688120.SH - Hwatsing / 华海清科 | Full investment artifact

Full active edition | Financial methods and portfolio Base overrides preserved.

Research date: 1 October 2026 | **Framework:** 8.0 | **Format:** standalone current-state analysis **Status:** Full Framework8.0 artifact with two complete management Q&A records and funded September placement | **Classification:** BOTTLENECK - domestic CMP qualification and process integration; global alternatives remain **Artifact Base:** 44/60 = **73% - Watchlist** | **Protected portfolio Base:** 78% (user override retained; separate from artifact assessment) **Snapshot:** supplied-workbook price CNY259.30; forward all-in share proxy536.080508M for H2 2026. Price remains the prior workbook snapshot. **Active ceiling:** Q4 2027 **CNY 50.375913**, pricing Q4 2027-Q3 2028 at20x recurring operating profit.

The commercial opportunity has broadened, but the enlargedTAM does not remove compensation, dilution or qualification costs. Explicit share-plan costs materially reduce near-term recurringOP versus the original artifact. The portfolio Base remains unchanged.

1. Supercycle, supply chain and durable advantage

Hwatsing supplies the planarization and adjacent processing needed for increasingly complex chips. ProductionCMP, thinning and implant qualifications create a strong domestic position. Installed equipment supports recurring consumables and maintenance, while wafer reclaim expands with capacity. The platform opportunity is broader than the originalCMP business, but product acceptance, factory capacity, R&D and employee compensation determine how much revenue becomes shareholder earnings.

Fab and packaging process requirements → qualified planarization/thinning/implant tools → acceptance and production use → recurring service and reclaim demand. HBM planarization belongs inside wafer CMP; other thinning/dicing belongs in the adjacent-tools vector. PanelCMP is included there once. The reported above90% share means the domestic-supplierCMP sales subset, not90% of allCMP equipment purchased inChina.

Business / curve	Stage	Evidence and next inflection
WaferCMP	Commercial scale	More than1,000 cumulative systems; advanced-machine repeat orders.
Thinning/implant/wet	Broadening commercial acceptance	Repeat orders verified, but factory capacity and qualification remain limiting.
PanelCMP/newreclaim	Earlytool orders and construction	Firstpanel order is not widespread panel adoption; newreclaim capacity ramps in stages.

Stage percentages are qualitative framework bands relative to a possible mature opportunity, not measured market penetration. A current capacity constraint can coexist with a larger long-term TAM; qualification and economic capture decide how much reaches this company.

2. Forward TAM and the three-phase expansion lens

Phase	Engineering opportunity	Demand-to-company bridge
2026-27 /100% weight	China wafer CMP and qualified adjacent tools	Prospectus cites2027 ChinaCMP USD1.47B versus globalUSD4.03B; scopes kept separate.
2028-29 /50% weight	More process complexity and localshare	ChinaCMP modeled12.5/15B CNY; adjacent tools and services separately constrained.
2030+ /20% weight	3D integration and panel processing	ChinaCMP modeled18B CNY; panel adoption remains probability-weighted within adjacent tools.

The 100% / 50% / 20% thematic weights guide thesis assessment. They are not blanket discounts to reported sales, contracts or all forecasts. Programme probabilities below govern only separately identified optionality. Current reported sales calibrate the starting point; they do not cap the future market.

3. Current earnings and management evidence

H1 reported revenue2.643200448B CNY grew35.58%; GP1.136315316B and42.99%GM. Parent NI0.563222967B grew11.44%, below sales growth; statutoryOP0.665919197B includes grants and investment items. OCF0.073312663B versus0.057033392B cash capex leaves0.016279271B simple post-capex operating cash. No minority profit allocation is required by the reported consolidated ownership structure. [S1]

Read the fullApril23 annual/Q1 presentation and10-question record publishedApril24, and the completeSeptember3 interim-results10-question record. Management confirms increasing advanced-packaging order share, repeat high-current implant deliveries and stronger installed-base services. Qualification requires production-line performance, sustained reliability and customer-specific tuning. Tianjin reclaim is full at200,000 wafers/month; Kunshan plans400,000/month in total, with200,000/month first phase. Implant production is constrained by leased space while Shanghai expansion proceeds. [S2/S3]

The full April 23 and September 3 management Q&A records were reviewed. Exact H1 product revenue splits, future financing needs and final new-award expense are not disclosed in the reviewed records and remain explicit model estimates.

4. Local evidence and calibration packet

AH12/13: shared China fab capex proxy for2026-30 is222.51/274/326/361/394B CNY (CXMT60/80/100/112/125;SMIC57.51/64/72/78/84;YMTC40/55/70/80/88;others65/75/84/91/97). These LOW budgets frame demand, not a second multiplier on the productSAM. CMP bridge:2027 USD1.47B China market×7.1 fixedCNY/USD×50% capture=5.2185B;2028 12.5B×55%=6.875B;2029 15B×60%=9B;2030 18B×62%=11.16B. Future market sizes and capture are analyst assumptions. Other annual revenues: adjacent tools1.2/2/3/4.2B,implant0.55/1/1.6/2.3B,wet0.3/0.5/0.75/1B,services 1.05/1.5/2/2.5B. CalibrateH1 sales to2.643200448B using LOW bucketshares67/10/5/4/14%; the total is actual, the split is not.2026 annualtargets4.2/0.7/0.3/0.2/0.8B sum6.2B; subtractH1 buckets forH2 and phase45/55%Q3/Q4. Later years22/24/25/29%. For adjacent/implant/wet unit-equivalent bridges, divide revenue by respective illustrative per-system ASP20M/30M/10M CNY, giving2027 60/18.33/30 equivalent accepted systems. These are normalization proxies, not disclosed actual unit shipments or prices.

5. Summing thesis score

Category	Points / maximum	Evidence
Core Thesis	16/20	Qualified domesticCMP platform; international substitutes exist.
Cycle Stage	8/10	Broad actual growth with lower-margin product ramps.
TAM	9/10	AdvancedCMP, thinning, implant and recurring services.
Catalysts	4/5	Repeat new-tool orders and funded capacity path.
Macro	9/10	China equipment localization and advanced memory.
Alpha	2/5	Well-recognized platform; dilution and cost details matter.
Risks	-4	Qualification, compensation/dilution, competition and capex cycles.

Sum: 44/60 × 100 = 73.333333%, conventionally rounded to 73%. This advisory thesis score does not replace any portfolio Base override. The separate risk classes below total the displayed deduction; holding status and classification do not waive that deduction.

6. Revenue sources, capture and product margins

Five exclusive product/service buckets with actual-total calibration. WaferCMP is sized against a China-specific equipmentSAM; adjacent tools use explicit captured unit-equivalent indices and separate panel optionality. Services combine installed-base spending and capacity-limited reclaim. Retain all ordinarySBC and add the material new share-plan expense and reserved-award allowance. Use an explicit financing-share assumption rather than claiming the legal maximum is the expected issuance.

Vector	Actual calibration / source	Forward demand and capture	Margin derivation / constraint
WaferCMP	ActualH1 total with67% estimated allocation	SAM×capture bridge5.2185/6.875/9/11.16B	44/45/46/46%2027-30; advanced mix without assuming monopoly pricing.
Adjacenttools	Thinning repeat orders andpanel first customer	1.2/2/3/4.2B, including panel0.04/0.15/0.35/0.70B	42/44/45/46%; qualification and scale required.
Implant	Batch deliveries and repeats; siteconstrained	0.55/1/1.6/2.3B; within prospectus China2031 marketUSD1.391B	35/38/40/42%; lower early commercial margins.
Wettools	Customer acceptance and fluid-delivery orders	0.3/0.5/0.75/1B; qualified adjacency	35/38/39/40%.
Services/reclaim	200,000wafers/month currentreclaim; growinginstalledbase	1.05/1.5/2/2.5B, capacitybridge below	50/51/52/52%; mixture of consumables and processing.

Confidence: reported historical totals are HIGH. Source-based forward extrapolations are MEDIUM only where the cited source sizes the relevant period; other product allocations, future capture and margin assumptions are LOW. A source for the historical anchor does not make an unsourced future factor management guidance. The detailed factors below are the single modeled base case, with uncertain assumptions exposed for review.

V1. Wafer CMP including advanced process applications

Sources: S1-S4 CMP production and China market sizing. Revenue = anchor × factor; GP/contribution = revenue × displayed product margin. Forecast confidence: LOW unless a specific actual/guided total is identified above.

Quarter	Revenue anchor	Demand / conversion factor	Revenue	Product margin	GP / contribution

验 资 报 告

信会师报字[2026]第 ZB11643 号

华海清科股份有限公司全体股东：

我们接受委托，审验了华海清科股份有限公司（以下简称“贵公司”）截至 2026 年 9 月 24 日止新增注册资本及股本情况。按照法律法规以及协议、章程的要求出资，提供真实、合法、完整的验资资料，保护资产的安全、完整是全体股东及贵公司的责任。我们的责任是对贵公司新增注册资本及股本情况发表审验意见。我们的审验是依据《中国注册会计师审计准则第 1602 号——验资》进行的。在审验过程中，我们结合贵公司的实际情况，实施了检查等必要的审验程序。

贵公司原注册资本为人民币 496,281,438.00 元，股本为人民币 496,281,438.00 元。根据贵公司第二届董事会第二十四次会议、2025 年年度股东会审议通过，经第二届董事会第二十六次会议、第二届董事会第二十八次会议审议通过修订，并经中国证券监督管理委员会证监许可[2026]1927 号《关于同意华海清科股份有限公司向特定对象发行股票注册的批复》核准，贵公司向特定对象发行人民币普通股（A 股）16,080,508.00 股，增加注册资本人民币 16,080,508.00 元，变更后的注册资本为人民币 512,361,946.00 元。

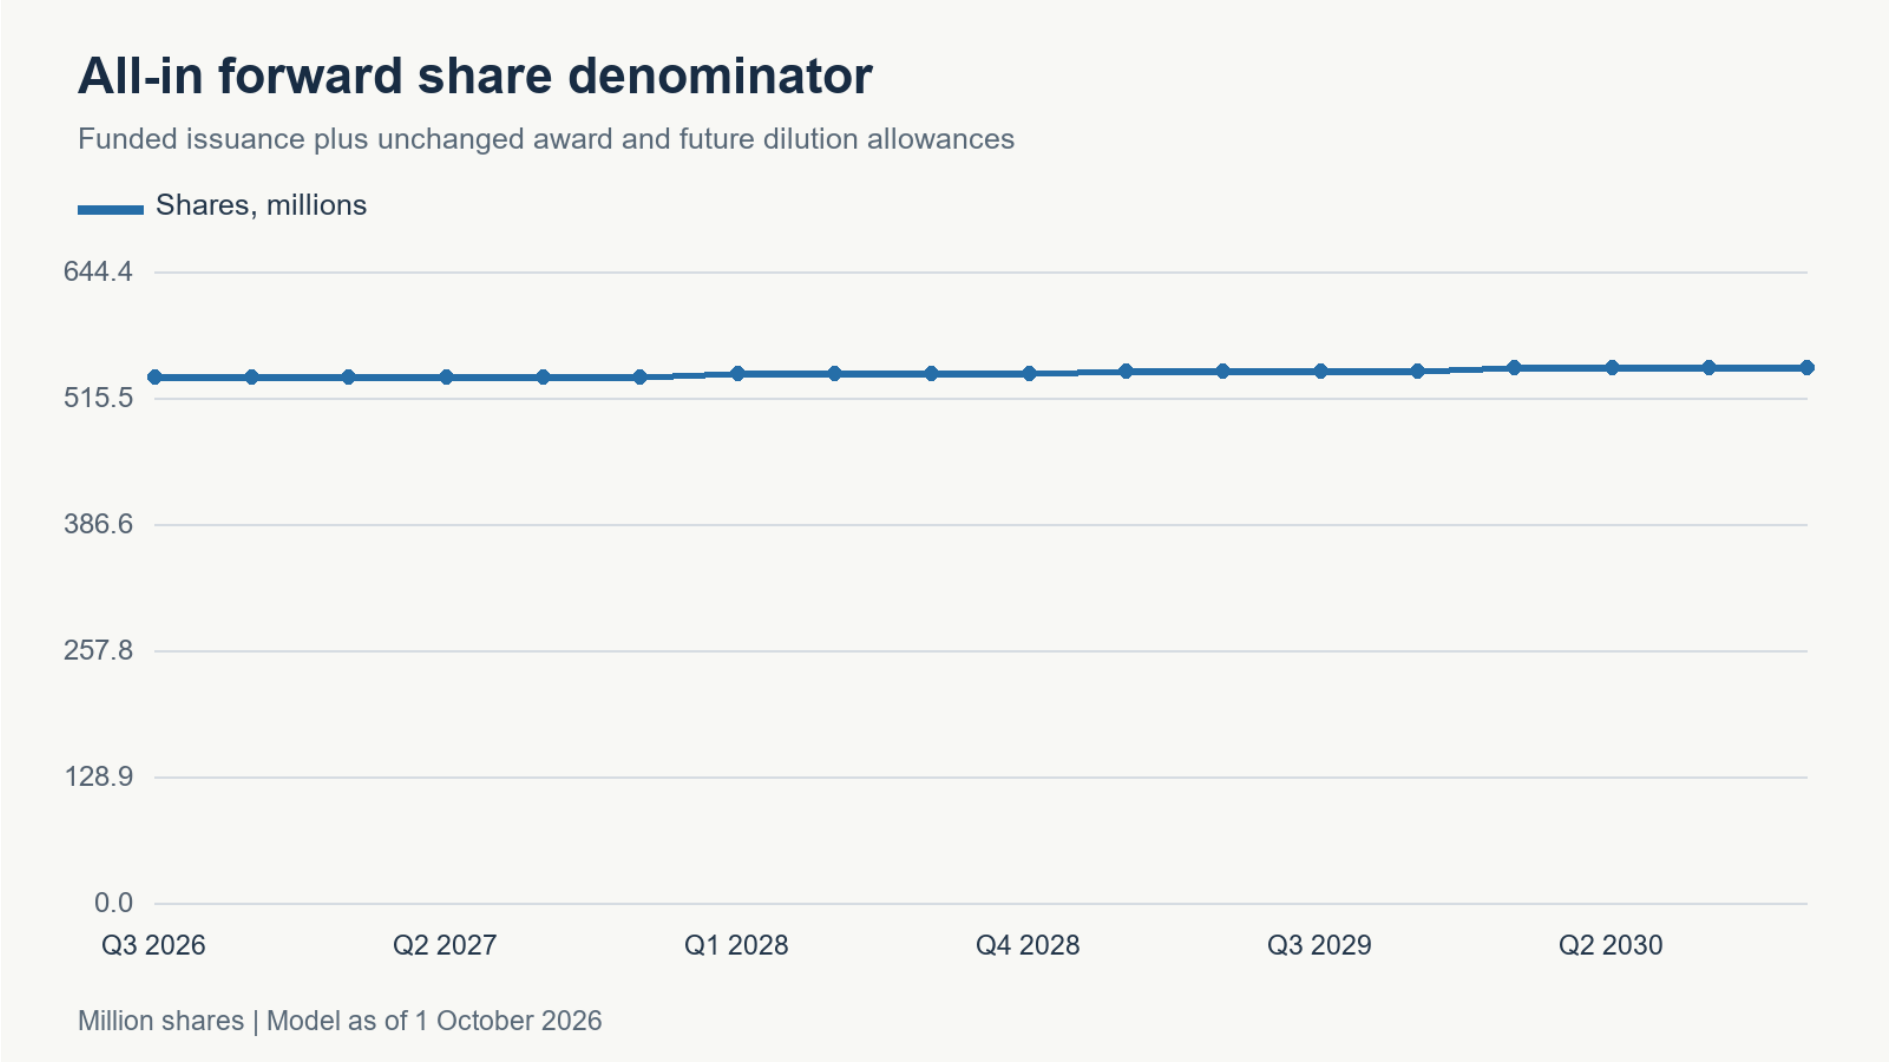

经我们审验，截至 2026 年 9 月 24 日止，贵公司实际已发行人民币普通股（A 股）16,080,508.00 股，发行价格 236.00 元/股，募集资金总额为3,794,999,888.00元，扣除保荐承销费用人民币17,806,603.24元，减除其他与发行权益性证券直接相关的不含税发行费用人民币4,076,609.86 元，募集资金净额为人民币 3,773,116,674.90 元，其中注册资本人民币 16,080,508.00 元，资本溢价人民币 3,757,036,166.90 元。

同时我们注意到，贵公司本次增资前的注册资本为人民币 496,281,438.00 元，业经致同会计师事务所（特殊普通合伙）审验，并于 2026 年 7 月 21 日出具致同验字(2026)第 110C000248 号验资报告。截至 2026 年 9 月 24 日止，贵公司变更后的累计注册资本为 512,361,946.00 元，股本为人民币 512,361,946.00 元。

本验资报告供贵公司申请办理注册资本及股本变更登记及据以

Capital verification: actual proceeds, shares and pre/post capital. September24,2026; issued reportOctober1.

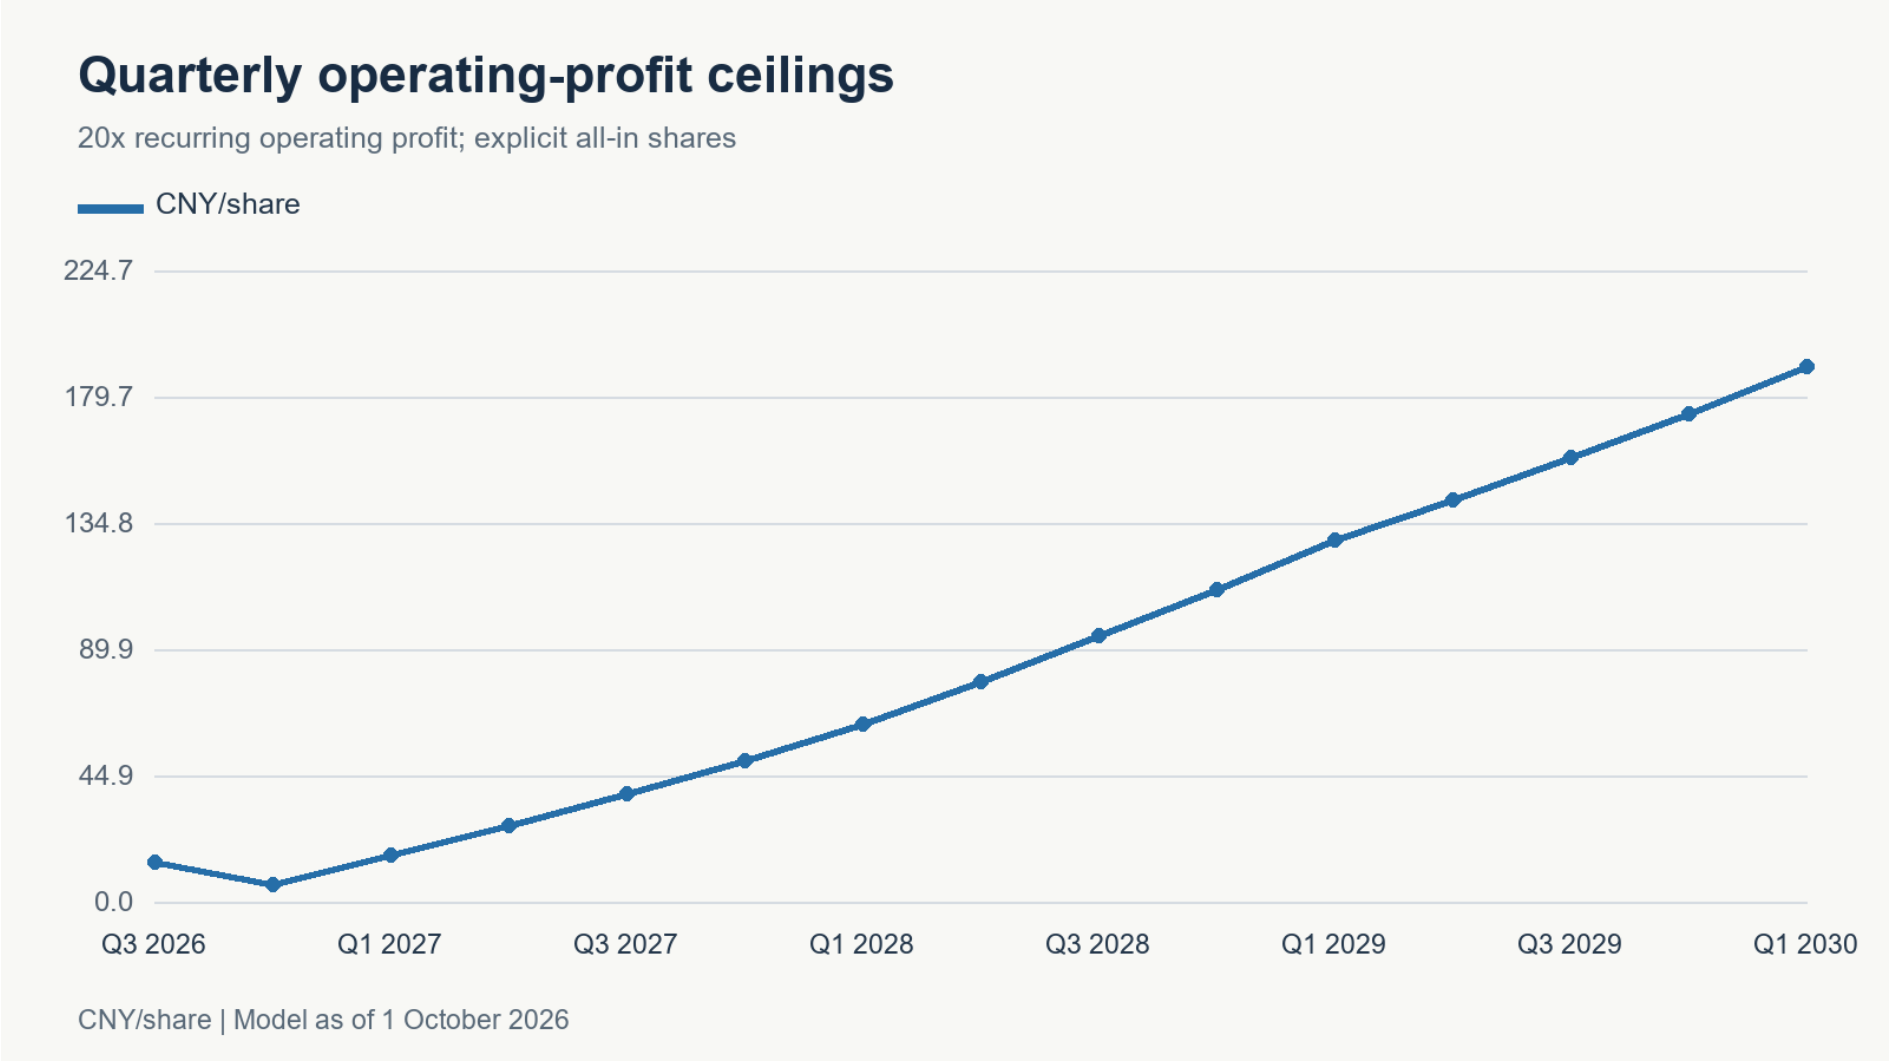

All-in forward share denominator. Million shares. Funded issuance plus unchanged award and future dilution allowances

Period	Pro forma issued M	All-in proxy M
H2 2026	512.361946	536.080508
2027	512.361946	537.105508
2028	512.361946	540.105508

Period	Pro forma issued M	All-in proxy M
2029	512.361946	543.105508
2030	512.361946	546.105508

Cash is not separately added to the operating-profit ceiling. Existing factory revenue, depreciation, award expense and award headroom remain in the model. This funding supports the same planned expansion; adding a second capacity revenue layer would double-count it.

9. Complete rolling four-quarter ceiling derivation

Quarterly operating-profit ceilings. CNY/share. 20x recurring operating profit; explicit all-in shares

Ceiling quarter	Exact earnings window	F4Q recurring OP CNY B	Multiple	Shares M	Ceiling CNY
Q3 2026	Q3 2026 to Q2 2027	0.378604	20x	536.080508	14.124905

Ceiling quarter	Exact earnings window	F4Q recurring OP CNY B	Multiple	Shares M	Ceiling CNY
Q4 2026	Q4 2026 to Q3 2027	0.157835	20x	536.080508	5.888465
Q1 2027	Q1 2027 to Q4 2027	0.446555	20x	537.105508	16.628212
Q2 2027	Q2 2027 to Q1 2028	0.731023	20x	537.105508	27.220843
Q3 2027	Q3 2027 to Q2 2028	1.036651	20x	537.105508	38.601397
Q4 2027	Q4 2027 to Q3 2028	1.352859	20x	537.105508	50.375913
Q1 2028	Q1 2028 to Q4 2028	1.711387	20x	540.105508	63.372311
Q2 2028	Q2 2028 to Q1 2029	2.118087	20x	540.105508	78.432339
Q3 2028	Q3 2028 to Q2 2029	2.551597	20x	540.105508	94.485137
Q4 2028	Q4 2028 to Q3 2029	2.998512	20x	540.105508	111.034319
Q1 2029	Q1 2029 to Q4 2029	3.499048	20x	543.105508	128.853328
Q2 2029	Q2 2029 to Q1 2030	3.883992	20x	543.105508	143.029007
Q3 2029	Q3 2029 to Q2 2030	4.295560	20x	543.105508	158.185085
Q4 2029	Q4 2029 to Q3 2030	4.720439	20x	543.105508	173.831363
Q1 2030	Q1 2030 to Q4 2030	5.198564	20x	546.105508	190.386781

Each ceiling = sum of the four operating profits in the stated window x20 x1000 / the starting-quarter all-in shares. Quarterly OP and product decomposition below/above use unchanged unrounded cells.

10. Annual trajectory cross-check

Calendar year	Revenue	GP / contribution	Opex	OP	OP margin
2027	8.319	3.623	3.176	0.447	5.368%
2028	11.875	5.309	3.597	1.711	14.412%
2029	16.350	7.463	3.963	3.499	21.401%
2030	21.160	9.732	4.533	5.199	24.568%

These are calendar-year sums of the quarterly path, not extra revenue and not the live valuation method. For non-December fiscal reporters, fiscal guidance and these calendar totals must be aligned using the period mapping above; a four-quarter run rate is not automatically the same fiscal year. Outer-year outputs are conditional

TAM/capture trajectories, not verified management sales targets.

The 2026 sales forecast of 6.2B CNY requires H2 revenue of 3.556799552B, against actual H1 revenue of 2.643200448B. Annual 2027-30 totals are 8.3185/11.875/16.35/21.16B. For wafer reclaim, assume monthly usable capacity of 200,000/300,000/400,000/550,000 wafers in 2027-30, 90% utilization and a 150 CNY service price per wafer. This produces 0.324/0.486/0.648/0.891B annual revenue. Timing and prices are LOW-confidence assumptions within the ultimate 600,000-wafer monthly footprint. Subtract these amounts from total service forecasts to obtain 0.726/1.014/1.352/1.609B for consumables and maintenance. At an illustrative 0.5M CNY annual service capture per installed-equivalent tool, those balances imply 1,452/2,028/2,704/3,218 serviced equivalents, compared with more than 1,000 cumulative CMP shipments currently, plus other tools. Reclaim revenue is included only once. Prospectus industry forecasts and share-plan performance hurdles are neither management revenue guidance nor guaranteed capture.

11. Dilution sensitivity

Q4 2027 share assumption	Shares M	Ceiling CNY
-5%	510.250233	53.027277
+0%	537.105508	50.375913
+5%	563.960783	47.977060
+10%	590.816059	45.796285

Same operating case; only the future denominator varies.

12. Programme and probability ledger

Programme / signal	Source and probability	Amount / unit base	Treatment in this model	Escalation / recognition
Advanced wafer CMP	Commercial repeat orders	China SAM × captured share	Inside wafer CMP, including HBM applications	Customer production acceptance
Panel CMP	First core-customer order / 50% conversion	Illustrative 0.08/0.30/0.70/1.40B sales pool in 2027-30	0.04/0.15/0.35/0.70B within adjacent tools	Repeat orders and broader adoption
Ion implantation	Commercial repeat batch orders	Illustrative 30M CNY equivalent system price	0.55/1/1.6/2.3B revenue already included	Shanghai site and customer qualification
Kunshan reclaim	Construction and staged ramp	400,000 wafers/month planned; first phase 200,000	Explicit capacity and utilization model within services	Commissioning, then utilization
New share plan	Shareholder approved; final grant terms awaited	16.9431M potential award shares and material expense	Both expense and share denominator included	Grant date, fair value and vesting conditions

Probabilities are analyst judgments under the framework signal hierarchy. Embedded revenue is not multiplied or added a second time. Where no defensible amount or unit base exists, the opportunity remains explicitly unquantified; confidence alone cannot create a revenue number. New evidence can enlarge the TAM, improve capture or move recognition earlier, but each requires an identifiable model input.

13. Scored risk classes

Risk class	Scored deduction	Mechanism and consequence
Execution	-1	Qualification and factory completion constrain sales conversion.
Financial	-1	Large award expense, equity financing and working capital.
Competition	-1	AMAT/Ebara and domestic competitors constrain pricing.
Customer cycle	-1	Concentrated fab spending can delay acceptance despite growingTAM.

14. Dated catalysts, counters and escalation

1. **New award grant - Next formal disclosure** Replace the preliminary 3.5457685B first-award expense and reserved-award allowance.
2. **Placement registration - October2026:** confirm CSDC registration and proceeds deployment; funded issuance is already in forward shares.
3. **Quarterly results - October 2026** Check new-tool margins, customer acceptance and cash collection.
4. **Capacity and panel CMP - 2027 onward** Track Kunshan phases, Shanghai implant production space and panel repeat orders.

15. Cross-book monitoring

Use the same customer-capex context as NAURA, Piotech and ACMR, while CMP-specific market size governs core capture. Semiconductor packaging revenue is not equivalent to the CMP equipment market. Relate panel CMP to BOE and glass-substrate developments without assuming an unverified CoPoS customer or design win. Konfoong and Fortune benefit only through their own component content.

16. Source register and model limits

S1 - Full2026 interim report (2026-08-22). Financial statements and detailed product commercialization stages.

S2 - Full interim-results investor Q&A (2026-09-03). Complete10-question issuer record reproduced, including qualification and capacity constraints.

S3 - Full annual/Q1 results investor record (2026-04-24). April23 presentation and complete10-question management discussion.

S4 - Updated registered placement prospectus (2026-09-08). Planned use of funds and market/capacity data; actual placement amount and shares are governed by S8.

S5 - Full revised employee share plan (2026-07-11). 16.9431M total awards; first13.5545M preliminary expense3.5457685B CNY.

S6 - Repurchase completion and latest issued shares (2026-09-17). 496.281438M issued;0.441120M repurchased shares retained for awards/conversion.

S7 - CXMT interim customer spending anchor (2026-08-29). ActualH1 cash capex declined despite broad memory demand; useful counter to unconditional acceleration.

DetailedH1 revenue by all five model buckets is not disclosed; those allocations are LOW estimates. Market forecasts in the prospectus use third-party methodologies and are not precise current order books. New award expense is preliminary, with actual grant timing/fair value still to replace assumptions.

Workbook: Positions_61_90_Before_After.xlsx, model tab 90_688120_SH. It owns portfolio ranking, prices and return calculations; those are intentionally outside this artifact. **Current artifact path:** G:\My Drive\1amInvesting\Artifacts\Artifact Rescore Sept 6 2026\688120SH_Hwatsing_DeepDive.md. **Original snapshot:** versions/originals/688120SH_Hwatsing_DeepDive.md. Superseded history is retained separately in VERSION_LOG, not in this current-state model.
