688596.SH - 正帆科技 (Shanghai Gentech Co., Ltd.)

Full active edition | Financial methods and portfolio Base overrides preserved.

Research update: 5 October 2026 | **Framework:** 8.0 update | **Business analysis retained from:** 27 June 2026 **Classification:** BENEFICIARY - China fab gas/chemical delivery, WFE subsystems and materials | **Holding status:** retained from the existing artifact; not refreshed **Analytical Base:** 44/60 = 73%; **protected portfolio Base:** 73%, unchanged **Current Q4 2027 ceiling:** CNY **111.219357** per share, using **20x** Q4 2027-Q3 2028 operating profit and **325M** modeled diluted shares.

October 5 update: recognize the new option expense

The September 29 grant notice discloses **5.0M options** at an exercise price of **CNY 66.53**. The issuer estimates **CNY 40.2382M** of expense over 2026-2030. The current model includes 100% of that estimate as an operating cost. This is recognition of the disclosed estimate, not a 100% probability that final audited expense will equal it. Actual service, performance, forfeiture and accounting outcomes can change the charge.

The prior model was established before this grant and contains no identifiable grant-specific expense allocation. The root-selected overlap is zero for this new cost: current OP equals prior OP less the allocated new charge. The 2026 estimate is assigned to Q4 as a late-quarter timing proxy; 2027-2030 estimates are divided equally across four quarters. These quarterly allocations are model assumptions, not issuer quarterly guidance. Revenue, product gross-margin assumptions and the 20x valuation method are unchanged.

名单，同意以 2026 年 9 月 29 日为授权日，向符合授予条件的 69 名激励对象授予股票期权 500.00 万份，行权价格为 66.53 元/份。

六、股票期权的会计处理方法与业绩影响测算

（一）股票期权公允价值的确定方法

根据《企业会计准则第 11 号—股份支付》和《企业会计准则第 22 号—金融工具确认和计量》的相关规定，公司以布莱克—斯科尔期权定价模型（Black-ScholesModel）作为定价模型，公司运用该模型以 2026 年 9 月 29 日为计算的基准日，对授予的股票期权的公允价值进行了测算，具体参数选取如下：

1、标的股价：59.94 元/股（2026 年 9 月 29 日收盘价）

2、有效期分别为：1.50 年、2.50 年、3.50 年（授予日至每期首个行权日的期限）

3、历史波动率：27.77%、28.56%、25.92%（分别采用上证指数和科创 50 指数最近 1 年、2 年、3 年的波动率）

4、无风险利率：1.23%、1.27%、1.29%（分别采用中债国债 1 年期、2 年期、3 年期的到期收益率）

（二）预计股票期权实施对各期经营业绩的影响

本激励计划授予的股票期权对各期会计成本的影响如下表所示：

单位：万元

股票期权激励成本	2026 年	2027 年	2028 年	2029 年	2030 年	合计
	414.49	1,626.77	1,192.47	660.56	129.53	4,023.82

注：1、上述结果并不代表最终的会计成本。实际会计成本除了与实际授予日、授予日收盘价和授予数量相关，还与实际生效和失效的数量有关；

2、提请股东注意上述股份支付费用可能产生的摊薄影响；

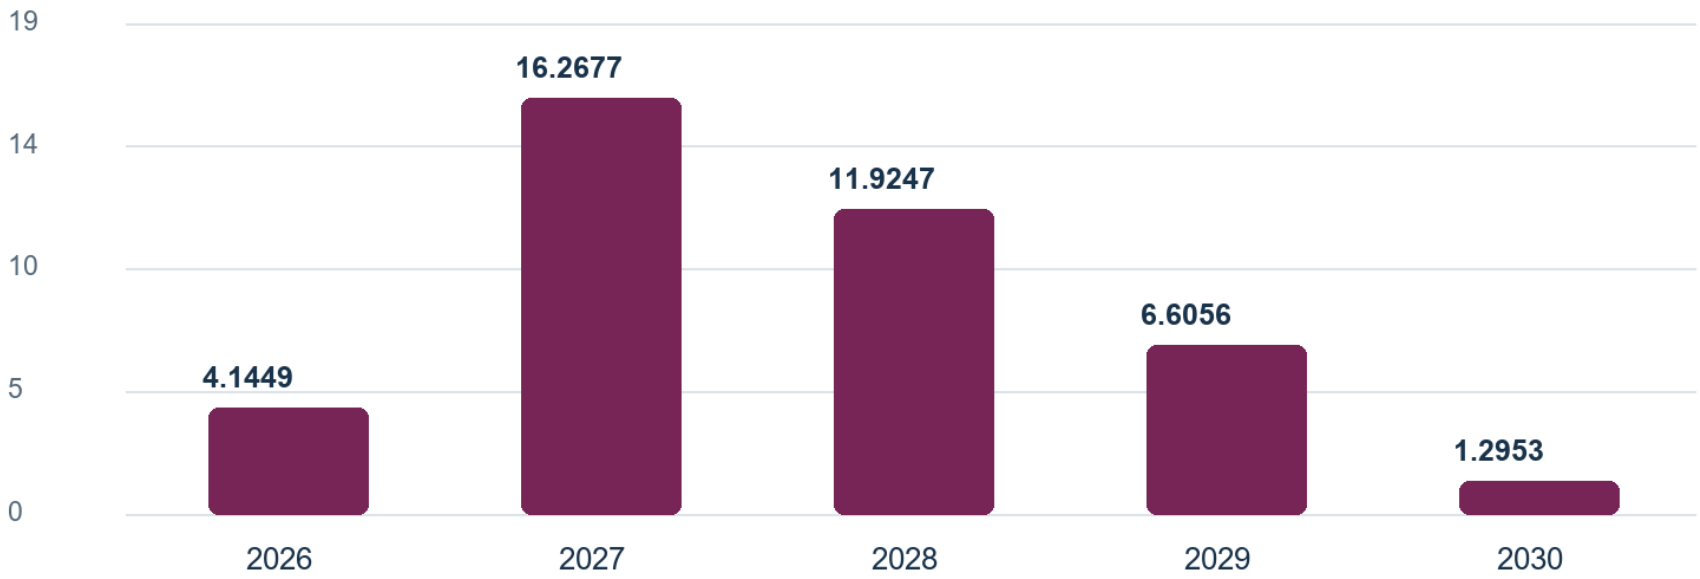

3、上述摊销费用预测对公司经营业绩的最终影响以会计师事务所出具的审计报告为准。

本激励计划的成本将在成本费用中列支。公司以目前信息估计，在不考虑本激励计划对公司业绩的正向作用情况下，本激励计划成本费用的摊销对有效期内各年净利润有所影响，但影响程度不大。考虑到本激励计划对公司经营发展产生的正向作用，由此激发管理、业务团队的积极性，提高经营效率，降低经营成

Original issuer option-grant notice, PDF page 6. The accounting table is in CNY ten-thousands; values below are converted to CNY millions. Signed September 29, 2026; source path dated September 30.

Gentech: new option-grant expense

CNY millions | Issuer estimate adopted in the operating model; actual expense can change

Total 2026–2030: CNY 40.2382M

2026 charge placed in Q4; later annual estimates divided equally across four quarters.

Issuer-estimated annual option cost and the frozen model allocation. Source: September 29 grant notice, PDF page 6; annual estimates are not audited expense.

Year	Issuer estimate, CNY M	Quarter allocation, CNY M	Status
2026	4.1449	Q4 4.1449	Prospective estimate; timing is model allocation
2027	16.2677	Each quarter 4.066925	Prospective estimate; timing is model allocation

Year	Issuer estimate, CNY M	Quarter allocation, CNY M	Status
2028	11.9247	Each quarter 2.981175	Prospective estimate; timing is model allocation
2029	6.6056	Each quarter 1.651400	Prospective estimate; timing is model allocation
2030	1.2953	Each quarter 0.323825	Prospective estimate; timing is model allocation

Q4 2027's forward-four-quarter window contains one quarter of the 2027 charge and three quarters of the 2028 charge: 4.066925 + 3 × 2.981175 = **CNY 13.01045M** less OP. The ceiling moves from CNY 112.020000 to CNY 111.219357, or -0.7147%. The analytical and portfolio Bases are retained.

Options, issued shares and the existing dilution allowance

The source reports **317.670467M issued shares** and 5.0M potential new A shares on exercise. Their simple gross sum is **322.670467M**, before other instruments. The existing model retains **325M total diluted shares**, described in the prior artifact as including convertible exposure. The apparent 2.329533M difference is not a verified spare reserve: the outstanding convertible and other award overlap has not been reconciled. The full 5M is therefore not added again to the existing aggregate denominator. No current shares or assumed cash proceeds are added by this update.

3、授予人数：69 人。

4、行权价格：66.53 元/份。股票期权行权前，如公司发生资本公积转增股本、派送股票红利、股份拆细、配股、缩股或派息等事项，相应行权价格将参照相关规定进行调整；

5、股票来源：公司向激励对象定向增发的本公司 A 股普通股股票。

6、激励计划的有效期、等待期和行权安排情况：

本激励计划的有效期为自股票期权授予之日起至激励对象获授的股票期权全部行权或作废失效之日止，最长不超过 60 个月。

本次激励计划的等待期分别为自授予之日起18个月、30个月和42个月。自股票期权激励计划授权日起18个月后，满足行权条件的激励对象可以分三期行权。具体行权安排如下表所示：

行权期	行权时间	可行权比例
第一个行权期	自授予日起满18个月后的首个交易日至授予日起30个月内的最后一个交易日止	30%
第二个行权期	自授予日起满30个月后的首个交易日至授予日起42个月内的最后一个交易日止	30%
第三个行权期	自授予日起满42个月后的首个交易日至授予日起60个月内的最后一个交易日止	40%

在上述约定期间因行权条件未成就的股票期权，不得行权或递延至下期行权，并由公司按本激励计划规定的原则注销激励对象相应的股票期权。在股票期权各行权期结束后，激励对象未行权的当期股票期权应当终止行权，公司将予以注销。

在满足行权条件后，公司将为激励对象办理满足行权条件的股票期权行权事宜。

7、激励对象名单及授予情况：

姓名	职务	国籍	获授股票期权数量（万份）	占授予股票期权总数比例	占股本总额的比例

Original grant notice, PDF page 4: share source and exercise timetable. Preserve the distinction between a granted option and an issued ordinary share.

Exercise window after September 29, 2026 grant	Grant fraction	Conditions
18-30 months	30%	First exercise opportunity begins in 2028; subject to conditions
30-42 months	30%	Conditions must be met within the window
42-60 months	40%	No carryforward of failed conditions; unexercised portions cancelled

Verified performance conditions

Shareholders approved the 2026 incentive plan and assessment rules on **September 21**, reported in the **September 22 announcement 2026-064**. The approved plan supplies the performance conditions that are not repeated in the grant notice. These conditions govern exercisability; they are not company revenue guidance or an additional probability multiplier on the operating model. Shareholder approval, PDF pages 1-2.

（1）公司层面业绩考核

考核年度	业绩考核目标	公司层面可行权系数设置			
2027年	指标1：2027年度营业收入不低于70亿元；指标2：半导体业务收入不低于35亿元。 两个指标需同时完成。	实际完成比例	80%以下	80%至100%	100%及以上
		可行权系数	0	0.8	1.0
2028年	指标1：2028年度营业收入不低于84亿元；指标2：半导体业务收入不低于42亿元。 两个指标需同时完成。	实际完成比例	80%以下	80%至100%（且不得低于上一年度营业收入）	100%及以上
		可行权系数	0	0.8	1.0
2029年	指标1：2029年度营业收入不低于100亿元；指标2：半导体业务收入不低于50亿元。 两个指标需同时完成。	实际完成比例	80%以下	80%至100%（且不得低于上一年度营业收入）	100%及以上
		可行权系数	0	0.8	1.0

注：业绩考核指标的财务数据以经会计师审计的数据为准。

（2）个人层面绩效考核

若公司层面的业绩考核达标，则本计划将根据公司绩效考核相关制度对个人进行绩效考核，具体如下：

Original issuer 2026 option plan reproduced by Sina, PDF page 14: company-level performance targets and exercise coefficients. Both the total-revenue and semiconductor-revenue indicators must be satisfied.

Assessment year	Total revenue target, CNY B	Semiconductor revenue target, CNY B	Relationship
2027	7.0	3.5	Both indicators; not either/or
2028	8.4	4.2	Both indicators; not either/or
2029	10.0	5.0	Both indicators; not either/or

Actual target completion	Company exercise coefficient	Additional condition
Below 80%	0	Company-level performance condition fails
80% to below 100%	0.8	For 2028 and 2029, revenue must also not be below the previous year
100% or more	1.0	Both stated indicators must be satisfied

The source explicitly requires the two indicators together and uses audited financial data. For the 2028/2029 partial-achievement bucket, it adds the literal qualifier that revenue must not be below the previous year's revenue. It does not separately clarify whether that comparison applies to both total and semiconductor revenue; no broader interpretation is imposed here.

The personal-performance coefficient is **1.0 for a passing assessment and 0 for a failing assessment**. Options that cannot be exercised, or cannot be exercised in full because of assessment results, lapse and cannot roll into the following year. Approved plan, PDF pages 14-15. The complete instrument-by-instrument dilution bridge remains unresolved, while these quantitative performance conditions are now verified.

This source completion does not alter the frozen expense or valuation calculation. The **September 29 grant notice** supplies the updated expense estimate; the earlier plan is used here for its exercise conditions. Expense recognition can occur before exercise begins and is not equivalent to predicting that every option will be exercised.

Retained business analysis and thesis score

The following business and historical operating discussion retains its June 27 source context. This targeted update does not claim that older operating observations were newly reported in October.

Core Thesis: The Infrastructure Layer Underneath China's WFE Boom

正帆 sits between fabs and tools: high-purity gas/chemical delivery systems, Gas Box/Chemical Box/Bubbler modules for WFE tools, quartz/SiC consumables (via 汉京半导体 acquisition), specialty gases, precursors, and MRO services. Every tool OEM in the quintet (NAURA/AMEC/Piotech/ACMR/Hwatsing) needs 正帆-type infrastructure.

Business-quality transition: Non-equipment/OPEX share rose from 31% to 42.3% of revenue, and from 44.8% to 51.6% of new contracts. Shifting from one-time project CAPEX toward recurring OPEX (gases, materials, MRO, consumables).

汉京 **acquisition:** China's first ultra-high-purity quartz line for sub-10nm, first semiconductor-grade SiC component line. Customers include TEL, Hitachi Kokusai, TSMC, NAURA, Piotech, AMEC. High-upside but 2025 performance weak.

FY2025 trough: Revenue ¥49.16亿 (-10.1%), OP ¥0.93亿 (from ¥5.95亿 in FY2024). Process systems ¥28.36亿 (GM 20.87%), Equipment components ¥8.56亿 (+22%, GM 25.94%), Gas/materials ¥6.79亿 (+25%, GM 12.10%), MRO ¥5.44亿 (+20%, GM 24.70%). **Q1 2026:** Revenue ¥9.70亿 (+43.4%). New orders ¥12亿 (+58.6%). Semiconductor orders ¥7.05亿 (+93.6%). NI still negative (-¥2,560万).

Rule 6/9: FAIL global. PASS China domestic fab infrastructure + WFE subsystem. BENEFICIARY.

Scoring

Category	Score	Evidence
Core Thesis	15/20	Broad fab infrastructure + WFE subsystem + materials/OPEX platform. Not a tool OEM, not monopoly, weak current margins
Cycle Stage	8/10	Q1 orders +93.6% semiconductor, revenue +43.4%. But Q1 still loss-making, need Q2/Q3
TAM	9/10	Gas/chemical systems, Gas Box, quartz/SiC, specialty gases, precursors, MRO. Scales with WFE + fab capex
Catalysts	5/5	China WFE ramp, Q1 order rebound, 汉京 integration, gas capacity, precursor permits, helium/WF6 tightness
Macro	9/10	Export controls, China localization, memory capex, gas/chemical bottlenecks
Alpha	3/5	OPEX/subsystem compounding under-modeled vs tool OEMs
Risks	-5	Low margin / Q1 loss (-1), debt/finance cost (-1), convertible dilution (-1), receivables ¥27亿 (-1), customer concentration (-1)
TOTAL	**44/60 = 73%**	**WL**

Dated June 27 product-revenue calibration

The original product table is retained as historical model context, in CNY hundred-millions (亿元). It is not a freshly reconciled product allocation of the current quarterly model. Current consolidated revenue and OP are given in the tables below. No segment forecast was rebuilt for this option-cost update.

Segment	2025A	2026E	2027E	2028E	2029E	2030E
Process systems (gas/chemical delivery)	28.4	38	50	66	82	95

Segment	2025A	2026E	2027E	2028E	2029E	2030E
Equipment components (Gas Box/quartz/SiC)	8.6	15	24	38	55	72
Gas & advanced materials (specialty gas/precursors)	6.8	8.5	15	26	40	55
MRO / services	5.4	7	11	15	18	23
Total	**49.2**	**68.5**	**100**	**145**	**195**	**245**

The older artifact illustrated FY2028 product GP of about CNY 4.19B and corporate costs of CNY 1.93B. Its rounded annual profit and valuation table differed from the subsequently saved quarterly model. Those older annual outputs are superseded by the current quarterly-model totals below; the new charge is deducted from the saved model, not from the rounded illustration.

Complete current quarterly operating model

All financial values below are CNY millions. Every row is modeled. Reference OP is the saved model before this newly identified grant; current OP deducts the displayed charge once. Regular costs already in reference OP remain there.

Quarter / status	Revenue CNY M	Reference OP	New grant cost	Current OP	OP margin	Shares M
Q3 2026 / model	1,368.578	69.6150	0.000000	69.615000	5.087%	325.000
Q4 2026 / model	1,551.055	108.2900	4.144900	104.145100	6.714%	325.000
Q1 2027 / model	1,824.771	154.7000	4.066925	150.633075	8.255%	325.000
Q2 2027 / model	2,230.275	221.0000	4.066925	216.933075	9.727%	325.000
Q3 2027 / model	2,737.156	309.4000	4.066925	305.333075	11.155%	325.000
Q4 2027 / model	3,345.413	419.9000	4.066925	415.833075	12.430%	325.000
Q1 2028 / model	2,606.250	316.2250	2.981175	313.243825	12.019%	325.000
Q2 2028 / model	3,185.417	451.7500	2.981175	448.768825	14.088%	325.000
Q3 2028 / model	3,909.375	632.4500	2.981175	629.468825	16.102%	325.000
Q4 2028 / model	4,778.125	858.3250	2.981175	855.343825	17.901%	325.000
Q1 2029 / model	3,462.568	498.2250	1.651400	496.573600	14.341%	325.000
Q2 2029 / model	4,232.027	711.7500	1.651400	710.098600	16.779%	325.000

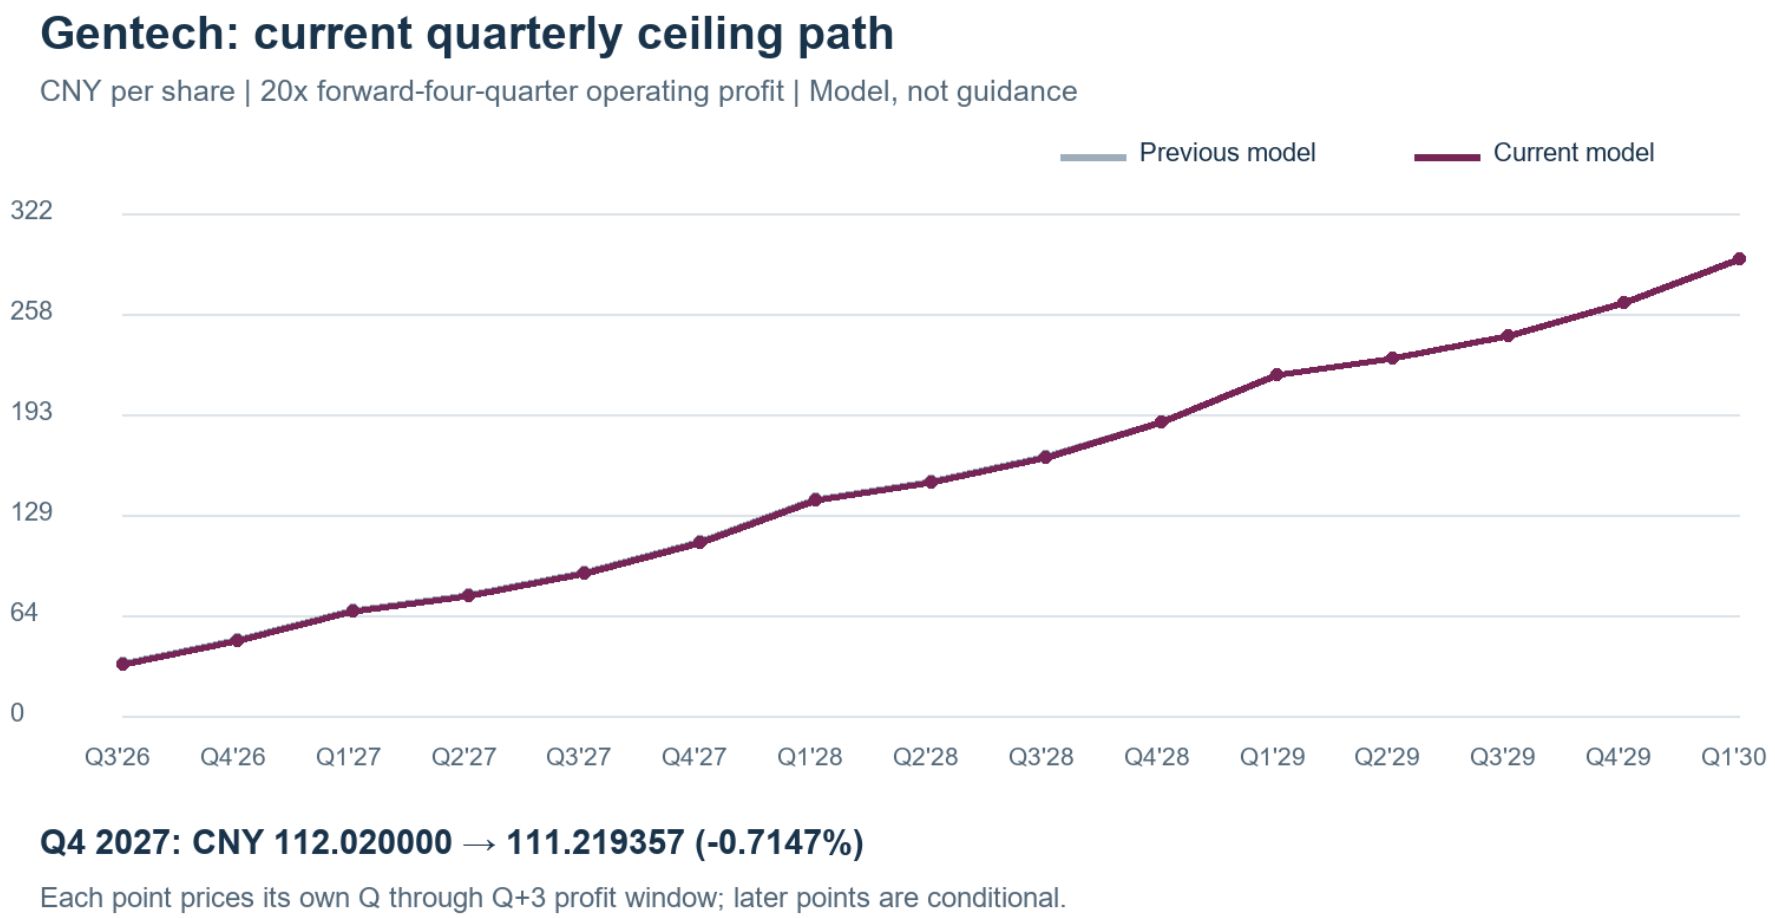

Quarter / status	Revenue CNY M	Reference OP	New grant cost	Current OP	OP margin	Shares M
Q3 2029 / model	5,193.851	996.4500	1.651400	994.798600	19.153%	325.000
Q4 2029 / model	6,348.041	1,352.3250	1.651400	1,350.673600	21.277%	325.000
Q1 2030 / model	4,285.125	666.5750	0.323825	666.251175	15.548%	325.000
Q2 2030 / model	5,237.375	952.2500	0.323825	951.926175	18.176%	325.000
Q3 2030 / model	6,427.688	1,333.1500	0.323825	1,332.826175	20.736%	325.000
Q4 2030 / model	7,856.062	1,809.2750	0.323825	1,808.951175	23.026%	325.000

Annual reconciliation of the current quarterly model

These are complete calendar-year sums for 2027-2030. The two available modeled 2026 quarters do not constitute a new full-year 2026 forecast. The source annual expense schedule above remains complete.

Calendar year / model	Revenue CNY M	Reference OP	New grant cost	Current OP	OP margin
2027	10,137.615	1,105.0000	16.2677	1,088.7323	10.740%
2028	14,479.167	2,258.7500	11.9247	2,246.8253	15.518%
2029	19,236.486	3,558.7500	6.6056	3,552.1444	18.466%
2030	23,806.250	4,761.2500	1.2953	4,759.9547	19.995%

Current rolling forward-four-quarter ceiling

Current and previous quarterly model ceilings. Source: frozen October 5 job and staged workbook calculation; each point uses its own forward-four-quarter window.

Ceiling quarter	Exact profit window	Forward 4Q OP	Multiple	Diluted shares M	Ceiling CNY
Q3 2026	Q3 2026 to Q2 2027	541.326250	20x	325.000000	33.312385
Q4 2026	Q4 2026 to Q3 2027	777.044325	20x	325.000000	47.818112
Q1 2027	Q1 2027 to Q4 2027	1,088.732300	20x	325.000000	66.998911

Ceiling quarter	Exact profit window	Forward 4Q OP	Multiple	Diluted shares M	Ceiling CNY

Q1 2028	Q1 2028 to Q4 2028	2,246.825300	20x	325.000000	138.266172
Q2 2028	Q2 2028 to Q1 2029	2,430.155075	20x	325.000000	149.548005
Q3 2028	Q3 2028 to Q2 2029	2,691.484850	20x	325.000000	165.629837
Q4 2028	Q4 2028 to Q3 2029	3,056.814625	20x	325.000000	188.111669
Q1 2029	Q1 2029 to Q4 2029	3,552.144400	20x	325.000000	218.593502
Q2 2029	Q2 2029 to Q1 2030	3,721.821975	20x	325.000000	229.035198
Q3 2029	Q3 2029 to Q2 2030	3,963.649550	20x	325.000000	243.916895
Q4 2029	Q4 2029 to Q3 2030	4,301.677125	20x	325.000000	264.718592
Q1 2030	Q1 2030 to Q4 2030	4,759.954700	20x	325.000000	292.920289

Active exact bridge: (415.833075 + 313.243825 + 448.768825 + 629.468825) × 20 ÷ 325.000000 = **CNY 111.219357 per share**. The window is Q4 2027 through Q3 2028. Calculations use full precision; displayed inputs are rounded.

The 20x multiple applies to forward operating profit, not after-tax earnings, EBITDA or enterprise value. The existing quarterly risk factor and 325M diluted-share convention are retained. No cash proceeds or exercise-price receipts are added separately to this operating-profit valuation.

Cross-Book: Fab Infrastructure Layer

Supplies INTO the WFE quintet (NAURA/AMEC/Piotech/ACMR/Hwatsing) AND directly to fabs (SMIC/CXMT/YMTC/BOE). Gas Box validated at 北方华创, 拓荆科技, 中微公司. Quartz/SiC consumables supply TEL, TSMC, NAURA. Complementary to Fortune Precision (parts) and KFMI (targets/ESC) - different subsystem layers.

Precursor optionality: 铜陵 base in trial production for 20+ precursor products (HCDS, TMA, High-K, Low-K). If permits obtained, competes/complements Yoke in China precursor localization.

Upgrade trigger: GM recovery above 25% + semiconductor orders sustaining >¥7亿/quarter. Revenue recovery alone insufficient - margin proof is the gate.

Sources, model custody and update boundary

Issuer September 29, 2026 option-grant notice, PDF pages 4-6. The underlying event is GENTECH-OPTION-GRANT-20260929, revision 1, delivered in DOT-EARNINGS-20261005 revision 3. The exact first-publication clock is unknown; the public path is dated September 30.

2026 option incentive plan, September 1 issuer document reproduced by Sina, PDF pages 14-15, supplies the company and personal performance conditions. September 22 shareholder-resolution announcement 2026-064, PDF pages 1-2, records September 21 approval. Original PDFs and full-page renders are preserved in the local evidence archive. The later grant estimate controls the expense bridge; the older plan's illustrative expense estimate is not substituted for it.

Workbook: v3_2_master_portfolio.xlsx, model tab 688596_SH_Q_Model. The new expense bridge is M17:N34 and B43:B49. **Production artifact:** G:/My Drive/1amInvesting/Artifacts/688596SH_Gentech_DeepDive.md. This staged version is the October 5 snapshot; production publication is separate. The June 27 first edition remains recoverable in the run's before snapshot.
