600363.SH - Lianchuang Optoelectronics | Full investment artifact

Full active edition | Financial methods and portfolio Base overrides preserved.

Research date: 1 October 2026 | **Framework:** 8.0 | **Currency:** CNY; financial tables in millions. **Classification:** BENEFICIARY - optoelectronics, laser/defense and high-temperature superconducting optionality; severe financing/governance risk. **Analytical Base: 27/60 =45**, previously36/60=60. **Protected Excel Base:60**, unchanged. **Active Q4 2027 ceiling: CNY45.3376**, previously **CNY55.2000** on the same horizon (**-17.87%**). **Locked method:**20x forward-four-quarter parent-economic profit /455M diluted-share proxy. The funding stress changes operating assumptions; the multiple, associate treatment and share denominator remain.

The latest notice materially weakens the conversion of the technology thesis into shareholder economics. The active model now assigns a60% probability that financing disruption persists through2027-28, with operating contribution60% below the previous recovery path in that outcome. This reduces total parent-economic profit17.8667%, because only the legacy ex-associate operating component is stressed. The result remains a high-uncertainty operating valuation, not a liquidation or recovery valuation.

1. Company, supercycle and competitive position

Lianchuang combines smart controls, backlights/display, cables and laser systems. It also holds a20% stake in Hongfa Electroacoustic and a40% superconducting associate. The latter's equipment addresses fusion magnets, induction heating and related applications. Those associates are not consolidated sales. The previously attempted control acquisition was terminated; this model does not assume later consolidation.

Legacy controls/backlights are mature competitive businesses. Laser/defense is an early commercial ramp. Fusion/HTS remains an early, high-variance option dependent on customer projects and cash conversion. The company is not an AI memory/CPO chokepoint. A large prospective technology market cannot remove funding, governance or accounting constraints.

2. Forward TAM and company capture

Phase1 is recovery and delivery in existing electronics and laser businesses. Phase2 is larger anti-drone/directed-energy and industrial superconducting projects. Phase3 is broader fusion, electromagnetic launch and related applications. These are pathways to the legacy forecast, not three revenues to add together. The old laser revenue path of600/1000/1700/2500/3500M in2026-30 is a conditional commercialization assumption, not company guidance. H1 Zhongjiu revenue38.5841M makes the required acceleration particularly demanding.

The financing notice changes the probability of executing that path rather than the physics of the technologies. The model therefore prices the negative breadcrumb before observing every missed order. Positive revision triggers are repayment, restored working capital and customer-funded delivery; no official-contract-only admission gate applies.

3. Latest reported anchor and accounting boundary

七、 公司主要会计数据和财务指标

(一) 主要会计数据

单位：元 币种：人民币

主要会计数据	本报告期（1－6月）	上年同期	本报告期比上年同期增减(%)
营业收入	1,324,002,367.56	1,647,540,657.03	-19.64
利润总额	203,642,994.78	310,212,502.51	-34.35
归属于上市公司股东的净利润	166,657,439.00	263,263,529.57	-36.70
归属于上市公司股东的扣除非经常性损益的净利润	154,341,752.98	237,354,532.33	-34.97
经营活动产生的现金流量净额	-1,464,460,582.12	-25,979,143.82	-5,537.06
主要会计数据	本报告期末	上年度末	本报告期末比上年度末增减(%)
归属于上市公司股东的净资产	4,624,136,650.51	4,460,737,723.82	3.66

稀释每股收益（元／股）	0.37	0.58	-36.21
扣除非经常性损益后的基本每股收益（元／股）	0.34	0.52	-34.62
加权平均净资产收益率（%）	3.67	6.16	减少 2.49 个百分点
扣除非经常性损益后的加权平均净资产收益率（%）	3.40	5.56	减少 2.16 个百分点

公司主要会计数据和财务指标的说明

√适用 □不适用

利润总额、归属于上市公司股东的净利润、归属于上市公司股东的扣除非经常性损益的净利润、经营活动产生的现金流量净额、基本每股收益及扣除非经常性损益后的基本每股收益下降主要系本期营业收入同比下降，营业利润下降所致。

八、 境内外会计准则下会计数据差异

□适用 √不适用

九、 非经常性损益项目和金额

√适用 □不适用

单位：元 币种：人民币

非经常性损益项目	金额	附注（如适用）
非流动性资产处置损益，包括已计提资产减值准备的冲销部分	-1,939,177.12	
计入当期损益的政府补助，但与公司正常经营业务密切相关、符合国家政策规定、按照确定的标准享有、对公司损益产生持续影响的政府补助除外	5,647,745.43	
除同公司正常经营业务相关的有效套期保值业务外，非金融企业持有金融资产和金融负债产生的公允价值变动损	2,356,182.95	

Lianchuang H1 2026 report, page6, released August29. Figures in yuan; translated controls below use CNY millions.

H1 Jan-June2026 unaudited	CNY M	Interpretation
Revenue	1324.00236756	-19.64% YoY
Reported operating profit	206.83259497	Includes investment income and finance expense
Investment income	268.78459508	Already inside reported operating profit
Associates/JVs portion	273.78338757	Part of investment income, not extra on top
Attributable net income	166.657439	-36.70% YoY
Ex-nonrecurring attributable NI	154.34175298	Different from operating profit
Operating cash flow	-1464.46058212	Severe working-capital/funding signal
Parent shareholders equity	4624.13665051	Book value is not liquid funds

Reported operating profit minus all investment income equals **-61.95200011M**. This residual includes finance expense55.28864259M, other income, impairments and other items; it is not clean EBIT. The standalone parent's245.61078706M operating profit is a different statement and is not used as consolidated parent-economic profit.

Hongfa equity-method income287.16159645M and superconducting associate loss-12.25763983M are already inside the associate total. Hongfa full-company revenue11,022.04326808M is not Lianchuang revenue. This update removes the old wording that could imply adding Hongfa again to reported consolidated operating profit.

4. New financing, governance and legal evidence

证券代码：600363　　证券简称：联创光电　　公告编号：2026-068

江西联创光电科技股份有限公司
关于实施其他风险警示暨停牌的公告

本公司董事会及全体董事保证本公告内容不存在任何虚假记载、误导性陈述或者重大遗漏，并对其内容的真实性、准确性和完整性承担法律责任。

重要内容提示：

- 证券停复牌情况：适用

根据江西联创光电科技股份有限公司（以下简称“公司”）于 2026 年 8 月 29 日披露的《2026 年半年度报告》，经自查，公司控股股东江西省电子集团有限公司（以下简称“电子集团”）存在对公司非经营性资金占用的情形。由于电子集团出现债务危机，导致截至本公告披露日尚有 169,204.22 万元（具体金额以证监会立案调查结果为准）占用资金未退回。

根据《上海证券交易所股票上市规则（2026 年 4 月修订）》第 9.8.1 条“上市公司出现以下情形之一的，本所对其股票实施其他风险警示：（一）公司被控股股东（无控股股东的，则为第一大股东）及其关联人非经营性占用资金，余额达到最近一期经审计净资产绝对值 5%以上，或者金额超过 1,000 万元，未能在 1 个月内完成清偿或整改”。截至本公告披露日，电子集团占用资金期限将满 1 个月。因此，公司股票将于 2026 年 9 月 29 日停牌一日，复牌后将被实施其他风险警示（ST），本公司的相关证券停复牌情况如下：

证券代码	证券简称	停复牌类型	停牌起始日	停牌期间	停牌终止日	复牌日
600363	联创光电	A 股　停牌	2026/9/29	全天	2026/9/29	2026/9/30

- **停牌日期为2026 年 9 月 29 日。**
- **实施起始日为2026 年 9 月 30 日。**
- **实施后 A 股简称为ST 联光。**

Company risk notice dated September29, effective September30: ST status and occupied funds. Original Chinese; interpretation below.

Disclosed exposure	CNY M	Scope / date
Controller-occupied funds	1692.0422	Subject to regulatory investigation; not automatically a new writeoff
Overdue principal	1439.2025	September16;32.26% of audited net assets
Bank-freeze requests	395.74871089	August4 request amount
Actual bank funds frozen	11.10414946	Different from requested amount

一、股票种类简称、证券代码以及实施风险警示的起始日

（一）股票种类：人民币普通股 A 股

（二）股票简称：股票简称由“联创光电”变更为“ST 联光”

（三）股票代码：仍为“600363”

（四）实施其他风险警示的起始日：2026 年 9 月 30 日

二、实施其他风险警示的适用情形

公司于 2026 年 8 月 29 日披露了《2026 年半年度报告》，经自查，公司全资子公司江西联创光电营销中心有限公司及江西联创数智科技有限公司通过签订贸易协议并支付预付款项方式向控股股东实际控制的关联方付款，预付款项最终流向控股股东。由于控股股东出现债务危机，导致 169,204.22 万元（具体金额以证监会立案调查结果为准）预付款项未退回，构成控股股东对公司非经营性资金占用。

根据《上海证券交易所股票上市规则（2026 年 4 月修订）》第 9.8.1 条“上市公司出现以下情形之一的，本所对其股票实施其他风险警示：（一）公司被控股股东（无控股股东的，则为第一大股东）及其关联人非经营性占用资金，余额达到最近一期经审计净资产绝对值 5%以上，或者金额超过 1,000 万元，未能在 1 个月内完成清偿或整改”。

截至本公告披露日，电子集团占用资金期限将满 1 个月。因此，公司股票将于 2026 年 9 月 29 日停牌一日，复牌后将被实施其他风险警示（ST）。

三、实施其他风险警示的有关事项提示

根据《上海证券交易所股票上市规则（2026 年 4 月修订）》第 9.8.1、9.8.2 条等相关规定，公司股票将于 2026 年 9 月 29 日停牌 1 天，2026 年 9 月 30 日起实施其他风险警示，实施其他风险警示后公司股票在风险警示板交易。

四、董事会关于争取撤销风险警示的意见及主要措施

1、公司董事会和管理层高度重视上述非经营性资金占用事项，全力督促控股股东电子集团尽快形成资金占用清偿方案，清偿占用的公司资金，尽最大努力尽快消除相关事项对公司的影响。根据《上海证券交易所股票上市规则（2026 年 4 月修订）》第 9.8.6 条“上市公司股票因第 9.8.1 条第一款第（一）项规定情

September29 company notice, page2: funding and frozen-equity disclosures; do not sum overlapping exposures.

All of the company's approximately20% Hongfa holding was frozen as of September22, along with16.66% of Hualian and20% of Zhongjiu. A freeze restricts transfer/cash options; it does not by itself remove equity ownership or prove the investee's earnings fell. The earlier H1 report's17.20% Hongfa freeze is superseded by the newer notice. These are judicial freezes, not pledges.

The occupied-funds amount, overdue principal, requested bank freezes and actual frozen balance have different definitions and dates. No overlap reconciliation was available. They are not added as four independent debt or operating-profit losses. The risk warning and removal from margin eligibility are verified events; neither is treated as a change in the sanctioned multiple.

5. Summing analytical Base

Category	Points	Current reasoning
Core thesis	8/20	Competitive electronics plus minority optionality; financing control weakens economic capture.
Cycle	3/10	H1 contraction and negative cash flow undermine the required production ramp.
TAM	9/10	Defense/laser and superconducting applications retain large conditional opportunities.
Catalysts	2/5	Commercial milestones now depend on repayment, liquidity and execution.
Macro	7/10	Defense, industrial and fusion support remain; no direct AI chokepoint claim.
Alpha	3/5	Local disclosures reveal economic/accounting distinctions missed by thematic narratives.
Risks	-5	Maximum framework deduction: funding/governance, legal restrictions, earnings quality, minority control and delivery.
Total	27/60 =45	Protected Excel60 is separate and unchanged.

The prior artifact used a-6 risk deduction, outside the current framework's-5 to0 range. The new summing assessment uses the current rule; deterioration appears in core/cycle/catalyst evidence as well as the capped risk class. Base is not multiplied into operating forecasts.

6. Revenue reference and forecast limits

The old artifact carried product sales in CNY100M units; converted correctly, its reference consolidated sales were3,600/4,250/5,120/6,100/7,260M for2026-30. Its rounded2025 product rows did not exactly reconcile to the reported total and are not used to manufacture an actual series.

The previous workbook contained a synthetic revenue scale of10,427M for2028, versus5,120M in that artifact, while calibrating profit to1,365M. That scale was not a sourced consolidated revenue forecast. It is replaced by the explicitly labeled legacy product-sales reference below. This reconciliation does not create an additional ceiling adjustment: profit is built independently from the preserved parent-economic reference and the funding bridge.

Reference segment, before funding stress	2027	2028	2029	2030
Smart controls	1880	2000	2150	2300
Backlight/display	1150	1200	1220	1230
Laser/defense	1000	1700	2500	3500
Cable/other	220	220	230	230
Total	4250	5120	6100	7260

No fresh company product guidance validates these legacy trajectories. They remain LOW-confidence reference cases, especially laser. H2 2026 starts with3,600M less actual H1 revenue1,324.002M, a demanding2,275.998M recovery reference before stress. Existing quarterly revenue weights are retained within each year; the funding scenario reduces the expected sales before the profit bridge. It assumes uniform relative exposure across consolidated products because no credible product-specific cash restriction allocation is disclosed.

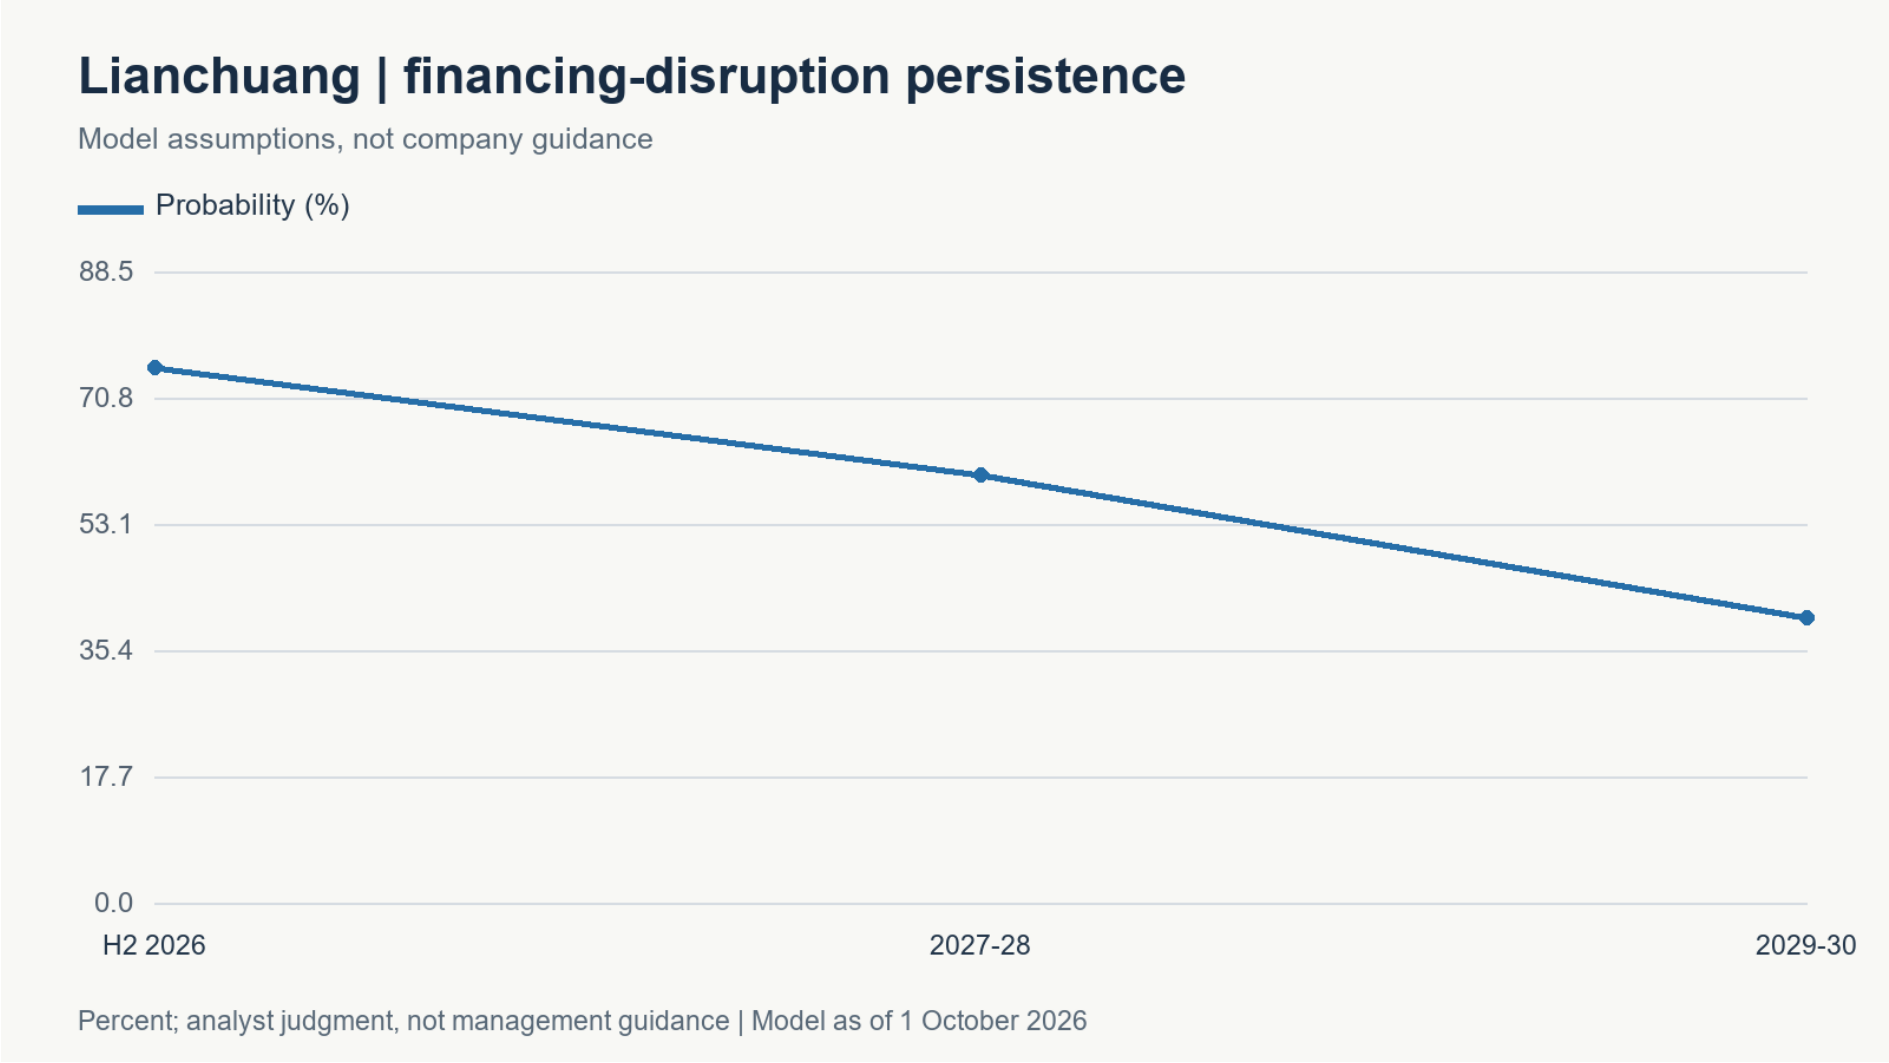

7. Explicit operating-cost and probability bridge

The preserved FY28 parent-economic profit reference is1,365M, which previously generated60/share, rather than silently replacing it with the old artifact's rounded1,350M. Use the legacy670:550:130 operating/Hongfa/HTS economic mix only as an allocation proxy. Ex-associate operations =reference×6.7/13.5; associates/other investment economics =the remainder. Actual investment income is not added again.

Conditional stress assumes30% lower revenue. A transparent two-to-one contribution/profit gearing proxy sets variable contribution at2×reference ex-associate profit and fixed operating costs at1×that profit. Under stress,2×70%-1=40% of reference ex-associate profit remains: a60% decline. It is a planning sensitivity for fixed-cost absorption, not disclosed gross margin or an audited cost forecast. Financing expenses already present in the inherited economic measure are not charged a second time.

The event is **persistence of impaired financing into the forecast period**, not the occurrence of the already-reported problem. Probability is75% forH2 2026,60% for2027-28 and40% for2029-30, reflecting explicitly assumed recovery over time. These are ASTRA judgments, not issuer probabilities. Judicial disposal of associates, further unrecoverable funds or insolvency could produce much larger losses than this operating-only scenario.

Expected consolidated revenue =reference revenue×(1-probability×30%). Expected parent-economic profit =reference associate contribution +reference ex-associate profit×(1-probability×60%). The final valuation risk factor remains1; no second discount is applied to the ceiling.

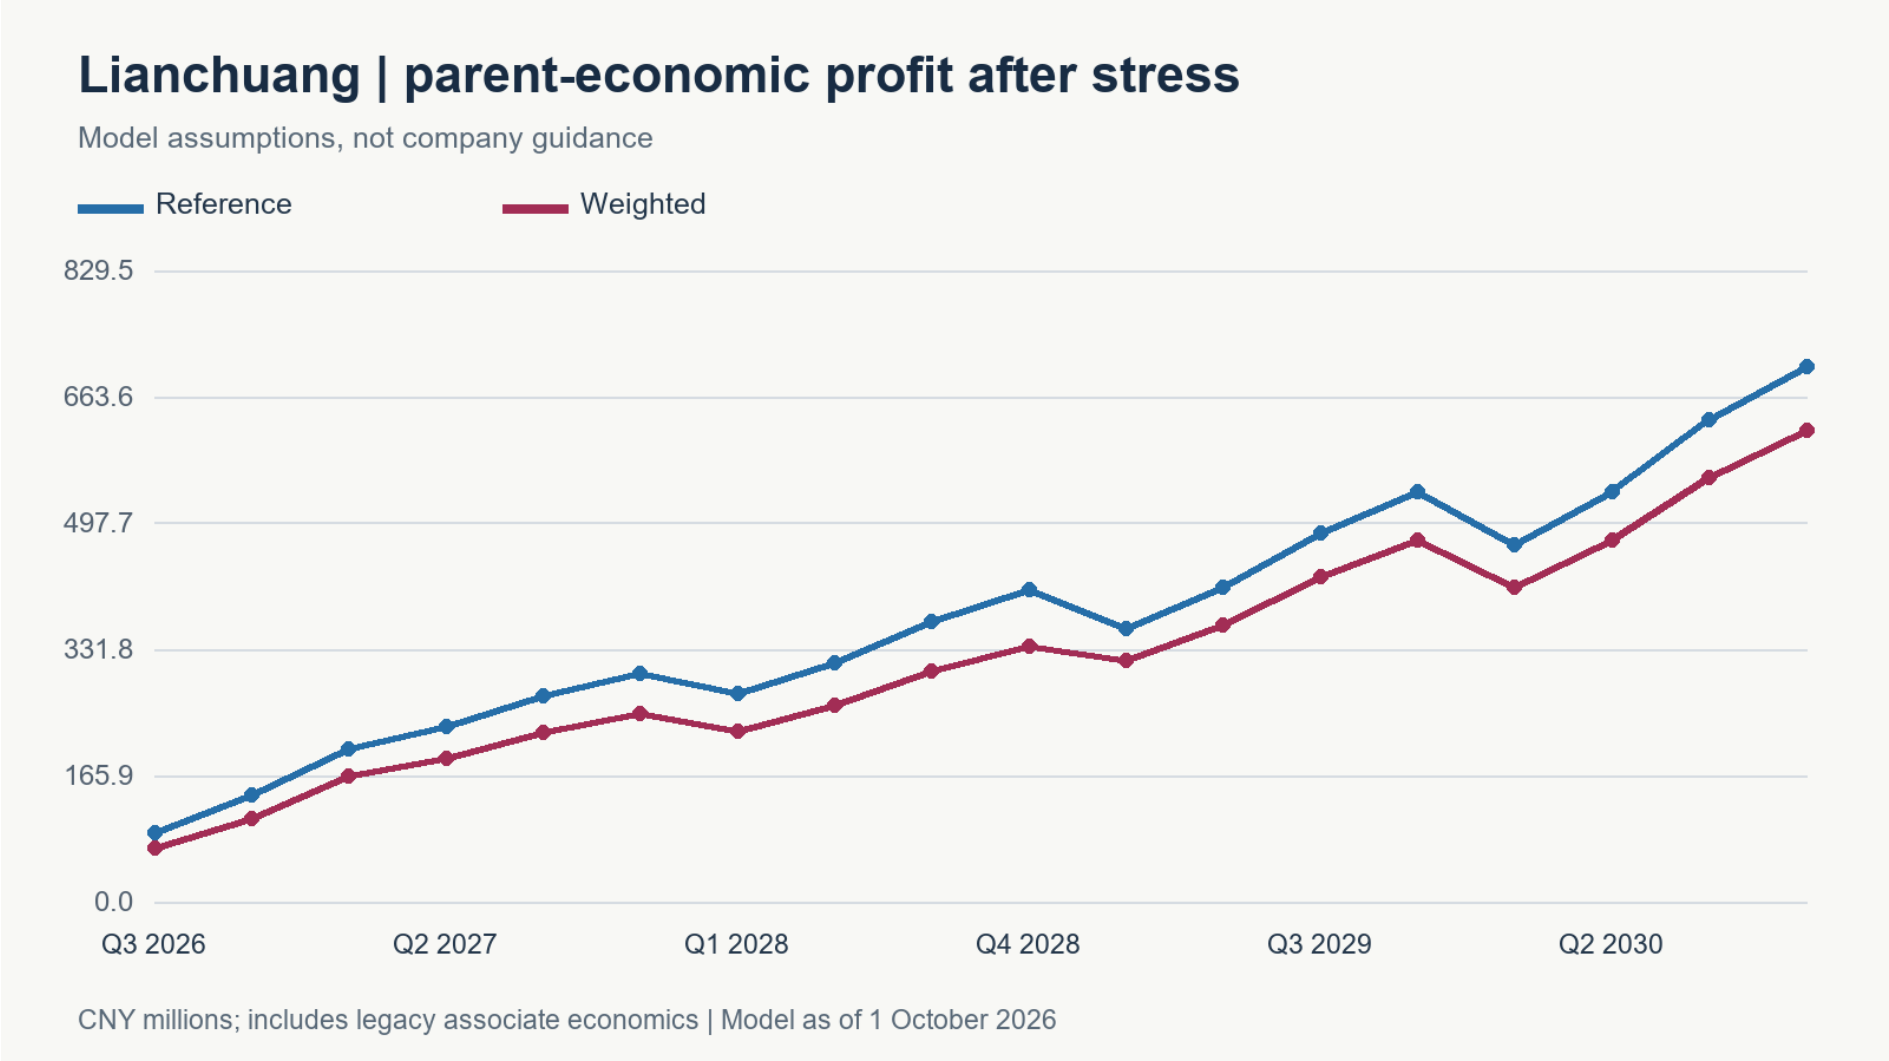

Lianchuang | financing-disruption persistence. Percent; analyst judgment, not management guidance. Model assumptions, not company guidance

Period	Probability	Conditional sales loss	Conditional ex-associate profit loss	Expected parent-profit loss
H2 2026	75%	30%	60%	22.3333%
2027-28	60%	30%	60%	17.8667%

Period	Probability	Conditional sales loss	Conditional ex-associate profit loss	Expected parent-profit loss
2029-30	40%	30%	60%	11.9111%

8. Quarterly model and economic decomposition

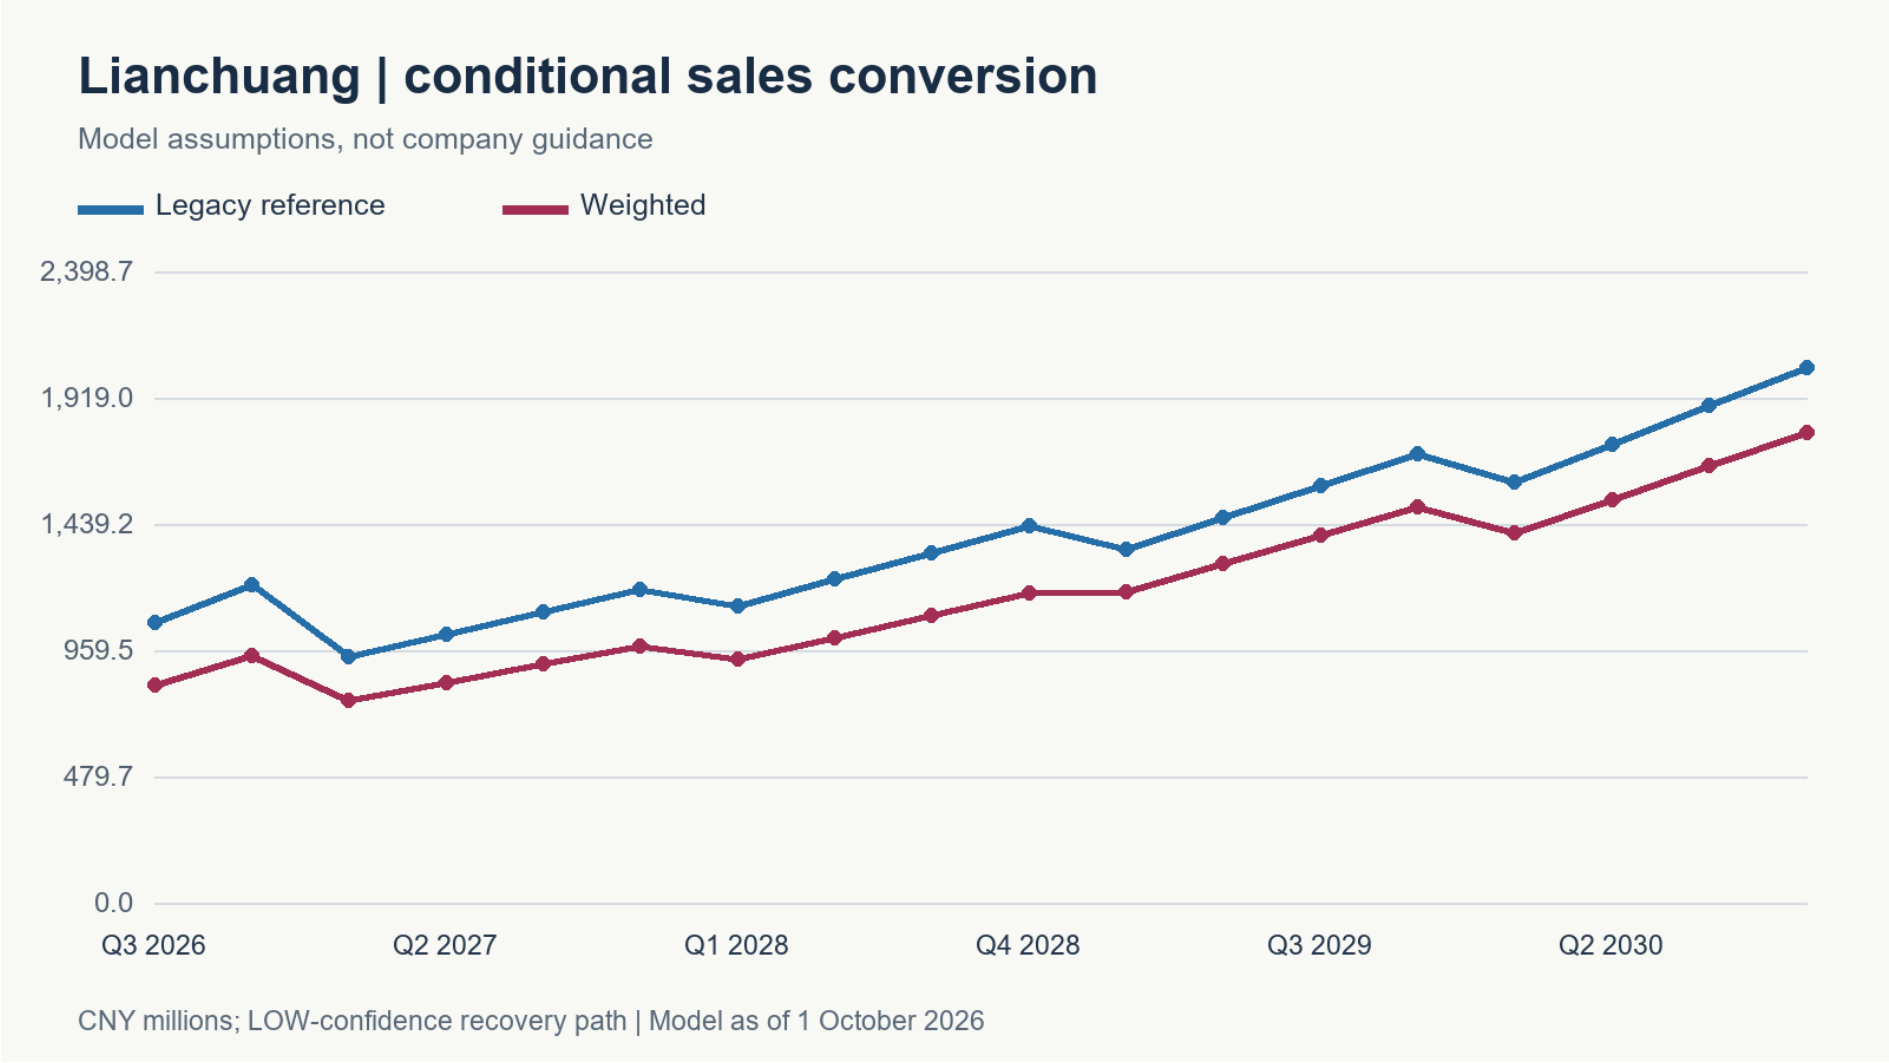

Lianchuang | parent-economic profit after stress. CNY millions; includes legacy associate economics. Model assumptions, not company guidance

Quarter	Reference OP	Assoc./investment	Ex-assoc. before	Probability	Ex-assoc. weighted	Total weighted OP
Q3 2026	90.090	45.379	44.711	75%	24.591	69.970

Q4 2028	409.500	206.267	203.233	60%	130.069	336.336
Q1 2029	359.450	181.056	178.394	40%	135.579	316.636
Q2 2029	413.368	208.215	205.153	40%	155.916	364.131
Q3 2029	485.258	244.426	240.832	40%	183.032	427.458
Q4 2029	539.175	271.584	267.591	40%	203.369	474.953
Q1 2030	468.650	236.061	232.589	40%	176.768	412.829
Q2 2030	538.947	271.470	267.478	40%	203.283	474.753
Q3 2030	632.678	318.682	313.996	40%	238.637	557.319
Q4 2030	702.975	354.091	348.884	40%	265.152	619.243

Parent-economic profit divided by consolidated revenue is not an operating margin because associates contribute profit without consolidated revenue. The workbook labels that ratio accordingly.

Lianchuang | conditional sales conversion. CNY millions; LOW-confidence recovery path. Model assumptions, not company guidance

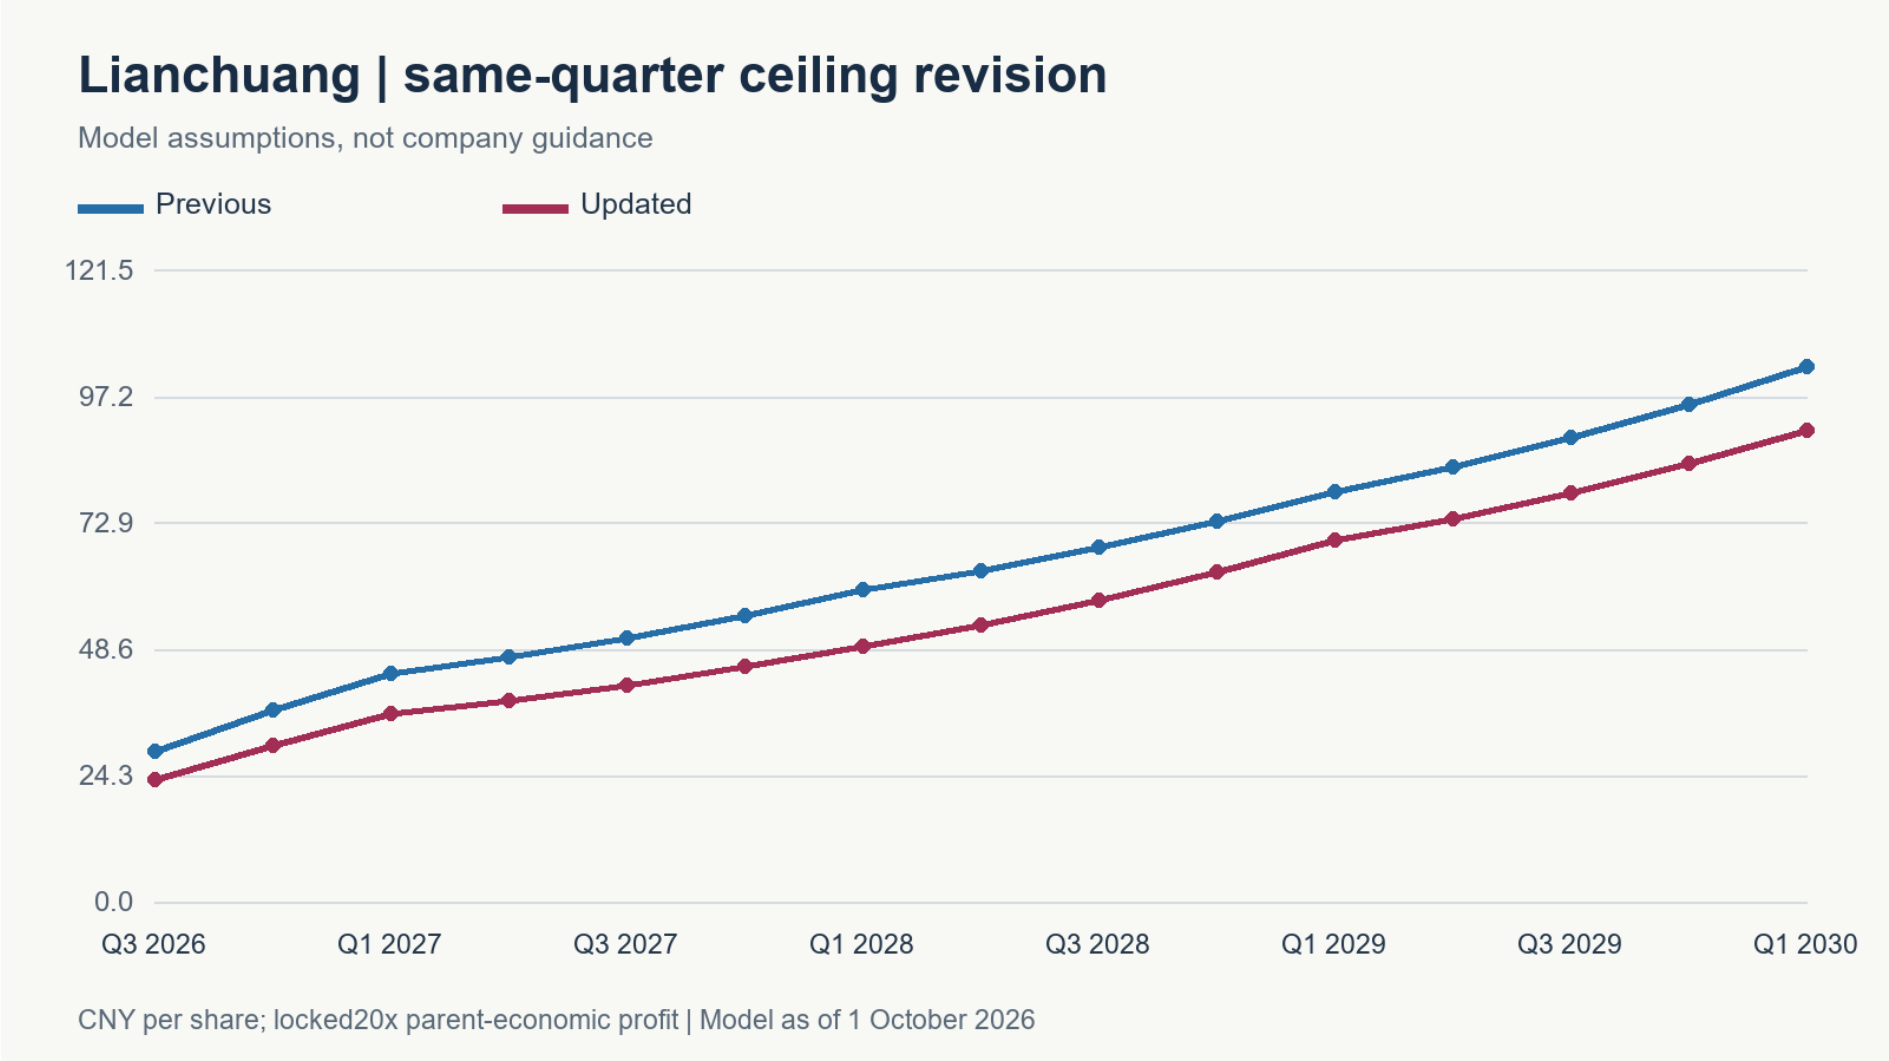

Quarter	Reference revenue	Expected revenue	Variable contribution proxy	Fixed cost proxy
Q3 2026	1066.874	826.827	89.423	44.711
Q4 2026	1209.124	937.071	139.102	69.551

Q2 2030	1742.400	1533.312	534.955	267.478
Q3 2030	1887.600	1661.088	627.991	313.996
Q4 2030	2032.800	1788.864	697.768	348.884

9. Valuation method and shares

20x forward-four-quarter parent-economic profit and455M diluted shares are retained. Issued common shares were450.888450M atJune30; the existing4.111550M buffer remains. Neither the stock warning nor the freeze changes this denominator automatically. Debt and funds potentially unrecoverable are not arbitrarily subtracted from a profit multiple. This preserves method consistency but leaves balance-sheet recovery and judicial-disposal tail risks outside the numerical operating scenario; they are material limitations.

10. Complete quarterly ceilings

Lianchuang | same-quarter ceiling revision. CNY per share; locked20x parent-economic profit. Model assumptions, not company guidance

Ceiling quarter	Exact OP window	F4Q weighted OP	Multiple	Shares M	Ceiling CNY
Q3 2026	Q3 2026 to Q2 2027	532.338473	20x	455	23.399493

Q1 2030	Q1 2030 to Q4 2030	2064.142889	20x	455	90.731556

Q4 2027:1,255.8M reference forward profit×(1-60%×60%×6.7/13.5)×20/455 =**CNY45.337600**. This is a forecast, not a realizable collateral value.

11. Probability sensitivity

Persistence probability through active window	Ceiling CNY	Treatment
0%	55.2000	Diagnostic; same operating severity
40%	48.6251	Diagnostic; same operating severity
60%	45.3376	Active
80%	42.0501	Diagnostic; same operating severity
100%	38.7627	Diagnostic; same operating severity

12. Material breadcrumb dispositions

Evidence	Model action	Double-count / uncertainty control
Funding occupation, overdue debt and frozen stakes	75/60/40% persistence probabilities and explicit operating loss bridge above	One combined funding disruption; amounts not added as independent losses
H1 sales/profit weakness	Latest reported anchor displayed;2026 recovery reference exposes the gap	Not described as a verified positive margin recovery
Hongfa judicial freeze	Underlying investee earnings retained; liquidity/ownership risk disclosed	No assumed profit decline solely from a freeze; no second addition of equity income
HTS and laser commercialization	Existing reference optionality retained under lower conversion	No new TAM or third-party target imported
Possible repayment/restored funding	Lower future persistence probability is already modeled	Recovery is an assumption; failed milestones increase probability rather than invite optimistic time roll

13. Principal risks and counters

Five scored risk classes receive-1 each: controller/governance; working-capital solvency; legal/asset-transfer restrictions; minority-investment/accounting quality; customer/technology execution. H1 actual noninvestment operations were loss-making. The forward path requires both operating recovery and market adoption. Hongfa is the principal current profit support, yet its frozen stake could become subject to enforcement. The probability bridge is bounded and does not encompass all failure states.

14. Dated checkpoints and probability revisions

At each October2026 repayment/regulatory update, reconcile actual recovered cash and restrictions. Lower H2 persistence75% only for usable funds or credible funded schedules. Q3/H2 results must show customer delivery, operating contribution and cash conversion. Through2027-28,60% persistence falls with independently supported liquidity recovery and rises with additional defaults, missed deliveries or judicial enforcement. The assumed40% rate from2029 is revised if recovery evidence fails; it is not an automatic thesis repair.

15. Cross-book implications

This remains a defense/industrial-superconducting watchlist case, separate from the portfolio's AI compute, memory and optical chokepoints. Its problems are company-specific governance/funding evidence, not evidence against the general fusion or laser TAM. Supplier/customer links require their own exposure bridges before changing another stock.

16. Sources, preservation and limitations

- September29 company risk notice, current occupied funds, overdue debt, freezes and risk-warning status. Official original downloaded and source images embedded.

- SSE margin-eligibility notice, effective status change.
- H1 report disclosure, August29; company-authored165-page PDF recovered from public mirror after official host challenge. Pages6,19,41-44,98,138-139 verified. Unaudited.
- Prior original-named artifact and pre-update master, preserved in dated versions: source of legacy TAM/product reference and20x/455M valuation conventions. Those estimates are not upgraded to primary-company guidance.

Unresolved: exact overlap and recovery of occupied/overdue/frozen balances, quantified disruption duration, future judicial disposal, product-level forward margins and funded customer schedules. These limit confidence in the point ceiling. The model uses explicit assumptions rather than presenting unknown amounts as verified. Updated full MD/PDF and600363_SH_Q_Model contain the same probability-weighted operating case; Excel Base remains60.
