Full active edition | Financial methods and portfolio Base overrides preserved.

October 5, 2026 update: September revenue reconciled

Active Q4 2027 price target: TWD 468.235484 per share, unchanged. Analytical Base 65/100; protected portfolio Excel Base 83/100, both unchanged.

Q3 monthly sales 759.391M, +1.41% vs forecast. Revenue anchor and dependent Q3 profit estimates updated; margins remain forecasts. Later-quarter inputs and Q4 2027 ceiling unchanged.

Q3 2026 prior forecast versus reported monthly-sales sum. TWD millions. Quarterly margins and OP are still modeled.

Reported monthly revenue	TWD millions
July 2026	240.751
August 2026	254.051
September 2026	264.589

Reported monthly revenue	TWD millions
Q3 monthly sum	759.391
Prior Q3 forecast	748.853
Q3 change	+1.4072%

Decision ledger (approved model treatment): Reported monthly revenue sum replaces Q3 forecast, probability100% for reported figure; product mix/margins/opex remain model assumptions. Do not infer actual OP. Future period input assumptions and existing custom multiple/share conventions retained. No unreported HBM or pricing addition. Q3 is outside Q4 2027 valuation window.

Source and dates: MOPS September consolidated revenue disclosure, company code 6830, ROC year 115, month 09; original monetary unit TWD thousands, divided by 1,000 for the table above. Retrieved October 5, 2026. MOPS table provides period but not first-publication timestamp; October 5 is retrieval date, not a proven initial-release date. The July/August figures retain their existing source provenance: Current artifact reported history; not freshly re-retrieved in this packet.

The company has reported monthly revenue, not a complete Q3 income statement. Product allocations, gross margins, operating expenses and OP remain explicitly modeled. The existing multiple, profit definition, share convention and protected Excel Base are retained. All later-quarter operating assumptions are retained.

Affected ceiling quarter	Previous target TWD	Updated target TWD	Change
Q3 2026	153.595415	154.623512	+0.6694%

Research date: 17 September 2026 | **Framework:** 6.0 consolidated | **Format:** standalone current-state analysis **Status:** Holding status not established by supplied artifact; protected portfolio Base 83 retained | **Classification:** BOTTLENECK CANDIDATE - analytical services with emerging optical equipment and licensing **Artifact Base:** 39/60 = **65% - Watchlist** | **Protected portfolio Base:** 83% (user override retained; separate from artifact assessment) **Snapshot:** supplied-workbook price TWD 398.000; model share proxy 61.500000M; implied snapshot market capitalization 24,477.000 TWD millions. Price is frozen from the supplied workbook, not a current-market refresh; capitalization uses the modeled denominator. **Active ceiling:** Q4 2027 **TWD 468.235484**, pricing Q4 2027-Q3 2028. The calendar-horizon label is current; the monthly review leaves that target unchanged. All 15 quarterly ceilings are derived below.

MSScorps can address a wider optical market through services, customer-owned RD/FA equipment and licensed production tools. The full model incorporates newer pricing and shipment indications, while distinguishing its own sales from partner royalties. Commercial acceptance and production scale are the main unresolved links between the larger opportunity and earnings.

1. Supercycle, supply chain and durable advantage

MSScorps combines materials/failure analysis with a potential optical-localization equipment and licensing platform. The latest company presentation explicitly embraces licensing to production-equipment partners. This replaces the old artifact’s no-licensing narrative. Patent ownership and litigation do not establish a global monopoly, an injunction against competitors or 90% future market share. The legacy workbook identifier 6830.TWO is retained for matching; the company is now TWSE-listed (6830.TW).

DB1: AI and advanced-node complexity → more materials and failure analysis → optical fault localization during PIC design, packaging and module development → possible equipment installation and licensed production testing. The required engineering function is inspection and yield control; it does not establish that one patented

method is the only solution. Expertise, customer integration and IP can support pricing, subject to evidence of competitive capture.

Business / curve	Stage	Evidence and next inflection
Advanced-node analytical services	Commercial ramp; 10-50% qualitative	Actual monthly growth and dedicated customer capacity.
Own optical services	Early commercial adoption	Three in-house tools support customer analysis.
MSS HG equipment	Pre-revenue commercialization; 0-10% qualitative	Customer evaluation precedes shipment, acceptance and recognized revenue.
Production-line licensing	Pre-scale; 0-10% qualitative	Co-development and discussions precede commercial royalty terms.

Stage percentages are qualitative framework bands relative to a possible mature opportunity, not measured market penetration. A current capacity constraint can coexist with a larger long-term TAM; qualification and economic capture decide how much reaches this company.

2. Forward TAM and the three-phase expansion lens

Phase	Engineering opportunity	Demand-to-company bridge
Phase 1; 100% thematic	Angstrom-node, advanced packaging and AI analysis	More process complexity increases analyses per customer programme. Qualified staff and instrument utilization determine billable capacity.
Phase 2; 50% thematic	Optical RD/FA equipment	PIC foundries, chip designers, packaging plants and module/system makers form four disclosed customer categories. Larger optical activity expands potential installations, but labs/tools are the relevant denominator, not every optical port.
Phase 3; 20% thematic	Licensed production testing	Partner equipment can extend distribution beyond MSS's own manufacturing capacity. Revenue is net license/royalty income; the partner's full machine price is excluded.

The 100% / 50% / 20% thematic weights guide thesis assessment. They are not blanket discounts to reported sales, contracts or all forecasts. Programme probabilities below govern only separately identified optionality. Current reported sales calibrate the starting point; they do not cap the future market.

3. Current earnings and management evidence

Q2 2026 revenue/GP/operating expenses/OP were TWD 635.155M/158.557M/142.447M/16.110M: GM 24.96%, OP margin 2.54%. Net income was 18.602M and basic/diluted EPS 0.35. H1 revenue was 1,213.881M and OP 7.285M. July revenue of TWD 240.751M, August 254.051M and reported September 264.589M sum to Q3 revenue of TWD 759.391M. This replaces the prior TWD 748.853M forecast (+1.41%). Monthly sales do not disclose quarterly product mix, gross margins or operating profit; those remain model assumptions. [MONTHLY-202609] Q4 remains TWD 825M, bringing the revised FY2026 revenue estimate to TWD 2,798.272M. These revenues are analytical services, not demonstrated equipment scale.

Read the full extracted June 16 and August 26 company presentation texts, plus Q2 financial statements and current monthly sales. Both presentations end with Q&A but do not contain the questions or answers; complete two-call Q&A coverage is unavailable. August 26 direct management remarks reported by UDN point to 2-3 year-end shipments and about three months of acceptance, hence Q1 2027 recognition. A September 3 SEMICON management interview still describes customer

validation, not completed commercial acceptance. These media reports are corroborating timing evidence, not additional formal guidance.

Two complete company presentation texts were reviewed, but the Q&A pages do not contain a transcript of questions and answers. Full two-call Q&A coverage is therefore incomplete. Media-reported prices are useful calibration, not issuer-filed order values. Future unit capacity, segment margins and royalty economics remain LOW-confidence.

4. Local evidence and calibration packet

The company’s Q2 statements, monthly sales and two investor decks establish service revenue, gross profit, expenses, debt and commercialization stages. July/August sales calibrate the next quarter. Product pricing and shipment targets in M9/M10 are separately labeled media reports. No verified global RD/FA equipment market size or exhaustive customer count was obtained, so the model does not assign a fabricated market-share percentage to an optical-industry dollar TAM.

5. Summing thesis score

Category	Points / maximum	Evidence
Core Thesis	15/20	Specialized analysis and optical localization patents; industry-wide exclusivity is unproven.
Cycle	7/10	AI analysis demand and monthly sales are improving; equipment remains in customer evaluation.
TAM	7/10	Equipment and partner licensing extend beyond labor-intensive services.
Catalysts	4/5	Customer trial, November demonstration and first acceptance milestones.
Macro	8/10	Advanced-node and optical complexity support demand; China and customer concentration remain.
Alpha	3/5	Licensing model is more scalable than the old thesis, but commercial economics remain undisclosed.
Risks	-5	Acceptance, IP competition, partner economics, capex, debt and dilution.

Sum: 39/60 × 100 = 65.000000%, conventionally rounded to 65%. This advisory thesis score does not replace any portfolio Base override. The separate risk classes below total the displayed deduction; holding status and classification do not waive that deduction.

6. Revenue sources, capture and product margins

Calendar quarters in TWD millions. Three non-overlapping vectors are analytical services (including in-house optical testing), externally sold MSS HG equipment after acceptance, and net partner royalties. Services use the July-September reported monthly sum for Q3, then the unchanged FY2027-30 sales forecasts of 3,200/3,900/4,600/5,400M. Q3 service GM remains 30% and absolute opex remains TWD 150M; higher revenue does not automatically raise that fixed budget. Equipment gross successful-case units are 20/44/76/114, with quarterly units 2/4/6/8; 8/10/12/14; 16/18/20/22; and 24/27/30/33. The first annual quantity uses the upper end of the media-reported 2027 target, not secured orders. ASP is now 70/68/65/62M, beginning at the midpoint of reported basic pricing and allowing later competition/configuration changes. Future ASPs are analyst assumptions. A 65% commercialization and acceptance probability is applied once to each equipment revenue and its associated product cost. Included equipment revenue is therefore 910/1,944.8/3,211/4,594.2M; probability-weighted units are analytical expectations, not fractional machines delivered. Licensing gross opportunity 15/80/160/360M is included at 50%, giving 7.5/40/80/180M. An illustrative 1M net royalty per partner unit implies the same gross number of royalty-bearing units; terms are undisclosed. Partner equipment gross sales are excluded. Services GM is 30-39%, equipment 55-60%, licensing 90%; all segment margins are estimates. Preserve the original absolute operating-cost budget rather than scaling staffing expense down with commercialization probability. Manufacturing/service depreciation stays in product cost. No 2026 equipment or royalty revenue is recognized. Use 20x OP throughout; multiple expansion requires demonstrated economics.

Vector	Actual calibration / source	Forward demand and capture	Margin derivation / constraint
Analytical services	Q2 actual 635.155M; July/August 240.751/254.051M.	Annual 3,200/3,900/4,600/5,400M. A capacity sensitivity uses 900/1,000/1,100/1,200 productive staff-equivalents and revenue per equivalent of 3.556/3.900/4.182/4.500M. Only the 900 total-headcount target has issuer support; productive equivalents, later staffing and productivity are analyst requirements, not forecasts provided by management.	GM 31-35% in 2027, 35-38% in 2028, 38% in 2029 and 39% in 2030; utilization and service mix must overcome labor and depreciation costs.
MSS HG equipment	Formal deck: demonstration and customer evaluation. M9/M10: pricing/target indications.	Gross annual 20/44/76/114 units. FY2028-30 can be decomposed as 22/38/57 customer-site equivalents times two accepted tools per site. These are required placements, not known sites. Own production must reach 14/22/33 tools in the final quarter of each year. Revenue = gross units × 70/68/65/62M ASP × 65%.	55% GM in 2027, 58% in 2028 and 60% thereafter. Component cost, assembly, warranty and installation remain in this estimated product margin.

Vector	Actual calibration / source	Forward demand and capture	Margin derivation / constraint
Partner licensing	One signed co-development arrangement; no disclosed recurring royalty contract.	Gross 15/80/160/360 royalty units × assumed 1M net royalty × 50% probability. This is a separate commercialization scenario, not booked royalties from the development agreement.	90% estimated GM leaves 10% for direct support/IP maintenance; corporate R&D is additionally expensed.

Confidence: reported historical totals are HIGH. Source-based forward extrapolations are MEDIUM only where the cited source sizes the relevant period; other product allocations, future capture and margin assumptions are LOW. A source for the historical anchor does not make an unsourced future factor management guidance. The detailed factors below are the single modeled base case, with uncertain assumptions exposed for review.

V1. Analytical services including optical services

Sources: M1/2/3/4; actual services and capacity expansion. Revenue = anchor × factor; GP/contribution = revenue × displayed product margin. Forecast confidence: LOW unless a specific actual/guided total is identified above.

Quarter	Revenue anchor	Demand / conversion factor	Revenue	Product margin	GP / contribution
Q3 2026	759.391000	1.000000	759.391	30.000%	227.817

7. Operating-cost bridge and quarterly operating model

Quarterly revenue and operating profit. TWD millions; Q3 monthly revenue reported, profit modeled.

Retained quarterly operating costs are 150/158M for H2 2026, then 165/175/185/195M in 2027, 210/225/240/255M in 2028, 275/295/315/335M in 2029 and 355/380/405/430M in 2030. These budgets support expanded development and commercialization even if revenue conversion disappoints. Product margins contain service/manufacturing depreciation; no EBITDA substitution is made. The displayed opex percentages are derived from these dollar budgets, not used to force an OP margin.

Profit basis: IFRS operating profit after depreciation and operating expenses. Amounts below are TWD millions.

Quarter	Status	Revenue	GP / contribution	Opex %	Opex	OP margin	Operating profit	Main driver	Confidence
Q3 2026	Monthly revenue actual; profit model	759.391	227.817	19.753%	150.000	10.247%	77.817	July-September reported monthly sum	HIGH revenue; LOW profit model
Q4 2026	Model	825.000	264.000	19.152%	158.000	12.848%	106.000	Service capacity conversion	LOW model
Q1 2027	Model	811.000	273.250	20.345%	165.000	13.348%	108.250	Initial equipment acceptance	LOW model

Q3 2030	Model	2,659.000	1,316.400	15.231%	405.000	34.276%	911.400	Partner adoption	LOW model
Q4 2030	Model	2,829.900	1,413.540	15.195%	430.000	34.755%	983.540	Mature equipment case	LOW model

OP = sum of product GP/contribution - explicit operating costs. OP margin = OP ÷ revenue. Displayed numbers are rounded for reading; the workbook calculates from unrounded inputs. Guidance assigned to a future quarter retains Model status because guidance is not an actual result.

8. Multiple, shares and recognition convention

20× forward IFRS OP retains the initial equipment-transition multiple. The present service business has low operating margins, while equipment and royalty economics are still unproven. A durable installed base, recurring licenses and demonstrated returns could support reassessment, but patent ownership alone does not justify scheduling a higher multiple each year.

All 18 rows are **Model**, not company guidance. Dilution bridge: June issued shares approximately 54.414M + 111.3/147.4 = 0.755M remaining CB shares + 6M planned new shares = approximately 61.169M. Use 61.5M from the first forward window, allowing 0.331M for rounding/other dilution; 62/62.5/63/63.5M for 2027-30 are forward proxies. Starting from June outstanding plus June unconverted debt avoids double-counting subsequent conversions. Rights-issue price adjustments and future equity awards may alter the denominator. The first window conservatively includes the planned issue throughout, rather than presenting a GAAP weighted-average share count. No fundraising proceeds are added to operating profit or the ceiling.

The valuation denominator is the ceiling quarter’s diluted-share proxy. It is not a historical EPS weighted-average assumption disguised as a fully known future capitalization. Unit factor: 1; this converts the model units to TWD per share. No cash balance, enterprise-value adjustment or after-tax earnings substitution is added to the operating-profit ceiling.

9. Complete rolling four-quarter ceiling derivation

Rolling four-quarter price targets before and after October 5. TWD/share.

Ceiling quarter	Exact earnings window	Forward 4Q OP	Multiple	Diluted shares M	Ceiling TWD	Key inflection
Q3 2026	Q3 2026 → Q2 2027	475.467300	20x	61.500000	154.623512	September monthly revenue reconciled

Ceiling quarter	Exact earnings window	Forward 4Q OP	Multiple	Diluted shares M	Ceiling TWD	Key inflection
Q4 2026	Q4 2026 → Q3 2027	643.850000	20×	61.500000	209.382114	Service capacity conversion
Q1 2027	Q1 2027 → Q4 2027	854.650000	20×	62.000000	275.693548	Initial equipment acceptance
Q2 2027	Q2 2027 → Q1 2028	1,046.988000	20×	62.000000	337.738065	More accepted tools
Q3 2027	Q3 2027 → Q2 2028	1,243.698000	20×	62.000000	401.192903	Customer replication
Q4 2027	Q4 2027 → Q3 2028	1,451.530000	20×	62.000000	468.235484	2027 delivery target
Q1 2028	Q1 2028 → Q4 2028	1,660.984000	20×	62.500000	531.514880	Second-year equipment ramp
Q2 2028	Q2 2028 → Q1 2029	1,901.246000	20×	62.500000	608.398720	Partner development
Q3 2028	Q3 2028 → Q2 2029	2,131.386000	20×	62.500000	682.043520	Analytical scale
Q4 2028	Q4 2028 → Q3 2029	2,341.804000	20×	62.500000	749.377280	Licensing launch
Q1 2029	Q1 2029 → Q4 2029	2,526.600000	20×	63.000000	802.095238	Broader optical installations
Q2 2029	Q2 2029 → Q1 2030	2,713.870000	20×	63.000000	861.546032	Equipment throughput
Q3 2029	Q3 2029 → Q2 2030	2,935.080000	20×	63.000000	931.771429	Advanced-node demand
Q4 2029	Q4 2029 → Q3 2030	3,182.030000	20×	63.000000	1,010.168254	Customer site replication
Q1 2030	Q1 2030 → Q4 2030	3,454.520000	20×	63.500000	1,088.037795	Larger service footprint

Q3 2026: OP window Q3 2026 to Q2 2027: (77.817300 + 106.000000 + 108.250000 + 183.400000) x 20 / 61.500000 = TWD 154.623512 per share. Revenue for Q3 2026 is a reported monthly-sales sum; product mix, gross profit and operating costs remain model assumptions. The existing valuation basis is unchanged.

- **Q4 2026:** (106.000000 + 108.250000 + 183.400000 + 246.200000) × 20 × 1 ÷ 61.500000 = **209.382114 TWD/share**. Window: Q4 2026-Q3 2027.
- **Q1 2027:** (108.250000 + 183.400000 + 246.200000 + 316.800000) × 20 × 1 ÷ 62.000000 = **275.693548 TWD/share**. Window: Q1 2027-Q4 2027.
- **Q2 2027:** (183.400000 + 246.200000 + 316.800000 + 300.588000) × 20 × 1 ÷ 62.000000 = **337.738065 TWD/share**. Window: Q2 2027-Q1 2028.
- **Q3 2027:** (246.200000 + 316.800000 + 300.588000 + 380.110000) × 20 × 1 ÷ 62.000000 = **401.192903 TWD/share**. Window: Q3 2027-Q2 2028.
- **Q4 2027:** (316.800000 + 300.588000 + 380.110000 + 454.032000) × 20 × 1 ÷ 62.000000 = **468.235484 TWD/share**. Window: Q4 2027-Q3 2028.
- **Q1 2028:** (300.588000 + 380.110000 + 454.032000 + 526.254000) × 20 × 1 ÷ 62.500000 = **531.514880 TWD/share**. Window: Q1 2028-Q4 2028.
- **Q2 2028:** (380.110000 + 454.032000 + 526.254000 + 540.850000) × 20 × 1 ÷ 62.500000 = **608.398720 TWD/share**. Window: Q2 2028-Q1 2029.
- **Q3 2028:** (454.032000 + 526.254000 + 540.850000 + 610.250000) × 20 × 1 ÷ 62.500000 = **682.043520 TWD/share**. Window: Q3 2028-Q2 2029.
- **Q4 2028:** (526.254000 + 540.850000 + 610.250000 + 664.450000) × 20 × 1 ÷ 62.500000 = **749.377280 TWD/share**. Window: Q4 2028-Q3 2029.
- **Q1 2029:** (540.850000 + 610.250000 + 664.450000 + 711.050000) × 20 × 1 ÷ 63.000000 = **802.095238 TWD/share**. Window: Q1 2029-Q4 2029.

- **Q2 2029:** (610.250000 + 664.450000 + 711.050000 + 728.120000) × 20 × 1 ÷ 63.000000 = **861.546032 TWD/share**. Window: Q2 2029-Q1 2030.
- **Q3 2029:** (664.450000 + 711.050000 + 728.120000 + 831.460000) × 20 × 1 ÷ 63.000000 = **931.771429 TWD/share**. Window: Q3 2029-Q2 2030.
- **Q4 2029:** (711.050000 + 728.120000 + 831.460000 + 911.400000) × 20 × 1 ÷ 63.000000 = **1,010.168254 TWD/share**. Window: Q4 2029-Q3 2030.
- **Q1 2030:** (728.120000 + 831.460000 + 911.400000 + 983.540000) × 20 × 1 ÷ 63.500000 = **1,088.037795 TWD/share**. Window: Q1 2030-Q4 2030.

10. Annual trajectory cross-check

Calendar year	Revenue	GP / contribution	Opex	OP	OP margin
2027	4,117.500	1,574.650	720.000	854.650	20.757%
2028	5,884.800	2,590.984	930.000	1,660.984	28.225%
2029	7,891.000	3,746.600	1,220.000	2,526.600	32.019%
2030	10,174.200	5,024.520	1,570.000	3,454.520	33.954%

These are calendar-year sums of the quarterly path, not extra revenue and not the live valuation method. For non-December fiscal reporters, fiscal guidance and these calendar totals must be aligned using the period mapping above; a four-quarter run rate is not automatically the same fiscal year. Outer-year outputs are conditional TAM/capture trajectories, not verified management sales targets.

Model annual 2027-30 revenue is 4,117.500/5,884.800/7,891.000/10,174.200M. FY2028 consists of 3,900M services + 1,944.8M equipment + 40M royalties = 5,884.8M. Equipment and royalties are 33.7% of that year, distinct from the mature mix envisioned in the original artifact. Unit counts and margins must be revisited as the first accepted shipments reveal actual economics.

11. Dilution sensitivity - same operating case

Denominator sensitivity	Q3 2027 shares M	Q3 2027 ceiling TWD	Effect on ceiling
-5% shares	58.900000	422.308319	+5.26%
+0% shares	62.000000	401.192903	+0.00%
+5% shares	65.100000	382.088479	-4.76%
+10% shares	68.200000	364.720821	-9.09%

This isolates denominator uncertainty; it is not a second bull/bear operating case or permission to remove known dilution. The base case remains the explicit share path in the rolling table.

12. Programme and probability ledger

Programme / signal	Source and probability	Amount / unit base	Treatment in this model	Escalation / recognition
Service expansion	M1/2/4; 85% demand confidence	3,200→5,400M annual scenario	Conditional operating path; no blanket probability haircut	Billable utilization and product GP.
MSS HG commercialization	M2/7/9/10; 65% probability	20/44/76/114 gross units at specified ASP	Probability applied once to equipment revenue and cost of sales	Paid orders, acceptance and disclosed capacity.
Partner licensing	M2/3; 50% probability	15/80/160/360M gross net-royalty opportunity	Included once at 50%; no partner gross machine sales	Executed commercial terms and recognized royalty.
Additional co-development partners	M2; 60% relationship confidence	No standalone amount	Within equipment/licensing opportunity	Signed scope and economic rights.
Pending rights issue	M5; 90% completion confidence	6M shares at 500 TWD	Full dilution included; proceeds excluded from OP	Subscription and final issuance.
Patent litigation	Historical claim; outcome not assigned	No damages or monopoly share	Zero separate valuation	Public legal outcome and practical competitive effect.

Probabilities are analyst judgments under the framework signal hierarchy. Embedded revenue is not multiplied or added a second time. Where no defensible amount or unit base exists, the opportunity remains explicitly unquantified; confidence alone cannot create a revenue number. New evidence can enlarge the TAM, improve capture or move recognition earlier, but each requires an identifiable model input.

13. Scored risk classes

Risk class	Scored deduction	Mechanism and consequence
Commercial acceptance	-1	Trials and co-development may not become paid equipment purchases.
IP and competition	-1	Patent validity, scope and alternate inspection methods affect capture; no monopoly is assumed.
Partner economics	-1	Royalty rates, scope, timing and the split of equipment value remain undisclosed.
Capacity and cost absorption	-1	Labor, laboratory tools and manufacturing capacity must grow without overwhelming gross profit.
Funding and dilution	-1	Bank debt, convertible bonds, capital spending and the pending issue affect per-share economics.

14. Dated catalysts, counters and escalation

1. **2026-09-30 monitoring date - Customer trials** Distinguish booked demonstrations from orders or acceptance.
2. **2026-10-08 - Capital subscription window** Verify proceeds, final share count and debt/capex use.
3. **2026-11-05 - Demonstration** Assess functionality, customer validation and partner scope.
4. **2026-12-31 - Initial shipments** Compare shipments with acceptance terms; do not prematurely record revenue.
5. **2027-03-31 - First recognition** Check actual price, costs, warranty and customer acceptance.
6. **2027-12-31 - Unit target and capacity** Test gross 20-unit case against output, deliveries and cash receipts.
7. **Each report through 2030 - Licensing and capture** Require commercial terms and revenue before increasing the partner scenario.

15. Cross-book monitoring

MSScorps serves materials analysis, foundry/PIC R&D, packaging and optical-module testing. These exposures overlap with Tower, GF, ASE and optical-device holdings, without implying undisclosed customer relationships. The company deck separates RD/FA equipment from partner production-line licensing. Both serve the same larger optical ecosystem but earn different invoices. A move from outsourced services to a customer-owned machine can cannibalize some testing service revenue; the model requires other advanced-node demand to outweigh that displacement.

16. Source register and model limits

M1 - Q2 consolidated financial statements (2026-08-10). Financial statements verify quarterly OP and EPS. June cash was TWD 682.361M; bank borrowings carrying value totaled 1,997.210M, before CB 108.177M and leases 503.364M. Service cost includes depreciation; EBITDA is not the valuation numerator.

M2 - Company investor presentation (2026-08-26). AI client-zone Phase 3 was completed in July; Phases 4/5 are discussion/planning. MSS HG customer evaluation is scheduled in September with a November 5 demonstration. One international measurement-equipment co-development agreement is signed. Management distinguishes RD/FA equipment from production-line licensing. The formal deck does not disclose unit ASP, royalty rate or contracted sales volume; subsequent media pricing indications are separately identified as M9/M10.

M3 - Preceding company presentation (2026-06-16). The earlier presentation already described equipment sales, patent licensing and production-equipment revenue sharing. Its 2026 headcount target was 880; the August deck raised this to 900.

M4 - Company monthly revenue table through August (2026-09). July 240.751M and August 254.051M TWD; January-August total 1,708.683M. No September actual was available at that historical cutoff; the current October 5 review incorporates the later September MOPS disclosure [MONTHLY-202609].

M5 - Company capital-raise announcement, MOPS mirror (2026-09-09). Planned issue: 6M shares at TWD 500, raising gross TWD 3B. Subscription payments are scheduled after this review date; this is not completed financing or cash already received.

M6 - Company convertible-bond announcement, MOPS mirror (2026-07-21). June 30 unconverted principal TWD 111.3M at TWD 147.4 conversion price; potential shares about 0.755M. Do not add the entire original TWD 500M issue to shares already converted.

M7 - Direct management remarks reported by UDN (2026-08-26). Management targeted 2-3 shipments by year end, followed by about three months of acceptance and Q1 2027 revenue recognition. Five customer trial bookings are not five completed purchases.

M8 - SEMICON management interview (2026-09-03). The chairman described ongoing commercialization and customer validation. His comment on improving monthly profit does not identify IFRS operating profit and is not substituted for reported quarterly results.

M9 - Reported management pricing and capacity discussion (2026-08-25). Media corroboration: basic equipment indication TWD 60-80M; options can raise price. Initial production scale remained demand-dependent. This is not a formal order or audited revenue.

M10 - Reported equipment shipment outlook (2026-09-08). Reports a 10-20-unit 2027 target and a much higher fully configured price. Use the basic configuration midpoint; do not apply the fully configured price to every future unit.

No full Q&A transcript for both presentations. Equipment pricing and the 2027 unit target have media-reported indications, not formal sales commitments. Production capacity, accepted orders, later ASP/units, royalties, segment GP and future dilution remain uncertain. The old influencer/Serenity score overlay is removed; only Framework categories are scored. No court ruling, exclusive market share, customer-specific equipment commitment or financing completion is inferred. The framework ceiling capitalizes OP before interest/tax and has no separate net-debt adjustment; it is not a conventional equity fair-value estimate.

Workbook: Positions_46_60_Before_After.xlsx, model tab 60_6830_TWO. It owns portfolio ranking, prices and return calculations; those are intentionally outside this artifact. **Current artifact path:** G:\My Drive\1amInvesting\Artifacts\Artifact Rescore Sept 6 2026\6830TWO_MSScorps_DeepDive.md. **Original snapshot:** versions/originals/6830TWO_MSScorps_DeepDive.md. Superseded history is retained separately in VERSION_LOG, not in this current-state model.

October 5 source register and synchronization record

MONTHLY-202609: TWSE-6830-REVENUE-202609, revision 1. Primary MOPS disclosure; company 6830, period2026-09, retrieved2026-10-05T11:30:31.055112+00:00. Source SHA-256: 2ba288cfe81d66773e23cfc84a42dd931df1f7259927317af5b542c63d928348. The publication timestamp is not established from the monthly table. This current record supersedes September forecast-status wording while preserving earlier source cutoffs.

Current model snapshot: October 5, 2026; full original research retained. Master workbook sheet 6830_TWO_Q_Model. Active Q4 2027 target TWD 468.235484; analytical Base 65, protected Excel Base 83. Quarterly revenue, profit and ceiling tables above use the staged, validated workbook values.
