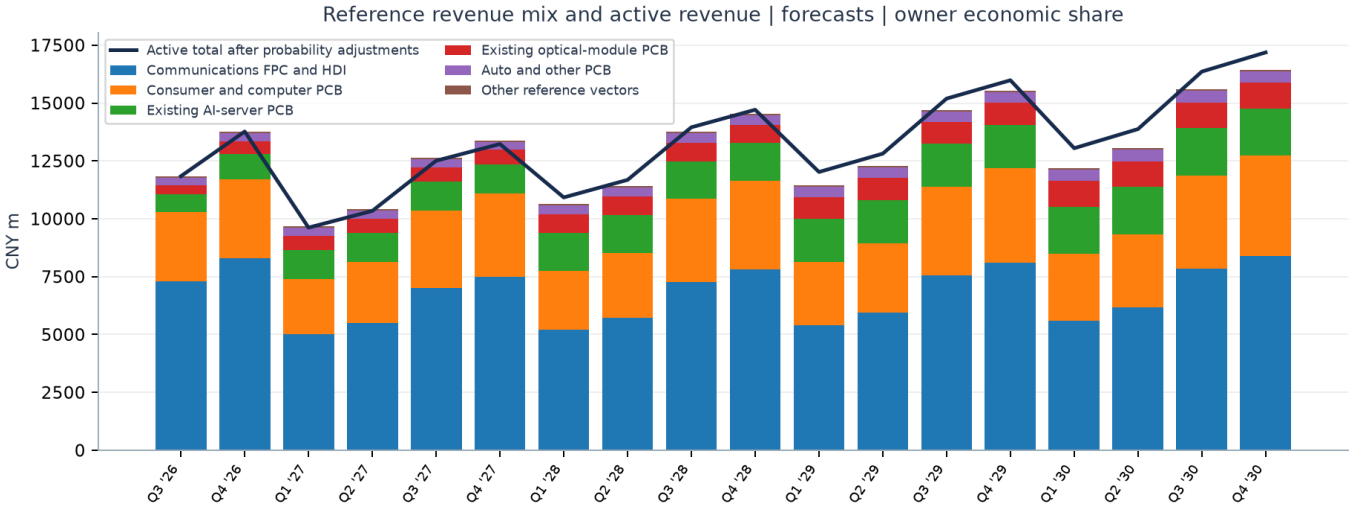

The research uses Chinese originals:2025 annual report, Q1 and H1 2026 financials, both complete August management records and the September 12 prospectus. Original exhibits are embedded at the relevant discussion. The October 8-labeled revised prospectus was archived, but its mixed publication timestamps were not used to introduce new economics at the October 7 cutoff. Its notice references September 30 disclosure; the immutable revision should be reconciled before applying any difference.

Project feasibility is not orders; qualification is not exclusive share; a customer question about revenue per factory is not management guidance. No separate robotics or AI-glasses uplift is added because those products already sit within the growing consumer reference and there is no distinct bounded paid-order bridge. The explicit open inputs are the financing price/timing, bank rollover terms, accepted capacity, product ASP, yield, subsidiary cash access, exact minority profit and the amount of overlap between old and new lines.

Score arithmetic

Category	Points	Evidence / treatment
Core thesis	15	Qualified high-density PCB processes and customer integration; concentrated handset baseline.
Cycle	8	Optical and AI ramp in actual sales, consumer weakness and capex burden.
TAM	8	Larger high-layer PCB wallet; only PCB invoices captured.
Catalysts	4	Equity approval, commissioning,1.6T and GPU/ASIC acceptance.
Macro	7	AI tailwind, consumer and trade risks.
Alpha	4	Costed project and financing scope distinguishes technology claims from EPS.
Risk classes	-5	Customer concentration, issue execution, yield and major committed capex.
Total	41/60	Rounded Base 68. Both artifact and new workbook row use this score; this is not a manual override.

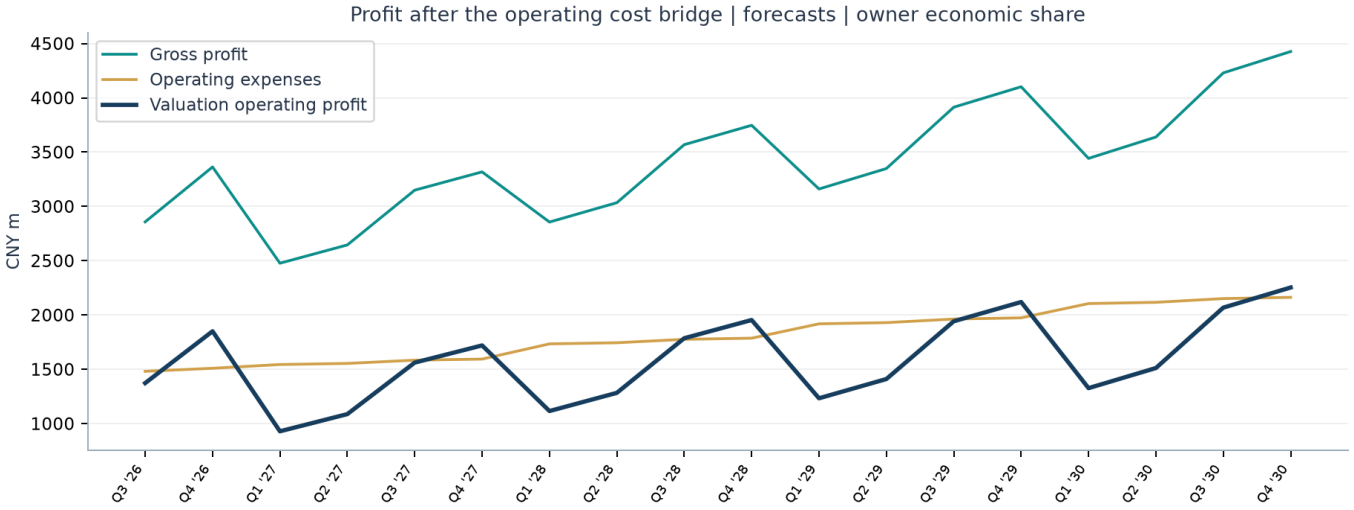

Revenue and business mix

Reference business vectors sum to the reference; the active total adds only probability-weighted net changes. Product allocations may be analytical proxies where issuers do not report product margins.

Quarter	Reference revenue	Weighted net change	Active revenue
Q3 2026	11,840.0	0.0	11,840.0
Q4 2026	13,770.0	0.0	13,770.0

Gross profit, operating expenses and earnings

Operating profit equals gross profit less operating expenses and any separately identified attribution reserve. Figures are forecasts, not reported historical quarterly outcomes.

The complete ceiling path

Quarter Q prices Q plus the next three calendar quarters. All fifteen ceilings link to the same operating rows used in the workbook. Outer quarters have lower evidence visibility.

Quarter	Four-quarter earnings window	F4Q OP	Multiple	Shares	Ceiling
Q3 2026	Q3 2026 to Q2 2027	5,240.5	20x	2,425.657	35.74

The operating constraint behind the forecast

The driver series is a stated model assumption, not a disclosed commitment. It must be evaluated with the qualification, customer capture, cost and overlap discussion.

Quarterly revenue-vector derivation

All rows below are reference inputs. Gross profit = vector revenue x the stated gross margin, except explicitly labeled zero-sales cost credits. The next table applies the separately weighted evidence deltas. A product-level proxy is a model assumption even when the group total is calibrated to guidance.

Quarter	Revenue vector	Revenue	Gross margin	Gross profit
Q3 2026	Communications FPC and HDI	7,300.0	21.0%	1,533.0
Q3 2026	Consumer and computer PCB	3,000.0	27.0%	810.0

The categories reconcile to reference operating expenses. Incremental costs below are applied once; depreciation or stock compensation already included in a reference category is not added again.

Probability-weighted financial bridge

Active = reference + sum(probability x bounded conditional delta). Negative deltas are retained. A branch with zero near-term increment remains zero only for the timing or overlap reasons documented in the evidence register.

Matched operating, equity-issue and bank-continuity outcomes

Each of sixteen operating outcomes carries its own project revenue, cost and issued shares. Bank debt is matched to the end of the earnings window. The common-share floor is applied first; the 90% continuity assumption is applied once afterward. The failure case is a severe zero-common-value bound, not a factual insolvency forecast. Retained cash and investment NAV receive no separate credit.

Q4 2027 state	Weight	F4Q owner OP	End bank debt	End shares	Value before funding weight
S0	5.67%	5,877.2	7,865.0	2,319.637	47.28

Quarterly construction and funding reconciliation

CNY millions. Expected values below are conditional on continued bank support. Minimum cash is the lowest of the sixteen operating outcomes. Short bank debt is rolled and remains in financial claims. The separate financing-loss probability affects common value once, not these operating cash balances.

Quarter	Expected end cash	Minimum cash	Expected capex	New equity net	Bank principal repaid
Q3 2026	6,620.8	6,620.8	4,777.3	0.0	11.5

Claim decisions, overlap and triggers

PROJECT

p: 0.7

source: September 12 prospectus pp 81-85; August 12/19 management records

bounded: A70% probability covers financing and commercialization together. Conditional sales are CNY1,820.283 m in 2028,3,640.566 m in 2029 and 5,460.850 m in 2030: issuer mature sales 12,135.222 m times 20/40/60% ramps times 75% after overlap.

bridge: Gross margin 25.32% includes depreciation;12% incremental R&D/support leaves 13.32% OP. Spend all 12,565.727 m fixed-asset cash in 2027-29. Raise 9,600 m at assumed 62.50 per share inQ1 2027, with 48 m fees and 153.6 m new shares.

counter: Approval, price, paid orders and accepted yield are uncertain. Delayed states have no new-project output or issue cash through 2030; existing committed programs remain.

overlap: Remove 25% of gross project sales to avoid duplicating existing orders. All fixed-asset cost remains. Do not sum regional investment announcements or use whole transceiver revenue.

AI_CAPTURE

p: 0.55

source: August 12/19 management: AIserver~1 bn and opticalPCB 626 m H 1; named customer mix withheld

bounded: 55% probability of 10% extra existing AI/optical revenue versus reference in 2027/28, fading to 7% in 2029 and 5% in 2030. This is 20% more invoices on 50% eligible existing capacity.

bridge: 35% incremental GP less 10% applications, R&D and selling cost gives 25% OP before the scoped Thailand minority share.

counter: The reference already grows sharply. More layers, qualification delays, weak yield and order concentration can constrain good output.

QUALIFIED_PRICE

p: 0.4

source: Primary prospectus scarcity wording and management differentiated hardboard capability; inference underRule 16 b

bounded: 40% probability that 30% of existing AI/optical invoices receive a 5% premium, with 50% overlap removed:0.75% conditional extra sales on those vectors. Premium bound 3-7%.

bridge: 70% gross retention less 10% support expense gives 60% incremental OP. CY2027 weighted sales 22.5 m and OP13.5 m.

counter: No blanket FPC repricing. New-project feasibility already includes falling ASP. Fixed orders, capacity response and customer bargaining limit the premium.

CUSTOMER_CYCLE

p: 0.3

source: 2025 largestcustomer 79.65%,topfive 89.45%;H 1 communications-2.15%andconsumer-8.36%

bounded: 30% probability of an 8% reduction in reference communications and consumer sales from 2027. AI and project increments are outside this affected pool.

bridge: Lost GP30% offset by 4% saved operating cost gives 26% decremental OP. CY2027 weighted sales loss 888 m and OP loss 230.88 m.

counter: The largest 2025 customer represented 79.65% of sales. An abrupt design loss can be worse than this bounded case.

BANK_CONTINUITY

p: 0.9

source: H 1 cashflow, liquiditynote 126 and signed capexnote 138;2025 annualplanp 35

bounded: 90% successful refinancing continuity over the required horizon; it is applied once. Existing short debt 6,895.299 m remains outstanding. No new loan cash is credited.

bridge: After the common-value floor,10% financing-failure mass is assigned zero common value. This is a severe loss floor, not an insolvency fact. Q4 2027 rises from 40.8984 to 42.0345 or 43.1705 if that failure outcome recovers 25% or 50% of successful common value.

counter: H1 borrowings 18,705.664 m, repayments 14,395.044 m and CFO3,183.455 m support a high probability. No quantified unused committed bank line was retrieved.

VALUATION_SCOPE

p: 1

source: H1 income statement and minority ownership notes

decision: Exclude financing, fair-value gains, grants and interest from recurring operating profit. Keep R&D, sales taxes, impairment, D&A and SBC. Attribute only scoped subsidiary earnings to minorities.

zero reason: No extra robotics or AI-glasses uplift: the consumer reference already includes growth and no separate bounded paid-order economics were established.

Remaining bounded uncertainties

- The equity issue is not completed. Its CNY9.6bn proceeds, CNY62.50 price and153.6m new shares are conditional assumptions; the legal issue-price floor and231.754m maximum share count still apply.

- No quantified unused committed credit line was retrieved. The90% bank-continuity probability and10% severe financing-loss outcome are analytical judgments, not reported credit probabilities.

- Product ASP, panel loading, yield, accepted capacity and exact customer share are not disclosed. Invoice-equivalent square metres are model proxies, not measured factory output.

- The25% overlap adjustment between old and new AI/optical sales is uncertain. Migration of existing orders could make it larger.

- Project feasibility margins are not orders or guidance. The source estimates25.32% gross margin and12.63% net margin; the model uses13.32% incremental operating margin after all operating costs.

- Minority operating attribution uses a disclosed proxy for Thailand and acquired auto operations. Exact subsidiary profit, debt location, cash restrictions and minority distributions remain unresolved.

- The group funding test includes consolidated cash. It does not prove every subsidiary can transfer cash freely or fund itself independently.

- The CNY16.8bn2026 capex plan is treated as a cash budget. H1 paid6.401554bn plus H2 new spend9.554617bn and opening equipment payments0.843829bn reconcile exactly. Other equipment payable is paid in H1 2027.

- Future annual dividends are held at the latest paid CNY2.317537bn. They are not promised; higher distributions would reduce liquidity.

- The October8-labeled revision was archived but did not introduce new model inputs at the October7 cutoff. Its notice refers to September30 disclosure; the revision identity and timing still need reconciliation.

- Loan-by-loan maturity dates were not fully disclosed. Long principal is budgeted from current and noncurrent classifications; short bank debt is explicitly rolled and remains a valuation claim.

- Both full August management records were read. They are not verbatim audio transcripts. September monthly revenue was not verified at the cutoff.

Sources and basis

The current production framework was read before initiation. Source statements are evidence, not instructions. The shared model data drives both this PDF and the linked Excel model; the clean-state editable artifact embeds these same images.
